Introducing coordinated and intelligently designed appliances by Siemens

Offering the perfect balance between modern design and innovative technology our range offers different value classes including iQ700; appliances with eye-catching design, cutting-edge technology and larger displays. Our iQ500 range brings the latest innovations and sleek designs offering first-class appliances for any home. iQ300 and iQ100 offer more affordable options with equally tasteful design and style.

Discover the entire built-in range – for even more flexibility as well as time – and resource-saving solutions which help support increasingly busy lifestyles. Siemens appliances include ovens that recommend the best programme to use for a dish with the Oven Assistant, dishwashers that feature the world's only Zeolith® drying system; a technological innovation that sets new standards for performance and energy efficiency. In addition our range features fridges with hyperFresh food preservation system to help keep food fresh for longer and outstanding freezers that never have to be defrosted. Not to mention A-rated freestanding washing machines that run more sustainably without compromising on performance. All working together to create an intelligently connected kitchen and utility space in the home.

A perfect union of intelligent technology and outstanding design

Get the best of both worlds, with appliances that are as clever as they are beautiful.

Stunning design and high quality materials come as standard with all Siemens appliances.

They have been engineered and designed in Germany to deliver quality, durability and reliability.

With more than 340 engineers across the UK, all employed and trained by us, our engineers have unrivalled knowledge in repairing our appliances. Each team member goes through over 400 hours of training before attending customer call outs, for added peace of mind.

In 2023, Siemens was awarded the D&G Total Excellence and Quality award. This award is based on surveys sent to customers of most of the major home appliance manufacturers and confirms our commitment to offering Siemens customers the very best service.

The World Health Organisation research shows that environmental noise pollution affects mental and physical health and is now second only to air pollution as the world's largest killer pollutant. An independent scheme, Quiet Mark acoustically tests products to enable consumers to easily identify quieter products for the home, which will benefit health and wellbeing. Find out more on pages 8-9.

Design is in our DNA.

Siemens Home Appliances' dedication to design excellence has been richly rewarded in the past year with numerous iF Design Awards, German Design Awards, Red Dot Design awards and Which? Award. Delivering a range of appliances equipped with smart technology, unparalleled user experience, and lasting, clear design aesthetics.

The iF Design Award.

The iF Design Award has been recognising cutting-edge product design around the globe for over 70 years receiving over 6,000 submissions from 70 countries annually.

The Red Dot Design Award.

The Red Dot Design Award, born in Essen (Germany) in 1955, has grown to be one of the most acclaimed product design awards in the world today.

The German Design Award.

The German Design Award is considered to be one of the world's most distinguished design competitions.

Which? Best Buy endorsement.

The Best Buy endorsement is given only to products and services proven to serve the consumer best in their independent lab tests and expert assessments. These top-rated products have all satisfied or exceeded their expert criteria, based on the results of rigorous comparative tests and analysis carried out by Which?. The Best Buy recommendation is 100% independent - no company can nominate its own products for a Best Buy endorsement. Their tests are based on criteria and benchmarks set by impartial experts.

Added peace of mind.

Siemens offers a 2 year warranty as standard across our built-in and freestanding range for added peace of mind. To register warranty please refer to the information on page 362. From time to time, Siemens may present additional warranties such as 5 year warranty on either products or defined components of a product which are time limited offers, to check if a product qualifies, please contact us, or go online at siemens-home.bsh-group.com/ie/customer-service/warranty

Siemens offers a 5 year warranty as standard on all our studioLine products across the range, for exceptional peace of mind. This warranty covers manufacturing and material faults. To register your studioLine products for warranty, please refer to the information on page 362.

In addition to the standard manufacturer warranty, our appliances also offer longer warranties on certain parts. This includes a 10 Year Anti-Rust warranty on all dishwashers, a 10 Year Compressor Drive warranty on selected cooling appliances, a 10 Year iQdrive® warranty on selected washing machines and lifetime AquaStop warranty on selected laundry and dishwasher appliances.

For further details, please refer to pages 363 or visit our Siemens Home UK or Ireland website.

studioLine range

The exclusive range of studioLine products are listed within this brochure. See page 11 for the full product range and where to find them in this brochure.

The virtualBrochure

We have developed an innovative virtualBrochure app which brings the Siemens product range to life, giving full control of the products, allowing for rotation, zoom and interaction with the appliances.

The Augmented Reality feature within the app also allows to visualise our appliances within a room. Perfect for when planning a kitchen.

The app is available from the Apple Store and Google Play.

Intelligently connected, a growing world of possibilities

Take the next step into the future as Siemens and Home Connect redefine the everyday with future driven innovations.

It is easy to think that kitchens are fully evolved, at Siemens we apply technology intelligently to continuously adapt and even pre-empt changing demands. Our smart appliances go further, all packaged into cutting edge design. Innovative features like checking how many dishwasher tablets are left whilst shopping to help manage the household more effectively. And with the new detergent scan feature, reducing detergent wastage is made possible.

Our i-Dos washing machine can automatically determine the right amount of detergent to use based on the washing load and the water hardness in the area. When using with the detergent scan feature on the app it will further fine tune settings according to the detergent used.

Siemens smart Home Appliances with Home Connect offer even more possibilities – from the everyday to the not so everyday.

Ovens

- **Recipes:** The Home Connect recipe section offers a large and delicious variety of Siemens approved recipes. The recipe cooking settings can even be sent directly to the oven, straight from a mobile, tablet or smart device when selected via the app.
- **Remote Control:** The oven can be operated intuitively from anywhere, for instance to preheat the oven on the way home.
- **Oven Assistant:** By selecting from a broad range of dish options, the oven will be automatically set to the ideal temperature and cooking mode to get perfect results on the chosen dish.

Coffee Machines

- **coffeeWorld:** A wide range of additional coffee specialties from around the world are available exclusively from the app. Drinks can be selected and ordered directly from the app and instructions sent straight to the coffee machine.
- **coffeePlaylist:** Guests can be easily entertained and impressed. A playlist can be built by asking each guest to submit their own coffee preferences via the app and the whole beverage list can then be transferred remotely to the coffee machine. The drinks will be prepared one after the other.
- **Remote Control:** It is easy to grab a coffee between meetings when working from home by operating the coffee machine remotely via the app, voice control or smart watch.

Hobs and Hoods

- **Notifications:** Helpful push notifications can be set to inform when the appliance needs maintenance attention, such as when the filters need replacing.
- **Cooking assistant:** The assist tab on the Home Connect App can help find and select cooking methods on the hob. Settings can even be sent directly to the hob for easier and quicker evening meals.
- **Hob-Hood Control:** Siemens hobs and hoods with Home Connect work together intelligently. The hood will switch on and adjust its settings automatically as needed when the hob is switched on.

Fridge Freezers

- **Remote Control:** The temperature and settings can be managed remotely using the Home Connect app. With helpful push notifications directly to the app, such as when the door is left open, it is easy to stay in control.
- **Inventory:** It is easy to keep track of what is in the fridge using the Inventory within the app. And for when food is nearing its use-by date, the No Waste recipes are perfect for using up ingredients in time.

Dishwashers

- **Remote Control:** The dishwasher can be operated from anywhere to fit in with all lifestyles. Check the washing status, receive push notifications such as when the programme is finished or when the rinse aid needs topping up and even start the machine remotely when out of the home.
- **Programme Assistant:** Simply select the type of dishes and cleaning preference on the app and Home Connect will suggest the best cycle for the load, to make dishwashing stress free and straight forward.

Washing Machines and Tumble Dryers

- **intelligentDry:** Load details can be automatically sent from the washing machine to the dryer to help it select the optimum drying programme. Once the drying programme has finished, it will ask for a rating to help inform the settings of future cycles.
- **easyStart:** For help with choosing the right programme, individualised to the load. By answering a few simple questions about the load, it will recommend and set up the right program. Then all that is needed is to tap start.

Our world has turned into an ever-growing network of partner services, to help turn any house into a fully connected home.

Reduce the effort of household tasks with Amazon Alexa and Google Assistant.

With the Home Connect skills, voice control can be used for easy interaction with connected appliances at home. From simple dialogues to personalised interactions, managing the household is made even easier. With just a few simple commands, it is possible to start the laundry programme, preheat the oven, check the dishwasher progress or ask for a coffee to be made. A world of exciting possibilities await when using voice assistant with Home Connect appliances.

Make life easier with Smart Reorder via the Alexa app.

Avoid running out of dishwasher tablets as Smart Reorder via the Amazon Alexa app brings automatic replenishment. The easy to set up feature will keep count of the remaining tabs and send a reminder when they need to be reordered.

Manage appliances while on a run with Fitbit.

Fitbit and Home Connect can help make sure a warm meal or cup of coffee is waiting at home after every training session. Thanks to the remote control capabilities of the app, the oven, coffee machine, washing machine, washer dryer, tumble dryer and dishwasher can be controlled directly from a Fitbit smartwatch. The status of appliances can also be monitored in real time, making it easier to remain in control.

Try demo

For a better understanding of the features available on the Home Connect app. You can still download the app and use the demo function without registering appliances.

To experience the demo mode use the QR codes to download the free Home Connect app, tap 'add appliances' on the home screen and choose from a range of demo appliances to experiment with.

Protecting peace of mind

With Quiet Mark accredited products that will not disturb the peace and quiet of the home.

Technology has made homes more efficient and convenient than ever before, but it has also made them noisier. Our daily lives are accompanied by the sounds of TVs, traffic, ringing phones, and working appliances. Quiet Mark was conceived as a global hub where consumers, trade buyers and architects can go to find verified third-party-checked quiet machines, equipment and technology. They have acoustic teams and a UK headquarters with labs where they test some products, and work with specialist labs worldwide to test others. Their testing covers a wide range of products, including not just home appliances but also forklift trucks, computer mice, and noise-cancelling headphones. Their goal is to make it standard for every dishwasher, for example, to operate under a certain decibel level and offer sound quality that is carefully considered during the research and design stage.

What effect does noise have on a person's wellbeing?

The impact of noise is more significant than people may initially think. Sound triggers the release of cortisol and adrenaline in the body, enabling quick action to protect ourselves against potential danger. This was necessary for survival in hunter-gatherer days. Fast forward to today, where people are surrounded by layers upon layers of noise which cause our bodies to release cortisol, creating adrenaline and putting additional pressure on the heart. Over time, this stress can cause headaches, difficulty concentrating or sleeping, and changes to the mood. Despite these potentially extreme reactions, the impact of sound is often ignored and misunderstood because it is invisible. This makes it even more of a threat to people's well-being.

How do noisy appliances affect the home

It is not just one noise but often multiple appliances running at once. This is likely to create a variety of beeps, bleeps, and sudden noises, and these can all add up. This can be particularly problematic if the office is also the kitchen table, or if someone in the household has hearing sensitivities or autism. By reducing the overall number of decibels in the home, people can also reduce anxiety levels and create a more peaceful space for everyone.

Which appliances are the biggest culprits when it comes to noise?

In late 2021 and early 2022, Quiet Mark conducted surveys to determine how people in the UK and the US feel about noise in the post-pandemic world. Their findings indicate that over four fifths of Brits, regardless of age group or region, would prefer to have quieter home appliances. The surveys also revealed that larger appliances, such as washing machines and dishwashers, were the biggest culprits of noise. Vacuum cleaners and juicers were also noted as sources of noise.

Is noise a consideration when people are buying appliances?

Their research also shows that over two thirds of UK consumers are more likely to purchase an appliance labelled as "quiet" compared to a similar product with no reference to noise levels. Furthermore, people are generally willing to pay more for quieter appliances. This trend is reflected in customer reviews, where many products receive high ratings specifically because they are quiet.

How does Quiet Mark accreditation work?

To compile their list of approved appliances, the team at Quiet Mark searches through all the new ranges of large appliances worldwide and creates databases of their energy labels. By law, every brand must undertake sound testing to certain ISO standards and declare this level. For washing machines, for example, this pertains to the levels for the spin and wash cycles. Although it is not possible for them to test every appliance, they do conduct spot checks. They then determine the very quietest 10 to 20% in each appliance category. A brand cannot buy a Quiet Mark; it is only awarded if its appliances meet these criteria. Siemens began its partnership with Quiet Mark in January 2023, and currently offers over 60 large appliances with Quiet Mark status. Look out for the Quiet Mark logo by the appliances to find them.

Experience the elite studioLine

For those who want to set themselves apart from every standard.

The studioLine kitchen

The Siemens studioLine appliances all line up perfectly to create a guaranteed design statement, adding elegance and exclusivity to a kitchen. With superior design and cutting-edge functionality, the classic and iconic studioLine appliances with their black glass and blackSteel fascia will complement any high-end kitchen design. The studioLine models all elegantly feature the studioLine signature underneath the Siemens logo.

studioLine offers a complete kitchen solution with innovative technology such as the Individual Browning camera in the oven, sous-vide cooking, and the freeInduction hob for zoneless cooking.

5 year warranty

All of the studioLine products come with a 5 year warranty for added peace of mind. This warranty covers manufacturing and material faults. To register the warranty, please refer to the information on page 362.

The perfect line up. Coordinated and intuitive cooking experiences

From ovens, to warming drawers, to coffee centres. Siemens clean lines and matching intelligent appliances allow for perfect design coordination.

Ovens

Siemens built-in ovens impress with their sleek finish and premium materials. They can be fitted alone or coordinated with other Siemens appliances for a design statement. Their ability to be installed independently allows full flexibility to fit appliances under work surfaces, in tall units or in a bank with other appliances. These multiple combinations give full freedom with the kitchen design, not to mention state-of-the-art technology and intelligent features which save time when cooking.

Compacts

With the variety of appliances in our compact built-in range, Siemens provides a combination of options to suit preferences, while delivering complete visual perfection. Siemens 45cm and 38cm high compact appliances allow for a full array of cooking configurations. Depending on the range and model, compact ovens are available with steam or integrated microwave, offering space-saving design without compromising on style or utility.

Siemens cooking warranties:

studioLine 5 year warranty

A five year warranty is available on all Siemens studioLine ovens and compact appliances listed in this brochure to protect against manufacturing and material faults during this warranty period.

2 year warranty

A two year warranty is available on all Siemens ovens and compact appliances listed in this brochure to protect against manufacturing and material faults during this warranty period.

Multiple talents. All aligned in one unique design

Connect to the future of cooking.

The studioLine oven range redefines the cooking experience, making it more intuitive, more enjoyable, and more rewarding. It includes all the great intelligent features and technology of the core Siemens range with additional state-of-the-art functions, all packaged in the exclusive studioLine design.

Elegance and performance united in the kitchen.
Both functional and beautiful the door of the studioLine iQ700 oven consists of high-quality black glass. The handle in the same material, seems invisible to the eye when looking at it from the front, while offering a solid grasp, when needed.

The dream team.
The Siemens studioLine range offers a wide selection of appliances that can be seamlessly combined to create a personalised configuration that will fit individual customer needs. From compact and full-size ovens, all the way to the built-in coffee machine, each appliance can be combined to create the ideal set up. While the warming and vacuum drawers fits perfectly under an oven or coffee machine to complete the perfect built-in combination. Whether alone or combined, side by side or on top of each other each appliance never fails to impress.

Models shown left:
HN978GQB1B single oven, CT918L1D0 coffee machine,
BI710D1B1B warming drawer, CM978GNB1B compact oven,
BI710D1B1B warming drawer.

The Siemens studioLine kitchen is all about connecting

Connecting to the endless possibilities of the smart home to free time for the things that matter.

The Siemens studioLine range offers many time saving shortcuts and innovative cooking solutions.

The full package.

The top of the range full size combination oven HN978GQB1B, offers greater cooking options with both microwave and pulseSteam functions while pyrolytic cleaning makes cleaning the oven effortless.

Well prepared. Well connected. Well done.

The integrated camera on selected iQ700 ovens* and the Home Connect app mean food can be checked from anywhere giving the freedom to control the oven settings without needing to be nearby. It can even create mouthwatering time lapse videos as the food cooks – perfect for sharing with friends.

In addition, the Browning Camera feature is designed to guarantee the perfect level of crispness. With camera-enabled artificial intelligence, the iQ700 studioLine oven with integrated camera, allows personalised cooking results by choosing from five different browning levels. The interior camera continuously monitors the dish, providing real-time feedback on its progress. Once the preferred browning level is reached, the oven intelligently turns off automatically, ensuring that the dish is cooked to perfection without any risk of overcooking.

* Only available on oven models HN978GQB1B and HS958GED1B.

Cook like a professional.

Siemens studioLine ovens featuring the full steam function also have a sous-vide programme which allows food to be cooked whilst sealed under vacuum at constantly low temperatures (50 - 95°C) with steam. This unique cooking method retains nutrients while enhancing flavours, giving better texture and tenderness. The results: a dish cooked to perfection every single time. Use in combination with the vacuum drawer.

The vacuum drawer.

The studioLine vacuum drawer is the perfect appliance for anyone who wants to elevate their cooking experience at home. It is a little known versatile kitchen accessory in its own right and can be used for so much more than cooking sous-vide. It can be used to quickly add flavour or marinade foods, extend storage life of food and even reseal opened jars and bottles.

varioClip rails Plus.

The quick and easy mounting system enables the telescopic varioClip Plus rails to be positioned at the perfect height for the dish even at grill level. In addition, the full extension rail system allows for the safe and easy loading and unloading of food in and out of the oven.

CM778GNB1B compact oven, BI710D1B1B warming drawer.

Key features within the iQ700 and iQ500 range

fast preheat

No more tedious waiting for the oven to reach the right temperature.

The fast preheating feature activates multiple heating elements simultaneously to get to the desired temperature very quickly.

coolStart

Cooking certain frozen and chilled foods in the oven is now even faster – thanks to the innovative coolStart function. Without the need to wait for the oven to reach the set temperature, frozen and chilled foods can be successfully cooked without preheating, while still using the recommended cooking time.

Everything put in a good light.

Depending on the model, there are different kinds of illumination inside the oven. Whether it is the standard Halogen light, LEDs or the most advanced Multilevel LED strip, they all provide a brilliant view into the oven without having to open the door.

Electronic control

Depending on the function selected, the oven will suggest a suitable temperature which can be manually adjusted. The selected temperature is displayed digitally and a heating up indicator shows the progress towards the set temperature. The same indicator shows residual heat once the oven is turned off. Get quick access to performance features like cookControl Plus and cookControl Pro whilst being safe in the knowledge that if left unadjusted for a period of time, the oven will switch off automatically.

fitbit

works with
Google Home

Our range of smart cooking appliances with Home Connect are designed to work intelligently for the user.

From easy set-up, quick access to user manuals, scheduling pyrolytic cleaning start times to fit consumers' needs, to notifications to clean cooker hood filters; Siemens cooking appliances with Home Connect intelligently make everything easy and more accessible.

In safe hands.

Siemens cooking appliances are equipped with intelligent sensors to help get the best results when cooking. For example, the 'dishes' section on the app will suggest the best cooking settings for a chosen dish.

The vast choice of recipes in the recipe section of the Home Connect app provide inspiration for budding or experienced home cooks alike. Once selected the cooking settings of the recipe can be transferred automatically to the oven intuitively from the app.

A growing world of partners.

The constantly growing network of partner solutions opens up completely new perspectives and networking possibilities. For an everyday life that is efficient and exciting like never before.

The Siemens Wi-Fi-enabled ovens connect to a wide range of smart devices and services. With partners including voice assistants, recipes, energy management and shopping and reordering – connecting appliances to Home Connect brings a whole world of opportunities to Siemens appliances.

Intelligent thinking, intelligent design.

We enable multiple ways to control our appliances to help when hands are full or life becomes busy – voice, smartwatch, tablet, and smartphone. There are countless applications that can be precisely tailored to the user's needs. With Home Connect and the relevant partner, the whole household can now be controlled with just one click. Everyone can create their own personal scenarios; for example by automating the switching off of various devices as they leave the home. An all-in-one solution for intelligent home automation.

Said. Done.

Appliances can be controlled without lifting a finger, by simply asking Amazon Alexa or the Google Assistant to start the oven, or even how long it will take until dinner is ready? The oven can even be controlled easily by voice while relaxing on the sofa.

Joined up thinking.

Depending on the model our smart ovens with roastingSensor know when the dish is done perfectly and switches itself off to avoid wasting energy unnecessarily. Complete control is at hand with the Home Connect app.

Enduring performance.

Downloadable programmes and software updates ensure the oven is always at the cutting edge of technology.

Knowledge at the touch of a button.

No need to search for the manuals hidden in the kitchen drawer, they can be accessed anytime easily with a simple tap via the Home Connect app.

Thanks to activeClean®, ecoClean®, ecoClean® Plus and humidClean by Siemens, cleaning the oven becomes simple and effortless.

Ovens with activeClean®
Baked on food and grease can be removed at the push of a button without any need for chemical treatments. Hassle-free, the oven cleans itself thoroughly with activeClean®. It does so by heating up to a very high temperature – turning all residues into ash, which can easily be wiped away. This process is called pyrolysis and is an extremely convenient and efficient way to clean the whole interior of the oven saving time and effort.

For iQ700, the optional telescopic rails and full width enameled pan are specially designed to be used with activeClean® so they do not need to be removed during the cleaning process. Only the wire shelf needs to be removed.

Ovens with ecoClean® and ecoClean® Plus
A special coating applied directly to the inside of the oven (please check specification of individual models), ecoClean® and ecoClean® Plus make cleaning the oven easy. The coated area cleans itself while the oven is on and models with back, roof and side coating benefit from a special cleaning programme.

humidClean
For faster cleaning, dirt is softened beforehand by vaporising soapy water. Simply add a drop of detergent to 400ml of water, pour the solution onto the centre of a completely cooled cooking compartment and set the cleaning programme. Once done the soiling can easily be removed with a dish cloth or soft brush.

Cleaning and de-scaling
Finished with a durable enameled interior, most Siemens compact45 combination ovens with steam feature dedicated cleaning and de-scaling programmes.

Drying programme
This programme can be used after each use to dry residual moisture inside the cavity of the oven.

activeClean® – ovens that clean themselves

Display options available for iQ700 single ovens and compact ovens

The iQ700 range oven menu comes with a high resolution TFT Touchdisplay in three different sizes. Each display type is designed to complement each other and coordinate effortlessly. The high-contrast colour screen offers smooth and intuitive navigation and gives access to all features by a simple touch. It is even easier to select the perfect settings with 'favourites' which can be accessed directly from the main menu.

TFT Touchdisplay Pro
Our largest high-contrast colour display is easy to read from any angle, allowing easy and comfortable operation of the oven.

TFT Touchdisplay Plus
A smaller display but still with the same colour, high-contrast display, the TFT Touchdisplay Plus is the intuitive and satisfying control centre of the oven.

TFT Touchdisplay
Our smallest display in the range but no less equipped to make the cooking experience effortless and help get the most from the oven.

iQ700 ovens and compacts are designed to complement one another.

An option for every need.
The Siemens oven range offers a wide selection of options to choose from which can be combined in a bank or in a row. From single ovens with an easy clean solution such as activeClean, to an oven with steam function. They can be combined with an additional compact model such as coffee machine or oven with integral microwave.

Cooking with steam.
The Siemens compact steamer and steam combination ovens provide the benefit of steam together with perfect design coordination. Steam and added steam cooking has increased in popularity in the past few years. Not only does this offer healthier cooking options as steam retains vitamins and nutrients, but also maintains the visual appearance of many foods. With fullSteam Plus, healthy can also be convenient. Using the perfectly balanced combination of steam and heat at 120°C, dishes finish cooking up to 50% faster than using the standard 100°C steam function.

The coffee solution.
For coffee connoisseurs, adding a Siemens coffee centre to the design can be a great solution. This versatile machine will provide a variety of specialist coffees at the touch of a button.

Keep it warm.
The Siemens iQ700 range also includes warming drawers. Primarily designed to pre-heat crockery and keep cooked food warm, these drawers can also slow cook, prove dough and defrost.

Available in 14cm or 29cm high options, they combine perfectly with single ovens and 45cm compact models in column or side by side in bank installations. For optimum design coordination, choose iQ700 models with matching TFT displays.

A built-in kitchen assistant.

cookControl Pro
Pre-installed, automated baking and roasting programmes in the oven guarantee ideal preparation. The chosen dish can be simply selected via the clearly arranged TFT Touchdisplay and the oven's sensors then control the process. The preferred result can be selected from various suggestions depending on time or preferences. The oven automatically applies the correct settings and functions then turns off when the dish is ready. More programmes can be downloaded by connecting the oven with a registered Home Connect account.

In addition to pre-installed programmes, cookControl Pro gives access to additional special sensors or heating modes depending on the appliance.

The same great results in up to half the time.

varioSpeed
When time is of the essence use the varioSpeed function to cut down cooking time by up to 50%.

Intuitive to use and a real "allrounder" – add the microwave function to the chosen heating mode to enjoy delicious and refined dishes faster.

varioSpeed delivers outstanding results such as soft textures and crispy crusts all in record time.

Achieve the best results.

Easier than ever before: roastingSensor Plus
Thanks to three measuring points, the innovative roasting thermometer is able to precisely and reliably measure the core temperature of a wide range of foods. Ideal for meat, poultry and fish, it can even be combined with the integrated microwave and the pulseSteam function. The roastingSensor Plus removes the need to keep checking on food.

bakingSensor Plus
Thanks to bakingSensor Plus the oven can detect when the baking process is complete. Select the required dish and the innovative sensor technology fitted inside selected iQ700 ovens can automatically control the baking process for consistently delicious results. The bakingSensor constantly measures the humidity levels in the oven interior and is therefore able to determine when the dish is fully cooked and ready.

roastingSensor Plus

Smooth operator.

softMove
For effortless operation of the oven door, the dampers ensure gentle and quiet opening every time. Available on all iQ700 built-in ovens.

softMove

Model shown: HS658GES7B single oven

Cooking flexibility.

4D hotAir
The innovative technology of the fan motor enables optimum heat distribution around the interior of the oven, as the oven is programmed to change the rotating direction of the fan every few minutes. Due to even distribution of heat within the cavity, cooking on up to 4 shelf levels is possible (for compact appliances up to 3 shelves). Food therefore always turns out perfectly, no matter which shelf it is placed on.

Steam cooking. The healthy way to cook.

fullSteam Plus
The steam function of the new iQ700 oven is not only a healthier way of cooking, it is also faster. The perfectly balanced combination of steam and heat at 120°C finishes dishes up to 50% faster than using the standard 100°C steam function. Ideal to preserve vegetables' fresh colours and retain vitamins and minerals. Even firm vegetables like potatoes and carrots become perfectly tender, making fullSteam Plus one of the most convenient ways to prepare a delicious and healthy meal.

pulseSteam
Siemens ovens and compact appliances with pulseSteam are real all-rounders for more flexibility when cooking. Steam can easily be added while baking and roasting with hot air. Multi function options offer the perfect cooking method for any food, preserving everything that is important: flavour, smell, texture and nutrients. Siemens combi-steam ovens do not just work with hot air but also with top and bottom heating and grilling, so bread, cakes and roasts come out just right: crisp on the outside and moist on the inside.

How does it work?
Siemens steam and steam combination ovens are quick and easy to install as they do not require plumbing-in. Our fullSteam ovens have the temperature range indicated; whereas our pulseSteam models have three intensity levels which can be adjusted, depending on what is being cooked.

The removable 1 litre water tank (1.3 litre for compact steamer) is accessed behind the semi-automatic control panel making it more convenient and easier to refill, even during cooking. Water is heated by a fast and efficient steam generator before being introduced into the oven. Thermostatic controls allow a pure steam temperature of 30 – 100°C.

Model shown: HS758G3B1B single oven

Rail Systems: The perfect accessories, designed especially for the iQ700 oven.

We supply accessories that help make cooking easier and more enjoyable. Great for tailoring the oven to individual needs offering ease of use and flexible cooking options to help create the perfect dish.

iQ700 telescopic rails
Fully extendable telescopic rails are available as an optional extra on selected iQ700 ovens. Designed to glide smoothly and effortlessly out of the oven, these rails offer clear and comfortable access to food during cooking and to remove the food once cooked without having to reach into the hot oven. Versions suited to pyrolytic models which can remain in the appliance during the cleaning cycle are also available, for effortless cleaning of the oven and the rails at the same time.

¹Telescopic rails are not available as optional accessories on ovens with integral microwave

Innovative speed solutions

for outstanding cooking creations: iQ500

Featuring more traditional, yet stylish, illuminated and easy to use control dials, the coordinated lightControl design allows the single ovens, built-in/under double ovens, compact microwave combination ovens, built-in microwave ovens, and warming drawers to be installed together, both vertically and horizontally*.

Siemens offers a choice of two coordinating iQ500 45cm compact microwave combination ovens, each featuring the same striking blue and white lightControl display as the iQ500 single ovens.

The standard microwave combination oven CM585AG50B features a large 36cm ceramic base to allow for use of rectangular dishes compared to a turntable.

Alternatively, the innovative CP565AG50B features not only microwave and oven functionality, but also full steam and steam combination options – the ultimate solution for combination cooking and perfect for maximising options if space is a premium.

Compact combination ovens are complemented by a 14cm high warming drawer to ensure complete iQ500 design coordination.

The iQ500 range also offers two design coordinated solo microwaves – a 25L version for installation in tall housing and a smaller 20L model design to fit into 30cm deep wall cupboards.

*Horizontal combinations for single ovens and 45cm compact appliances only.

Operation meets fascination.

lightControl
The lightControl dial highlights the chosen heating symbol with a striking blue light – making operating the oven into an intuitive and exciting experience. The design is consistent throughout the iQ500 range with the intuitive illuminated lightControl dials, whether selecting a cooking function on a single oven, or introducing steam to the 3 in 1 microwave combination compact appliance.

The secret to perfection.

addedSteam
This feature benefits foods by adding moisture and enhancing colour and crispness. This is done by enhancing a natural process called the Maillard effect. This is a reaction which occurs when natural sugars are caramelised in the presence of heat that gives conventionally cooked food it's colour and crispness. Adding shots of steam intensifies this reaction. For example bread crusts become dark, shiny and crisper compared to being cooked using conventional heat only.

Guarantee the best cooking results.

cookControl
Providing automatic programmes for mainly meat, poultry and fish. Available with either 10 programmes or 30 programmes, simply select the desired dish and enter the food's weight – everything else is done automatically.

Single point roastingSensor
The roasting thermometer is able to precisely and reliably measure the internal temperature of dishes. By getting an accurate reading of the core temperature of boneless and fat less dishes, it can determine when they are perfectly done.

3D hotAir
With the 3D hotAir, the oven distributes the heat consistently inside the oven cavity to guarantee perfect baking results while preventing flavours and smells intermingling even when cooking on three levels simultaneously.

Model shown:
MB578G5S6B built-in double oven

Introducing Siemens iQ500 double ovens.

softClosing Door.

Adding to the ambience of any kitchen, the softClosing Door, on selected iQ500 models, closes by gently cushioning the last few centimetres for minimal noise and maximum comfort. In addition, a softClosing Door ensures that items within the appliance are not disturbed from a heavy impact, avoiding unnecessary spills to clean.

iQ500 varioClip rails.

Selected Siemens iQ500 single and double ovens¹ feature a pair of innovative varioClip telescopic rails. Intelligently designed with an easy release system, these rails can be unclipped and repositioned on any of the five shelf positions in the oven², tailoring the position depending on the dish requirements. Whether grilling bacon for breakfast on one of the higher positions, or opting for a lower rail position to cook the Sunday roast, these fully extendable rails perfectly combine flexibility and convenience. Additional pairs of varioClip rails are available as optional extras to personalise the rail systems of each oven.

varioClip rails – designed to be released and repositioned quickly and easily

¹ Please see product descriptions for models that have the rails as standard
² varioClip rails suited only to the main oven on double ovens

Siemens iQ500 double ovens provide a great solution to gain extra flexibility and more cooking space.

Both ovens can be used when entertaining guests for example baking dessert in the main oven whilst heating savoury dishes within the top oven. Sitting seamlessly within the furniture, kitchen space is maximised without sacrificing the extra cavity space.

Our double oven with activeClean® benefits.

A double oven with top of the range features. Built-in model MB578G5S6B with Home Connect features activeClean® in both the main and top cavity. activeClean® heats up the temperature of the oven to burn residue and allow for easy wipe away cleaning, saving significant time when cleaning the oven. This model also includes the coolStart function, perfect for people always on the go and when needing to heat up frozen and chilled meals quickly.

A built-under to fit beneath work surfaces.

Alternatively, with the built-under oven model NB535ABS0B with a fast preheat and 3D hotAir cooking available in the main oven different types of foods can be cooked flexibly on up to 3 shelving positions, without tastes mingling. Its slightly smaller overall size means this double oven can also fit underneath the work surface – ideal when space is limited but an additional cooking cavity is needed.

NB535ABS0B built-under double oven

Key features of iQ500 double ovens:

3D hotAir
Can cook all types of food on up to 3 levels simultaneously to stop flavours and smells intermingling.

ecoClean® liners
A direct coating that lines the inside of the oven, ecoClean® makes cleaning the oven easy. The coated area cleans itself while the oven is on or can be activated with a cleaning programme. Available either as a full coating on the back, roof and sides or exclusively on the back panel.

activeClean®
Heating the cavity up to 480°C, activeClean® burns away all dirt and grime. The remaining ashes can then be easily wiped away inside the oven cavity for effortless oven cleaning.

Electronic control
Depending on the function selected, the oven will suggest a suitable temperature which can be manually adjusted. The selected temperature is displayed digitally and a heating up indicator shows the progress towards the set temperature. The same indicator shows residual heat once the oven is turned off. Get quick access to performance features like cookControl whilst being safe in the knowledge that if left unadjusted for a period of time, the oven will switch off automatically.

cookControl
Provides automatic programmes for the perfect preparation of meat, fish, vegetables and bread. Simply select the desired dish and enter the food's weight – everything else is done automatically. Either 10 or 30 programmes available, depending on the model.

coolStart
No more preheating when cooking chilled and frozen convenience food. Using an intelligent heating phase, it is now possible to cook frozen and chilled food without waiting for the oven to preheat.

Single point roastingSensor
By getting an accurate reading of the core temperature of boneless and fatless dishes, the roastingSensor can precisely and reliably measure the internal temperature of each dish to determine when it is perfectly done.

fast preheat
By activating all heating elements simultaneously, Siemens ovens with fast preheating get to the desired temperature very quickly.

Control the oven simply by using a smartphone or tablet with the Home Connect App to further expand the potential of the oven.

Features are on selected models. Please check individual models on matrix pages for exact specifications.

Explore compact ovens and microwaves

Ovens with integral microwave*

When teamed with a single oven, Siemens iQ700 compact ovens with microwave offer a great alternative to a double oven when more space is needed for traditional cooking. Designed first and foremost to function as an oven, with construction, features and functions identical to a traditional single oven, these models benefit from the addition of microwaves at low medium power (max. 360W) to deliver oven-led combination cooking. Our varioSpeed faster cooking feature speeds up the cooking process while retaining traditional cooking results.

Microwave combination Ovens*

These iQ500 models are designed to provide more functionality than a solo microwave oven, focusing on combination cooking, with the microwave using higher power (max. 600W) to lead the cooking process, supported by hot air or grill functions to deliver speedy crisp and browned results. Based around a more traditional microwave functionality these models offer the perfect solution if regular microwave heating is the priority, but with the back-up of separate or combination hot air cooking and grill functionality if required.

*These models are designed to operate best in combination mode, so when heating using microwave only, it may be necessary to adjust cooking times.

Compact Ovens with steam

When looking for healthier cooking options the Siemens range of compact ovens with steam creates healthier meals using the power of steam to deliver juicier meats, crisped and fluffy baked items and vegetables that retain more of their vibrant colours, vitamins and nutrients. Siemens fullSteam models offer pure steam cooking, plus many models also offer pulseSteam – pulses of steam are injected into the oven to work in tandem with traditional cooking functions. Please check individual models for exact specifications.

CM676GBS6B compact oven with integral microwave

CM585AGS0B compact microwave combination oven

CP565AGS0B compact microwave combination oven with steam

Inverter Technology

Inverter Technology delivers microwave power constantly while cooking – other, traditional microwaves are only able to deliver maximum power and manage the differing settings by alternating between on and off for specific time periods. This can result in uneven heating or over-cooked food and can be especially damaging to more delicate foods or smaller portions.

With Inverter technology, the microwave delivers power constantly, gradually managing the power levels down over time in order to control the food temperature. This gentle approach to cooking reduces uneven heating or overheated food and is especially beneficial for delicate foods. It may be necessary to adjust cooking times to ensure foods are thoroughly cooked before serving. Siemens recommends that the maximum power setting be used for heating liquids and the microwave is calibrated to provide a burst of high power initially, before managing the power down in stages to the next level over the first few minutes.

Models shown
CM678G4S6B iQ700 compact oven with integral microwave and **BI630CNS1B** iQ700 warming drawer

Warming and accessory drawers

Perfect for warming plates, a Siemens warming drawer will keep food warm for latecomers – as well as keeping plates at an optimum temperature to ensure hot food keeps it warmth when plated. With adjustable temperatures of 40-80°C, a four-setting iQ700 14cm or 29cm high warming drawer can be installed as a standalone appliance, or acts as the perfect accompaniment to Siemens iQ700 ovens and compacts. If needing additional storage only, a matching 14cm accessory drawer is also available. The iQ500 range includes a 14cm high warming drawer featuring 3 settings – minimum, medium and maximum – designed to coordinate with Siemens iQ500 ovens and compacts. The perfect line up of compact appliances with warming drawer is sure to bring style and elegance to any refined kitchen space.

PERFORMANCE / TECHNICAL INFORMATION	
Product dimensions H x W x D (mm)	595 x 594 x 548
Cavity capacity (litres)	71
Water tank volume (litres)	1
Maximum microwave power (W) ¹ / Number of power levels	– / –
Nominal voltage (volts)	220-240
Total connected loading (watts)	3600
Cable length (cm)	120
Minimum fuse protection	16A
Interior lights	■
Door glazing	■
STANDARD ACCESSORIES	
Full width enamelled pan / Wire shelves	1 / 2
Steam trays punched / unpunched	2 / 1
Telescopic rails	■

■ Yes, model has this feature. – Feature not available for this model.

¹ For Inverter models, the maximum setting offers a time limited boost option for heating liquids. To ensure optimal results and to protect the appliance, the microwave power output is reduced in stages over the first few minutes down to the next power level (600W). After a cooling period, the microwave boost option will be available once more.

Data valid in this table as of April 2024. Subject to modification without prior notice.

Discover the art of coffee

Experience the exceptional aroma of freshly brewed coffee at the push of a button.

Introducing the studioLine coffee centre – a masterpiece as aesthetically pleasing as it is efficient, combining design, technology, and great tasting coffee.

Designed with easy access to the water tank, coffee bean container and insulated milk jug, the coffee centre has front access thanks to a hinged front panel – so it is quick and easy to replace the water or beans. The milk tubes are also cleaned with steam after every milk beverage and as most of the components are removable and dishwasher safe, they are also easy to clean. Easy to install, the machine requires no extra plumbing.

Pure precision for perfect coffee indulgence with our built-in studioLine coffee centre.
The iQ700 studioLine built-in coffee centre conveys an elegant impression of absolute quality and intelligent innovation for those passionate about coffee.

The design of the iQ700 coffee centre is perfectly aligned with the entire iQ700 series. The milk, water and bean containers are conveniently hidden behind the coffee centre's door to keep the design lines clean, while the TFT Touchdisplay Pro and LED lights put each coffee in the spotlight.

Model shown:
CT718L1B0 built-in coffee centre with TFT touchDisplay Pro

Pure precision for perfect coffee indulgence

Immerse yourself in the world of coffee.

The Siemens fully automated built-in coffee machine is designed to deliver a great coffee experience, thanks to the interaction of all components – a result of our years of experience and strong commitment to research and development.

Pure precision for perfect coffee indulgence with our built-in coffee machine.
Our iQ700 built-in coffee centre conveys an elegant impression of absolute quality and intelligent innovation for those passionate about coffee.

The design of the iQ700 coffee centre is perfectly aligned with the entire iQ700 series. To keep the sleek lines looking clean, all milk, water and bean containers are conveniently hidden behind the coffee centre's door, while the TFT touchDisplay and LED lights put each coffee in the spotlight.

Designed with easy access to the water tank, bean holder and insulated milk jug, the coffee centre has front access thanks to a hinged front panel to allow quick and easy access to replace the water or beans. The milk tubes are also cleaned with steam after every coffee with milk and as most of the components are removable and dishwasher safe, they are also easy to clean. Easy to install, the machine requires no extra plumbing.

oneTouch function
The Siemens coffee machine can deliver delicious-tasting coffee – from latte macchiato, creamy cappuccino to extra-strong espresso at the touch of a button. The system prepares coffee and milk specialities automatically, which can be customised to the user preference.

sensoFlow system
Different coffees require the espresso shot to be heated at a different temperature in order to achieve the perfect results. sensoFlow does this automatically, every time.

A wide world of coffee to experience.

Get more with Siemens bean-to-cup coffee machines and built-in model with Home Connect. The app gives access to exclusive coffee drinks and intuitive remote functions directly via a smartphone, smart watch, tablet or voice assistant.

Home Connect
With the Home Connect app additional features and drinks are available. Select the coffee with coffeeWorld on a smart device, or ask a voice assistant to make it for you. Push notifications are sent from the machine, for example, when the beans are running low or when the machine needs cleaning.

The coffeePlaylist allows creation of a list where each guest can personalise their own drink and remotely send the order to the machine so they are automatically prepared one after another.

Connected partners including Amazon Alexa, offer additional flexibility like making a drink using voice control whilst IFTTT allows the creation of bespoke applets connecting the coffee machine to other smart home appliances to create personalised routines.

Award Winning Coffee Machine

The Coffee Machine on this page has been accredited with these prestigious design awards.

UnEQualled coffee shop experiences

Model shown:
TQ907GB3 EQ900 S700
fully automatic espresso machine

At home. In style

Delicious barista-style drinks at home with the Siemens EQ freestanding bean-to-cup coffee machines.

The world of cafe culture is at hand with the exciting range of EQ fully automatic bean-to-cup coffee machines designed for those that settle for nothing less than exceptional coffee.

With intelligent iAroma technology, 3 key innovations are combined together in a high quality brewing unit to deliver truly sensational tasting beverages. These intuitive appliances stand out on any premium kitchen surface with their stunning design, elegant display panels and optimal usability. From the entry-level compact EQ300 models to the fine-tuned connected EQ700 and EQ900 models.

Our top of the range machine: EQ900 S700

baristaMode: Individualise your coffee creation

There are five essential parameters of baristaMode that contribute to the quality of coffee and espresso: coffee strength, amount, temperature, coffee-to-milk ratio and brewing speed. The baristaMode allows for even finer, fully customised adjustments to please any coffee taste. Alternatively in comfortMode the machine makes these adjustments automatically leaving only the option to personalise strength and aroma.

beanIdent System: Get the most out of every roast

Many factors influence the flavour profile of a coffee bean. The region where it is cultivated, with its specific climate and soil, as well as the type of roasting, all play a part. The beanIdent System optimally adjusts all brewing settings to ensure the full aromas are extracted. Simply enter the variety and roasting level and let the EQ900 work its magic.

oneTouch DoubleCup

For added convenience, two coffee-milk specialities can be poured at once. Most of the range has an integrated coffee and milk outlet with double spouts, for faster drink preparation.

TFT display

The large, clear and colourful TFT display and disc control make managing drink preferences simple and intuitive with the EQ900 S700 machine.

dualBean System: Separate bean containers for a pure taste

Two separate coffee bean containers, each with its own grinder, ensure that the beans never get mixed up and guarantee that the desired flavour will always be achieved.

superSilent

Optimised soundproofing enables the most remarkable noise reduction.

The Siemens iAroma System

Experience the unique iAroma System available with Siemens fully automatic espresso machines: Innovative features work seamlessly together to guarantee the perfect taste and long-lasting product.

The long-lasting ceramic grinder creates the ideal ground coffee for perfect aroma.

The intelligent flow heater guarantees the perfect temperature every time.

The smart water pump – for the right water pressure every time.

The high-tech brewing unit creates great aroma thanks to its fine-tuned and precision controlled brewing operation.

Perfect pleasure at the touch of a button: oneTouch function.

For longer-lasting coffee indulgence: calc'nClean.

For busy mornings and tired evenings: Drinks on demand.

No matter the coffee speciality whether it is latte macchiato, creamy cappuccino or extra-strong espresso, thanks to the oneTouch Function this fully automatic coffee machine can serve up pure coffee indulgence at the touch of a button.

Maximise beverage quality, product lifetime and overall hygiene of the EQ coffee machine with the combined cleaning and descaling programme. Easy to use, calc'nClean provides a thorough clean and rinse, keeping the machine perfectly clean inside.

All our coffee machines have a minimum of 4 pre-set drinks available to select from the display. From the EQ300 models that have the option of Americano, Cappuccino, Espresso and Latte Macchiato all the way through to the top EQ700 model that offers all of these plus 7 more drink options. The Home Connect App allows access to an even wider, ever-growing range of beverage options with coffee world.

Induction, ceramic and gas hobs.

Designed to impress

The Siemens hob range combines stunning design with innovative technology and ergonomic design.

The advanced technology available on the Siemens hobs ensures the cooking experience is as enjoyable as possible, while time-saving features help prepare dishes quickly and effortlessly. With a wide range of styles, sizes and cooking types to suit any needs and kitchen design.

Model shown: ED811BS16E
80cm inductionAir Plus hob

Siemens hob warranties:

studioLine 5 year warranty
A five year warranty is available on all Siemens studioLine hobs listed in this brochure to protect against manufacturing and material faults during this warranty period.

2 year warranty
A two year warranty is available on all Siemens hobs listed in this brochure to protect against manufacturing and material faults during this warranty period.

Raising the stakes

The studioLine hob range is designed with the ambitious home chef in mind.

With its cutting-edge technology, the studioLine hob range gives unparalleled control, flexibility and precision over cooking. Beyond innovation, its sleek, modern look is designed to fit seamlessly into any kitchen, adding a touch of elegance and sophistication. Featuring 90cm, 80cm and 60cm induction hobs variants and 80cm vented hobs, there is an option to fit all requirements. The hob user interface supports the intelligent technology inside with the studioLine exclusive iconic blue light. Matching perfectly the rest of the studioLine appliance range.

Model shown:
EX877NX68E inductionAir Plus hob

Model shown:
EZ977KZY1E freeInduction hob

Experience the freedom of cooking: freeInduction and flexInduction.

The Siemens freeInduction hob offers all the benefits of induction cooking and more. The innovative full surface induction hob allows you to experience a new level of versatility, with total flexibility in size, shape and position of cookware.

With flexInduction, the flexible cooking zone automatically extends to accommodate extra-large cookware (up to 24cm) in diameter. If one zone is not big enough for your cookware, your hob takes control and activates more inductors for even heating. It is also an excellent option for using the Teppan Yaki accessory or griddle plates up to 40cm long.

Model shown:
EX977KXX5E flexInduction hob

cookingSensor Plus ready

Available on selected hobs, the cookingSensor Plus is an intelligent system which precisely measures and keeps the chosen temperature to avoid overboiling of water or milk. The cooktop communicates wirelessly via Bluetooth with the cookingSensor Plus which is attached to the pot, preventing any spilling accidents.

studioLine 5 year warranty

A five year warranty is available on all Siemens studioLine hob appliances listed in this brochure to protect against manufacturing and material faults during this warranty period.

Model shown:
LD98WMM66 glassdraftAir hood with
EZ977KZY1E freeInduction hob

The best of both worlds: inductionAir Plus.

Combining induction technology with powerful extraction, the inductionAir Plus vented hob gives design flexibility for the kitchen, with the added benefit of hasslefree cleaning.

Featuring Siemens state of the art flexInduction technology, studioLine hob sensors under the glass ceramic automatically detect the shape and size of pots and pans and immediately combine or split the cooking zones accordingly. They will also adjust the settings instantly if the cookware is moved.

The blue dual light Slider provides both a statement piece and intuitive control by touch and slide. When activated, the control panel is a visual highlight – when deactivated, it is completely invisible.

Model shown:
LD98WMM66 glassdraftAir hood and
EZ977KZY1E freeInduction hob

Perfect match: glassdraftAir.

The glassdraftAir is designed to fit perfectly to the design of our Siemens hobs. When installed side by side, the transition between the two appliances is practically seamless with the following hobs:

EZ977KZY1E Seamless installation with LD98WMM66 with kit LZ29WWY12
EX977KXX5E Seamless installation with LD98WMM66 with kit LZ29WWY12
EX977NXV6E Seamless installation with LD98WMM66 with kit LZ29WWY12
EX878LYV5E Seamless installation with LD98WMM66B with kit LZ28WWY12
EX877NYV6E Seamless installation with LD98WMM66B with kit LZ28WWY12

Hobs cooking types at a glance

With intelligent technology, elegant design aesthetic and practical yet impressive functionality, Siemens hobs bring excitement and ease when creating dishes.

Ceramic cooking

quickLite hobs

The surface of a glass ceramic hob heats up quickly and conveniently, while also being easy to clean due to the smooth and even surface. The cooking zones glow red when they are on and the temperature can be adjusted precisely, with up to 17 power levels. Siemens highSpeed cooking zones are also optimised for fast cooking and heat up almost instantly.

Model shown: **ET81RBHA1D** (page 134)

Gas cooking

Gas hobs

Tradition meets innovation – with their modern functions, Siemens gas hobs provide enjoyment in cooking like a pro. Low profile, single piece burners on the glass complete the sleek appearance.

Model shown: **ER9A6SB70** (page 138)

Induction cooking

freeInduction hob

The freeInduction technology enables cooking without limits. Up to 6 pots and pans of any shape and size can be placed simultaneously on the hob surface. The flexible induction zone immediately recognises the number, size and shape of the pans and automatically adjusts the cooking zone.

Model shown: **EZ977KZY1E** (page 119)

inductionAir Plus venting hobs

The inductionAir Plus venting hobs provide the freedom to design the kitchen flexibly, with the added benefit of hassle-free cleaning. The innovative design means that the grease filters fit into an entirely detachable liquid tray unit which is designed to completely protect against spillages and over-boiled liquids.

Model shown: **ED851HQ26E** (page 114)

flexInduction hobs

Siemens flexInduction hobs are a must for diverse cooking. The cooking area can be tailored to the user's cooking needs: from using as a traditional induction hob with four or five separate zones – for boiling rice, for example - to linking the zones together to form one zone for larger cooking pans.

With flexInduction Plus, the hob automatically knows how large the cookware is. This provides even heat with the use of an additional central zone if the hob detects that the pan is too large.

Model shown: **EX975KXW1E** (page 126)

Induction hobs

Induction cooking is recognised as being one of the quickest, safest and most efficient methods of cooking available. When a pan with a ferrous or magnetic metal base is placed on the hob, the coil situated below the ceramic surface uses an electromagnetic field to create heat, almost instantly heating the pan. With only the base of the pan heated the cooking zone stays cooler.

Model shown: **ED851HWB1E** (page 129)

Domino cooking

Domino hobs

Domino hobs can be installed alone or side by side with other types of compatible hobs. Domino cooking gives you more cooking options, for example the 40cm wide Teppan Yaki is ideal for combining with other Domino or faceted design cooktops to create a bespoke cooking area.

Models shown: **EX375FXB1E**, **ER3A6AB70**, and **ER3A6BB70** (pages 142-143)

The perfect hob for any kitchen design

A perfect finish suitable for any modern kitchen.

Siemens aim to provide a wide selection of quality hob choices to ensure there is enough variety and colour-ways to choose from to match any kitchen style.

Black glass

Black ceramic glass

Black tempered glass

Stainless steel

Perfectly framed.

Siemens offers a variety of finishes to the hob frame to allow the user to create a specific look or even match the hob to other Siemens products; from stand out premium steel trims to sleek flushline trims that fit neatly in line with the worktop surface.

Premium steel trim

Three sided bevel edge

Flush fit

Front bevel

Frameless

The perfect width.

Our hob range is available in a range of widths to suit specific kitchen design and needs. Our choice of induction hobs come in 60, 80 and 90cm options, gas is available in 60, 75 and 90cm options and venting hobs come in 60, 70 and 80cm options.

Fingers on the pulse of innovation.

TFT touchDisplay
The innovative TFT touchDisplay allows the user to get the most out of the Siemens induction hob. The full colour touch screen is intuitive and easy to use with clear information about the hob's status at all times as well as additional settings that open up new possibilities. The settings for each individual cooking zones can be selected intuitively for easy control. The zones can even be combined when needed for added flexibility – for example, for different sizes of cookware and various accessories. The display screen gives access to a new world of recipes which can help cook the perfect dish in just a few simple steps, complete with images and clear text.

Dual lightSlider
The dual lightSlider offers easy operation and selection of the cooking zones of the iQ700 induction hobs via one neatly arranged interface that illuminates when the hob is turned on. The power level of the cooking zones can be simply adjusted by sliding a finger along the lit scale or selecting the desired power level directly with precise control. When the hob is switched off, the controls are completely invisible for a sleek finish to the kitchen. As there are no protruding parts, cleaning is made even easier.

TFT Control
The TFT Control makes the access and operation of the hob functions easy and ensures good readability from any perspective.

touchSlider
The ergonomic touchSlider sits flush to the appliance, the power level scale can be adjusted to the desired setting at the slide of a finger, with control advances in half-levels from 1 to 9. Alternatively, the desired level can be selected directly for faster adjustments to the cooking zone temperature.

touchControl
Thanks to advanced touchControl technology, Siemens hobs can be operated by simply touching the surface. This means the controls are seamlessly integrated into the surface and make cleaning even easier.

frontControl
Gas hobs with frontControl feature all controls at the front of the appliance for ease of use.

Induction key features

Home Connect Hobs.
Designed to make life easier.

The Home Connect app offers more by connecting together the Siemens intelligent kitchen and unlocking additional features and functions. It is also possible to use the services of different partners – turning the house into a connected home.

The Home Connect app can be used to turn the hob on, or change the cooking power level, while IFTTT can connect our connected hobs to a wider variety of partners including home lighting and music systems.

The status of our appliances can be checked from anywhere using the Home Connect app on a smartphone. No more leaving the house and having to go back and to check if the hob was turned off. Peace of mind is just a click away with Siemens smart hobs and the intuitive Home Connect app. Appliance settings, including on/off status, active cooking zones, child lock implementation and cooking time status can be monitored from anywhere.

A wide range of recipes are available via the app and the cooking and temperature settings can be sent directly from there straight to the hob, perfect for busy evenings. Additional seasonal recipes and extra cooking support can also be found through the App.

cookConnect system

Many functions of the extractor hood can be automated using the Home Connect app. Once the cookConnect system has been set up, the hood will automatically adjust its extraction level depending on the power level of the hob. The hoods lighting can also be adjusted directly from the hob. Get more with Home Connect.

For more information see pages 164 and 165.

Discover more exciting possibilities for a seamless life with Siemens and Home Connect. For more information visit siemens-home.bsh-group.com/uk/homeconnect

Model shown:
EX875KYW1E flexInduction hob with
HZ9FF040 flexInduction 4-piece pan set

Discover the powerful responsiveness of Siemens induction cooking.

powerInduction

Instantly hot. Instantly cooler. With Siemens powerInduction the heat is conducted directly to the pans and their contents via induction coils, without heating the hob. Heat-up times are short, safety is increased and the hob is much easier to clean.

cookingSensor Plus

Once attached to the pot, the cookingSensor Plus interacts with the cooktop, giving a signal when a certain temperature has been reached and keeping it exactly at that level to prevent overboiling.

powerMove

Enables intuitive control by splitting the hob into various zones with different set temperatures (low to high). Depending on the hob it has 2, 3 or 5 different zones.

powerBoost

Increases power by up to 50%. This can save up to 35% of the time it takes to heat up pots or cook large quantities depending on the chosen dish.

fryingSensor Plus

Makes frying easier by automatically maintaining the ideal temperature to ensure the food is cooked just right. Once the preferred programme is selected depending on the type of food to be cooked, a signal will notify when to add oil to the pan and add the food – fryingSensor Plus then takes control. The sensor delivers full precision when frying by keeping the dish at the defined temperature level as soon as this has been reached.

panBoost

This feature heats cookware faster than when using heat setting 9. After 30 seconds, this function automatically switches itself off and reverts back to power level 9.

Combi-Zone

When using larger pots and pans, the Combi-Zone connects two induction zones together to ensure better heat coverage.

Please note: these features are on selected models. For information on model specification, please check pages 87-89.

Explore the science of inductionAir Plus cooking

Model shown:
ED851HQ15E
inductionAir Plus hob

Our best induction hob, evolved: inductionAir Plus

Model shown:
ED851HQ15E inductionAir Plus hob

The Siemens inductionAir Plus system combines cutting-edge induction technology, such as combi zones and powerMove Plus, with sleek, integrated ventilation. Favoured in open plan and compact kitchens, inductionAir Plus hobs give a sense of free-flowing space and light for a more social experience within the kitchen.

inductionAir Plus hob

The inductionAir Plus hob gives more design flexibility when planning a kitchen, with the added benefit of hassle-free cleaning. The innovative design means that the grease filters fit into an entirely detachable liquid tray unit which is made to completely protect against spillages and over-boiled liquids.

How does it work?

All parts of the inductionAir Plus hob are neatly arranged in a liquid tray unit, accessed from the top of the hob. Each part is dishwasher-proof, including the black glass air inlet grid, the 2-in-1 grease filter and the liquid tray. Each part is also separate to save space in the dishwasher.

Protects from spills

As a first layer of protection, the black glass air inlet grid is designed to limit the flow of liquids into the ventilation module. As a second layer of protection, the liquid tray captures up to 200ml from day-to-day cooking and can be easily discarded. In addition, up to 700ml of additional liquid can be held in the liquid safety tank accessed from beneath the appliance, and safe-guarding it from damage.

The perfect fit.

Size flexibility

The inductionAir Plus hob comes in 3 variants of size: 60cm, 70cm and 80cm. This means that, whatever space is available, there is an inductionAir Plus hob that will fit in perfectly.

Installation options

There are 4 different ways to install the inductionAir Plus hob, giving you plenty of options as to how and where to install it.

See page 146 for an outline of installation options and accessory requirements.

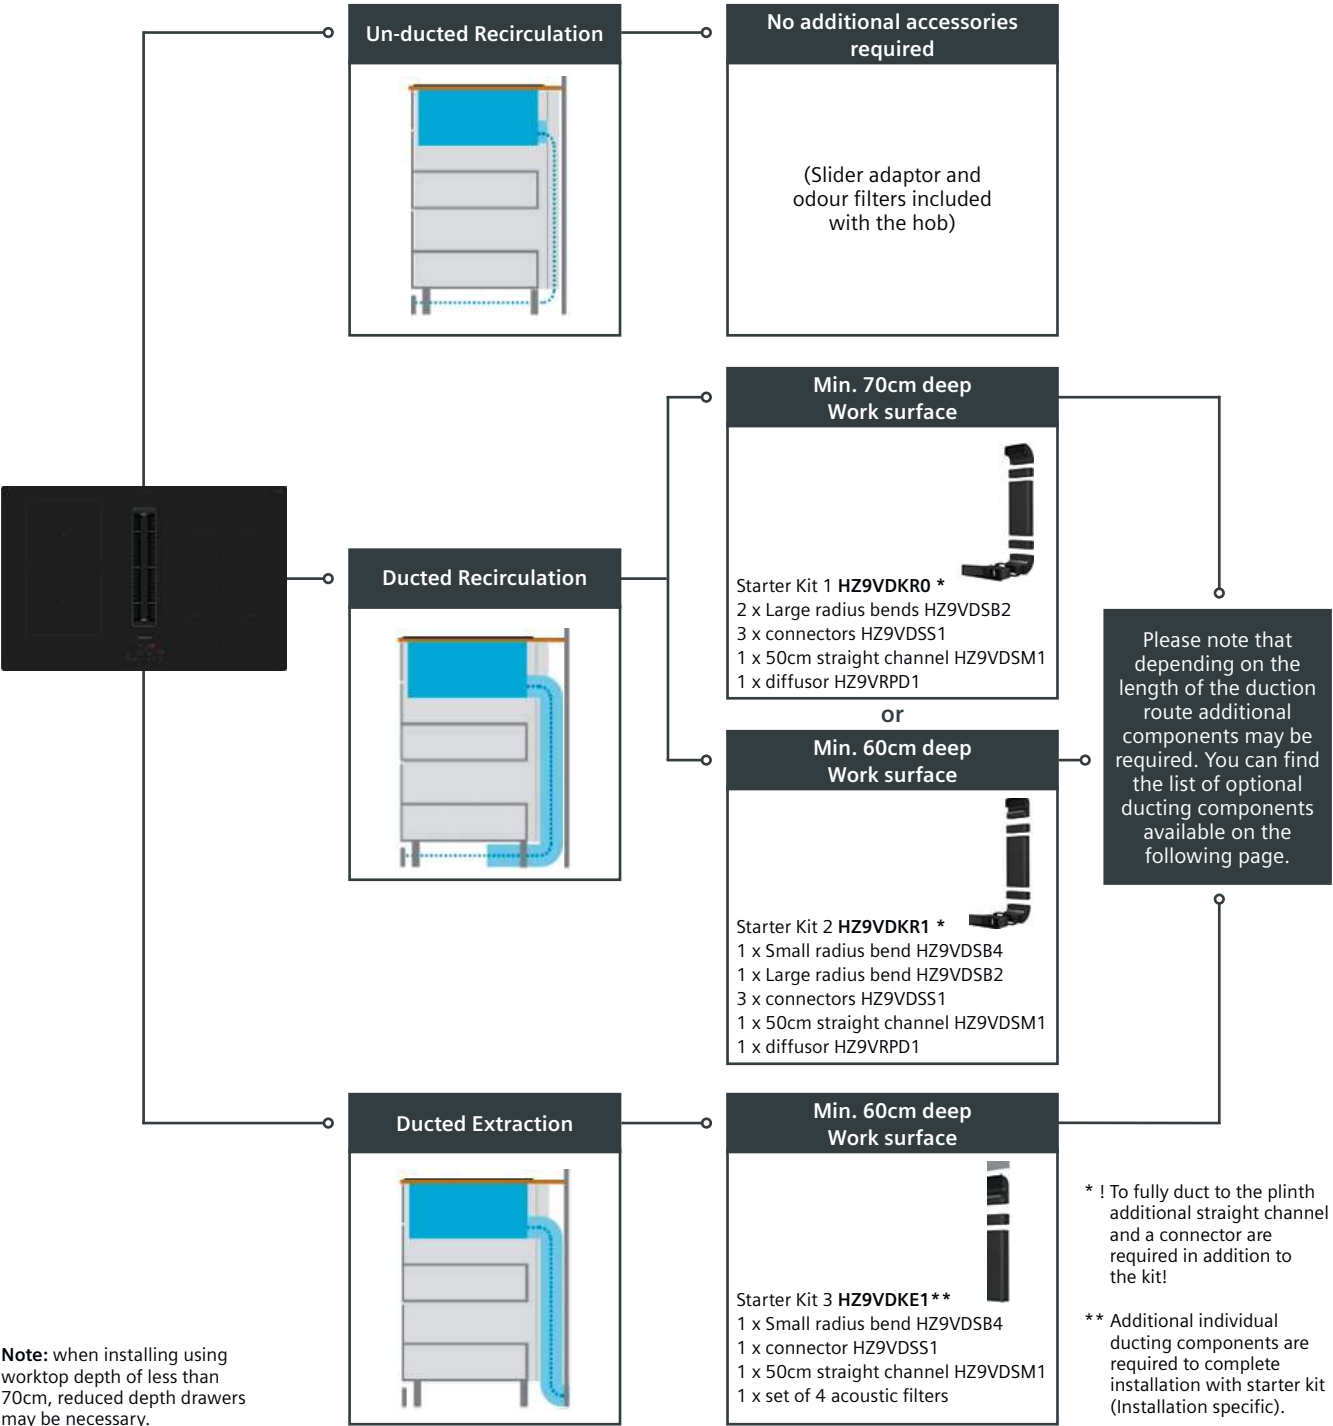

Scan to view
installation options

Venting hobs – installation options

Depending on your chosen extraction route we have created a selection of ducting kits to simplify the installation process.

Select your chosen extraction mode from the options below.

Optional additional individual ducting components		
	HZ9VDSM1	500mm long flat channel ducting section – outlet size 222mm x 89mm
	HZ9VDSM2	1000mm long flat channel ducting section – outlet size 222mm x 89mm
	HZ9VDSB1	Flat channel 90° horizontal bend, for worktop depth minimum 65cm – outlet size: 222mm x 89mm
	HZ9VDSB2	Flat channel 90° vertical bend (large Radius), for worktop depth minimum 70cm – outlet size 222mm x 89mm
	HZ9VDSB3	Flat channel 90° vertical bend (medium Radius), for worktop depth minimum 65cm – outlet size: 222mm x 89mm
	HZ9VDSB4	Flat channel 90° vertical bend (short Radius), for worktop depth minimum 60cm – outlet size 222mm x 89mm
	HZ9VDSS1	Connection piece for use between straight channel ducting components and bends – outlet size: 222mm x 89mm
	HZ9VDSS2	Flexible Connection piece for use between straight channel ducting components and bends – outlet size: 222mm x 89mm
	HZ9VDSIO	Straight Adaptor / Converter flat to round (Ø 150mm) – outlet size: 222mm x 89mm
	HZ9VDSI1	90° Adaptor / Converter flat to round (Ø 150mm) – outlet size: 222mm x 89mm
	HZ9VRPD1	Diffusor for ducted recirculation – outlet size: 222mm x 89mm
	HZ9VRCR1	1 x set of cleanAir Plus recirculation filters

Additional planning notes for vented hob installation

Ducted recirculation using starter kit HZ9VDKR0 for min. 70cm worktop depth

- Install the filters into the hob (included with venting hob)
- Use the adhesive to seal the first bend into the back of the hob
- Discard the telescopic slider piece included with venting hob

Ducted recirculation using starter kit HZ9VDKR1 for min. 60cm worktop depth

- Install the filters into the hob (included with venting hob)
- Use the adhesive to seal the first bend into the back of the hob
- Discard the telescopic slider piece included with venting hob

Ducted exhaust extraction using – Starter kit HZ9VDKE1 for min. 60cm worktop depth

New touchSlider induction hobs. Precision without trying

Our new range of touchSlider induction hobs and angled hoods work tirelessly in the background to remove distractions, eliminate errors and enhance the cooking experience.

Designed for maximum flexibility and control and true to the distinctive Siemens design – our intelligent hobs and hoods make cooking more intuitive, automatically adjusting to the cookware, personalising to the user preferences and automating tasks.

Pure intelligence. Full flexibility.

Siemens' new induction hobs are a natural fit for modern kitchens with their beautiful design with high-quality materials and intuitive touchSlider controls. The range includes a variety of widths – from 60cm to 90cm – with unique design perspectives in every model class. There is a hob to fit each individual style and personal requirements and elevate the kitchen design. The stylish new touchSlider control allows adjustment in increments of half a level at the slide of a finger across the surface.

Designed to simplify the process and prevent errors, the intelligent sensors, flexible induction zones and customisable features make cooking more intuitive, taking the stress out of meal preparation.

Featuring all standard features from the Siemens induction range they include additional features like:

Intelligent hood automatic

The hood matches the fan level to the temperature and power of the hob, allowing to cook from start to finish without ever touching the hood by simply pairing both appliances with the Home Connect app. Intelligent hood automatic is available on all new touchSlider induction hobs in combination with our new iQ300, iQ700 inclined hoods.

fryingSensor Pro

fryingSensor Pro prevents overheating thanks to the intelligent sensors that keep the heat in the pan at a constant temperature while cooking to prevent overheating. Just select the best temperature for the dish from the 11 options available.

Favourite button

The favourite button personalises the cooking experience, with just one tap. When connected to the Home Connect app, the favourite button can be programmed to perform a chosen action. Whether it is activating a specific heat and timer setting, switching on hood lighting, or turning on other connected appliances and devices using IFTTT.

Our hobs are official Red Dot design and innovation award winners.

The Jury said, "This induction hob offers a combination of interface and interaction that is impressive in its logic. Cooking becomes an experience thanks to the constant response of an intelligent surface".

Have it your way with Home Connect.

Intelligent connectivity gives more control, support and freedom. Whether it is getting a notification on a smartwatch when dinner is ready, lowering the heat on the hob via a smartphone or tablet, or asking the smart assistant speaker (Amazon Alexa or Google Assistant) to turn off the hob while the table is being set, Home Connect gives more flexibility and more ways to personalise the kitchen.

Some of the features displayed can be accessed only if the device is connected to a Home Connect Account and a SingleKey ID account via the Internet. Home Connect is a service of Home Connect GmbH. For more information on Home Connect, visit www.home-connect.com/gb/en

flexInduction and induction hobs

Model shown:
EX975KXW1E flexInduction hob

flexInduction, no-compromise cooking at its best.

Siemens flexInduction hobs are a must for diverse cooking. The cooking area can be tailored to individual needs, so it can either be used as a traditional induction hob with separate zones, or by linking the zones together for larger cooking pans. The extended cooking surface can accommodate multiple pans of any size, placed anywhere on the surface at the same time. flexInduction also includes boost settings, automatic pan recognition and touchSlider controls.

Each flexInduction zone houses four innovative elongated inductors beneath the glass, which act independently to detect the presence of cookware on the hob. The individual inductors only work when cookware is detected, whether that is a 10cm milk pan placed in one corner, or a large griddle plate covering the whole zone. With only specific areas active at any particular time, no energy is wasted. And for an even more versatile cooking, the newly designed triple flexInduction hob provides the ultimate in flexible cooking with three flexInduction zones. flexInduction is no-compromise cooking at its best.

With flexInduction Plus, the cooking zones automatically adapt to the sizes of pots and pans of up to 30cm in diameter. If one cooking zone is not sufficient, additional inductors are automatically activated to ensure the heat is evenly applied at all times. flexInduction Plus offers additional flex zones for even larger pans. In 90cm variants an additional flex zone is possible with additional inductors below the hob surface situated in the centre of the hob. For 80cm flexInduction Plus hobs, the left and right zones can be extended further to allow for a larger cooking space. For 60cm flexInduction Plus hobs, no matter which side of the pan goes over, a central zone is automatically added.

Induction cooking

Induction cooking is recognised as being one of the quickest, safest and most efficient methods of cooking available.

When a pan with a ferrous or magnetic metal base is placed on the hob, the coil situated below the ceramic surface uses an electromagnetic field to create heat, almost instantly heating the pan. With only the base of the pan heated the cooking zone stays cooler.

Easier to clean and safer to use, because the ceramic cooking surface is warmed only by the heat transferred back from the cookware and its contents, spillages are less likely to burn on, and there is normally no need to wait for the glass to cool down before simply wiping it over with a cloth, there is some residual heat from the cooking process but there is a reduced risk of burning on high temperatures from the hob surface. And if the induction hob is turned on without a pot or pan being placed on it, the hob itself will not heat up which reduces the risk of getting burnt.

Black glass finish

Our stunning induction hobs feature a black glass finish and bold displays. Our stylish collection mimicks the aesthetics of our built-in ovens and microwaves so our kitchen appliances can truly complement one another.

Model shown:
EX875KYW1E
flexInduction hob

Gas hobs

key features

High performance, high speed.

Tradition meets innovation – with their modern functions, Siemens gas hobs provide enjoyment in cooking like a pro. Our top-of-the-range models feature beautiful and durable black ceramic glass hob bases, with cast iron pan supports for a contemporary look. They are designed to coordinate with other appliances in the iQ700 range, and can be combined seamlessly with iQ700 domino and electric hobs. Low profile, single piece burners on the glass complete the sleek appearance.

stepFlame technology
Introducing the ground-breaking innovation in gas hobs: stepFlame. Offering 9 precise power levels to provide the same level of control than with an electric hob, but with gas - removing all guesswork. Whatever the level selected, the exact heat and the flame size needed is provided to achieve the precise results. It is just as easy to operate as it sounds, so conjuring up delicious meals is now easier than ever.

Cast Iron
Cast iron pan supports are designed to withstand even the heaviest of pots and pans and provide a sleek finish to each hob. All can be removed for easier cleaning and iQ700 models have dishwasher safe pan supports.

Power Level Display with residual heat indicator
Together with the new stepFlame technology, selected gas hobs feature an LED display which clearly shows the selected power level at a glance. For added safety, the LED display also shows whether there is any residual heat from the hob indicated by a capital 'H' for hot and a lower case 'h' for warm.

Wok burner
Siemens gas hobs feature wok burners that deliver 3.3kW, 4.0kW, 4.2kW, 5.0kW or 6.0kW of power depending on the model, meeting the increasing demand for high speed cooking. But it is not just about power; they can be turned down to just 0.3kW – perfect for simmering. For the ultimate in flexibility, our 6.0kW and 5.0kW burners are dual control – the inner and outer flame rings can be adjusted independently via a single control.

Dishwasher proof
All gas on ceramic glass models feature pan supports that are treated with a special coating which resists discolouration and the damaging effects of a dishwasher.

Hob accessories

For additional cooking flexibility Siemens provide a range of accessories for our flexInduction, gas and domino hobs.

flexInduction hob Accessories

Pan sets
This new range of induction pans are designed to work perfectly with induction and flexInduction hobs. The rectangular shape fits perfectly to the induction zones and the pans are all oven-proof up to 220°C with a non-stick coating so that food cooks perfectly while also being easy to clean. They are also easy to stack to maximise storage space.

4-piece set
HZ9FF040

(Consists of 1 x Flex Pan large, 1 x Flex Pan medium and 2 x Flex Pan small with lids)

3-piece set

HZ9FE280

Six piece pan set
HZ9SE060

OPTIONAL ACCESSORIES FOR DOMINO HOB	
CookingSensor Plus Wireless temperature sensor for cookingSensor Plus ready models	HZ39050
Connecting strip for use with side trim hobs	HZ394301
Flex Pan Set 4 pcs. Perfect universal pans for the FlexZone.	
Consists of 1 x Flex Pan large, 1 x Flex Pan medium and 2 x Flex Pan small with lids	HZ9FF040
Flex Pan Set 3 pcs. Perfect universal pans for the FlexZone.	
Consists of 1 x Flex Pan large, 1 x Flex Pan medium and 1 x Flex Pan small with lid	HZ9FF030
Flex Pan large approx. 35 x 22cm. Perfect universal pan for the FlexZone	HZ9FF010
Teppan Yaki approx. 34 x 20cm. Perfect for the FlexZone	HZ9TY010
Four piece pan set, suited for induction, radiant ceramic and gas.	
Consists of 1 x sauté pan, 2 x pots with lids and 1 x milk pan	HZ9SE040
Six piece pan set, suited for induction, radiant ceramic and gas.	
Consists of 2 x sauté pan, 3 x pots with lids and 1 x milk pan	HZ9SE060
Cast iron non-stick frying pan, suited for induction, base diameter 185mm	HZ9FE280
BergHOFF three piece induction pan set	HZ9SE030
Griddle plate, approx. 40x20 cm for use with flexInduction	HZ390522
Teppan Yaki, approx. 40x20 cm for use with flexInduction	HZ390512
Oval roasting dish with lid for use with induction hobs	HZ390011

Cooking without limits - freeInduction

The innovative full surface induction hob allows users to experience a new level of flexibility. The 48 micro inductors positioned beneath the sleek ceramic surface allow to cook without the restriction of traditional cooking zones.

Up to four pots and pans can be placed anywhere on the surface, the induction hob then automatically detects the size and shape of the cookware, and delivers the heat exactly where it is needed. Its unique activeLight gives helpful intelligent visual feedback.

SAFETY FEATURES	
Ignition via control dials	■
Flame failure safety device	■
PERFORMANCE / TECHNICAL INFORMATION	
Maximum gas power output load (A)	13,800
Nominal voltage (V)	220-240
Total connected electrical load (max. W)	1.1
Cable length (cm)	150
GB plug	–
Left burner power (kW)	6.10
Front left burner power (kW)	–
Rear left burner power (kW)	–
Centre/Centre front burner power (kW)	1.90
Centre back burner power (kW)	1.10
Rear right burner power (kW)	2.80
Front right burner power (kW)	1.90
Right burner power (kW)	–
Pre-set for natural gas	■
CE Marked	■
STANDARD ACCESSORIES	
Wok stand ⁵	■
LPG jets	28-30 / 37mbar

■ Yes, model has this feature. – Feature not available for this model.
All models comply with COMMISSION (EC) No. 1275/2008 with regard to ecodesign requirements for standby and off mode electric power consumption.

¹Dual circuit means standard outer flame ring plus 2nd inner flame ring.
²High power output for rapid heating – especially valuable for flash and wok frying.
³Dual control means the inner and outer rings of a dual circuit burner can be controlled independently.
⁴Pan supports can be cleaned in the dishwasher. Supports have special additional coating and hand finishing of enamel.
⁵For round based pans.

Data valid in this table as of April 2024. Subject to modification without prior notice.

Domino hob combination installation

Below are diagrams showing the possible combinations for installing your Domino hob

L	X
392	662
602	872
812	1082
912	1182

When installing a Domino unit right next to a hob, an assembly kit (HZ394301) is required.

L	X
302	572
392	662

When installing two or more Domino units side-by-side, one or more assembly kits are required (2 units = 1 assembly kit, 3 units = 2 assembly kits, etc).

L	X
302	874
392	964

When installing two or more Domino units side-by-side, one or more assembly kits are required (2 units = 1 assembly kit, 3 units = 2 assembly kits, etc).

L	X
392	964
602	1174
812	1384
912	1484

When installing two Domino units right next to a hob, two assembly kits (HZ394301) are required.

If two or more elements are installed right next to one another, one or several installation kits are required (2 elements 1 installation kit, 3 elements 2 installation kits, etc.).

Cutout dimension (X) depending on the combination see table:

Outstanding performance, intelligently designed

The kitchen is the heart of the home. Not only is it a place to cook, it is also a place to entertain, relax after a hard day's work, or spend time with friends and family.

Our range of hoods offer sleek designs and innovative features to elevate the kitchen. From ceiling hoods to glassdraftAir hoods, we have stylish options to suit any taste. The quiet and energy efficient motors, available on some Siemens hoods create a comfortable cooking environment.

Siemens hoods keep the kitchen space fresh, and air cleaner whilst also providing ambient lighting. Browse through intelligent ventilation solutions for all kitchen designs. Our venting hobs with inductionAir Plus combines an advanced induction hob with a high-performance extractor for even clearer views in the kitchen. See the hobs section for details on the inductionAir Plus (pages 98-99).

Advanced ventilation with a stylish design

Introducing studioLine worktop solutions

studioLine

studioLine 5 year warranty

A five year warranty is available on all Siemens studioLine ovens and compact appliances listed in this brochure to protect against manufacturing and material faults during this warranty period.

Model shown:
LD88WMM66B glassdraftAir hood

glassdraftAir hoods: A perfect blend of elegance and functionality.

With a sleek and modern design, the studioLine glassdraftAir hoods add a touch of sophistication to any kitchen. This advanced ventilation system ensures efficient airflow, keeping the kitchen environment fresh and comfortable. It seamlessly integrates into the kitchen design, enhancing the aesthetic appeal while providing optimal performance. Guided Air technology, one of the intelligent features on this ventilation solution, creates an air curtain behind the glass, improves airflow and ensures optimal and quiet extraction performance across all cooking zones.

For a seamless look the glassdraftAir can be combined with the hobs below:

The LD98WMM66 can be combined with the iQ700 EZ977KZY1E freeInduction hob, the iQ700 EX977KXX5E flexInduction hob or the iQ700 EX977NXV6E flexInduction hob using the LZ29WWY12 seamless installation kit.

While the LD88WMM66B can be combined with the iQ700 EX878LYV5E flexInduction hob or EX877NYV6E flexInduction hob using the LZ28WWY12 seamless installation kit.

Set the mood with emotionLight Pro
emotionLight Pro, exclusive to studioLine hoods, enhances the kitchen's style and creates the perfect ambience with fully dimmable LED lights in a variety of captivating colours.

Whatever the preference – a warm and cosy ambience with soft tones or a bold statement with vibrant hues, emotionLight Pro allows customisation of the lighting to suit any mood and style. Experience the versatility and visual impact of this innovative feature and transform the kitchen into a space that reflects unique personalities and design preferences.

Venting hobs: Double efficiency and functionality in one appliance.

Introducing studioLine inductionAir Plus hobs – where cutting-edge technology meets sleek sophistication. With unparalleled control, flexibility, and precision over cooking and ventilation, these venting hobs are designed to elevate culinary experience to new heights. This worktop ventilation solution is perfect for open plan living or for customers who desire a seamless integration of the hob and the hood in one appliance. Say hello to an intelligent kitchen that exudes elegance and style.

Model shown:
EX877NX68E inductionAir Plus hob

Installation solutions for every kitchen

Worktop installation.

glassdraftAir and inductionAir Plus ventilation.

The perfect solution for keeping kitchen designs clear and with unhindered sightlines. The stylish glassdraftAir premium glass panel retracts fully into the unit when not in use. When in operation, its unique transparent design adds a subtle highlight to the kitchen, while its innovative Guided Air technology guarantees excellent performance from all cooking zones.

For seamless installation combine the LD98WMM60B glassDraft Air with the EX975KXW1E or EX975LVV1E flexInduction hobs using the LZ29WWY12 seamless installation kit.

The perfect combination of innovation and functionality. These appliances offer double the efficiency and convenience by integrating a cooktop and ventilation system into one product. Ideal for kitchens with limited space or for customers seeking a clean and unique look.

Hood installation options

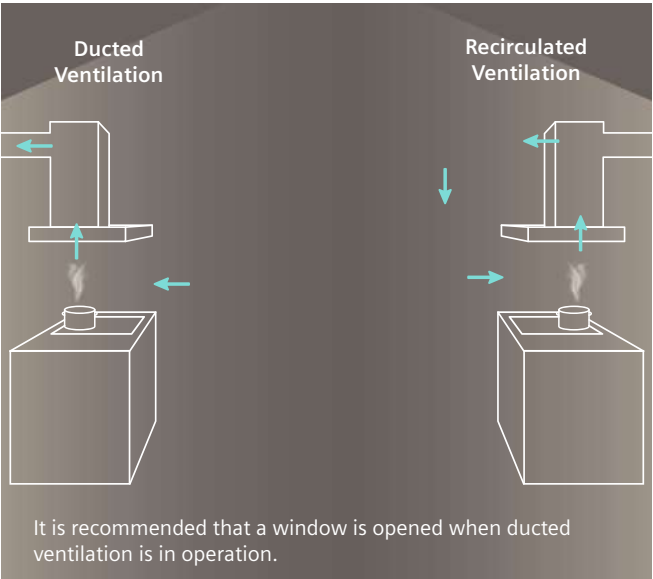

Ducted or recirculated?

For optimum performance, the extractor hood should be ducted to the outside of the house, so that the extracted air is vented outside. But sometimes this is not practical, so most Siemens hoods can also operate in recirculating mode; where the air is passed through a metal filter to remove grease, and then through a carbon filter to remove odours before being directed back into the kitchen.

Although the extraction rate is usually slightly lower when using this method than ducted extraction and the carbon odour filter will need to be replaced, recirculating the air offers an energy efficient benefit; cool air is retained in the home in the summer and warm air does not vent out during winter months.

- Ducted Ventilation**
- Extracts steam and odours
 - Effective planning of ducting system required

- Recirculated Ventilation**
- Removes over 90% of odours with cleanAir filters
 - Easy to install – no ducting required
 - Separate recirculation kit required

The power to perform.

A great hood must be powerful enough to effectively remove moisture and cooking odours from a kitchen. We recommend the hood should be able to change the air in the kitchen 6-12 times per hour. Using this quick calculation, you can check whether a hood is sufficiently powerful. Firstly, calculate the volume of the kitchen (HxWxD metres). Next multiply that figure by 12. The resulting figure is the ideal extraction rate required in intensive mode. Match this to a lower power level on the hood to avoid having to run at full power for increased efficiency.

FOR EXAMPLE

Room: 4m x 4m x 2.5m = 40m³

12 changes per hour in intensive operation: 12 x 40m³ = 480m³/h

So the hood must achieve >480m³/h in intensive mode.

Recirculation filters.

				
standard high performance or regenerative	STANDARD ODOUR FILTER	CLEANAIR FILTER*	CLEANAIR PLUS FILTER*	LONG LIFE REGENERATIVE FILTER*
Lifetime	6-12 months	6-12 months	12 months	10 years
Benefits	Simple installation, Anti-fish treatment	Increased surface area, Up to 3dB (A) sound reduction, improved extraction and performance, Anti-fish treatment	Anti-pollen functionality: the filter retains 99% of airborne pollen and deactivates allergens which are retained by the filter. Increased surface area, Up to 3dB (A) sound reduction, improved extraction and performance, Anti-fish treatment	High odour reduction, Up to 3dB (A) sound reduction, Regenerated in the oven every 4 months recommended (2 hours, 200°C), Improved extraction performance

*CleanAir and Regenerative filters are not available for all styles of hood. Additional module may be required to house the filter. Images for example only, different filters may come in a different size and style.

State-of-the-art efficiency with the iQ drive motor.

Siemens hoods feature innovative technology that saves energy. This is thanks to the highly efficient, durable brushless iQdrive motor which is powerful, but requires very little energy to run. Capable of handling odours and grease in the most challenging cooking situations, and specially designed to last longer. The brushless iQdrive motor at the heart of our selected hoods is capable of extracting a measured value of up to 1007m³/h in our most powerful hood*.

*LC91KLT60B

Intelligent angled hoods, clean air and quiet moments

Our new range of iQ300 and iQ700 angled hoods and touchSlider hobs work tirelessly in the background to remove distractions, eliminate errors and enhance the cooking experience.

Designed for maximum flexibility and control, and true to the distinctive Siemens design – our intelligent hobs and hoods make cooking more intuitive by automatically adjusting to the cookware, adapting to user preferences, and automating tasks. When cooking, greasy fumes and loud noises can make it difficult to concentrate or have a conversation. The powerful, quiet and energy-efficient angled hoods allow delicious meals to be prepared, free from disturbance.

intelligent hood automatic
The hood matches the fan level to the temperature and power of the hob, empowering consumers to cook from start to finish without ever touching the hood. Simply pairing both appliances with the Home Connect app allows users to benefit from this automated cooking feature. Intelligent hood automatic is available on all new touchSlider induction hobs in combination with our new iQ300, and iQ700 angled hoods.

Favourite button
The favourite button personalises the cooking experience, with just one tap. When connected to the Home Connect app, the favourite button can be programmed to perform a chosen action. Whether it is activating a specific heat and timer setting, switching on hood lighting, or turning on other connected appliances and devices using IFTTT.

iQdrive
Thanks to the low-friction mechanics of the iQdrive motor, the iQ300 and iQ700 angled hoods are not only extremely powerful and durable, but virtually silent too. The same level of performance for extraction and quietness can be achieved in both recirculation and exhaust modes.

climateControl Sensor: iQ700 hoods
The climateControl Sensor in the hood detects steam and odours and adjusts the extraction rate precisely as needed, switching off once cleared. This ensures the air in the kitchen stays grease and odour free, in the most energy efficient way.

LED Lighting
The cooking area can be personalised depending on mood or preference with the LED Lighting Temperature. The hoods lights can be adjusted to the desirable warmth or coolness without having to sacrifice on lighting quality. An array of colour temperatures between warm white (2700k) and cool white (500k) can be selected via the hoods settings in the Home Connect app.

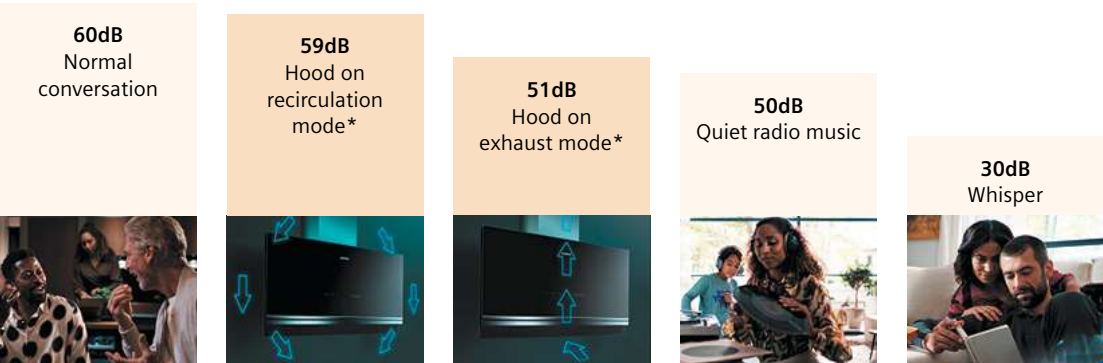

Have it your way with Home Connect.
Intelligent connectivity gives more control, support and freedom. Whether it is getting a notification on a smartwatch when dinner is ready, lowering the heat on the hob via a smartphone or tablet, or asking the smart assistant speaker (Amazon Alexa or Google Assistant) to turn off the hob while the table is being set, Home Connect gives access to more flexibility and more ways to personalise the kitchen.

Some of the features displayed can be accessed only if the device is connected to a Home Connect Account and a SingleKey ID account via the Internet. Home Connect is a service of Home Connect GmbH. For more information on Home Connect, visit www.home-connect.com/gb/en

Completely automatic ventilation

Control two appliances with one.

Experience a new level of cooking efficiency with our intelligent features that effortlessly connect the hob and the hood, creating a seamless cooking experience.

cookConnect system

Control the hood's power levels and lighting directly from the hob after pairing both appliances via Home Connect. On top of this, once the hob is switched on, the hood will start automatically.

climateControl sensor

The climateControl sensor automatically adjusts the power level of the hood depending on the level of steam and odours in the air – keeping the kitchen fresher without having to manually adjust the power. The climateControl Sensor is activated by selecting the 'auto' button.

Intelligent Hood Automatic

Experience seamless interaction between the hob and the hood. By pairing both appliances with the Home Connect app, automated cooking and ventilation solutions are enjoyed. The hood adjusts its fan level based on the hob's output, eliminating the need for manual control. This intuitive feature is available on our new touchSlider induction hobs, with iQ300 and iQ700 angled hoods. The hob and the hood communicate throughout the cooking process, enabling the hood to automatically adjust the extraction rate as heat is added or removed. However, manual adjustment of the fan speed and light settings is still available. Once cooking is complete, the hood switches to the automatic after run function, which can be customised through the Home Connect app.

Model shown left and above:
LC91KLT60B angled glass chimney hood

Hood key features

Model shown:
LC67KFN60B angled glass chimney hood

Smart hoods make cooking a breeze.

Home Connect

Experience more versatile ways of cooking with Siemens hoods that have Home Connect. Easily control the lighting, power level, and run time of the hood via a smartphone, tablet or smartwatch.

Take connected cooking a step further to control hood settings with Amazon Alexa voice control. For example, ask Alexa how to clean the filter, set the ambient lights or start extraction. All these features also work with Google Home, making it simple to control appliances in every kitchen. With the Home Connect app, the climateControl sensor can be activated so that the hood's extraction rate automatically adjusts depending on the level of steam and odours in the kitchen.

The cookConnect system enables connection of the hob and the hood through the Home Connect app for more convenient control. This feature allows hood settings to be changed from the hob, so there is complete control from just one appliance.

Other lighting options.

LED Illumination

All Siemens hoods are equipped with state-of-the-art LED lighting, ensuring the hob is illuminated evenly and clearly.

softLight with Dimmer

Allows dimming of the hood lights. Perfect for when cooking is finished and a subtle glow in the kitchen is desired.

Controlling your hood.

Home Connect and voice control

Activate and control connected hoods by using the Home Connect app or via voice control with Amazon Alexa or Google Home to take the connected cooking experience to the next level.

touchControl

The design of touchControl is integrated into the black glass panel for easy control at the touch of a button. Its sleek design is not only aesthetically pleasing but also enables easy cleaning.

cookConnect system

Control the hood's power levels and lighting directly from the hob after pairing both appliances via Home Connect. On top of this, once the hob is switched on, the hood will start automatically.

touchSlider

Stunning design meets sleek control with touchSlider. Control Siemens hoods with ease by simply sliding a finger along the touchSlider to select the power level.

Model shown: LC97BHM50B touchControl

Other product features.

Hood Width

Siemens offers a wide range of hoods to fit different sized spaces. For optimal results, the cooker hood should be at least as wide as the hob. Our hood widths range from 370-520mm.

Energy efficient hoods*

Siemens hoods feature innovations that make them incredibly energy efficient to run, from our durable and quiet brushless iQdrive motor to LED lighting.

*For individual product energy efficiency ratings please check individual product specifications.

Intensive setting

The intensive setting creates a powerful boost of extraction, perfect for tackling demanding dishes such as stir fry or steamed vegetables. This ensures moisture is properly eradicated without misting windows and the kitchen air is kept fresh.

Interval Operation

With interval ventilation, the hood switches on automatically at the lowest level for 10 minutes every hour, to keep the air in the kitchen refreshed. The interval ventilation switches off after 24 hours.

Automatic after running time

This convenient feature reduces cooking odours by allowing the extractor to carry on running automatically after cooking has finished. It will run at a low speed for 3-30 minutes – the duration the extractor carries on for depends on the model.

Filter Saturation Indicator System

The filter saturation indicators use an illuminated symbol on the hood to show when the hood's grease filters need to be cleaned. For hoods installed with a recirculation filter, the saturation indicator will also signal when the recirculation filter should be replaced or regenerated (depending on type of filter installed).

Width (mm)		792	
Control position / Control type		Front / Blue Dual lightSlider	
Style		TopFrame without front bevel (Frameless flushline installation)	
KEY FEATURES			
Home Connect		■	
Integrated extractor		■	
cookingSensor Plus ready¹		HZ39050 required	
fryingSensor Plus settings for hob		5 levels	
Favourite Button		–	
Automatic extraction		Fully sensor based	
Number of flexInduction zones		2	
Number of combiZones		–	
HOB FEATURES			
Number of individual zones / Power levels		4 / 17	
powerBoost / powerMove Plus		■ / 3 stages	
panBoost		■	
Adaptable volume / Energy consumption display		– / ■	
Keep warm function		■	
quickStart / Quick stop (Quick switch-off)		■ / –	
file flexMotion / reStart xMotion		■ / ■	
Demo mode		■	
Dish categories/setting recommendations		■	
Wipe protection function (Control panel pause)		■	
SAFETY FEATURES			
Residual heat indicator / Pan recognition		■ / ■	
Childproof lock / Favourite button		■ / –	
Countdown timer / Count up timer		■ / ■	
Safety time switch off / Main on/off switch		■ / ■	
HOOD FEATURES			
climateControl sensor / Metal grease filter		■ / ■	
Power levels		17 + 2 Intensive	
Automatic intensive revert setting		6 minutes	
Automatic or manual control		■	
Automatic after running: Extraction / Recirculation		12 / 30 minutes	
Interval operation		■	
Dishwasher safe grease filter cassette with spillage collection		Yes - 200ml capacity	
Dishwasher safe spillage overflow collector		700ml capacity	
Electronic grease filter / cleanAir filter saturation indicators		■ / ■	
PERFORMANCE / TECHNICAL INFORMATION – HOB			
Maximum power output (W)		7,400	
Nominal voltage (V)		220-240	
Electrical cable length (cm)		110	
Rear left zone - power (kW) / dimensions (mm)		2.20	200 x 240

Front right zone - power (kW) / dimensions (mm)		2.20	200 x 240
flexInduction zone left - power (kW) / dimensions (mm)		3.30	400 x 240
flexInduction zone right - power (kW) / dimensions (mm)		3.30	400 x 240
combiZone left - power (kW) / dimensions (mm)		–	–
combiZone right - power (kW) / dimensions (mm)		–	–
Rear left zone / Rear right zone - with powerBoost (max. kW)		3.70 / 3.70	
Front left zone / Front right zone - with powerBoost (max. kW)		3.70 / 3.70	
PERFORMANCE / TECHNICAL INFORMATION – EXTRACTOR			
Extractor energy efficiency rating		B	
Extraction rate in m³/h ^(1,2)			
– ducted / recirculating power level minimum		154 / 132	
– ducted / recirculating power level maximum		500 / 499	
– ducted / recirculating power level intensive		622 / 595	
Noise level (sound power) based on dB[A] re 1pW ^(1,3)			
– ducted / recirculating power level minimum		42 / 41	
– ducted / recirculating power level maximum		69 / 68	
– ducted / recirculating power level intensive		74 / 72	
Motor power (W)		170	

■ Yes, model has this feature. – Feature not available for this model.
All models comply with COMMISSION (EC) No. 1275/2008 with regard to ecodesign requirements for standby and off mode electric power consumption.
¹ Max 3 sensors at any time; one WSP provided. ² Air flow and noise declarations made in line with CECED Code Of Conduct. ³ Sound power measured according to EN60704–3 on largest pipe diameter.
Data valid in this table as of April 2024. Subject to modification without prior notice.

Core Hoods and Venting Hobs

product overview

2 year warranty
A two year warranty is available on all Siemens hood appliances listed in this brochure to protect against manufacturing and material faults during this warranty period.

Model shown: LD98WMM60B glassdraftAir hood

The finishing touch for your kitchen.
Now with flexible installation.

Extract cooking smells at source with the iQ700 glassdraftAir hood, ideal for keeping the sightlines of open plan kitchens. Conveniently placed within the worktop, this elegant hood can be automatically raised when needed, then disappears at the touch of a button. There is no need to worry about losing storage space beneath as the motor can be placed somewhere more convenient with the remote installation kit.

The Siemens Remote Motor Installation Mounting Kit (LZ21WWM11) frees up space under the worktop and provides the option to mount the motor up to 3 metres away from the appliance. Image for illustrative purposes only. Ducting not supplied.

Full range of technical diagrams for seamless installation can be found online at siemens-home.bsh-group.com/uk

Scan to view
installation options

A: Installation of motor unit on front/rear or offset laterally with max. 3 m clearance (special accessory required)

Motor unit must always be accessible

B: 5.5 mm

Planning recommendation, air recirculation

A: Exterior wall – U-value $\leq 0.5 \text{ W/(m}^2\text{K)}$

Standard installation: Partially laid around the toe kick

B: Exterior wall – U-value $> 0.5 \text{ W/(m}^2\text{K)}$

Installation with fully laid pipework to the toe kick for poorly insulated exterior walls or above cold floors

Combination with electric hob

Combination with gas hob is not possible

To prevent power loss, observe the following:

- Do not install upper cabinets above the appliance
- Clearance of open shelf elements above the appliance min. 650 mm (recommended)
- Left/right clearance between appliance and wall/adjacent upper cabinet min. 500 mm
- Clearance between appliance frame and wall min. 50 mm

Combination with electric hob Seamless, top-mounted installation

A: Worktop overlap to kitchen cabinet

Combination with gas hob is not possible

To prevent power loss, observe the following:

- Do not install upper cabinets or open shelf elements above the appliance
- Left/right distance between appliance and wall/adjacent upper cabinet min. 500 mm
- Distance between appliance frame and wall min. 50 mm

Combination with electric hob Standard, top-mounted installation

Standard: with worktop divider between downdraft and hob

Combination with gas hob is not possible

To prevent power loss, observe the following:

- Do not install upper cabinets or open shelf elements above the appliance
- Left/right distance between appliance and wall/adjacent upper cabinet min. 500 mm

Combination with electric hob Seamless, top-mounted installation

A: Worktop overlap to kitchen cabinet

Combination with gas hob is not possible

To prevent power loss, observe the following:

- Do not install upper cabinets or open shelf elements above the appliance
- Left/right distance between appliance and wall/adjacent upper cabinet min. 500 mm

Standard, top-mounted installation

Standard: with worktop divider between downdraft and hob

A: $\geq 20 \text{ mm}$ between the Guided Air suction area and a cabinet wall
B: $\geq 60 \text{ mm}$ for air recirculation

$\geq 100 \text{ mm}$ for air extraction with ducting in the plinth

C: Motor unit must always be accessible

Seamless, top-mounted installation (Special accessory required)

A: Worktop overlap to kitchen cabinet

B: $\geq 20 \text{ mm}$ between the Guided Air suction area and a cabinet wall

studioLine

Personalised cooling, aCool Modular refrigeration

Intelligent cooling from studioLine.

The studioLine aCool range offers the perfect level of personalisation with seamless design. Everything can be adjusted to meet the user's lifestyle and needs. Thanks to the modular concept, these cooling solutions offer endless possibilities to meet the highest demands. aCool can be combined without any restrictions, and as individually as needed. Attention to detail and high-end quality is apparent in every feature of this range.

The appliances can be customised even further with our optional stainless steel door panels and handles or they can complement the rest of the kitchen furniture instead by mounting panels to the door, matching the kitchen furniture design.

Mix and match from a selection of multi-door fridge freezers, fridges, freezers and wine coolers to create a bespoke cooling solution – all with 5 year warranty.

aCool

Siemens aCool warranties:

5 year warranty

A five year warranty is available on all Siemens aCool appliances listed in this brochure to protect against manufacturing and material faults during this warranty period.

Compressor Drive 10 Year Warranty

Available on selected Siemens built-in fridges and fridge freezers, this warranty covers defects in the compressor motor.

To find out more about warranty and for registration, please visit:
siemens-home.bsh-group.com/ie/customer-service/warranty

studioline

An exceptional solution awaits...

These appliances can easily become a part of a side-by-side arrangement.

Delivering big when it comes to creating cooling spaces. With appliances usually coming in two different sizes, allowing more configuration possibilities.

Position the appliances to suit every need. Whichever and however they are required.

Depending on the chosen arrangement additional installation accessories are required. Please follow the rules below to order the correct ones:

- If the appliances are installed handle to handle you will need a side-by-side installation kit.
- If the appliances are installed handle to hinge you will need a heating kit.
- If the appliances are installed hinge to hinge you will need a heating kit.

Please note when the spacing between appliances is over 160mm the kits are not required.

Accessories

- CI60Z200 Heating kit
- CI60Z000 Installation kit for side-by-side installation (without heating kit)

Models shown:

FI30NP33 (left) freezer installed side-by-side with
CI30RP02 (right) fridge using side-by-side kit fridge freezer

A modular system providing endless possibilities

studioLine

Build an individual cooling zone with studioLine aCool cooling appliances and experience space, sophisticated design and performance wrapped up in one.

Freezer and fridge

Experience the traditional side-by-side combination with a difference, with an aCool freezer and fridge, available in both a smaller or larger widths to suit all needs.

Wine cabinet and multi-door fridge with bottom freezer drawer

Choose the ideal combination, like a Siemens wine cabinet and a fridge right next to each other.

Wine cabinet, fridge and freezer

Combine everyone's needs in one place to make an outstanding visual and practical statement. Mix and match wine cabinet, fridge and freezer by placing them side-by-side and create a tailored set that meets all expectations.

Wine cabinet and fridge with bottom freezer drawer

In combination with a studioLine wine cabinet, the fridge with bottom freezer could be the right solution. A 'grand opening' to enjoy every day.

Experience wine at its best

The studioLine aCool wine cabinets are designed to provide ample room for bottles of wine and optimal storage conditions to help maintain their quality. From the adjustable humidity feature, which ensures the right level of humidity to prevent cork brittleness or the growth of mould, to the independently adjustable temperature zones, allowing storage of red and white wines at their ideal temperature.

The cabinet door is equipped with UV-protection glass to prevent damage from sunlight while the oak shelves not only display wine bottles in an attractive way but also protect them and their labels from scratches. The low vibration technology makes storage safer and particularly quiet. With premium LED lighting, you can display the bottles of wine in the best light without affecting the temperature in the cabinet.

aCool technical diagrams

Fridge freezer CI36TP02

Scan to view how
to install Siemens
aCool appliances

A: Area for installation of power connection.
B: Area for running the water line. It is recommended that the waterbox is placed adjacent to the installation cavity, so that it can be accessed for service without uninstalling the appliance. If this is not possible, place the recessed waterbox adjacent to the water supply socket elevated at the heights as referenced in areas A and B.
C: Recess depth depends on kitchen design. For a flush installation, the depth needs to be at least 24 inches plus the thickness of the door panel.
Stainless steel models contain a panel-ready base unit, ready-to-install stainless steel door(s) with a right or left door swing and handle(s).

* Depends on the thickness of the unit door.
3/4" (19 mm) refers to the stainless steel door. (Special accessory.)

Single door freezer FI24NP33

** Door handle must be added to this measurement

* Depends on the thickness of the unit door.
3/4" (19 mm) refers to the stainless steel door. (Special accessory.)

A: Area for installation of power connection.
B: Area for running the water line. It is recommended that the waterbox is placed adjacent to the installation cavity, so that it can be accessed for service without uninstalling the appliance. If this is not possible, place the recessed waterbox adjacent to the water supply socket elevated at the heights as referenced in areas A and B.
C: Recess depth depends on kitchen design. For a flush installation, the depth needs to be at least 24 inches plus the thickness of the door panel.
Stainless steel models contain a panel-ready base unit, ready-to-install stainless steel door(s) with a right or left door swing and handle(s).

Intelligent cooling appliances for long lasting freshness

Siemens built-in cooling appliances provide the ultimate way to store food flexibly and correctly for optimum freshness.

From our smallest built-in fridge to our most impressive, each appliance brings more freshness and convenience. Siemens cooling appliances offer combinations for every individual requirement, taste and kitchen design. Siemens built-in fridges, freezers and wine coolers come in a wide range of models offering full flexibility when planning a kitchen.

Model shown: KI86NHFE0 fridge freezer

Built-in
Cooling

Siemens built-in cooling warranties:

studioLine 5 year warranty
A five year warranty is available on all built-in studioLine cooling appliances listed in this brochure to protect against manufacturing and material faults during this warranty period.

5 year warranty
A five year warranty is available on selected built-in cooling appliances listed in this brochure to protect against manufacturing and material faults during this warranty period.

Offer dates: 01.04.24 – 31.03.25. Online registration required. For full T&Cs and qualifying appliances visit siemens-home.bsh-group.com/ie/customer-service/warranty

2 Year warranty
All Siemens built-in cooling appliances listed in this brochure have a two year manufacturer's warranty as standard to protect against manufacturing or material faults.

Compressor Drive 10 Year Warranty
Available on selected Siemens built-in fridges and fridge freezers, this warranty covers defects in the compressor motor.

To find out more about warranty and for registration, please visit: siemens-home.bsh-group.com/ie/customer-service/warranty

Opening the door to new possibilities

For even more convenience in the kitchen, selected studioLine cooling appliances come with push-to-open and voice assisted door openAssist.

No need to touch the door: openAssist

With a simple voice command to a voice assistant like Amazon Alexa, the studioLine fridge or freezer will open. Even without a voice assistant, a gentle push will open the fridge or freezer door – and a gentle push will automatically and quietly close the door. Touchless functionality keeps the stylish kitchen design running seamlessly throughout. openAssist with voice command is available on KI81FHOD0 and GI81NHNE0 only.

Control via Home Connect.

Thanks to Home Connect, the refrigerator is connected anytime and anywhere. Control the functions of the fridge easily and conveniently via a smartphone, even when away enjoying a holiday in another country.

A fresh solution for fresh food.

Also equipped with innovative hyperFresh Premium 0°C technology, the iQ700 studioLine fridge offers the best conditions keeping fruit, vegetables, meat and fish fresh for longer.

Model shown: KI81FHOD0 studioLine single door fridge

Keep food fresh for longer

Model shown: KI81FHOD0 hyperFresh premium

hyperFresh technology:

Set the right conditions to ensure food stays fresh for longer: hyperFresh humidity drawers and near 0°C chiller drawers.

Freshness controlled: hyperFresh
The stylish hyperFresh control panel enables simple adjustment to the humidity in the fridge. The hyperFresh drawer with rippled base allows cool air to easily circulate around fruits and vegetables. As a result, the quality and freshness of food will be retained.

Shelf life maximised: hyperFresh Plus
The hyperFresh Plus drawer does not just store food, it provides the right conditions to keep ingredients fresh for longer. Whether it is being used for storing fruits or vegetables, it will increase shelf life and reduce food wastage. Simply switch between the 2 control settings, and the humidity will be adjusted for optimum storage of the food.

Food stays fresh for longer: hyperFresh Premium
With a choice of 3 humidity controls, simply select between storing fruits, vegetables, or both. The hyperFresh Premium drawer will regulate how much humidity the food receives. These innovative drawers help to keep in nutrients and minerals to create delicious meals and fewer trips to the supermarkets, saving time, effort and money. hyperFresh Premium is available in selected Siemens single door fridges only.

hyperFresh near 0°C chiller drawers.
Perfectly fresh for fish and meat:
hyperFresh and hyperFresh Plus models: The two hyperFresh near 0°C chiller drawers are specially designed for the storage needs of fish and meat. Keep them fresher in ideal conditions near 0°C to retain the vitamins and minerals for longer. With two separate compartments the transfer of unpleasant smells will be avoided.

hyperFresh Premium models: These variants come complete with a larger full-length near 0°C chiller drawer, where fish and meat are stored at the perfect temperature.

Create combinations to fit every lifestyle

Our built-in cooling appliances come in a wide range of heights and widths to create the perfect combination for the kitchen.

Height and width

Our built-in cooling appliances are available in a range of heights and widths to fit within a variation of kitchen designs and available spaces.

Fridge Freezer split options:

Fridge Freezer split %

Our range of fridge freezers are available in a variety of sizes with different splits of fridge areas and freezer areas. Alternatively, a bespoke split can be created using separate fridge and freezer units stacked or paired side-by-side.

70	60	50
30	40	50

Flexible shelves and door racks.

Enjoy convenience with easyLift shelves. Even when full, the shelves can be raised or lowered by 6cm to make room for taller items – ideal for serving jugs. Our easyLift door trays are also great for large bottles in the fridge door, the shelf can be adjusted to meet the flexible requirements of individual lifestyles.

modularFit cooling appliances for flexible design.

Siemens modularFit appliances are freely combinable. A kitchen should match the household's lifestyle. That is why our single door cooling and freezing appliances can be combined perfectly for individual requirements and taste. With unique and innovative cooling technologies the appliances can even enrich everyday life. Siemens modularFit appliances come with exciting innovations like hyperFresh and noFrost technology. The simple installation as well as an energy efficiency category offers maximum flexibility and freshness.

Combine cooling and freezing appliances in any way with modularFit.

Thanks to the anti-condensation technology, it is possible to install cooling and freezing appliances next to each other in multiple different layouts. The innovative technology prevents the build-up of moisture between the appliances, keeping everything fresh and clean.

Side-by-side example for illustrative purposes

Choosing the right hinge: fixed and sliding.

Siemens built-in cooling appliances are available with specific types of hinges that either aid the installation and design of the kitchen or can be matched for replacement appliances.

Fixed hinge

Fixed hinge

A fixed hinge means that the furniture door is mounted to the appliance door. Advantages of a fixed hinge mean that we can offer softClosing doors that automatically close at an angle of approx 15°-20° preventing the door from accidentally being left open. The installation also offers better access to the appliance interior and due to the optimised width, higher energy efficiency with competitive volume.

They are thoroughly tested to withstand constant opening and closing. The softClose door retracts effortlessly and creates minimal noise. In addition to aesthetics, a softClose door ensures that items within the fridge are not disturbed from a heavy impact, meaning no spills to clean.

Sliding hinge

A sliding hinge means that the furniture door is mounted at the kitchen cabinet body as well as a sliding rail to connect the fridge and furniture door.

Sliding hinge

+11%*

+45%*

The Siemens integrated XL and XXL fridge-freezers.

A perfect blend of increased capacity, freshness and flexibility that seamlessly fit into any kitchen design. With our innovative appliances, consumers can enjoy more room to store all their fresh food and ingredients, with a cooling space that adapts to their needs.

Gone are the days of constantly rearranging everything to fit in groceries. Our combinations of fridge, freezer, and door compartments provide consumers with the perfect organisation system, allowing them to store food and beverages for large parties or everyday meals without any hassle. Our XL models offer 11% more capacity compared to the standard fridge freezer, while the larger XXL models offer an impressive 45% more capacity.

But it is not just about capacity. Our integrated fridge-freezers are designed to seamlessly blend into the kitchen, while boasting sleek modern design when opened, adding style and sophistication to any kitchen.

Increased Flexibility, Better Storage Options

The design interior allows for maximum flexibility. The modularFit feature gives the freedom to position the fridge and the freezer according to preference, creating a customised and convenient kitchen setup. The flexShelf gives even more storage freedom with the option to fold the shelf completely against the back wall to use all the space or slide the front part of the flexShelf under the back part and use the other half for smaller items.

Explore more cooling features

Experience intelligent cool with Home Connect.

Smart fridges

Flexibly control cooling appliances using a smartphone or smartwatch. Using the Home Connect app, the temperature of the fridge can be adjusted, or superCool can be turned on on the way home from the food shop. It is even possible to turn on holiday mode from anywhere, to save energy where required. The app sends useful push notifications when there has been a significant temperature change in the fridge, or if the door has been left open, minimising the risk of food waste.

Optimised cooling.

autoAirflow system

This system works with the electronics to optimise the air circulation within the fridge and freezer compartments to ensure even cooling throughout the appliance. This means however groceries are organised, they will be cooled quickly. The back wall of the appliance has open vents which work with the cooling circuit to draw cold air into each compartment.

Type of control.

Interior LCD display

LED Light.

LED light

Type of control.

At the touch of a button, the in-door LCD display offers precision control to allow the optimum temperature for food to be maintained easily. This in turn helps to keep food fresh for longer.

LED Light.

The new integrated long-lasting LED lights available on most of our range fit flush in the side walls or ceiling and illuminate the interior uniformly.

Suitable storage solutions for all needs.

Telescopic rails

Bottle rack

freshProtectbox

Ergonomically ideal access

Fully-retractable drawers on telescopic rails create an easy access shelving zone. This makes it easy to pull the drawers out further, providing a better overview of all food items and making them easier to remove.

Bottle rack

Available on some models, the perfect place to store wine of all varieties and make the best use of fridge space. The waveshaped bottle rack can be positioned in a variety of places and safely stores bottles without them rolling back and forth.

freshProtectbox

Provides the optimum temperature for individual foods, allowing them to stay fresher for longer. This in turn helps reduce waste and trips to the supermarket – saving time and money.

Freezer features

With noFrost technology, the freezer no longer needs to be defrosted manually.

noFrost

Defrosting the freezer is now done automatically. Siemens freezers are equipped with intelligent sensor-controlled technology to save the chore of defrosting the freezer. An air-circulation system guides the humidity to the outside of the refrigerator into an external evaporation tray, and sensors measure the degree of humidity and any frost production – ensuring the appliance is periodically defrosted without the need to turn it off or empty it out. Also, ice no longer forms on the inside of the refrigerator, and the appliance's energy consumption remains consistently low.

lowFrost

For those models that come with lowFrost, life is still made easier. lowFrost reduces the build-up of frost by up to 50%, so there is no need to defrost the freezer as often – only once every 3 to 4 years. Designed to save time and provide added convenience so time can be spent doing enjoyable activities, not defrosting the freezer.

Storage made easy with bigBox.

Big enough for a busy lifestyle, the bigBox has the capacity for storing whole frozen turkeys, as well as the height to hold dessert glasses upright. Ideal for the holidays and entertaining.

Other useful freezer features.

superFreeze function

superFreeze makes sure that warmer food added to the freezer does not raise the freezer temperature, stopping food partially defrosting.

superCool

The superCool button can be used to quickly reduce the temperature in the refrigerator to +2 °C. This prevents any undesirable rises in the temperature of already chilled food whenever new food is added which is not as cold.

iceTwister

Simply activate the iceTwister and receive up to 20 ice cubes at once right away. The water tank is very easy to remove for reliable refilling.

iceDispenser

Models with this feature are able to dispense ice when needed thanks to a plumbed water connection. Depending on model, ice is available as cubes or crushed.

freezerLight

Our special LED freezerLight makes it possible to get the perfect overview of the freezer compartment by providing light to the whole area.

Wine cabinets

Premium design with optimal temperature control.

For carefully stored and beautifully presented wine bottles.

Our wine cabinets will ensure bottles are displayed effortlessly whilst making an impressive visual statement. Thanks to Siemens state-of-the-art technology, wines will be maintained at the optimal temperature for their type. So each individual bottle – whether it is red, white or sparkling, is conditioned perfectly to be enjoyed when needed.

Siemens wine cabinets are designed to provide great first-rate storage for any wine. Wine bottles are presented elegantly on beautifully crafted oak wooden shelves, reducing the risk of scratches or tears to the bottles and labels. Wood is also the perfect surface to display wine, minimising vibrations which can cause wines to age.

Light, especially sunlight, can adversely affect wine. The sun's ultra violet rays in particular can degrade and prematurely age wine. Siemens wine cabinets are equipped with LED lights to minimise heat emissions and temperature fluctuations. As a result, the cabinet remains at the optimal temperature at which it is set. Settings can be specified from 5-20°C, allowing storage of Champagne from 5-8°C, as well as red wine from 12-20°C.

The glass panelled doors are also protected with a UV filter offering further protection to bottles from any unnecessary light that can lead them to spoil or fade wine labels.

The soft LED feature provides added drama, phasing in gently to reveal the wine. If the cabinet is the focal point of the kitchen, our Presentation Mode feature will enable the light to be kept permanently on, allowing bottles to shine in all their glory.

There is space to fit up to 21 bottles in our 30cm wide cabinet, or up to 44 bottles in our 60cm wide unit. The grey interior gives a premium modern seamless finish throughout the kitchen. Each cabinet is also designed with a reversible hinge allowing the direction the door opens to be changed depending on the flow of the kitchen.

Acoustic warning light indicators will notify if the door is opened for a long period, or if the wine storage compartment is too warm or too cold for an extended period to ensure the wine is kept protected.

2 Year Warranty
A Two year warranty is offered on our wine cabinets to cover manufacturing or material faults.

For more information please see page 363.

Cooling. Super efficient, super stylish

Elegant, functional and packed with technology, a Siemens freestanding fridge freezer is a talking point in the kitchen.

Whether it is an American Style fridge freezer that has a wow-factor, a side by side fridge and freezer for extra space, or a single appliance, Siemens has a wide range of products to choose from. Our energy efficient appliances are packed with food preservation technology.

Model shown: **KF96RSBEA**
Multi Door / American style fridge freezer

Siemens freestanding cooling warranties:

5 year warranty
A five year warranty is available on selected freestanding cooling appliances listed in this brochure to protect against manufacturing and material faults during this warranty period.

Offer dates: 01.04.24 – 31.03.25. Online registration required. For full T&Cs and qualifying appliances visit siemens-home.bsh-group.com/ie/customer-service/warranty

2 year warranty
All other Siemens cooling appliances have a two year manufacturer's warranty as standard to protect against manufacturing or material faults.

10 Year Compressor Drive Warranty
Available on all Siemens freestanding fridge freezers, covers defects in compressor motor.

To find out more about warranty and for registration, please visit: siemens-home.bsh-group.com/ie/customer-service/warranty

Keeping food fresh for longer:

hyperFresh technology

Set the right conditions to ensure food stays fresh for longer with hyperFresh humidity drawers and near 0°C chiller drawers.

Freshness controlled: hyperFresh

Simply use the stylish control panel to adjust the humidity in the fridge. The hyperFresh drawer with a rippled base allows cool air to circulate easily around fruits and vegetables. As a result, the quality and freshness of the ingredients will be retained.

Shelf life maximised: hyperFresh Plus

The hyperFresh Plus drawer does not only store food, it provides the right conditions to keep ingredients fresh for longer. Whether it is fruits or vegetables, using the drawer will increase shelf life and reduce food wastage. Simply switch between the 2 control settings, and the humidity will be adjusted for optimum storage of food.

Food stays fresh for longer: hyperFresh Premium

Enjoy fresher food with hyperFresh Premium. With a choice of 3 humidity controls, simply select between storing fruits, vegetables, or both. The hyperFresh Premium drawer will regulate how much humidity the food receives. These innovative drawers help to keep in nutrients and minerals to create delicious meals and require fewer trips to the supermarkets, saving time, effort and money. hyperFresh Premium is available in selected Siemens single door fridges only.

Perfectly fresh for fish and meat:

hyperFresh near 0°C chiller drawers

The hyperFresh near 0°C chiller drawers, on the hyperFresh and hyperFresh plus models, are especially designed for the storage needs of fish and meat. Keep them fresh in ideal conditions near 0°C to retain the vitamins and minerals for longer. With two separate compartments the transfer of unpleasant smells will be avoided.

hyperFresh Premium models come complete with a larger full-length near 0°C chiller drawer, where fish and meat are stored at the perfect temperature.

Technology that helps make life easier

Freezer storage made easy with bigBox.

Big enough for a busy lifestyle, the bigBox has the capacity for storing whole frozen turkeys, an entire leg of lamb, several pizzas, as well as the height to hold dessert glasses upright.

The bigBox provides plenty of space to accommodate and stack everything. And when an even larger space is needed, all the drawers and shelves can be easily removed from the freezer compartment which is ideal for the holidays and entertaining.

With noFrost technology, the job of defrosting the freezer never needs to be done again.

noFrost

Defrosting the freezer is now done automatically. Siemens freezers are equipped with intelligent sensor-controlled technology to save the hassle of defrosting the freezer. An air-circulation system guides the humidity to the outside of the refrigerator into an external evaporation tray, and sensors measure the degree of humidity and any frost production – ensuring the appliance is periodically defrosted without the need to turn off the appliance or empty it out. Also, ice no longer forms on the inside of the refrigerator, and the appliance's energy consumption remains consistently low.

lowFrost

Thanks to the innovative lowFrost technology with the special evaporator, not only is there less ice build up, but also defrosting is much faster than in conventional systems. All lowFrost models have a water drainage system, to allow removal of all thawed water during the defrosting process.

Stay connected in the kitchen, with Home Connect.

Smart fridges

Cooling appliances with Home Connect offer the ability to flexibly control Siemens appliances using smart devices, such as a smart phone, tablet or smart speaker. This means appliances can be controlled from anywhere; for example adjusting the fridge temperature to cool down whilst on the way home from the supermarket, or setting the fridge to holiday mode whilst at the airport. Push notifications can also be set up to send an alert if the door has accidentally been left open, or if the temperature has risen above a certain level.

For more information about Home Connect visit <https://www.siemens-home.bsh-group.com/uk/inspiration/innovation/connected/cooling>

Premium cooling options

for every size and style of kitchen

Choose the style and size.

When considering which freestanding appliance to purchase look at, what height space there is available? Consider the width? Is more capacity needed? Is more fridge or freezer space required?

Height and width
Siemens has many different sizes of cooling models to suit varying needs from: 183cm-203cm high and between 60cm and 91cm in width.

French Style / Multi door
183 x 90cm

American Style
178 x 91cm

Fridge Freezers

Create the perfect pair.

For extra internal space pair one of the below Siemens upright fridges alongside a Siemens upright freezer to re-create the style of an American fridge freezer with our easy access shelving zone.

For a design statement, combine the Black Steel iQ500 KS36VAXEP (fridge) with the iQ500 GS36NAXEP (freezer).

To complete these looks, a joining strip will need to be purchased to secure the two appliances. These can be bought through our website or through a retailer.

The joining strip product codes are:
KS39ZAL00 – Stainless Steel Easy Clean
KS39ZAX00 – Black Steel

Models shown: iQ500 **KS36VAXEP** single door fridge combined with iQ500 **GS36NAXEP** single door freezer using the **KS39ZAX00** Black Steel joining strip

Models shown above:

Tried and tested.

All Siemens fridges and freezers are built to last. Rigorous testing ensures that our products meet all the requirements of our customers. Every single one of our appliances is tested before it leaves the factory. For 24 hours a day, components are tested continuously to the maximum tolerance possible for the equivalent lifetime of the appliance.

Our doors are weighted and then opened and closed by the handle 200,000 times during testing to ensure they are robust (200,000 times is equivalent to opening and closing the door 27 times per day for 20 years). Materials are not only tested for suitability and longevity, we also look at how they sound and feel when we use them.

Make a stylish statement in the kitchen.

Introducing Multi Door / American Style fridge freezers.

From the premium double-width shelving to the sleek outer finishes – the Multi Door / American Style fridge freezers are designed to stand out in the kitchen. Behind the scenes, our cooling technologies such as multiAirFlow and fresh boxes provide the optimum temperatures to keep all food and drink at their best while adjustable shelving and smart compartments make it easy to personalise fridge space and keep shopping organised. Also with noFrost technology, the freezer will never need to be defrosted again.

Room for more. Refreshment at any time.

Room for more

The KF96RSBEA comes with a full width fridge and pull-out freezer. It even comes with a separate beverage drawer that has premium oak shelving compartments and five different set temperatures for soft drinks, beer, champagne, white wine and red wine. The beverage drawer stores drinks at the ideal temperature, always ready to enjoy. Perfect for busy kitchens.

Refreshment anytime

The new KF96DPXEA is the perfect combination, where freshness meets intelligent design. Featuring a quick ice and water dispenser with bottle fill function that can dispense up to 5kg of ice per day (cubes or crushed). It can also dispense freshly filtered water as needed with the built-in UltraClarityPro water filter. It also features a multi purpose shelf, which can be used as a bottle rack or flat, giving storage flexibility.

Interior Electronic LED Display

easyAccess shelving

easyLift door trays

LED Illumination

autoAirflow system

Bottle rack

easyAccess shelving zone on single door freezers
Creates additional space whilst delivering the design of an American fridge freezer interior compartment.

LED Illumination
Integrated seamlessly into the top or the side walls of our cooling appliances, LED lighting is very efficient and gives maximum illumination of the fridge and freezer.

autoAirflow system
This system works with the electronics to optimise the air circulation within the fridge and freezer compartments to ensure even cooling throughout the appliance. This means however groceries are organised, it will cool them quickly no matter where they are placed. The back wall of the appliance has open vents which work with the cooling circuit to draw cold air into each compartment.

easyLift
Adjustable door trays and glass shelves that can be moved even when full for optimal convenience.

Bottle rack
Available on some models which is the perfect place to store wine of all varieties and make the best use of the fridge space.

Experience intelligent cool

Model shown: KG49NXXDF fridge freezer

Fresh food for longer with sensor controlled cool.

freshSense
Fresh food guaranteed for longer. With conventional fridges, varying surrounding temperatures and the continuous opening of the refrigerator door lead to temperature changes inside the appliance. To ensure this does not affect the food inside, sensors immediately react to any changes. The freshSense sensors activate as soon as a change in temperature is registered and compensates for this change in an instant. Therefore the temperature always remains within the optimum range, and food stays fresh and delicious for longer.

Inverter motor
The intelligent inverter technology is a clever combination of the inverter motor and sensor. The sensors register every slight change in temperature or humidity inside the refrigerator, for example when the door is opened or warm food is stored. This information is then passed to the inverter motor, which adapts its need for energy accordingly. This means food can be cooled intelligently and energy efficiently, and thanks to the high-quality inverter motor, incredibly quietly.

superCool
Ensures that warmer food entering the fridge does not increase the fridge temperature, which can affect other food.

superFreeze
superFreeze makes sure that warmer food added to the freezer does not raise the freezer temperature, stopping food partially defrosting.

Wrap around evaporator
This new technology creates more space in the freezer cavity, allowing for more innovations like bigBox for large food items, plus removable glass drawers.

iceTwister
Simply activate the iceTwister and receive up to 20 ice cubes at once right away. The water tank is very easy to remove for reliable refilling.

Explore more features that work around busy lifestyles.

safetyGlass shelves
All safety glass shelves are made from extra strong, easy-to-clean glass. If something tips over, the spillage is contained and does not spill into the rest of the refrigerator compartment.

Holiday mode
Holiday Mode will ensure that food in the freezer stays cold enough to maintain freshness whilst reducing its energy output. Our fridges also feature a warning alarm that signals when the door has been left open, ensuring that energy is not needlessly wasted and preserving the food inside.

Innovative features for sparkling results

Siemens built-in dishwashers feature modern design and innovative ideas for seamless living.

Siemens dishwashers are equipped with practical innovations such as varioSpeed Plus, which washes and dries your dishes three times faster than the average cycle, and Zeolith® drying technology that transforms humidity into heat for gentle and effective drying results.

With maximum flexibility from adjustable baskets and foldable racks, and stylish innovations such as sideLight and timeLight floor projection, they provide the perfect balance between modern design and innovative technology. The ideal solution for family dinners or hosting parties for friends, as they ensure dishes and glasses are left sparkling clean.

Model shown: **SN87TX00CE**
fully integrated dishwasher

Siemens built-in dishwasher warranties:

studioLine 5 Year Warranty

A Five Year Warranty is available on all built-in studioLine cooling appliances listed in this brochure to protect against manufacturing and material faults during this warranty period.

5 year warranty

A five year warranty is available on all built-in dishwasher models listed in this brochure to protect against manufacturing and material faults during this warranty period.

Offer dates: 01.04.24 – 31.03.25. Online registration required.
For full T&Cs and qualifying appliances visit siemens-home.bsh-group.com/ie/customer-service/warranty

10 Year Anti-Rust Warranty

All Siemens dishwashers purchased from the 1st January 2012 onwards have a 10 Year Anti-Rust Warranty to protect against rust in the inner cavity of the appliance.

Lifetime AquaStop Warranty

All Siemens built-in dishwashers listed in this brochure have a lifetime AquaStop warranty to protect against water damage caused by a defective AquaStop system.

To find out more about warranty and for registration, please visit:
siemens-home.bsh-group.com/ie/customer-service/warranty

Speed, performance and efficiency built-in: studioLine dishwashers

Setting new standards for speed, cleaning performance and energy efficiency, studioLine dishwashers boast trend-setting technology and first-class features.

Delivering faster results without compromising on quality. Our A-rated dishwashers are designed to save energy, reduce carbon footprint, and help contribute to a greener world. Proof that performance and sustainability can go hand in hand.

Revolutionary technologies, like Zeolith®, ensure brilliant and energy efficient drying results.

emotionLight Pro helps create the perfect atmosphere with customisable illumination. There are 256 different colour variants to choose from.

They will seamlessly integrate into any kitchen design, and offer added planning flexibility with the varioHinge, available in 81.5cm and 86.5cm height options.

All studioLine dishwashers work with the Home Connect app, so you can control or personalise settings using voice or your smart device.

Made in Germany

Experience a high standard of quality with our 60cm studioLine dishwashers which are made in Germany.

5 year warranty

A 5 year warranty is available on Siemens studioLine appliances protecting against any manufacturing, material faults or defects during this warranty period. See our terms and conditions page 362 for further information.

Key dishcare features

All our dishwashers feature glass care technology, they regulate the degree of hardness in the water to help optimise the protection of glasses, as soft water can cause glass corrosion.

The priority zone for gentle and thorough washing of the most valuable glasses.

glassZone
Thanks to the glassZone, even the most valuable of glasses can go in the dishwasher with peace of mind. The six integrated nozzles ensure continuous but gentle water supply which enables thorough cleaning without damaging sensitive materials. In addition, integrated soft anti-slip elements give a secure hold, protect against mechanical stress and prevent damage to glass rims.

Create the perfect space in the dishwasher for any load.

rackMatic™
Available across all storage solutions, this feature conveniently allows the user to raise and lower the height of the top basket to create more or less space, even when the dishwasher is loaded.

Storage solutions for added flexibility and better results.

varioDrawer
By adding a third shelf for cutlery, varioDrawer removes the need for a cutlery basket and creates more space.

varioFlex basket system
The varioFlex basket has 2 flexible areas in the top rack and 4 in the bottom, providing extra flexibility within the dishwasher to create more space for larger items.

flexComfort basket system
These baskets have the ability to fold down certain compartments within the cavity for extra room – the top rack has 2 areas that can be adjusted for extra flexibility whilst the bottom basket has 8 areas that can be adjusted to create more space so the inside of your dishwasher is constantly adaptable. Anti-slip elements and stemware support hold have also been added, meaning it has never been as easy to load your dishwasher.

flexComfort Pro basket system
The flexComfort Pro basket system is designed to hold larger plates and allows you to create extra space for pots and pans with ease. Choose from up to 6 flexible areas in the top rack and up to 8 flexible areas in the bottom basket to create extra space. Blue touchpoints inside the baskets indicate all the adjustment options available at a glance, and the easyGlide wheels on the upper basket make loading the dishwasher even easier. Other features such as anti-slip elements and stemware support hold means you can easily and securely load your glassware and get on with your day, chore free.

Floor projection displays.

infoLight

Projects a beam of light onto the floor to show the dishwasher is running. This prevents needing to open the door while the cycle is still active to see if it is finished.

timeLight

Useable on any colour surface, the innovative timeLight projects the remaining time and other essential dishwasher cycle information onto the floor, making it easy to check on the cycle status.

With quiet dishwashers, this solution shows the dishwasher is running and how long is left at a glance, to avoid having to open the door mid-cycle to check.

Light up the dishwasher.

emotionLight

Creating a relaxed ambiance, the emotionLight uses LED lights to reflect off brilliantly-cleaned glasses and create a cool blue glow emanating from inside the dishwasher when the door is open and switching off again when closed.

sideLight

With the sideLight, it is easy to immediately see whether the washing programme is still running. During operation, the blue light strip illuminates the furniture gap on the left hand side of the dishwasher. Only available on selected models.

Added kitchen convenience.

autoOpen dry

Gentle drying thanks to autoOpen dry. During the drying process, the door opens automatically allowing dishes to naturally dry without the need for additional energy.

Silence programme

When the Silence programme is selected the dishwasher's noise level is reduced by 2-3dB. This is achieved by decreasing water pressure and extending run time.

Silence on Demand

If silence is needed during the wash cycle, the dishwasher can be paused for up to 30 minutes by using Silence on Demand with Home Connect. This can be activated via the app or voice control.

Hygiene Plus

Great for cleaning chopping boards, food containers and utensils. It heats up to extra high temperature in the final rinse for maximum hygiene, regardless of the chosen cycle.*

*Not on delicate programme.

Water consumption

Our built-in dishwashers' lowest water usage programme is 7.7L per cycle* if the Eco 50 programme is selected, for the most resource efficient option.

*Based on SN95ZX61CG

Machine Care with Siemens dishwashers

For excellent results when washing and drying, looking after the dishwasher correctly is important. All of our integrated Siemens dishwashers include the Machine Care Programme.

This programme is designed to be used together with a dishwasher cleaning detergent and provides a short, high temperature, high pressure wash designed to remove limescale and grease build up inside the dishwasher and outlet pipes. The dishwasher will send a reminder every 30 cycles or so to run this programme, to keep the appliance running as efficiently as possible.

Discover top of the range displays

Multiple choices for display type to suit every need.

Black touch control with TFT display and real-time clock

The clear, high resolution touch controlled TFT display makes it easy to select programmes and settings and check the dishwasher status at a glance. Thanks to the real-time clock, it is now possible to set the exact time the dishes will be ready, for extra convenience. Perfect for delivering warm plates to the dinner table.

Model shown: **SN87TX00CE** fully integrated dishwasher

Black touch control with LED display

With the same top of the range sleek black touch control panel, it has a clear LED display screen which displays the programme setting and duration time.

Model shown: **SN95ZX61CG** fully integrated dishwasher

Black / Stainless Steel touch control button and LED display

The two zone design is stylish and functional, with direct button selection and a white LED display, providing clear status information. When a programme and option is selected a blue LED illuminates under the button.

Model shown: **SX73HX10VG** fully integrated extra height 86.5cm dishwasher

Black push button control with toggle and LED display

With black buttons, a toggle screen and an LED screen which displays programme settings and duration time, this easy to use interface is practical and stylish.

Model shown: **SN61HX03KG** fully integrated dishwasher

and seamlessly fitted varioHinge options

varioHinge. The ideal solution for extra long cabinet doors.

varioHinge enables the furniture panel to slide up the appliance door as it opens, avoiding collision with the plinth.

Siemens has six built-in 60cm dishwasher models – SN97T800CE studioLine, SX97T800CE studioLine, SN95YX02CG, SN95ZX61CG, SN73HX10VG, SX73HX10VG – plus a 45cm dishwasher SR93EX24MG - with varioHinge.

varioHinge ensures flexible dishwasher installation inline with the design of the kitchen. Perfect for cabinet doors in handle-less kitchens, or designs with low baseboards and longer cabinet panels as the varioHinge allows the cabinet door to be pushed upwards when opened to avoid the door catching. The varioHinge reduces the bottom gap between cabinet doors too for a seamless finish to the kitchen. These appliances are suitable for use with a 50mm plinth.

✓ Attractive design for high installation thanks to minimal gap size made possible by varioHinge.

✓ With varioHinge, a lower plinth height is possible.

Dishwashers with varioHinge – high installation

Live in the moment with the help of a smart dishwasher.

There are more important things in life than worrying about washing dishes and replenishing dishwasher tabs. Siemens smart dishwashers provide more efficient results, additional programmes and enhanced control.

There are a number of great features to choose from in the Home Connect app, such as Speed on Demand and Silence on Demand. The app allows the selection of favourite programmes and option combinations to provide the flexibility to alter wash cycle options from anywhere at anytime.

Perfectly tailored dishcare

The Intelligent Programme adapts the dish washing process to individual needs. After the programme is finished, the results and duration can be rated via the Home Connect app. From this, the dishwasher will automatically adapt the settings and offer several alternatives, such as more energy efficient options. It also has the option to monitor water and energy consumption.

Never run out of dishwasher tabs again

By linking a smart dishwasher with the Smart Finish auto-replenishment service, there will never be a situation where there is no dishwasher tablets again. The Smart Finish service keeps track of tablet stock and will automatically reorder more when it is running low.

Always use the perfect programme

By using the Home Connect app to start a programme, it will be easy to see a detailed description of each programme, as well as energy and water usage indicators. The choice is either pick the best programme for the specific load or let our Programme Assistant help pick the recommended option based on the requirements.

Programme Download

Paired with the Home Connect app Siemens' dishwashers can always be kept up to date with software updates. They can even be personalised by downloading free additional programmes available via the Home Connect app. Whether it is more intense programmes, intelligent programmes or even faster programmes, there are additional programmes – up to 10 depending on the model - available to suit everyone's need. Once downloaded they can also be added to favourites for even quicker access.

Learn more about Home Connect by visiting Siemens Home IE: www.siemens-home.bsh-group.com/ie

Or scan the QR code to learn more about our smart dishwasher appliances.

Model shown:
SN87TX00CE
fully integrated dishwasher

Features available on all built-in dishwasher models.

varioSpeed Plus
Use the varioSpeed Plus button to run the dishwasher significantly faster without compromising on wash quality.

Speed on demand
An advanced functionality of varioSpeed Plus that cleans and dries the dishes in the shortest possible time for individual needs. This option can be selected, even if the programme is running, via the Home Connect App.

dosageAssist
Quickly and evenly dissolves dishwasher tablets throughout the entire machine, leaving no mess to clean at the end of the cycle. This also prevents the tablet getting stuck in the dishware to ensure no cleaning product residue is left after the cycle.

extraDry
The extraDry option can be added to any programme and will extend the drying cycle. This can be useful for harder to dry loads.

intensiveZone
Delicate items can be cleaned together in the same wash as pots and pans. The intensiveZone increases the spray pressure and temperature in the bottom basket to handle burnt on pans, whilst more delicate items can be washed safely in the top basket.

aquaSensor
Ensures that the optimum temperature is used depending on how dirty the dishes are, so that they are left perfectly clean all year round.

Heat exchanger
Protects glasses from cracking by using gentle water heating. Heat generated during the wash cycle is used to pre-heat the rinsing water to stop glasses being put under stress.

loadSensor
The loadSensor feature helps to ensure that dishes are cleaned thoroughly by ensuring that the optimum amount of water is flowing through the dishes during the cycle.

Favourites
The Favourite button makes using the dishwasher even more personal. Simply enter the most used combination of programmes and options, and then start them conveniently at the touch of a button, via the Home Connect app or via a smart watch.

A modern handleless kitchen.

openAssist
With door openAssist, fully integrated dishwashers can be opened by touching the front of the unit to make loading and unloading easy. This removes the need for a handle and is the ideal choice for designer kitchens. With this feature, it is also possible to implement a child lock so that the appliance requires two gentle touches before opening.

60cm dishwashers

iQ 700 SN87TX00CE

60cm fully integrated dishwasher

flexComfort Pro basket system

flexComfort Pro baskets create extra room for pots and pans. With an optimised lower basket design for large plates and adjustable sides highlighted with blue touchpoints, the dishwasher can adapt to any load quickly and easily.

varioDrawer included

Selected models include a varioDrawer, providing a third loading level for cutlery and removing the need for a cutlery basket. This creates more room for large pots and pans below and includes space for small items such as ladles and espresso cups.

¹ On an energy-efficiency class scale from A to G.

² Energy consumption in kWh/100 operating cycles (using Eco programme).

³ Water consumption in litres/operating cycle (using Eco programme).

⁴ Duration of Eco programme.

⁵ We would recommend our dishwashers are connected to the mains water supply where possible. However, they may also be connected to an external water softener as long as the water softener produces softened water of less than 1.1 mmol/litre (7.0°e) and the water softener in the appliance is turned off. Please contact product advice for further information.

Water pressure required: 0.5-10 Bar. Flow rate: 10 litres per minute. Inlet valve connected directly to ¾" screwed joint.

Data valid in this table as of April 2024. Subject to modification without prior notice.

*5 year warranty - Offer dates: 01.04.24 – 31.03.25. T&C's apply. Online registration required.

45cm slimline dishwasher

iQ 300 SR93EX24MG

45cm slimline fully integrated dishwasher

Slimline

Slimline dishwashers are perfect for kitchens with limited space. Despite the reduced size, they still benefit from exciting features such as door openAssist and speed programmes.

Our 45cm dishwasher has a two tone design with features including varioHinge, Home Connect, Speed on demand (via Home Connect app) and the Favourite programme (can set programme and option choice as favourite via the Home Connect app).

Speed on demand

The programme be sped up at any time during the wash cycle, even if the programme has started unlike, varioSpeed+ (this would need to be selected before the start of the programme). Speed on Demand can be activated using the Home Connect app.

Cutting-edge innovations for extra shine

Siemens freestanding dishwashers take full advantage of the latest technologies.

Designed to fit in around busy lifestyles, our standard 60cm freestanding dishwashers feature efficient, time saving and environmentally conscious programmes, sure to make dishes shine. With a sleek and stylish design, both inside and out, Siemens dishwashers are designed to complement the home.

Freestanding Dishwashers

Siemens freestanding dishwasher warranties:

5 year warranty

A five year warranty is available on all freestanding dishwasher models listed in this brochure to protect against manufacturing and material faults during this warranty period.

Offer dates: 01.04.24 – 31.03.25. Online registration required. For full T&Cs and qualifying appliances visit siemens-home.bsh-group.com/ie/customer-service/warranty

10 Year Anti-Rust Warranty

All Siemens dishwashers purchased from the 1st January 2012 onwards have a 10 Year Anti-Rust Warranty to protect against rust in the inner cavity of the appliance.

Lifetime AquaStop Warranty

All Siemens freestanding dishwashers listed in this brochure have a lifetime AquaStop warranty to protect against water damage caused by a defective AquaStop system.

To find out more about warranty and for registration, please visit: siemens-home.bsh-group.com/ie/customer-service/warranty

Dishwashing

key features

Welcome to a new era of dishwashing with brilliantShine.

Our new 60cm dishwashers feature the brilliantShine programme – a one touch solution that combines the Glass 40°C programme and the Shine & Dry option to ensure glassware is always left sparkling clean.

Straight from dishwasher to table, Shine & Dry provides streak-free, shining glasses. Harnessing the power of Zeolith® at its best, the special drying cycle also works just as well on plastics, pots and pans, saving time as there is no longer a need to give them an extra towel dry. The brilliantShine programme with Zeolith® Drying produces sparkling glasses to be proud of, keeping glassware ready to shine for any guests, even unexpected ones.

There are three factors in dishwashing that influence the shine of glassware: temperature, cycle time, and the use of detergent. The new brilliantShine programme offers three intelligent solutions that take care of these factors:

- Zeolith® drying uses a Zeolite mineral that absorbs moisture and converts it into a gentle heat.
- The Shine & Dry option swills all residues of detergent with extra rinsing water, resulting in streak-free, shining glassware.
- The Glass 40°C programme ensures that glassware is not exposed to excessive temperatures or spray pressures, and keeps the cycle time shorter.

Zeolith®: Super efficient drying technology.

Using advanced drying technologies, Siemens dishwashers keep energy consumption to a minimum. Zeolith®, a form of zeolite mineral, has the astonishing ability to absorb moisture and convert it to heat. The heat produced naturally by the Zeolith® is used for the drying cycle. No additional energy is therefore required to heat up the contents of the dishwasher for the drying process (as with a standard drying system). This leads to excellent drying results, with less energy usage than models without Zeolith® technology.

Zeolith® is stored in the depths of the dishwasher. It regenerates itself and keeps working for the lifetime of the machine, so it never needs replacing. Combine this with the economy 50°C programme to get brilliant results with minimal energy.

Drying phase
Zeolith® absorbs moisture and converts it to heat energy.

Cleaning phase
As the mineral is heated during the cleaning cycle, it is recharged and ready to absorb moisture once more.

The new priority zone for gentle and thorough washing of the most valuable glasses.

glassZone
With glassZone, even the most valuable of glasses can go in the dishwasher with peace of mind. The six integrated nozzles ensure continuous but gentle water supply to enable thorough cleaning without damaging sensitive materials. In addition, integrated soft anti-slip elements give a secure hold to protect against mechanical stress and prevent damage to glass rims.

Dishwashing key features

The Home Connect app helps take minds off the household chores.

By connecting the dishwasher to the Home Connect App, programmes and options can be easily selected to start the dishwasher from wherever and whenever. The app enables out of home appliance control so dishes can be ready exactly when needed – which is perfect for busy lifestyles. When the cycle has finished, the Home Connect App will send a push notification to say so.

There are a number of great features which can be selected through the Home Connect app, such as Speed on Demand, Silence on Demand and autoOpen Dry. It is also possible to set a Favourite programme and alter the wash cycle options from anywhere.

easyStart menu
The easyStart feature on the Home Connect app helps with finding the correct setting for the load quickly and easily. By answering a few simple questions, the app will suggest the optimum programme for the load. It is easy to adjust the dishwasher settings via the app on a smartphone or tablet to keep it running at maximum efficiency.

Home Connect partner Services
It is also possible to use our partner services, such as Amazon Alexa, Google Assistant and IFTTT to manage the dishwasher. With Amazon Alexa, the appliance can be controlled via voice – just ask Alexa.

To keep on top of dishwasher tablet stock, automatic tablet replenish can be used through Smart Reorder within the Amazon Alexa app. The feature is easy to set up and saves having to worry about running out of tablets again.

Setting the water settings has never been easier too. Whether the area experiences hard or soft water, it can be easily set within the app in seconds.

IFTTT technology enables the integration of the Home Connect App with a wider array of connected devices. With customised applets, it is even easier to bring a smart home to life. For example, the lights can be set to flash when the dishwasher cycle finishes.

Programme Download
Paired with the Home Connect app Siemens' dishwashers can always be kept up to date with software updates. They can even be personalised by downloading free additional programmes available via the Home Connect app. Whether it is more intense programmes, intelligent programmes or even faster programmes, there are additional programmes – up to 10 depending on the model - available to suit everyone's need. Once downloaded they can also be added to favourites for even quicker access.

Learn more about Home Connect by visiting Siemens Home IE: www.siemens-home.bsh-group.com/ie

Basket systems for added flexibility and better results.

varioDrawer
By adding a third shelf for cutlery, varioDrawer removes the need for a cutlery basket and creates more space.

varioFlex basket system
The varioFlex basket has 2 flexible areas in the top rack and 4 in the bottom, providing extra flexibility within the dishwasher to create more space for those larger items.

flexComfort basket system
These baskets have the ability to fold down certain compartments within the cavity for extra room. The top rack has 2 areas that can be adjusted for extra flexibility. The bottom basket has 8 areas that can be adjusted to create more space so the inside of the dishwasher is constantly adaptable. Anti-slip elements and stemware support hold have also been added, meaning it has never been as easy to load the dishwasher.

flexComfort Pro basket system
The flexComfort Pro basket system is designed to hold larger plates and allows easy creation of space for pots and pans. Choose from up to 6 flexible areas in the top rack and up to 8 flexible areas in the bottom basket to create extra space. Blue touchpoints inside the baskets indicate all the adjustment options available at a glance, and the easyGlide wheels on the upper basket make loading the dishwasher even easier. Other new features such as anti-slip elements and stemware support hold means it is easy to securely load glassware.

rackMatic™ 3-stage
Available across all storage solutions, this feature conveniently allows the user to raise and lower the height of the top basket to create more or less space, even when the dishwasher is loaded.

Let the dishwasher do the work, with the automatic programme sensor.

auto 45°-65°
Automatic programme

Doing the dishes is now easier than ever before with sensor technology included in every one of our dishwashing appliances. From soiled pots and pans to delicate plates – every item gets the right care and treatment.

For example, the autoProgramme sensor gives brilliant results at the push of a button. As soon as the autoProgramme is activated, the aqua sensor automatically measures the cloudiness of the water to precisely adapt the amount and temperature of water needed for optimal cleaning. The sensor controls the entire washing and drying process and automatically adjusts water consumption, water temperature and cycle time to suit each load. The sensor control unit steers the whole washing and drying process to deliver brilliant results every time.

Model shown left:
SN27T100CE 60cm freestanding dishwasher

Enhanced performance and sparkling results

Model shown: SN25ZI07CE
60cm dishwasher

Standard features on all freestanding models.

intensiveZone
Delicate items and pots and pans can be cleaned together in the same wash. The intensiveZone option increases the spray pressure and temperature in the bottom basket to handle burnt on pans, whilst delicate items can be washed safely in the top basket.

Favourite
The Favourite button makes the dishwasher even more personal. By entering the most used combination of dishwashing programmes and options, they can be conveniently started at the touch of a button, via the Home Connect app or via the Alexa voice assistant.

Silence programme
When the Silence programme is selected the dishwashers noise level is reduced by 2-3dB. This is achieved by decreasing water pressure and extending run time.

aquaSensor
Makes sure that the optimum temperature is used depending on how dirty the dishes are, meaning that dishes are perfectly clean the first time round.

Silence on demand
With the Home Connect App, it is possible to pause the dishwasher for up to 30 minutes by selecting Silence on Demand via the Home Connect App if silence is needed during the washing cycle.

Heat exchanger
Protect glasses from cracking with gentle water heating. Heat generated during the wash cycle is used to pre-heat the rinsing water to stop glasses being put under stress.

varioSpeed Plus
Use the varioSpeed Plus button to run the dishwasher significantly faster without compromising on wash quality.

extraDry
The extraDry option can be added to any programme and will extend the drying cycle. This can be useful for harder to dry loads.

Speed on demand
An advanced functionality of varioSpeed Plus that cleans and dries the dishes in the shortest possible time for individual needs. This option can be activated, even when a programme is already running, within the Home Connect app.

loadSensor
By monitoring that the optimum amount of water is flowing through the dishwasher throughout the cycle, the loadSensor helps to ensure that dishes are cleaned thoroughly.

dosageAssist
Quickly and evenly dissolves dishwasher tablets throughout the entire machine, leaving no mess to clean at the end of the cycle.

Machine Care with Siemens dishwashers
For excellent results when washing and drying, it is important that the dishwasher is looked after correctly. All of our freestanding Siemens dishwashers include the Machine Care Programme. This is designed to be used together with a dishwasher cleaning detergent and provides a short, high temperature, high pressure wash designed to remove limescale and grease build up inside the dishwasher and outlet pipes. The dishwasher will send a reminder every 30 cycles or so to run this programme, to keep the appliance running as efficiently as possible.

Highlight features, available on selected freestanding models.

TFT display with real-time clock
The clear, touch control high resolution TFT display makes it easy to select programmes and settings and check the status of the dishwasher at a glance. Thanks to the real-time clock, it is now possible to set the exact time the dishes will be ready by, for extra convenience. Perfect for delivering warm plates to the dinner table.

autoOpen dry
Gentle drying thanks to autoOpen dry. During the drying process, the door opens automatically and gently. This allows the natural drying of the dishes without the need for additional energy.

Hygiene Plus
The Hygiene Plus setting is ideal for chopping boards and food containers. It heats up to extra high temperature in the final rinse for maximum hygiene.

emotionLight
The emotionLight uses LED lights to create a cool blue glow emanating from inside your dishwasher.

■ Yes, model has this feature. – Feature not available for this model.

¹ On an energy-efficiency class scale from A to G.

² Energy consumption in kWh/100 operating cycles (using Eco programme).

³ Water consumption in litres/operating cycle (using Eco programme).

⁴ Duration of Eco programme.

⁵ We would recommend our dishwashers are connected to the mains water supply where possible. However, they may also be connected to an external water softener as long as the water softener produces softened water of less than 1.1 mmol/litre (7.0°e) and the water softener in the appliance is turned off. Please contact product advice for further information. Water pressure required: 0.5-10 Bar. Flow rate: 10 litres per minute. Inlet valve connected directly to ¾" screwed joint.

Data valid in this table as of April 2024. Subject to modification without prior notice.
*5 year warranty - Offer dates: 01.04.24 – 31.03.25. T&C's apply. Online registration required.

Laundry care, high performance with state-of-the-art technology

Siemens' built-in laundry range is intelligently designed and quietly efficient to make laundry easier and less of a chore.

Our machines are the perfect blend of cutting-edge technology and innovative design. Siemens built-in washing machines and washer dryers seamlessly integrate into any space - and with a focus on efficiency and convenience, they quietly deliver beautifully clean clothes.

Built-in
Laundry appliances

Siemens home laundry warranties:

5 year warranty

A five year warranty is available on the built-in washing machine listed in this brochure to protect against manufacturing and material faults during this warranty period.

Offer dates: 01.04.24 – 31.03.25. Online registration required. For full T&Cs and qualifying appliances visit siemens-home.bsh-group.com/ie/customer-service/warranty

2 year warranty

A two year warranty is available on all Siemens built-in washer dryers listed in this brochure to protect against manufacturing and material faults during this warranty period.

AquaStop Lifetime Warranty

Selected Siemens laundry appliances have a lifetime AquaStop warranty to protect against water damage caused by a defective AquaStop system. For models with this warranty please check the matrix.

iQdrive Motor 10 Year Warranty

The iQdrive Motor Warranty is available on selected laundry machines to protect against any defects to the iQdrive motor. For models with this warranty please check the laundry matrix.

To find out more about warranty and for registration, please visit: siemens-home.bsh-group.com/ie/customer-service/warranty

Laundry care key features

Our laundry appliances are designed to make laundry easier and less of a chore. They can be neatly concealed behind the door, maintaining clean lines and modern aesthetics. With a range of key features, doing laundry has never been more convenient.

Model shown above: **WI14W502GB**

reload

The reload function is the perfect solution when an extra item needs to be added to the load. Once the icon is displayed, the washing machine can be paused and extra items can easily be added in.

Foam detection

Detects if too much foam has been created in the wash, if so, it will adjust the drum movement and add an extra rinse cycle if necessary.

rapid15

Washes, rinses and spins lightly soiled clothing in just 15 minutes. Designed for those with busy lifestyles.

Extremely quiet washing machines

Thanks to the brushless iQdrive motor and antiVibration side panels, Siemens built-in washing machines are particularly quiet in their class.

Extremely quiet washer dryers

Our washer dryers are designed to be as quiet as possible while still offering excellent performance and results when washing and drying.

Wool programme

An exceptionally gentle woollen hand wash programme. The drum is set to provide a cradle motion, with only an occasional rotation, giving a soft wash action. A special spin phase finishes the cycle.

Shirts/Blouses

The ideal programme for a week's worth of shirts, offering a reduced spin to reduce ironing. Suitable for up to 2kg worth of washing, this cycle is designed to run for just over an hour.

Mixed fabrics

Perfect for the mid-week wash of a mixture of cottons, and hard-wearing or easy-care fabrics. Load up to 4kg worth of garments with a running time of just 49 minutes.

Delicates/silk

This gentle programme is perfect for those delicate, washable fabrics, e.g. silk, satin, synthetics or blended fabrics (e.g. curtains). Cool temperatures, gentle spinning between the rinse cycles, and reduced final spin speeds reduce creases dramatically.

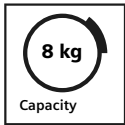

Model shown: **WI14W502GB**

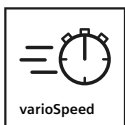

The complete laundry solution with features that fit around any lifestyle

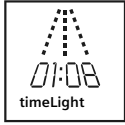

Features specific to integrated washing machines.

Check model for available functions.

- 

Capacity
The large 8kg drum capacity is the perfect size to hold more laundry and reduce the number of loads to wash.
- 

Drum Clean
An automatic alert after 20 washes to run the Drum Clean programme on a 90°C or 60°C wash keeps the appliance clean and odour free.
- 

varioSpeed
This feature can automatically detect when time can be saved. The smart sensor identifies load volume and textile kind, to adapt the washing machine's programme time efficiently to suit the specific load, delivering perfectly clean laundry in up to 55% less time.
- 

timeLight
Stay in control. The timeLight projects the remaining cycle time and programme status onto any floor surface to keep the consumer informed at a glance, and is visible without opening the cabinet door.

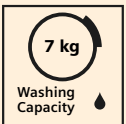

Model shown:
WI14W502GB

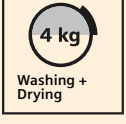

Features specific to integrated washer dryers.

Check model for available functions.

- 

Washing capacity
The large 7kg washing capacity ensures clothes can be washed with fewer loads.
- 

Drying capacity
The 4kg drying capacity ensures clothes can be dried effectively.
- 

Washing + Drying
The continuous washing and drying cycle is suitable for loads up to 4kg. This cycle will first wash clothes on the chosen setting and once finished, will automatically switch to drying the clothes for ease and speed.
- 

autoDry
Gently dries laundry to the exact degree of dryness desired.
- 

ActiveWater™
Helps to reduce water consumption thanks to a 2-step automatic load adjustment system.
- 

Fluff removal programme
A ten minute fluff removal cycle on washer dryers that removes fluff deposits in the machine. A light indicates when this is needed.
- 

Outdoor
Specialised programme for washing waterproof clothing with membrane technology to protect the fabric and seams. For use with outdoor fabric detergent.

Welcome to a freestanding range with a host of intelligent laundry solutions

Siemens' freestanding washing machines, washer dryers and tumble dryers deliver outstanding results every time.

Sleek, streamlined, and stylish, Siemens freestanding laundry appliances not only look great in the home, they perform perfectly too. With state-of-the-art technology Siemens freestanding washing machines are extremely energy efficient, easy to use, and most importantly designed to save time and resources.

All Siemens freestanding tumble dryers feature sensor drying, which provides uniform drying results, and makes over-drying a thing of the past, meaning laundry is easier and less of a chore.

Siemens freestanding washer dryers combine the innovative functions of the modern washing machines and dryers in one appliance to save effort, time and space. Conveniently control both washing and drying cycles, at the touch of a button, with the large display and clear operation on these intelligent appliances.

Siemens home laundry warranties:

5 year warranty

A five year warranty is available on all freestanding washing machine, washer dryer and tumble dryer models listed in this brochure to protect against manufacturing and material faults during this warranty period.

Offer dates: 01.04.24 – 31.03.25. Online registration required. For full T&Cs and qualifying appliances visit siemens-home.bsh-group.com/ie/customer-service/warranty

Lifetime AquaStop Warranty

Selected Siemens laundry appliances have a lifetime AquaStop warranty to protect against water damage caused by a defective AquaStop system. For models with this warranty please check the matrix.

iQdrive® 10 Year Warranty

The iQdrive® Motor Warranty is available on all washing machines to protect against any defects to the iQdrive® motor.

To find out more about warranty and for registration, please visit: siemens-home.bsh-group.com/ie/customer-service/warranty

Rethink laundry care with the Siemens Intelligent Utility Room

When space is no issue, a dedicated utility room can offer more convenience, efficiency, and organisation.

All the laundry essentials - detergents, fabric softeners, ironing board – can be found in one organised, easy-to-access place. A laundry room offers ample storage, helping to keep the home clutter-free and laundry essentials at one's fingertips.

Above all, a laundry room is a time-saver. With everything needed in one place to wash, dry, fold, and iron in record time.

Our advanced laundry technology further delivers control, convenience and flexibility to the process with appliances designed to not only clean clothes but also to automate as much of the process as possible to free time for more important tasks.

Siemens laundry appliances are designed to be intelligent and efficient, knowing exactly when to start a wash cycle to maximise energy efficiency, and when to adjust water levels based on the load size to preserve resources. They dispense the optimal dosage of detergent, ensuring excellent results. With the Home Connect app, stay informed and educated on the best programmes to save resources or time, and easily access the most frequently used programmes. A laundry room that truly adapts to individual needs.

Even with limited space for laundry appliances, these washing machines, tumble dryers and washer dryers still seamlessly fit into an everyday kitchen. Our appliances are equipped with great features, offering convenience and efficiency as the standard.

Laundry key features

Siemens laundry appliances are full of innovative features designed to effortlessly maintain the quality and appearance of clothes.

Time saving programmes, a targeted stainRemoval feature, reduced ironing cycles, and the smart connection between the washer and dryer, simplify every aspect of doing laundry.

A new level of convenience.

reload
The reload function allows the machine to be paused and the door opened, to add any extra item to the load at the next safe opportunity while a programme is running.

antiVibration
Having antiVibration technology built-in to the design of the machine makes the appliance more stable, which, in turn, makes it quieter.

powerSpeed 59 system
With the powerSpeed system, the laundry gets evenly soaked and heated up much faster and more consistently, for more thorough washing. Suited for up to 5kg of cottons or blended fabrics, the powerSpeed 59 result is achieved by a second pump that feeds the water into the drum at the beginning of the washing process. In parallel, the detergent is mixed with water and gets sprayed into the centre of the load, shortening the run time to only 59 minutes and increasing the wash performance.

rapid15 and rapid30
Need a clean shirt an hour before leaving the house? The rapid15 and rapid30 washing programmes are the perfect solution. These innovative features wash, rinse and spin clothes in under an hour.

Drum interior light
The drum is lit after switching on the appliance, after opening and closing the door, and after starting the programme for extra convenience. The light switches off automatically.

Less Ironing option
At the touch of a button, 'Less Ironing' can be added to a selected programme. This ensures the machine gently and evenly drains the water and reduces the spin speed, helping to keep creases to a minimum.

Outdoor
Specialised programme for washing waterproof clothing with membrane technology to protect the fabric and seams. For use with outdoor fabric detergent.

Outdoor/waterproof
This programme can be used to apply a waterproof treatment to breathable fabrics, prolonging the life of high-quality functional clothing like winter jackets, fleeces and ski wear.

Efficient laundry care, intuitively

Siemens washing machines take the hassle out of doing laundry.

Our machines take full advantage of the latest technology and innovation, and are designed to make laundry less of a chore.

Automatic programmes

Whether normal or delicate items – the automatic programme's 'Auto' function adjusts the entire wash cycle to suit various laundry needs for optimum effect. Perfect for hard-wearing fabrics this mode will even add extra detergent if the washing is heavily soiled.

Hygienically clean laundry: The hygiene programme

The hygiene programme is particularly suitable for people with allergies.

Meets the highest hygiene standards: The Drum Clean programme

An automatic alert after 20 washes notifies when to run the Drum Clean programme on a 90°C or 60°C wash which keeps the appliance clean and odour free.

Get perfectly clean laundry in up to 65%* less time with varioSpeed

Available on all our washing machines, this feature can automatically detect when time can be saved. The smart sensors identify load volume and type of textile, hence adapting the washing machine's process time efficiently to suit the specific load.

*Difference between the duration of the Easy Care Programme 40°C and the duration of the Easy Care Programme 40°C in combination with the varioSpeed option.

Take a load off with Home Connect.

Siemens' smart washing machines, with Home Connect, have exciting features that provide more flexibility and choice when doing laundry.

Optimal dosing of detergent

i-Dos accurately dispenses detergent based on fabric type, water hardness and degree of soiling. With the detergent scan on the Home Connect app, the intelligentDosing can even be further optimised. Simply scan the chosen detergent and fabric softener and Home Connect will set up the ideal dosage settings perfectly, only using the exact amount of detergent needed, every time.

Match the laundry programme to specific needs

Use the Home Connect app to guide programme selection. Home Connect gives a description of each programme, and an indication of its energy and water consumption, so the best decisions are made for certain laundry needs. Home Connect also enables the washing machine and the dryer to work together. The dryer automatically chooses the right programme and the most suitable drying target based on the load washed in the washing machine.

Connected partners

With our connected partners - Amazon Alexa, Google Home and IFTTT - any living space can be turned into a fully connected home. Speak to appliances simply by asking Amazon Alexa or Google Home voice assistant. With the IFTTT app, Home Connect appliances can be connected to a wider range of smart devices. Set up applets and digital commands to create bespoke solutions such as programming smart lights to flash when the laundry cycle ends.

For more information about Home Connect, visit Siemens Home IE: siemens-home.bsh-group.com/ie

Or scan the QR code to learn more about our smart laundry appliances.

Washing machine key features

Clear display for easy selection.

All our models feature easy to use, intuitive LED displays to provide a full overview and make operation effortless.

Display shown: **WG46G2Z9GB** iQ500 washing machine

Display shown: **WG56B2A1GB** iQ700 washing machine

Just add laundry with i-Dos.

The i-Dos system automatically determines how much detergent is needed for each wash load, based on the weight of the laundry and programme used. Once the laundry is placed in the drum the intelligent washing machine will automatically determine the optimum allocation of detergent.

The built-in drawer conveniently holds enough liquid detergent for around 20 washes which removes the need to measure and fill the container for every wash. As the correct amount of liquid detergent is used every time, clothes will receive the perfect wash whilst saving time, water and detergent. Resulting in hassle-free laundry and perfectly clean clothes. With Home Connect, the detergent scan feature will even further adjust the dosing based on the detergent used.

Tough on stains, gentle on clothes.

With the stainRemoval system, tough stains can be removed effortlessly without the need for specialist products or pre-washing. After loading clothes in the machine, up to 16 stain treatments* are available to select from.

Whether it is red wine or coffee, dirt or grass, blood or even cosmetics, our stainRemoval system automatically optimises the wash settings to remove individual stains from laundry. The system tailors the wash according to the nature of the stain, creating the perfect balance between the mechanical drum action, water level, wash time and temperature, thus, saving time, money on buying specialist products and removing the need for pre-washing. Unforeseen accidents need not ruin clothes anymore.

*16 stain treatments available on Home Connect models.

Fast and efficient washing machines with added peace of mind.

*Offer dates: 01.04.24 – 31.03.25. Online registration required. For full T&Cs and qualifying appliances visit siemens-home.bsh-group.com/ie/customer-service/warranty

A breath of fresh air: Siemens Washer Dryers

Enjoy the luxury of complete laundry care without needing a lot of space.

varioSpeed

Get perfectly clean laundry in up to 65%* less time. This feature can automatically detect when time can be saved. The smart sensor identifies load volume and textile kind, hence adapting the washing machine's process time efficiently to suit the specific load.

autoDry

autoDry technology prevents overheating or uneven drying. Sensors precisely measure and control the temperature and moisture of laundry, preventing it from shrinking.

selfCleaning condenser (Washer Dryers and Tumble Dryer)

An automatic selfCleaning condenser is integrated into many Siemens laundry appliances helping to keep the condenser lint free. This sensor-controlled programme is intuitive and collects lint during each drying cycle. The result is a continually lint-free condenser that helps to keep energy consumption constantly low at all times. The fluff just needs to be removed from the lint filter after every cycle.

*Difference between the duration of the Easy Care Programme 40°C and the duration of the Easy Care Programme 40°C in combination with the varioSpeed option.

Fast and efficient washer dryers
with added peace of mind.

Model shown: **WN54G1A1GB**

The i-Dos system automatically determines how much detergent is needed for each wash load, based on the weight of the laundry and programme used. Once the laundry is placed in the drum the intelligent washing machine will automatically determine the optimum allocation of detergent.

The built-in drawer conveniently holds enough liquid detergent for around 20 washes which removes the need to measure and fill the container for every wash. As the correct amount of liquid detergent is used every time, clothes will receive the perfect wash whilst saving time, water and detergent. Resulting in hassle-free laundry and perfectly clean clothes.

Wash&Dry60

With just one push of the button, the washer dryer perfectly washes and carefully dries up to 1kg of laundry in only 60 minutes. Perfect for when clothes need to be prepared quickly.

The 10.5kg washer dryer

The 10.5kg washer dryer model provides ultimate convenience. Ideal for families, achieve everything in one go with the ability to wash and dry a larger-than-average load.

smartFinish

The smartFinish programme uses gentle steam to reduce wrinkles, cutting down ironing time. Even badly wrinkled shirts and blouses are significantly smoothed out.

Intelligent drying: Siemens Tumble Dryers

With the latest technology built into our appliances, Siemens offers energy-efficient and stunning looking appliances for stylish kitchens and utility spaces.

Take the guess work out of drying

Home Connect enables the washer and dryer to work together. The dryer automatically chooses the right programme and the most suitable drying target based on the load washed in the washing machine. intelligentDry guarantees precise drying results with maximum protection. Let Home Connect do the thinking.

High-performance and highly-efficient (Tumble Dryers only)

Be fascinated by the state-of-the-art technology of Siemens heat pump dryers. Heat pump dryers are condensation dryers equipped with a special heat pump technology. In contrast to classic condensation dryers, energy in the form of heat is not discharged into the environment; instead it is retained for the drying process.

Siemens heat pump dryers achieve impressive energy values and consume significantly less energy than condensation dryers. Our heat pump dryers can also be set up, like all condensation dryers, in multiple places within the home, since the condensed water is collected in a separate container integrated into the appliance. Alternatively, if preferred, the water can be drained out if plumbing allows.

Sensor drying

All Siemens tumble dryers feature sensor drying, which provides uniform drying results, and makes over-drying a thing of the past. Sensors in the drum continually monitor the residual moisture in the laundry. They detect when the load has reached the selected drying level, and move the programme to the final cool-down period.

A lot less ironing

The Less Ironing option extends the anti-crease phase period at the end of the cycle by up to 120 minutes leading to fewer creases in laundry – so less time is spent ironing.

varioSpeed

This feature can automatically detect when time can be saved. The smart sensor identifies load volume and textile kind to adapt the tumble dryer's programme time efficiently to suit the specific load.

The rapid40 drying programme

With this programme, washing will be perfectly dry in only 40 minutes, thanks to optimised temperature control and a customised cool-down phase.

Wool or shoe drying basket

To further protect garments and materials during the drying process, Siemens iQ500 and iQ700 tumble dryers come with a drying basket. Warm air is then gently passed around the garments, rather than tumbling them.

Wool drying basket

Shoe drying basket

Stacking kits

Not only helping to stabilise the dryer on top of the washing machine, the shelf allows the easy loading and unloading of the dryer.

Product codes: WZ27410 (standard) / WZ27400 (with pull-out shelf).

State-of-the-art technology is at the heart of all Siemens tumble dryers.

*Offer dates: 01.04.24 – 31.03.25. Online registration required. For full T&Cs and qualifying appliances visit [siemens-home.bsh-group.com/ie/customer-service/warranty](https://www.siemens-home.bsh-group.com/ie/customer-service/warranty)

Intelligent Care, Our award-winning customer service team

Dedicated Siemens Service
With our dedicated team of trained and qualified engineers available across the United Kingdom*, each having undergone over 400 hours of training, you can be confident that your Siemens appliances are in the safest of hands.

Customer service.

Trust Siemens Customer Service to help with the following:

- Offer product advice on using our appliance or help with choosing a new Siemens appliance.
- Register a Siemens appliance and extend the warranty.
- Arrange a repair for a Siemens appliance by one of our Siemens engineers.*
- Locate and buy replacement spare parts and accessories.

Call us on: **UK: 0344 892 8999 IE: 01450 2655**
For opening hours, please visit our website.

Calls are charged at the basic rate, please check with the relevant telephone service provider for exact charges.

* In some areas of the UK and Ireland we use selected and approved service partners to carry out repairs on our behalf where the repair price and process may vary.

Repair service.

If a Siemens appliance needs a repair, we are here to help. Our team of locally based engineers are employed and trained by Siemens, which gives them unrivalled knowledge and expertise to repair our appliances.*

It is easy to book, and manage an engineer visit online or via our call centre (see left for contact details).

Book or manage a repair online at:
UK: www.siemens-home.bsh-group.com/uk/customer-service/repair
IE: www.siemens-home.bsh-group.com/ie/customer-service/repair

Online help.

Prefer to receive help online?

Siemens also offers a high quality comprehensive range of online services. Our online support offers help getting familiar with our appliances, find user manuals, browse FAQ's, get useful tips and have full control over an engineer booking.

Visit our online customer service portal at:
UK: www.siemens-home.bsh-group.com/uk/customer-service/
IE: www.siemens-home.bsh-group.com/ie/customer-service/

Online shop.

Accessories and cleaning products.

Well maintained appliances last longer, this is why we offer everything needed to look after any of our appliances on the Siemens online store. Our tested and approved cleaning and care products can be found there, along with other accessories ranging from a water filter for fridges, to a Teppanyaki grill plate for hobs.

Shop online at:
UK: www.siemens-home.bsh-group.com/uk/shop
IE: www.siemens-home.bsh-group.com/ie/shop

Spare parts.

Siemens keeps a comprehensive range of replacement spare parts for up to 15 years. You can browse our exploded view diagrams on our store or speak to an advisor on the phone to help you locate and buy the spare parts you need.

Shop spare parts online at:
UK: www.siemens-home.bsh-group.com/uk/shop/search-parts
IE: www.siemens-home.bsh-group.com/ie/shop/search-parts

Download and install
Home Connect App

Partners brought to you
by Home Connect

Apple App Store

Google Play Store

More support with the Home Connect app.

Pairing a Siemens home appliance with the Home Connect app unlocks additional services including service support. The Home Connect app can provide useful push notifications when an appliance needs attention, such as when the filters need replacing or a clean care cycle is needed. Useful reminders will also let the user know when detergent, rinse aid and salt are running low. User manuals, self-help tips, appliance information and customer service contact details are also available directly from the app when needed.

Download the Home Connect app for more info.

Warranties and Registration

Register my appliance

Siemens recommends that all home appliances are registered to ensure we can easily contact customers in the event of an important product update. For more information about registering appliances of all brands, please visit: www.registermyappliance.org.uk

Siemens offers a 5 year warranty as standard on all our studioLine products across the range, for exceptional peace of mind. This warranty covers manufacturing and material faults.

2 year warranty
All Siemens home appliances have a Siemens two year manufacturer's warranty as standard to protect against manufacturing or material faults and defects during this warranty period.

To register call:
UK: 0800 519 2116
IE: 01230 0344

Or register online:
UK: www.siemens-home.bsh-group.com/uk
ROI: www.siemens-home.bsh-group.com/ie

5 year warranty
From time to time, Siemens may present additional warranties on either products or defined components of a product which are time limited offers.

To register call:
UK: 0344 892 8999
IE: 01450 2655

Or register online:
UK: www.siemens-home.bsh-group.com/uk
IE: www.siemens-home.bsh-group.com/ie

Offer dates: 01.04.24 – 31.03.25. Online registration required. To check if a product qualifies, please contact us, scan the QR code or go online at www.siemens-home.bsh-group.com/ie/customer-service/warranty

10 Year Compressor Drive Warranty
Available on selected Siemens fridges and freezers, this warranty covers defects in the compressor motor.

10 Year Anti-Rust Warranty for Dishwashers
Protects against rust in the inner cavity of the appliance during this warranty period. Applies to all Siemens dishwasher appliances only.

10 Year iQdrive® Motor Warranty
Protects against manufacturing or material faults and defects to the iQdrive motor only during this warranty period. Applies to selected Siemens laundry appliances only.

Lifetime AquaStop Warranty
A lifetime warranty to protect against water damage caused by a defective AquaStop system. Applies to selected Siemens laundry and dishwasher appliances only.

Notes

This image shows a full page of blank, lined paper. It features approximately 20 horizontal grey lines spaced evenly apart, typical of notebook paper. The lines extend across the entire width of the page, leaving small margins at the top and bottom. There are no vertical lines or other markings present.

Models shown on front left to right:

HM778GMB1B single oven, **CT718L1B0** coffee machine, **BI710C1B1B** warming drawer,
CM778GNB1B compact oven, **BI710C1B1B** warming drawer.

This brochure is current as from the publication date and supersedes all previous brochures for these products. Whilst BSH Home Appliances Ltd believes that all information contained within this brochure is correct at the time of going to print, no representation or warranty, express or implied, is or will be made and no responsibility or liability is or will be accepted by BSH Home Appliances Ltd in relation to the accuracy or completeness of this information and any liability is expressly disclaimed. To the extent permitted by law, BSH Home Appliances Ltd expressly excludes: i) all conditions, warranties and other terms which might otherwise be implied by statute, common law or the law of equity and ii) any liability for any direct, indirect or consequential loss or damage (including, without limitation, damages for loss of business or loss of profits) arising in contract, tort or otherwise from the use of or reliance on any information contained within this brochure or from any action or decision taken as a result of such use or reliance. BSH Home Appliances Ltd reserves the right to modify technical data and all other information contained within this brochure without notice. All rights reserved.

No part of this publication may be reproduced in any form or without the prior written permission of BSH Home Appliances Ltd.

This brochure should not be regarded as an infallible guide nor as an offer of sale for a particular product.

Due to variables in the reproduction process, colours of actual products may vary slightly from those depicted. We recommend a visit to a Siemens dealer to confirm that specifications and colours are to your satisfaction.
