Your washing machine

Congratulations - You have opted for a modern, high-quality domestic appliance manufactured by Siemens. The washing machine is distinguished by its economical water- and energy

Each machine that leaves our factory has been inspected thoroughly to ensure that it functions properly and is in perfect condition.

Further information: www.siemens-home.com

Environmentally friendly waste disposal

All packaging must be disposed of in accordance with environmental quidelines.

This appliance is certified in accordance with European Directive 2002/96/EEC on waste electrical and electronic equipment

This directive provides the framework for the EU-wide collection and reuse of used appliances.

ntection of the environment/Conservation tight - Always fill the washing machine with a maximum amount of

- laundry for the relevant programme.
- Wash normally soiled laundry without a pre-wash. Instead of Cottons 90 °C. choose the programm
- The Cottons 60 °C with the additional function ecoPerfect Comparable cleaning result with significantly lower energy
- Measure the detergent according to the manufacturer's instructions and water hardness.
- If the laundry is then dried in the tumble dryer, select the spin speed according to the instructions of the dryer manufacturer.

ntended use

- for domestic use only.
- for washing machine-washable fabrics and hand-washable wool in detergent solution,
- to be operated with cold drinking water and commercially available detergents and care products which are suitable for use in washing machines.

Safety instructions

 Read the instruction manual and installation instructions and all other information enclosed. with the washing machine and act accordingly.

Retain the documents for subsequent use.

Risk of electric shock – Never pull the cable to disconnect the mains plug. Never insert/disconnect the mains plug with damp hands.

Danger to life For worn-out appliances:

> Disconnect the mains plug. Sever the mains cable and discard along with the plug.

 Destroy the lock on the washing machine door. This will prevent children from locking themselves in and risking their lives.

Danger of suffocation Keep packaging, film and packaging parts out of the reach of

Risk of poisoning Risk of explosion

Keep detergents and care products out of the reach of children.

 Items of laundry pretreated with cleaning agents containing solvents, e.g. stain remover / cleaning solvent may lead to an explosion after being loaded into the washing machine. Rinse items of laundry thoroughly by hand beforehand.

Risk of injury The washing machine door can become very hot.

 Be careful when draining hot detergent solution. Do not climb onto the washing machine.

Do not lean on the open washing machine door.

Do not reach into the drum if it is still rotating.

 Be careful when opening the detergent drawer while the machine is in operation.

Programmes

备T Cottons	J. 00 - 32			-(Exertinal Partect* @ acc Darfact = (Eseviron) ww (Extra rince)
+ J Prewash	0 06-*	7 ka/	Hard-wearing fabrics heat-resistant fabrics made of	2) speculation, & ecolation, a (lasy-ini), & (latinise)
♣ Hygiene	ე。09-₩	4 Kg*	cotton or linen	五 speedPerfect*, @ eco Perfect, 国 (Easy-iron), w (Extra rinse); for especialy sensitive skin, extandad wash cycle at selected temperature, higher water level, additional rinse cycle
合 Easy-Care	ე。09-₩—		Easy-care fabrics made of cotton, linen, synthetic fibres or blended fabrics	亞 speedPerfect, Ø ecoPerfect, 為 (Easy-iron), 📨 (Extra rinse)
企働 ⇔ Mix	*-40°C	3 kg	Fabrics made of cotton or easy-care fabrics	=① speedPerfect, Ø ecoPerfect, ⊃ (Easy-iron), (Extra rinse); different types of laundry can be washed together
📤 Dark Wash	%-40°C		Dark-colored fabrics made of cotton and dark easy-care fabrics	=① speedPerfect, @ ecoPerfect, ≥ (Easy-iron), (Extra rinse); Reduced rinse and final spin cycle
∴ Delicate/Silk	%-40°C		For delicate, washable fabrics, e.g. made of silk, satin, synthetic fibres or blended fabrics (e.g. curtains)	- ∰ speed Perfect, Ø eco Perfect, ﷺ (Easy-iron), (Extra rinse); No spin between rinse cycles
® ← Wool	\$-40°C		Hand- or machine-washable fabrics made of wool or containing wool	Particularly gentle wash programme to avoid shrinkage of laundry, longer programme breaks (fabrics rest in the detergent solution)
G Super 15′	\$-40°C	2 kg	Easy-care fabrics made of cotton, linen, synthetic fibres or blended fabrics	Short programme, approx. 15 minutes, suitable for lightly soiled laundry
A Outdoor	%-40°C		All-weather, sports and outdoor fabrics including fabrics with weatherproof membrane	∃① speed Perfect, Ø eco Perfect, (Extra rinse); Reduced final spin in intervals
帝 Shirts/Business	ე。09-₩		Non-iron shirts made of cotton, linen, synthetic fibres or blended fabrics	=① speedPerfect, @ ecoPerfect, ≥ (Easy-iron), (Extra rinse); spin only, hang up dripping wet
# Lingerie	- 40°C ₩	1 kg	Dessous	- ◯ speed Perfect, ⊘ eco Perfect, ≥ (Easy-iron), 🖦 (Extra rinse)
Additional programmes			R ®	ഈ Rinse/© Spin, ്പ് Empty
7	ŕ	100 to 00 to	++	

Reduced load for additional **ED speed** Perfect function.

Programmes without pre-wash - add detergent to compartment II, programmes with pre-wash - distribute the detergent between compartments I and III.

Safety instructions

 Read the instruction manual and installation instructions and all other information enclosed with the washing machine and act accordingly.

Retain the documents for subsequent use.

Risk of electric shock – Never pull the cable to disconnect the mains plug.

Never insert/disconnect the mains plug with damp hands.

Danger to life

0811

9000 494 315

WM12E461TH

Siemens-Electrogeräte GmbH Carl-Wery-Str. 34 81739 München / Germany For worn-out appliances:

Disconnect the mains plug.

- Sever the mains cable and discard along with the plug.

 Destroy the lock on the washing machine door. This will prevent children from locking themselves in and risking their lives.

Danger of suffocation

- Keep packaging, film and packaging parts out of the reach of children.

Risk of poisoning Risk of explosion

- Keep detergents and care products out of the reach of children.

 Items of laundry pretreated with cleaning agents containing solvents, e.g. stain remover / cleaning solvent may lead to an explosion after being loaded into the washing machine. Rinse items of laundry thoroughly by hand beforehand.

Risk of injury

- The washing machine door can become very hot.

- Be careful when draining hot detergent solution.

- Do not climb onto the washing machine.

Do not lean on the open washing machine door.

Do not reach into the drum if it is still rotating.

- Be careful when opening the detergent drawer while the machine is in operation.

Programme setting with maximum spin speed for testing according to or in accordance with IEC 60 456.

The values deviate from the indicated values depending on water pressure, water hardness, water inlet temperature, room temperature, type and amount of washing and degree of soiling, utillised detergent, fluctuations in the mains voltage and selected additional

Care

Risk of electric shock. Disconnect the mains plua.

Risk of explosion. No solvents.

Before washing for the first time

Do not load any laundry into the machine. Turn on the tap.

Add the following to compartment II:

- approx. 1 litre water
- detergent (dosage according to the manufacturer's instructions for light soiling and the appropriate degree of water hardness)

Set the programme selector to & Easy-Care 60 °C and select & Start/Reload. At the end of the programme, turn the programme selector to Off.

Machine housing, control panel

- Wipe with a soft, damp cloth.
- Do not use any abrasive cloths, scourers or cleaning agents (stainless steel cleaners).
 Remove detergent and cleaning agent residue immediately.
- Do not clean with a jet of water.

Cleaning the detergent drawer ...

... if it contains detergent or fabric softener residues.

- 1. Pull out, press insert down, remove draw completely.
- 2. To remove the insert: press the insert upwards from below with your finger.
- 3. Clean the detergent dispenser tray and insert with water and a brush and dry it

Leave the detergent drawer open so that any residual water can evaporate.

- Attach the insert and engage (connect the cylinder to the guide pin).
- 5. Push in the detergent drawer.

Drum

Leave the washing machine door open so that the drum can dry out. Rust stains - use chlorine-free cleaning agent, not steel wool.

Descalina

Ensure there is no laundry in the machine

Descale the appliance according to the descaler manufacturer's instructions. This should not be necessary if the correct dosage of detergent is used.

Emergency release, e.g. in the event of a power cut

The programme continues to run when the power has been restored. However, if the laundry has to be removed, the washing machine door can be opened as follows:

Risk of scalding.

The detergent solution and laundry may be hot. If possible, leave it to cool

Do not reach into the drum if it is still rotating.

Do not open the washing machine door if water can be seen through the glass.

- 1. Turn the programme selector to **Off** and disconnect the mains plug.
- 2. Drain the detergent solution -> page 10.
- 3. Pull the emergency release downwards with a tool and release. Washing machine door can then be opened.

Information on the display panel depending on model

- F: 16 Close the washing machine door properly; laundry may be caught.
- F: 17 Open the tap completely, supply hose kinked or trapped; Clean the filter -> page 10, Water pressure too low.
- Detergent solution pump blocked; Clean the detergent solution pump -> page 10. Drainage hose F: 18 / waste pipe blocked; Clean the drainage hose at the siphon -> page 10.
- Motor fault. Call customer services. F: 21
- F: 23 Water in the base tub, appliance leaking. Call customer services.

Maintenance

Risk of scalding.

Allow the detergent solution to cool down. Turn off the tap.

Detergent solution pump

Turn the programme selector to **Off** and disconnect the mains plug.

1. Open and remove the service flap.

2. For models with a drainage hose: Remove the drainage hose from the retainer and pull it from the housing. Remove the container. Remove the sealing cap, allow the detergent solution to flow out. Replace the sealing cap and place the drainage hose in the retainer.

2* For models without a drainage hose: Carefully unscrew the pump cover until the detergent solution begins to flow out. When the service flap is half full, close the pump cover and empty the service flap. Repeat the above steps until all the detergent solution has completely drained out.

- 3. Carefully unscrew the pump cover (residual water).
- 4. Clean the interior, pump cover thread and pump housing (the impeller in the detergent solution pump must rotate).
- 5. Replace the pump cover and screw it tightly.
- 6. Place the service flap back on and close.

To prevent unused detergent from flowing straight into the drain during the next wash: Pour 1 litre of water into compartment II and start the Empty programme.

Drainage hose at the siphon

Turn the programme selector to **Off** and disconnect the mains plug.

- 1. Loosen the hose clamp, carefully remove the drainage hose (residual water).
- 2. Clean the drainage hose and siphon connecting piece.
- 3. Reattach the drainage hose and secure the connection with the hose clamp.

Filter in the water supply

Risk of electric shock!

Do not immerse the HydroSafe safety device in water (contains an electric valve).

- 1. Turn off the tap.
- 2. Select any programme (apart from Rinse/ Spin/ Empty).
- 3. Choose ♦ Start/Reload. Let the programme run for approximately 40 seconds.
- 4. Turn the programme selector to Off. Disconnect the mains plug.

and/or for Standard and Agua-Secure models:

Remove the hose on the rear of the appliance. Remove the filter with pliers and clean.

6. Connect the hose and check for leaks.

What to do if

VVI	nat to do if	
•	Water is leaking out.	Attach/replace the drainage hose correctly.Tighten the screw connection of the supply hose.
	No water supply. Detergent not dispensed.	 → Start/Reload not selected? Tap not turned on? Filter blocked? Clean the filter -> page 10. Supply hose kinked or trapped?
	Washing machine door cannot be opened.	 Safety function active. Programme stopped? -> page 4. Ø (without final spin) selected? -> page 3, 4. Can be opened by emergency release only?-> page 9.
	Programme does not start.	 → Start/Reload or ⊕ (Finished in) time selected? Washing machine door closed? Childproof lock active? Deactivate -> page 5.
	Detergent solution is not drained.	 Ø (without final spin) selected? -> page 3, 4. Clean the detergent solution pump -> page 10. Clean the waste pipe and/or drainage hose.
	Water not visible in the drum.	Not a fault - water below the visible area.
•	Unsatisfactory spin result. Laundry wet/too damp.	 Not a fault - the unbalanced-load detection system has cancelled the spin cycle because of uneven distribution of the laundry. Distribute small and large items of laundry evenly inside the drum. (Easy-iron) selected? -> page 5. Selected speed too low? -> page 5.
	changes during the wash cycle.	 Not a fault – the programme sequence is optimised for the particular wash process. This may result in changes to the programme duration in the display field.
	Spin cycle performed several times.	 Not a fault - unbalanced load detection system adjusts the imbalance.
	Residual water in the compartment for care products.	 Not a fault - the action of the care product is not affected. Clean the insert if necessary -> page 9.
	Odour formation in the washing machine.	 Run programme 全行Cottons 90 °C without laundry. Use standard detergent.
	Status display flashes. Foam may be coming out of the detergent drawer.	 Too much detergent used? Mix 1 tablespoon of fabric softener with ½ litre of water and pour into dispenser II (not for outdoor and down-filled textiles!). Reduce the detergent dosage for the next wash cycle.
	Intense noise formation, vibrations and "wandering" during the spin cycle.	 Are the appliance feet fixed? Secure the appliance feet -> Installation instructions. Transportation safety devices removed? Remove the transportation safety devices -> Installation instructions.
	Noises during spin and drain cycles.	- Clean detergent-solution pump -> page 10.
•	Display panel/indicator lamps do not function during operation.	Power cut?Fuses triggered? Reset/change the fuse.If the fault occurs repeatedly, call customer services.
	Programme sequence longer than usual.	 Not a fault - unbalanced load detection system adjusts imbalance by repeatedly distributing the laundry. Not a fault - foam detection system active - adds an additional rinse cycle.
•	Detergent residues on the laundry.	 Occasionally, phosphate-free detergents contain water-insoluble residues. Use the Rinse/ Spin cycle or brush out the laundry after

washing.

- If you cannot correct a fault yourself (switching on/off) or a repair is required:

 Turn the programme selector to **Off** and remove the mains plug from the socket.

 Turn off the water supply and call customer services -> Installation instructions.

Observe the safety instructions on page 8.

Washing machine

Instruction manual

en

Read these instructions and the separate installation instructions before operating the washing machine.
