The humidity in the room approximately 51 kg

**Installation**

1. Open the door.
2. Refit the filter.
3. Rinse the fluff filter under running water.
4. Wait 2 hours and start again.
5. Make sure that the air inlet is clean and level.

**Care and cleaning**

1. The dryer must not be used by children or persons who have not been instructed.
2. Dust (e.g. coal dust, flour) poses a danger: Do not use the dryer in rooms inside the house.
3. If the dryer is tilted, the water in the condensation container will not be able to flow out.
4. Connect the dryer to an AC earthed socket according to specifications.
5. Ensure that air can circulate.

**Technical data**

- **Ambient temperature**
  - 5...40 °C
- **Fuse protection**
  - 1,5 A
- **Connected load**
  - 2,2 kW
- **Connection voltage**
  - 220-240 V
- **Condensation container**
  - **Max. capacity**
    - Cupboard Dry* 800 (approx. 40 %) 54 0.57
    - Cupboard Dry* 1400 (approx. 50 %) 128 1.62
    - Cupboard Dry* 2000 (approx. 60 %) 168 2.10
    - Cupboard Dry* 3500 (approx. 70 %) 133 1.70
    - Cupboard Dry* 5000 (approx. 80 %) 169 2.19
- **Internal dimensions**
  - 60 x 60 x 85 cm (height adjustable)
- **Weight**
  - 20 kg
- **Normal noises**
  - A clicking noise.
  - A normal noise.

**Normal noises**

- Using the control panel and the drying programme control:
  - A clicking noise.
  - A normal noise.

**What to do if...**

- The selected programme does not suit the load. Use another drying programme or, in addition, select the time for drying.
- The programme has stopped automatically without a failure, door open or maximum drying time reached. Carry out another drying programme or, in addition, select the time for drying.
- A moisture sensor is wet. This can flow out if the dryer is tilted.
- If in doubt, have the appliance connected by a specialist.
- Be careful to avoid sharp edges.
- The dryer is very heavy. Do not attempt to lift it on your own.

**What to do if...**

- The selected programme does not suit the load. Use another drying programme or, in addition, select the time for drying.
- Wait 2 hours and start again.
- Never operate the dryer without a cover cap.
- Only use genuine spare parts and accessories for safety reasons.
- Defect

**Safety Instructions**

- Do not remove the threaded feet under any circumstances.
- Do not obstruct the air inlet on the front of the dryer.
- Do not set up the dryer behind a door or sliding door, as this may obstruct the dryer door or prevent it from opening. This will prevent a potentially fatal danger to children from locking themselves in.
- Do not attempt to use the dryer during a prolonged use.
- Do not use steel wool or abrasive materials.
- Do not use the appliance covering plate, you must be modified in terms of its technology or properties.
- Do not throw the limescale in the trash. Capacity: 0.22 kg.
- Use a spirit level.
- Read these instructions before switching on the dryer.
Rinse the fluff filters under running water → page 4. Clean filter
Empty the condensation container.
Clean the filter in the condensation container if necessary → page 9.

End of programme after 1-24 hours (button may need to be pressed several times) can always be set to the nearest full hour.

Automatic cleaning of the heat exchanger.

0, 1, 2, 3 The drying result (e.g. Cupboard Dry) can be adjusted over three levels (1 - max. 3) for the Cotton, Easy-Care, Mixed Fabrics and Rapid 40 programmes → presetting = 0. After one of these programmes has been finely adjusted, the setting is retained for the others. Further information → page 6.

**Low Heat** Reduced temperature for delicate fabrics Drying time; e.g. polyacrylics, polyamide, elastane

**Less Ironing** Reduces creasing and prolongs the ‘reduced ironing’ programme has finished.

**Buzzer** Select On/Off for buzzer at the end of the programme.

Never start the dryer if it is damaged. Inform your after-sales service.

Make sure your hands are dry. Hold the plug only.

Remove all items from pockets. Check for cigarette lighters.

The drum must be empty prior to loading.

See programme overview on page 7.

For further information about our products, accessories, spare parts and services, please visit: www.siemens-home.com
Drying

Emptying condensation
Empty the container after each drying cycle, not during drying.
1. Remove the condensation container and hold it level.
2. Pour out the condensation.
3. Always push container in fully until it clicks into place.
   If the Empty water indicator lamp flashes despite the container having been emptied → Filter in condensation container, page 9.

Cleaning the fluff filter
The fluff filter consists of two parts.
Clean the inner fluff filter after every drying cycle.
1. Open the door. Remove fluff from the door/door area.
2. Pull out the inner fluff filter and open it out.
3. Remove the fluff (by wiping the filter with your hand).
   If the fluff filter is heavily soiled or blocked, rinse it under running water and dry thoroughly.

Switching off the dryer
Turn the programme selector to Off.
Do not leave laundry in the dryer.

Removing the laundry
Your dryer is equipped with an automatic reduced ironing function. The drum is moved at specific time intervals for 60 minutes once the programme has ended. The laundry stays loose and fluffy (or 120 minutes if the additional Less Ironing function is selected).

End of programme as soon as the AntiCrease/End indicator lamp lights up.

Interrupt programme Adding or removing laundry.
1. Open the door. The drying process is interrupted.
2. Add or remove laundry then close the door.
3. If required, select a new programme and additional functions.
4. Press the Start/Stop button. The remaining time is updated after a few minutes.

Do not pull out/empty the condensation container when drying is in progress.
Information on laundry ...

Labelling of fabrics

Follow the manufacturer’s care information.

- Dry at normal temperature.
- Dry at low temperature → in addition, select Low Heat.
- Do not machine dry.

Always observe the safety instructions on page 13.
Do not tumble-dry the following fabrics, for example:
- Non-breathable fabrics (e.g. rubber-coated).
- Delicate materials (silk, curtains made from synthetic material) → these may crease.
- Oil-stained laundry.

Drying tips

- To ensure an even result, sort the laundry by fabric type and drying programme.
- Always dry very small fabrics (e.g. baby socks) together with large items of laundry (e.g. towels).
- Close zips, hooks and eyelets, and button up covers.
- Tie fabric belts, apron strings, etc. together
- Do not over-dry easy-care laundry → Risk of creasing.
- The drying result depends on the type of water used during washing. → Fine adjustment of the drying result → page 6.
- Knitted fabrics (e.g. T-shirts, jerseys) often shrink slightly the first time they are tumble-dried. → Do not use the Cupboard Dry Extra programme.
- Allow laundry to finish drying in the air.
- Do not dry woollens in the dryer. They may, however, be refreshed → page 7.

Environmental protection / Energy-saving tips

- Before drying, spin the laundry thoroughly in the washing machine → the higher the spin speed, the shorter the drying time will be, thus less energy is consumed. Also spin easy-care laundry.
- Use the maximum recommended capacity, but do not exceed it → Programme overview page 7.
- Make sure the room is well ventilated during drying.
- Do not cover or seal the air inlet.

Fine adjustment of the drying result

Adjustment of the levels of dryness

Turn to Off
1 x to the right
Press and hold Low Heat and turn 5 x to the right
Press Low Heat until the required level is reached
Turn to Off

L:00, L:01, L:02, L:03 are shown in sequence
Short signal when changing from L:03 to L:00, otherwise long signal.

Important Information ...

Your dryer is designed to be particularly energy efficient. Its technical features include a refrigeration circuit, which uses energy efficiently in a similar way to a refrigerator.

The dryer’s heat exchanger is cleaned automatically during drying.

The fluff filters and filter in the condensation container must be cleaned regularly.

Never operate the dryer without the fluff filters and/or condensation container with filter.

Fluff filters

During drying, fluff and hair from the laundry is trapped by the fluff filter. Blocked fluff filters may impair the heat exchange process.
The fluff filters must therefore be cleaned after every drying cycle. Rinse regularly under running water → page 4.

Filter in the condensation container

The filter in the condensation container cleans the condensation. This condensation is required for the automatic cleaning process. The filter should be cleaned regularly under running water. Empty the condensation container before cleaning the filter → page 4/5.

Fabrics

- Do not dry any fabrics that have come into contact with solvents, oil, wax, grease or paint: e.g. hair styling products, nail varnish remover, stain remover, cleaning solvent, etc.
- Empty all pockets.
- Do not dry non-breathable fabrics.
- Avoid drying items that produce a lot of fluff.
- Woollens should be refreshed only, using the woollens programme.
Sort the laundry according to type of textile and fabric. Fabrics must be suitable for tumble drying.

After drying...
- **Iron laundry**
- **Lightly iron laundry**
- **Do not iron laundry**
- **Mangle laundry**

### PROGRAMMES

<table>
<thead>
<tr>
<th>TEXTILE TYPE AND INFORMATION</th>
<th><strong>Cotton</strong></th>
<th><strong>Easy-Care</strong></th>
<th><strong>Mixed Fabrics</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>max. 7 kg</strong></td>
<td>Hard-wearing fabrics, boil-resistant fabrics made of cotton or linen.</td>
<td>Non-iron laundry made of synthetic fibres and blended fabric, easy-care cotton.</td>
<td>Mixed items of laundry made of cotton and synthetics (Mix).</td>
</tr>
<tr>
<td><strong>max. 3.5 kg</strong></td>
<td>Fabrics suitable for ironing (iron fabrics in order to avoid creasing).</td>
<td>Single-layer fabrics.</td>
<td></td>
</tr>
<tr>
<td><strong>max. 3 kg</strong></td>
<td>Fabrics made of thick, multilayered items of clothing.</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Woollens Finish</strong></td>
<td>max. 3 kg</td>
<td>Woolen fabrics suitable for washing machines. Fabrics become fluffier but not dry. Remove fabrics once the programme has ended and allow to dry.</td>
<td></td>
</tr>
<tr>
<td><strong>Rapid 40</strong></td>
<td>max. 2 kg</td>
<td>Laundry made of synthetic fibres, cotton or blended fabrics (for example) that needs to be dried quickly. The values may differ from the those specified depending on the type of fabric, mixture of laundry to be dried, residual moisture in the fabric and loading capacity.</td>
<td></td>
</tr>
<tr>
<td><strong>Outdoor</strong></td>
<td>max. 1.5 kg</td>
<td>Fabrics with membrane coating, water-repellent fabrics, functional clothing, fleece fabrics (dry jackets/trousers with removable internal lining separately).</td>
<td></td>
</tr>
<tr>
<td><strong>Programme time warm 30</strong></td>
<td>max. 3 kg</td>
<td>Pre-dried, multi-layered, sensitive fabrics made of acrylic fibres, or separate small items of laundry. Also for subsequent drying.</td>
<td></td>
</tr>
</tbody>
</table>

*for **Cotton** and **Easy-Care** programmes only

**Dryness levels can be selected individually → Cupboard Dry Extra, Cupboard Dry and Iron Dry (depending on the model).

Degree of dryness can be finely adjusted; multi-layered textiles require a longer drying time than single-layered items of clothing. Recommendation: Dry separately.
Installation

1. Setting up the dryer
   - Check dryer for transport damage.
   - The dryer is very heavy. Do not attempt to lift it on your own.
   - Do not lift the dryer by protruding parts (e.g. the door) - risk of breakage.

2. Mains connection
   - Connect to an AC earthed socket. If in doubt have the socket checked by a specialist.
   - The mains voltage and the voltage shown on the rating plate (page 10) must be the same.

Setting up the dryer

- The appliance plug must always be accessible.
- Ensure that the appliance is installed on a clean, level and firm surface.
- Do not obstruct the air inlet on the front of the dryer.
- Keep the area around the dryer clean.
- Make the dryer level using the threaded feet and a spirit level.
- Do not remove the threaded feet under any circumstances.

Frost protection

- Prepare the dryer → see Frost protection.
- Transport the dryer in a vertical upright position.
- Following transportation, do not use the dryer for two hours.

Preparation

- Empty the condensation container → page 4.
- Select any programme using the programme selector. To connect an AC earthed socket if in doubt have the socket checked by a specialist.
- Turn the programme selector to off.

Transport

- Take all accessory parts out of the drum.
- The drum must be empty.
- Make sure that the air inlet remains unobstructed.

Moisture sensor

- Open the door.
- Clean the moisture sensors using a damp sponge with a rough surface.
- Do not use steel wool or abrasive materials.

Care and cleaning

- Do not use steel wool or abrasive materials.
- Do not operate the dryer if there is a danger of frost.

Heat exchanger

- The dryer's heat exchanger is cleaned automatically during drying.

Filter in the condensation container

- Pull out the condensation container.
- Pull the filter out of its snap-in lock.
- Clean the filter under running water or in the dishwasher.
- Refit the filter.
- Insert the condensation container so that it locks into place.

Moisture sensors

- A thin layer of limescale may build up on the moisture sensors after prolonged use. The drum must be empty.
- A thin layer of limescale may build up on the moisture sensors after prolonged use. The drum must be empty.
- Remove detergent and cleaning agent residue immediately. Do not use harsh agents or solvents. Do not use steel wool or abrasive materials.
- Some water may collect between the window and the seal during drying. This does not affect the proper operation of your dryer in any way.

Appliance must be switched off.

Avoid sharp edges.

Do not set up in a room that is susceptible to frost. Freezing water may cause damage.

Do not remove the threaded feet under any circumstances.

Do not lift the dryer by protruding parts (e.g. the door) - risk of breakage.

*Test programs according to DIN EN 61121

**The values may differ from those given, depending on overvoltage and undervoltage, the type of fabric, composition of the laundry to be dried, the residual moisture in the fabric and the size of the load.

*Drum interior light (depending on model) (bulb E14, 25 W)*

The drum lights up after the door is opened or closed, and after the programme starts, and switches off automatically. Changing the bulb → page 12.

Optional accessories (from after-sales service using order number)

<table>
<thead>
<tr>
<th>Washer-dryer stack connection set</th>
</tr>
</thead>
</table>
| The dryer can be placed on top of a suitable washing machine with the same width and depth to save space. The dryer **must be** fastened to the washing machine using this connection set.
| Same as WZ 20310, but with pull-out worktop. |

<table>
<thead>
<tr>
<th>Installation underneath the worktop</th>
</tr>
</thead>
<tbody>
<tr>
<td>Instead of the appliance covering plate, you <strong>must</strong> have a metal cover fitted by a specialist.</td>

</tbody>
</table>

Normal noises

During drying, the compressor and the pump generate some noise which is entirely normal.

The compressor in the dryer may occasionally generate a humming noise. The volume and pitch of this may vary depending on the selected programmes and the progress of the drying.

The compressor in the dryer is ventilated from time to time, which creates a whirring sound.

The automatic cleaning process causes a clicking noise.

The process of pumping the condensation into the condensation container generates pumping noises.
What to do if...

If you cannot rectify a fault yourself (e.g. switching off/on), please contact our after-sales service. We will always find an appropriate solution and will avoid unnecessary visits by engineers. Trust the expertise of the manufacturer and rest assured that the repair will be carried out by trained service technicians using original spare parts. The contact details of your local after-sales service can be found in the enclosed after-sales service directory, or by calling one of these numbers:
- GB 0844 8928999 (Calls from a BT landline will be charged at up to 3 pence per minute. A call-set-up fee of up to 6 pence may apply.)
- IE 01450 2655

When contacting the after-sales service, please quote the appliance’s product number (E no.) and production number (FD) (see under the loading door).

Turn the programme selector to Off and unplug the mains plug from the socket.

- The Start/Stop indicator lamp does not light up. Main plug plugged in? Programme selected?
- The Empty water indicator lamp and the Start/Stop button are flashing. Empty the condensation container → page 4. Clean the condensation container filter if necessary → page 9. Dryer transported? → Wait 2 hours and start again.
- The Clean filter indicator lamp and Start/Stop button are flashing. Rinse the fluff filter under running water → page 4.
- CN appears in the display panel. Not an error. Automatic cleaning of the heat exchanger. Do not empty the condensation container.
- The dryer does not start. Start/Stop button selected? Door closed? Programme set? Ambient temperature greater than 5 °C?
- Water is leaking out. Make sure the dryer is level.
- The door opens by itself. Push the door closed until you hear it click into place.
- Creasing. Laundry load exceeded? Remove articles of clothing immediately after the end of the programme, hang up and pull into shape. Unusable programme selected → page 7.
- Drying result is not satisfactory (laundry feels too damp). Warm laundry feels damper than it actually is. The selected programme does not suit the load. Use another drying programme or, in addition, select the time programme → page 7. Use fine adjustment for the drying result → page 1/2 and 6. Fine layer of limescale on the humidity sensors → Clean the humidity sensors → page 9. Programme termination, e.g. tank full, mains power supply failure, dryer open or maximum drying time reached.
- Drying time too long. Rinse the fluff filters under running water → page 4. Insufficient supply of air → ensure that air can circulate. Air inlet possibly blocked → Clear inlet → page 8. Ambient temperature higher than 35 °C → ventilate the room.
- The humidity in the room increases significantly. Make sure the room is sufficiently ventilated.
- Power failure. Remove laundry from the dryer immediately and spread out. This allows the heat to dissipate.
- Loud humming noise for several seconds. Has the condensation container been properly inserted? → Push the condensation container all the way in. Not an error. Normal noises → page 11.
- The interior light is not working (depending on model). Pull out the appliance plug, remove the cover cap in the interior above the door (use Torx 20 screwdriver) and replace the bulb → page 10. Close the cover cap. Never operate the dryer without a cover cap.
Observe the safety instructions on page 13.

Read these instructions before switching on the dryer.
