Intended use

- only for domestic use.
- only to be used for drying, refreshing or unwrinkling fabrics that have been washed with water.

This appliance is intended for use up to a maximum height of 4000 metres above sea level.

Keep children younger than 3 years old away from the dryer.

Do not let children make the cleaning and maintenance work on the dryer without supervision.

Do not leave children unsupervised near the dryer.

Keep pets away from the dryer.

The dryer can be operated by children 8 years old and older, by persons with reduced physical, sensory or mental abilities and by persons with insufficient experience or knowledge if they are supervised or have been instructed in its use by a responsible adult.

Preparing for installation, see page 10

Never operate the dryer if it is damaged.
Inform your after-sales service.

Only if your hands are dry.
Only hold the plug by the plug casing.

Sorting and loading

Remove all objects from pockets.
Pay particular attention to cigarette lighters.
The drum must be empty before filling.
If necessary, fill the water tank for Steam Refresh/Drying programmes → page 8.
See programme overview on page 7.
See also separate instructions for “basket for wooll” (depending on the model).

Selecting and adjusting the programmes

Select the drying programme ... and adapt to individual requirements

Programme selector

Display panel

Additional functions

For selecting the settings.

For changing all the settings in the display panel.

1 -24 hrs
End of the programme after ... (depending on the programme selected, e.g. 1:54h → 2h; you can always select up to the next full hour).

0, 1, 2, 3, 4
There are four buzzer volume settings: 0 (off), 1 (quiet), 2 (normal), 3 (loud), 4 (very loud).

On-Off
Provides protection against unintentional changes to the functions set (press and hold the menu button for 5 seconds).

0, 1, 2, 3
The drying result (e.g. Cupboard Dry) can be increased in three stages (1 - 3) for the programmes Cottons, Easy-Care and Super 40° → presetting = 0. After one of these programmes has been finely adjusted, the setting is retained for the others.

600-1800
The spin speed that was used in the washing machine; for more precise indication of the projected drying duration only.

Electronic start timer

(Change)

Cottons

Low Heat

Super 40°

Fine adjustment of the drying result

Spin speed

Reduced temperature for delicate fabrics, e.g. acrylic, polyamide, elastane or acetate etc.

Reduces creasing and prolongs the anti-creasing phase after the programme has finished; can be selected in the programme overview on page 7.

Status indicators

Indicators which show the programme sequence;
Drying, Iron Dry, Cupboard Dry, End / Easy Iron, etc.

Service indicators

Clean the fluff filter and/or air cooler under running water.
Empty the condensation container.
Fill the water tank with distilled water → page 8.

Disposal in an environmentally-responsible manner

This appliance is labelled in accordance with European Directive 2012/19/EU concerning used electrical and electronic appliances (waste electrical and electronic equipment - WEEE). The guideline determines the framework for the return and recycling of used appliances as applicable throughout the EU.

This appliance is intended for use up to a maximum height of 4000 metres above sea level.

To help.

Every dryer which leaves our factory is carefully checked to ensure that it functions correctly and is in perfect condition.

Should you have any questions, our after-sales service will be pleased to help.

For further information about our products, accessories, spare parts and services, please visit: www.siemens-home.com
Inspecting the dryer

Connecting the mains plug

Loading laundry

Select the drying programme...

Individual requirements

are sensitive, a light touch is enough!

Press the start button

Drying / Short spin / Refresh

**Emptying condensation**

Empty the container after each drying cycle, not during drying!
1. Remove the container, holding it level.
2. Pour out condensation.
3. Push the container back in until it clicks into place.

**Cleaning the fluff filter**

1. Open the door, remove the filter and fold open.
2. Remove the fluff (by wiping the filter with your hand).
3. Close the filter, insert it again and close the door.
4. Remove fluff from the door and the area around it.
   Very dirty or blocked filters should be rinsed under warm water, and then dried thoroughly.

**Clean the filter in the water tank if it is dirty**

1. Remove the condensation tank.
2. Remove the filter.
3. Clean the filter under running water.
4. Re-insert the filter and push in the condensation tank until it clicks into place.

**Switching off the dryer**

Turn the programme selector to **Off**.

Do not leave damp laundry in the dryer.

**Removing the laundry**

The automatic Easy Iron function moves the drum at certain intervals. The load remains loose and soft for an hour (or two hours if you manually select the Easy Iron function, depending on the model.)

**Programme end** once **lights up in the display.**

**Interrupt programme** removing or adding laundry.

- The drying cycle can be interrupted for a brief period so that laundry may be added or removed. The selected programme must then be continued until it is finished.

- **Hot steam may escape during the Steam Drying / Steam Refresh programmes.**

1. Open the door. The drying cycle is paused.
2. Remove or add laundry and close the door.
3. If required, select a new programme and additional functions.
4. Press the **start** button. The remaining time is updated after a few minutes.
**Information on laundry ...**

**Labelling of fabrics**

Follow the manufacturer’s care information.
- Drying at normal temperature.
- Dry at a low temperature → select +C4 (Low Heat) as well.
- Do not machine dry.

Do not tumble-dry the following fabrics:
- Airtight fabrics (e.g. rubber-coated fabrics).
- Delicate materials (silk, curtains made from synthetic material) → they may crease.
- Oil-stained laundry.

**Drying tips**

- To ensure a consistent result, sort the laundry by fabric type and drying programme.
- Close zips, hooks and eyes, and do up any buttons. Tie belts, apron strings etc. together.
- Do not overdry easy-care laundry → risk of creasing. Allow laundry to finish drying in the air.
- Do not iron laundry immediately after drying, fold items up and leave for a while → the remaining moisture will then be distributed evenly.
- The drying result depends on the type of water used during washing. → Fine adjustment of the drying result → Page 1/2.
- Knitted fabrics (e.g. T-shirts, jerseys) often shrink slightly the first time they are tumble-dried. → Do not select the [Low Heat] Cupboard Dry Extra programme.
- Starched laundry is not always suitable for dryers → starch leaves behind a coating that adversely affects the drying operation.
- When washing laundry that is to be tumble-dried afterwards, dose the fabric softener according to the manufacturer’s instructions.
- With a small load, use the Timed Program.

**Tips for Short spin/refreshing**

- Use your dryer for unwrinkling and refreshing fabrics.
- Short spin cycle for reducing creasing.
- Refresh cycle for eliminating odours from fabrics.

Do not use Short spin/Refresh for the following fabrics:
- Wool, leather, fabrics with metal, wooden or plastic parts.
- Wax and oil jackets.
- Sort the laundry by colour and put on separate short spin/refresh cycles to prevent the colours from bleeding.
- These programmes do not remove stains → stains must be treated and removed beforehand.
- For best results, so that the laundry will have as few creases as possible, remove each item immediately after the programme has finished and hang on a hanger to finish drying. Pull clothes into shape if required.

**Environmental protection / Energy-saving tips**

- Before drying, spin the laundry thoroughly in the washing machine → the higher the spin speed, the shorter the drying time will be (consumes less energy), also spin easy-care laundry.
- Use the maximum recommended capacity, but do not exceed it → Page 7, “Programme overview”.
- Make sure the room is well ventilated during drying.
- Clean the fluff filter after each drying cycle → page 4.
- Keep the air cooler clean → page 6 “Cleaning and care”.
- Keep the supply of cool air unobstructed → Do not cover or block the cooling grill.

---

**Cleaning and care**

**Dryer housing, control panel, air cooler, moisture sensors**

- Wipe with a soft, damp cloth.
- Do not use harsh cleaning agents and solvents.
- Remove detergent and cleaning agent residue immediately.
- During drying, water may collect between the door and seal. This does not affect your dryer’s functions in any way.

Clean the protective filter 5 - 6 times a year or if → flashes after the fluff filter has been cleaned.

**Air cooler / Protective filter**

When cleaning, only remove the protective filter. Clean the air cooler behind the protective filter once a year.

- Allow the dryer to cool.
- Residual water may leak out, so place an absorbent towel underneath the maintenance door.

1. Unlock the maintenance door.
2. Open the maintenance door fully.
3. Turn both locking levers towards each another.
4. Pull out the protective filter/air cooler.

Do not damage the protective filter or air cooler.

Clean with warm water only.

Do not use any hard or sharp-edged objects.

5. Clean the air cooler thoroughly.
   Allow to drip dry.
6. Clean the seals.
7. Re-insert the protective filter/air cooler, with the handle facing down.
8. Turn back both locking levers.
9. Close the maintenance door until the lock clicks into place.

**Moisture sensors**

The dryer is fitted with stainless steel moisture sensors. The sensors measure the level of moisture in the laundry. After a long period of operation, a fine layer of limescale may form on the sensors.

1. Open the door and clean the moisture sensors with a damp sponge which has a rough surface.

Do not use steel wool or abrasive materials.

**Cover for steam nozzle in the drum**

After lengthy operation, limescale and fluff may accumulate on the cover of the steam nozzle. Clean regularly:

1. Open the door and remove the cover with a screw driver. Clean the cover under running water.
2. Push and click the protective cap back in place.
Sort the laundry according to type of textile and fabric. Fabrics must be suitable for tumble drying.

After drying...

- iron laundry
- lightly iron laundry
- do not iron laundry
- mangle laundry

**Programme overview** see also pages 5 and 8

<table>
<thead>
<tr>
<th>PROGRAMMES</th>
<th>TEXTILE TYPE AND INFORMATION</th>
</tr>
</thead>
</table>
| **Cottons** | max. 8 kg Hard-wearing fabrics, boil-resistant fabrics made of cotton or linen.  
| **Easy-Care** | max. 3.5 kg Non-iron laundry made of synthetic fibres and blended fabric, easy-care cotton.  
| **Iron Dry** | Fabrics suitable for ironing (iron fabrics in order to avoid creasing).  
| **Cupboard Dry** | Single-layer fabrics.  
| **Cupboard Dry Extra** | Fabrics made of thick, multilayered items of clothing.  
| **Steam Dry** | For smoothing hard-wearing and easy-care fabrics. Steam smooths the fabrics.  
| **Cottons Non Iron** | max. 2.5 kg Further information → Page 8.  
| **Synthetics Non Iron** | max. 1.5 kg Further information → Page 8.  
| **Steam Refresh** | For freshening hard-wearing and easy-care fabrics. Steam refreshes the fabrics.  
| **Business** | max. 1.5 kg Further information → Page 8.  
| **Casual** | max. 1.0 kg Fabrics with membrane coating, water-repellent fabrics, functional clothing, fleece fabrics (dry jackets/trousers with removable internal lining separately).  
| **Outdoor** | max. 1.5 kg Fabrics made of thick, multilayered items of clothing.  
| **Dessous** | max. 1.0 kg Lingerie made of synthetic fibres, cotton or blended fabric.  
| **Super 40’** | max. 2 kg Laundry made of synthetic fibres, cotton or blended fabrics (for example) that needs to be dried quickly. The values may differ from the those specified depending on the type of fabric, mixture of laundry to be dried, residual moisture in the fabric and loading capacity.  
| **Woollen Finish** | max. 3 kg Woollen fabrics suitable for washing machines. Fabrics become fluffier but not dry. Remove fabrics once the programme has ended and allow to dry.  
| **Timed program warm** | max. 3 kg Pre-dried, multi-layered, sensitive fabrics made of acrylic fibres, or separate small items of laundry. Also for subsequent drying.  

*Dryness levels can be selected individually → [ ] Cupboard Dry Extra, [ ] Cupboard Dry and [ ] Iron Dry (depending on the model).*

Degree of dryness can be finely adjusted; multi-layered textiles require a longer drying time than single-layered items of clothing. Recommendation: Dry separately.
Steam Drying - Steam Refresh

Programmes

Steam programmes for unwrinkling or refreshing
- Your dryer has unwrinkling and refreshing programmes that can be used for removing odours and minimising creasing in dry fabrics. Steam smooths and freshens up items of clothing.
- Sorting the laundry according to size, weight, fabric and colour is necessary.
- Only use Short spin/Refresh for fabrics with the same properties.
- The result of refreshing and unwrinkling may vary depending on the type of fabric, size of the load and programme selected.
- After unwrinkling or refreshing, all fabrics must be removed immediately and hung crease-free on a hanger or a washing line for 15 minutes.

Please observe the treatment symbols and manufacturer’s instructions on the fabrics. Do not use Short spin/Refresh for fabrics made of wool, leather, containing metal or wooden parts as well as wax and oil jackets! Do not use any dryer cleaning sets!

Steam Dry

חווים ערב

Synthetics Non Iron
Suitable for easy-care fabrics, e.g. formal shirts. Fabrics are smoothed. You can expect optimum results if “non-iron” appears on the care label. After the programme has finished, the items must be removed immediately and hung crease-free on a hanger or washing line for 15 minutes. The programme is for up to 5 formal shirts.

Cottons Non Iron
Suitable for hard-wearing cotton fabrics, e.g. bed linen, tablecloths or formal shirts. Fabrics are smoothed. You can expect optimum results if “non-iron” appears on the care label. After the programme has finished, the items must be removed immediately and hung crease-free on a hanger or washing line for 15 minutes. The programme is for up to 5 formal shirts or 1 to 2 larger items.

Steam Refresh

 الحوث

Business
Suitable for refreshing suits, jackets and trousers, or dry-clean items that cannot be washed in the washing machine → see the care label. The programme only refreshes fabrics and does not clean them. After the end of the programme, the items must be removed immediately. Programme for 1 suit or 1 to 2 smaller items.

Casual
Suitable for refreshing casual wear made of cotton or artificial fibres. Fabrics must be suitable for dryers → see the care label. The programme refreshes fabrics only, and does not clean them. After the programme has finished, the fabrics must be removed immediately. Programme for 1 pullover, 2 pairs of trousers or formal shirts.

Steam programmes for unwrinkling or refreshing

Steam Drying - Steam Refresh

Your water tank empties automatically after the programme has finished. Cleaning is therefore not required

Filling the water tank:
Fill the dryer’s water tank with distilled water before every Steam Dry - Steam Refresh cycle.

1. Move the programme selector to Steam Dry or Steam Refresh. The ☹ symbol appears in the display.

2. Remove the condensation tank completely.

Before every Steam Dry - Steam Refresh cycle, fill the water tank with distilled water only. Do not use tap water, condensation or additives.

3. Fill the water tank. Use the jug supplied.

If the water tank filter is dirty → clean the filter in the water tank. See page 4.

4. Pour the distilled water into the filling hole on the water tank, until the ☹ symbol goes out on the display panel.

If drying the recommended load, approximately 250 to 300 ml of distilled water is used in the Steam Dry - Steam Refresh programmes.

5. Insert the condensation container all the way.

6. Start the Steam Dry or Steam Refresh programme.
Installation

1. Setting up the dryer
- The appliance plug must always be accessible.
- Ensure that the appliance is installed on a clean, level and firm surface.
- Keep the cooling grille on the front of the dryer clear.
- Keep the area around the dryer clean.
- Level the dryer using the threaded feet.
- Use a spirit level.
- Do not remove the threaded feet under any circumstances.

- Connect to an AC earthed socket. If in doubt, have the socket checked by a specialist.
- The mains voltage and the voltage shown on the rating plate (→ Page 11) must be the same.
- The connected load and necessary fuse protection are specified on the rating plate.

3. Converting the installed load
- Note the fuse protection of the socket.

Frost protection / Transport

Do not install the dryer behind a door or sliding door, which could prevent or restrict opening of the dryer door. This will prevent children from locking themselves in and putting their lives in danger.

Preparation
1. Empty the condensation container → page 4.
2. Select any programme using the programme selector.
3. Press the start button → condensation is pumped into the container.
4. Wait 5 min., and then empty the condensation container again.
5. Turn the programme selector to Off.

The water tank must not contain any distilled water. If necessary, run the Steam/Refresh programme.

Consumption rates (The value on the label is achieved at the maximum heat setting.)

** The values may differ from those specified, depending on the type of fabric, composition of laundry to be dried, residual moisture in the fabric and the amount of laundry being loaded.

Technical data

- Dimensions (DxWxH) 60 x 60 x 85 cm (adjustable height)
- Weight approximately 43.5 kg
- Max. capacity 8 kg
- Condensation container 4.0 l
- Water tank approx. 0.4 l
- Connection voltage 220-240 V
- Connected load max. 2800 W
- Fuse protection 16 A / 10 A
- Ambient temperature 5 - 35 °C
- Product number
- Production number Inside of door
- The rating plate can be found on the back of the dryer.

- **Drum interior light (depending on model) (bulb E14, 25 W)**

The drum lights up after the door is opened or closed, and after the programme starts, and switches off automatically. Changing the bulb → page 12.

Optional accessories (from after-sales service using order number, depending on the model)

- Platform For easier loading and unloading. The basket contained in the drawer can be used to carry the laundry.
- Washer-dryer stack connection set
- The dryer can be placed on top of a suitable washing machine with the same width and depth to save space. The dryer must be fastened to the washing machine using this connection set.
- With pull-out worktop: WZ 20300
- Connection fittings for condensation outlet
- The condensation is conveyed directly via a hose.

Installation underneath the worktop

Instead of the appliance covering plate, you must have a metal cover fitted by a specialist.
What to do if...

If you cannot rectify a fault yourself (e.g. switching off/on), please contact our after-sales service. We will always find an appropriate solution and will avoid unnecessary visits by engineers. Trust the expertise of the manufacturer and rest assured that the repair will be carried out by trained service technicians using original spare parts. The contact details of your local after-sales service can be found in the enclosed after-sales service directory, or by calling one of these numbers:
- GB 0344 892 8999 (Calls charged at local or mobile rate.)
- IE 01450 2655 (0.03 € per minute at peak. Off peak 0.0088€ per minute.)

When contacting the after-sales service, please quote the appliance's product number (E no.) and production number (FD) (see inside of the door).

Set the programme selector to OFF and remove the appliance plug from the socket.

- The start indicator light does not come on.
  - Mains plug plugged in?
  - Programme selected?
  - Check the socket fuse.

- The display panel light and indicator lights (depending on model) go out and the start indicator light flashes.
  - Energy-saving mode is activated → see the separate Energy-saving mode instructions.

- The symbol and start indicator light are flashing.
  - Empty the condensation container → Page 4.
  - Check the condensation outlet hose, if applicable (kink).

- The symbol and start indicator light are flashing.
  - Clean the air cooler → Page 6 “Cleaning and care”.
  - Clean the filter → Page 4.

- The symbol flashes.
  - Is the water tank empty?
  - Filling with distilled water → Page 9.

- The Steam Dry - Steam Refresh programme does not start.
  - The filter in the water tank may have become dirty.
  - If so, clean the filter in the water tank → Page 4.

- Water is leaking out.
  - Make sure the dryer is level. Clean the air cooler seal.

- The door opens by itself.
  - Push the door closed until you hear it click into place.

- Items crease even though the Steam Dry - Steam Refresh programme has been selected.
  - Laundry load exceeded?
  - Remove articles of clothing immediately after the end of the programme, hang up and put into shape.
  - Unsuitable programme selected → Page 7.

- Laundry is not dried correctly or is still too damp.
  - After the end of the programme, warm laundry feels damper than it actually is.
  - Spread the laundry out and allow the heat to disperse.
  - Finely adjust the dryness level – this extends the drying time but does not increase the temperature. Your laundry will become drier.
  - Select a programme with a longer drying time or increase the drying level. This does not increase the temperature.
  - Select a programme for extended drying of laundry that is still damp.
  - If you have exceeded the maximum load for the programme, the laundry may not be dried correctly.
  - Clean the moisture sensor in the drum. A fine layer of limescale may adversely affect the performance of the sensors and your washing will not dry properly.
  - Drying has been interrupted as a result of a power cut, because the condensation container is full or because the maximum drying time has been exceeded.

- Drying time too long.
  - Rinse the fluff filters under running water → Page 4.
  - Insufficient supply of air → ensure that air can circulate.
  - Air inlet possibly blocked → Clean inlet → Page 16.
  - Ambient temperature higher than 35 °C → ventilate the room.

- The humidity in the room increases significantly.
  - Make sure the room is sufficiently ventilated.

- One or more programme status indicator lamps are flashing.
  - Clean the filter and air cooler → Page 4/6.
  - Check the installation conditions → Page 10.
  - Switch off, allow to cool, switch on again and restart the programme.

- The interior light (depending on the model) does not work.
  - Pull out the appliance plug, remove the cover cap in the interior above the door (use Torx 20 screwdriver) and replace the bulb. Close the cover cap. Never operate the dryer without a cover cap.

- Power failure.
  - Remove the laundry from the dryer immediately and spread out. This allows the heat to dissipate. Be careful as the door, the drum and the laundry may be hot.
Observe the safety instructions on page 13.

Caution - risk of scalding.

Read these instructions and the separate Energy-saving mode instructions before operating the dryer.
