What to do if...

Safety instructions

Care and cleaning

- Clean the moisture sensors with a damp sponge which has a rough surface.
- Refit the exhaust air duct.
- Switch off the dryer and allow it to cool down.
- Clean the exhaust air duct.

Installation

1. Do not set up in a room that is susceptible to frost.
2. Ensure that the appliance is placed on a clean, level and firm surface.
3. Keep the area around the dryer clean.
4. The mains plug must always be accessible.

Spare parts

- Do not use the dryer if it is defective or if you suspect that it is.
- Only load the drum with items of laundry.
- Do not use multiple plugs/couplings and/or extension cables.
- Pull the mains plug out of the socket immediately or disconnect the fuse.

Defect

- The contact details of your local service directory.
- Please provide the after-sales service the product number (E no.) and the production number (depending on Fluff filter/Exhaust air duct).

Risk of electric shock.

- Never pull the mains plug out of the socket by its cable.
- Do not use the dryer with a faulty mains cable. In order to avoid danger, ensure that the items are left at a temperature that ensures that the items will not be damaged.

- Pull the mains plug out of the socket immediately if the appliance is defective or if you suspect that it is.

- Repairs must only be carried out by the after-sales service.
- Do not use the dryer in a room where there are gas burning devices, as this may cause explosions.

- For easier loading and unloading. The basket contained in the drawer can be used.
- For easier loading and unloading. The drum must be empty.
- Do not install the dryer behind a door or between two walls.
- Do not install the dryer in a room where there are gas burning devices, as this may cause explosions.

Risk of explosion.

- Do not use the dryer if it is defective or if you suspect that it is.
- Only load the drum with items of laundry.
- Do not use multiple plugs/couplings and/or extension cables.
- Pull the mains plug out of the socket immediately if the appliance is defective or if you suspect that it is.

- Repairs must only be carried out by the after-sales service.
- Do not use the dryer in a room where there are gas burning devices, as this may cause explosions.

Risk of electric shock.

- Never pull the mains plug out of the socket by its cable.
- Do not use the dryer with a faulty mains cable. In order to avoid danger, ensure that the items are left at a temperature that ensures that the items will not be damaged.

- Pull the mains plug out of the socket immediately if the appliance is defective or if you suspect that it is.

- Repairs must only be carried out by the after-sales service.
- Do not use the dryer in a room where there are gas burning devices, as this may cause explosions.

- Do not use the dryer in a room where there are gas burning devices, as this may cause explosions.

- Do not use multiple plugs/couplings and/or extension cables.
- Only use earth-leakage circuit breakers with the following symbol:
Your new dryer

Congratulations - You have chosen to buy a modern, high-quality Siemens domestic appliance.
A distinctive feature of your dryer is its low energy consumption.

Every dryer which leaves our factory is carefully checked to ensure that it functions correctly and is in perfect condition. Should you have any questions, our after-sales service will be pleased to help.

Environmentally responsible disposal
This appliance is labelled in accordance with European Directive 2012/19/EU concerning used electrical and electronic appliances (waste electrical and electronic equipment - WEEE). The guideline determines the framework for the return and recycling of used appliances as applicable throughout the EU.

For further information about our products, accessories, spare parts and services, please visit: www.siemens-home.com

Intended use

- exclusively for domestic use,
- only for drying fabrics which have been washed using water.

Keep children younger than 3 years old away from the dryer.
Do not let children make the cleaning and maintenance work on the dryer without supervision.
Do not leave children unsupervised near the dryer.
Keep pets away from the dryer.
The dryer may be operated by children from 8 years of age, by persons who have limited physical, sensory or mental abilities and by persons who have inadequate experience or knowledge, provided they are supervised or have been instructed by a responsible person.
This appliance is intended for use up to a maximum height of 4000 metres above sea level.

Programmes / Fabrics
Detailed overview of the programmes and fabrics
→ Programme overview, page 7.
Observe the care instructions on the care label.

Programme selector for setting the programme and switching the appliance on/off. Can be turned in both directions.

Programme sequence
Childproof lock
Fluff filter/Exhaust air duct

Further information can be found on page 5

Display panel / Buttons

- Programme selector / Off
- Off
- Programme selector
- Cottons
- Easy-Care
- Dryness levels to select with the Cottons and Easy-Care programmes:
  - Cupboard Dry Extra
  - Cupboard Dry
  - Iron Dry
  - Outdoor
  - Towels
  - Mix
  - Warm
  - Cold
  - Shirts/Business
  - Rapid 40'
  - Woollen finish
  - Lingerie

Programmes / Fabrics

- Cottons
  - Hard-wearing fabrics.

- Easy-Care
  - Fabrics made from synthetic or blended fabrics.

Dryness levels to select with the Cottons and Easy-Care programmes:

- Cupboard Dry Extra
  - Thick and multi-layered fabrics.

- Cupboard Dry
  - Single-layered laundry.

- Iron Dry
  - Laundry suitable for ironing after drying.

- Outdoor
  - Functional clothing made of microfibre. Terry-towelling laundry e.g. towels and bathrobes.

- Towels
  - A mixed load of fabrics made of cotton and synthetic fabrics.

- Mix
  - All types of fabric except for wool and silk.

- Warm
  - Cotton or linen fabrics that are still damp and easy-care fabrics.

- Cold
  - Synthetics, cotton or blended fabrics.

- Shirts/Business
  - Woollen fabrics that are suitable for use in washers.

- Rapid 40’
  - Lingerie made of synthetic fibres, cotton or blended fabric.
Set and adjust the programme individually

1. Close the door.

2. Select Start/Pause.

3. Set and adjust the programme individually.

   - Low-heat drying – reduced temperature.
   - Extends the anti-crease function.
   - Buzzer on/off.
   - Start/Pause:
     - Starts, pauses and continues the programme.
     - Activates or deactivates (Childproof lock).

4. End of the programme...

   - Interrupt the programme:
     1. Open the door or press the Start/Pause button; the drying cycle is interrupted.
     2. Add or remove laundry and close the door.
     3. If required, select a new programme and additional functions. Select the Start/Pause button. The remaining time is updated after a few minutes.

   - The drum and door may be hot!

5. Remove the laundry and switch off the dryer.

6. Clean the fluff filter.

   - Do not operate the dryer without a fluff filter or with a defective fluff filter. A clean fluff filter minimizes energy consumption.

   - Clean the fluff filter after each drying cycle:
     1. Open the door. Remove any fluff from the door/around the door and pull out the fluff filter.
     2. Remove the fluff from the shaft of the fluff filter.
     3. Remove the fluff (sweep your hand over the fluff filter). If the fluff filter is very dirty or blocked, rinse with warm water and dry thoroughly.
     4. Insert the fluff filter so that you hear it engage.

Sort the laundry

- Remove all items from pockets, especially cigarette lighters.
- The drum must be empty prior to loading.

Connect the mains plug

- Make sure your hands are dry.
- Only grasp the plug by the plug body.

Inspect the dryer

- Start the dryer if it is damaged!
- Your after-sales service!

Before using the dryer for the first time run the drying cycle without any laundry → page 6.
Display panel and settings

- **Display panel (status indicators)**
  - Clean the fluff filter → page 4/11 or check the exhaust air duct → page 8.
  - The dryness levels can be increased in three levels.
  - The time when the programme has to end can be set by selecting the Finished in time. The Finished in time can be selected in one-hour steps, up to a maximum of 24 hours. Select the Finished in button repeatedly until the required number of hours is displayed.
  - After setting the level of the fine adjustment for a programme, it is also retained for other programmes, until ✿ Fine Adjust is changed again.
  - Reduced temperature for delicate fabrics, e.g. polyacrylic, polyamide or elastane, with a longer drying time.
  - After the programme finishes, the drum moves at regular intervals to prevent creases. Laundry remains loose and fluffy.

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fluff filter/Exhaust air duct</td>
<td>Clean the fluff filter or check the exhaust air duct.</td>
</tr>
<tr>
<td>Programme sequence</td>
<td>These indicators show the programme progress in the next steps of the drying cycle: *Drying; **Iron Dry; ***Cupboard Dry; *-P. Programme pause → if required; *-End Programme end.</td>
</tr>
<tr>
<td>Childproof lock</td>
<td>You can lock the dryer to prevent the functions you have set from being changed inadvertently. To activate/deactivate ✿Childproof lock start the programme and then press and hold the ✿ Start/Pause button for 5 seconds until a long acoustic signal is heard. The option activated/deactivated ✿Childproof lock indicator light on/off.</td>
</tr>
<tr>
<td>Remaining time</td>
<td>When a programme is selected, the anticipated drying time (remaining time) for the recommended load is displayed. While drying, the moisture sensors detect the actual load and correct the programme length. This is shown by jumps in the remaining time in the display panel.</td>
</tr>
</tbody>
</table>

Settings (indicators lights and buttons)

- Selected option activated/deactivated → indicator light on/off. See the separate Energy-saving mode instructions.
  - Drying Time: Drying time, available only for timed programmes, can be selected from min. 0:20 h to max. 3:00 h, in 10-minute steps.
  - Fine Adjust: The dryness levels can be increased in three levels.
  - Finished in: The time when the programme has to end can be set by selecting the Finished in time. The Finished in time can be selected in one-hour steps, up to a maximum of 24 hours. Select the Finished in button repeatedly until the required number of hours is displayed.
  - Gentle Dry: Reduced temperature for delicate fabrics, e.g. polyacrylic, polyamide or elastane, with a longer drying time.
  - Wrinkle Guard*: After the programme finishes, the drum moves at regular intervals to prevent creases. Laundry remains loose and fluffy.
  - Buzzer: For switching the buzzer on and off. ✿ Buzzer indicates program end if it is activated. Other sounds are not influenced by this option.

Notes on laundry ...

- **Labelling of fabrics**
  - Follow the manufacturer's care instructions.
  - Suitable for tumble drying.
  - Dry at normal temperature.
  - Dry at low temperature → in addition, select ✿ Gentle Dry.
  - Do not tumble dry.

- Do not tumble dry the following fabrics:
  - Non-breathable fabrics (e.g. rubber-coated).
  - Delicate materials (silk, curtains made from synthetic material) → these may crease.
  - Oil-stained laundry.

- **Before drying for the first time**
  - Do not put any laundry in the machine. Turn the programme selector to ✿Warm/ Cold (→ page 7) and select ✿Start/Pause. At the end of the programme selector to Off.

- **Drying tips**
  - To ensure a consistent drying result, sort the laundry by fabric type and drying programme.
  - Always dry very small fabrics (e.g. baby socks) together with large items of laundry (e.g. towels).
  - Close zips, hooks and eyelets, and button up covers. Tie cloth belts, apron strings, etc. together or use a laundry bag.
  - Do not over-dry easy-care laundry → risk of creasing. Allow laundry to finish drying in the air.
  - Do not dry woollens in the dryer. They may, however, be refreshed in the dryer → page 7, ✿Woollen finish programme (depending on model).
  - Do not iron laundry immediately after drying; fold items up and leave for a while → residual moisture will then be distributed evenly.
  - Knitted fabrics (e.g. T-shirts, jerseys) often shrink slightly the first time they are tumble-dried. ✿Do not use the ✿Cupboard Dry Extra programme.
  - Starched laundry is not always suitable for dryers → starch leaves behind a coating that reduces the drying effect.
  - When washing laundry that is to be tumble dried afterwards, use the correct amount of fabric softener as specified in the manufacturer's instructions.
  - For pre-dried, multi-layered fabrics or small, individual items of laundry, use the timed programme. Also suitable for subsequent drying.

- **Environmental protection / Energy-saving tips**
  - Before drying, spin the laundry in the washing machine → higher spin speeds minimise the drying time and reduce energy consumption.
  - Use the maximum recommended capacity, but do not exceed it → Programme overview, page 7.
  - Make sure the room is well ventilated during drying.
  - Clean the fluff filter after every drying cycle → Clean the fluff filter, page 4/11.
**Programme overview** see also page 6.

Sort the laundry according to type of textile and fabric. Fabrics must be suitable for tumble drying.

After drying, laundry is to be ...

<td><strong>Lingerie</strong></td>
<td>Lingerie made of synthetic fibres, cotton or blended fabric.</td>
</tr>
</tbody>
</table>

*Dryness levels can be selected individually: ** Cupboard Dry Extra, ** Cupboard Dry and ** Iron Dry (depending on the model). Degree of dryness can be finely adjusted; multi-layered textiles require a longer drying time than single-layered items of clothing. Recommendation: Dry separately.*
Care and cleaning

**Dryer housing and control panel**
- Wipe clean with a soft, damp cloth.
- Do not clean with a water jet.
- Remove detergent and cleaning agent residue immediately.

**Exhaust air duct** → Exhaust air duct installation instruction.
Check the exhaust air duct as it may be clogged.
Clean the exhaust air duct at regular intervals, e.g. every six months.
Do not bend the exhaust air duct.
1. Switch off the dryer and allow it to cool down.
2. Disconnect the mains plug.
3. Remove the exhaust air duct.
4. Clean the exhaust air duct.
5. Refit the exhaust air duct.

**Moisture sensors**
The dryer is equipped with stainless steel moisture sensors.
Moisture sensors measure the moisture level of the laundry.
After sustained, repeated operation, a fine layer of limescale may form on the moisture sensors.
1. Open the door.
2. Clean the moisture sensors with a damp sponge which has a rough surface.

Do not use steel, wool or abrasive agents!

Installation

- Scope of delivery: dryer, operating and installation instructions, basket for woollens (depending on the model).
- Check the dryer for transport damage.
- The dryer is very heavy. Do not attempt to lift it on your own.
- Be careful to avoid sharp edges.
- Do not lift the dryer by protruding parts (e.g. the door) - risk of breakage.
- Do not set up in a room that is susceptible to frost. Freezing water may cause damage.
- If in doubt, have the appliance connected by a specialist.

**Setting up the dryer**
- The mains plug must always be accessible.
- Ensure that the appliance is placed on a clean, level and firm surface.
- Install the exhaust air duct → Exhaust air duct installation instruction.
- Keep the area around the dryer clean.
- Level the dryer using the threaded feet and a spirit level.
- Never remove the threaded feet!

Do not install the dryer behind a door or sliding door which could prevent or obstruct the dryer door from opening. This will prevent children from locking themselves in and risking their lives.

**For mains connection**, see Safety instructions → page 13.
- Connect to an AC earthed socket. If in doubt have the socket checked by a specialist.
- The mains voltage and the voltage shown on the rating plate (→ page 10) must be the same.
- The connected load and necessary fuse protection are specified on the rating plate.

Take all accessory parts out of the drum. The drum must be empty.

Clean and level.
Optional accessories

Exhaust air duct set
The exhaust air is extracted via a hose.

Washer-dryer stack connection set
The dryer can be placed on top of a suitable washing machine with the same width and depth to save space. The dryer must be fastened on the washing machine with this connection set. If the worktop of the washing machine is less than 544 mm deep, please consult the after-sales service or your specialist retailer.

Platform
For easier loading and unloading. The basket contained in the drawer can be used to carry the laundry.

***Programme setting for testing and energy labelling in accordance with Directive 2010/30/EU.

After-sales service

If you cannot rectify the fault yourself (e.g. switching off/on) → What to do if... page 11/12. Please contact our after-sales service. We will always find an appropriate solution and avoid unnecessary visits by engineers.

The contact details of your local after-sales service can be found in the enclosed after-sales service directory.

Please provide the after-sales service the product number (E no.) and the production number (FD) of the appliance.

Turn the programme selector to Off and remove the mains plug from the socket.

- The Start/Pause indicator light does not light up.
  Mains plug plugged in? Programme selected? Check the socket fuse.

- The display panel light and indicator lights (depending on model) go out and the Start/Pause indicator light flashes.
  Energy-saving mode is activated → see the separate Energy-saving mode instructions.

- The display panel switches off.
  The appliance goes into the sleep mode after activating Finished in option → page 5.

- (Fluff filter/Exhaust air duct) indicator light flashes.
  Clean the fluff filter → page 4.
  Press the Start/Pause button to reset the displayed indication and then press the Start/Pause button again to restart the appliance if necessary.
  Exhaust air duct blocked or bent? Clean the exhaust air duct → page 8.
  If necessary, clean the insect screen on the exhaust air pipe.

- Dryer does not start.
  Start/Pause button selected? Door closed? Programme set?

- Programme terminates shortly after starting.
  Ambient temperature greater than 5°C?
  Is the appliance loaded with the laundry?
  Load too small for selected programme? Use timed programme → page 6/7.
  Loaded laundry dry?

- Water is leaking out.
  Make sure the dryer is level.

- The door opens by itself.
  Push the door closed until you hear it engage.
What to do if ...

- Drying result is not satisfactory (laundry feels too damp).
  - Warm laundry feels damper than it really is.
  - The selected programme does not suit the load. Use another drying programme or, in addition, select the timed programme → page 7.
  - Dryer installed too closely to other objects? Provide adequate air circulation.
  - Use ⇓ Fine Adjust for the dryness levels → page 5.
  - Fine layer of limescale on the humidity sensors → Clean the moisture sensors → page 8.
  - Programme termination, e.g. mains power supply failure, door open or maximum drying time reached?

- Drying time too long.
  - Clean the fluff filter under running water → page 4.
  - Insufficient supply of air → Ensure that air can circulate.
  - Ambient temperature greater than 35°C → Ventilate the room.

- The humidity in the room increases.
  - Make sure the room is sufficiently ventilated.
  - Exhaust air duct installed/the exhaust air routes directly into the open air? → Installation instructions for exhaust air duct, page 1.

- One or more indicator lights are flashing.
  - Clean the fluff filter → page 4/11.
  - Check the installation conditions → page 9.
  - Exhaust air duct blocked or bent?
  - Clean the exhaust air duct → page 8.
  - Switch off, allow to cool, switch back on, and restart the programme.

- Power failure.
  - Remove the laundry from the dryer immediately and spread out. This allows the heat to dissipate. Be careful as the door, the drum and the laundry may be hot.

- Condensation in the exhaust air duct.
  - Exhaust air duct too long? Check the maximum exhaust air duct length. Further information → Installation instructions for exhaust air duct.

Safety instructions

- Emergency
  - ONLY use the dryer...
  - in rooms inside the house.
  - for drying fabrics.
  - The dryer must NEVER...
    - be used for purposes other than those described above.
    - be modified in terms of its technology or attributes.
  - Dangers
    - The dryer must not be used by children or persons who have not been instructed in its use.
    - Do not leave children unsupervised near the dryer.
    - Keep pets away from the dryer.
    - Remove all objects from the pockets of garments.
    - Pay particular attention to cigarette lighters → Risk of explosion.
    - Do not lean or sit on the dryer → Risk of tipping.
    - Open the dryer door while it is hot. Prepare for steam to escape.
  - Installation
    - Fasten down loose leads → Risk of tripping.
    - Do not operate the dryer where there is a risk of frost.
    - The safety information in the separate installation instructions for the exhaust air duct must be observed without fail.
  - Mains connection
    - Connect the dryer to an AC earthed socket according to specifications, as otherwise it cannot be guaranteed that the appliance is completely safe.
    - The cable cross-section must be sufficient.
    - Only use earth-leakage circuit breakers with the following symbol:
      ![Symbol](symbol.png)
    - The mains plug and socket must be compatible.
    - Do not use multiple plugs/couplings and/or extension cables.
    - Do not touch or hold the mains plug with wet hands → Risk of electric shock.
    - Never pull the mains plug out of the socket by its cable.
    - Do not damage the mains lead
      - Do not damage the mains lead → Risk of electric shock.
  - Operation
    - Only load the drum with items of laundry.
    - Check what has been loaded before switching the dryer on.
    - Do not use the dryer if the laundry has been in contact with solvents, oil, wax, grease or paint (e.g. hair spray, nail polish remover, cleaning solvent, etc.) → Risk of fire/ explosion.
    - The tumble dryer is not to be used if industrial chemicals have been used for cleaning.
    - Dust risk (e.g. coal dust or flour): do not use the dryer → Risk of explosion.
    - Do not turn off the dryer until the drying process ends, unless the laundry will be removed quickly and spread out, so that the heat can dissipate.
    - Do not put laundry containing foamed material/rubber in the dryer → elastic material may be destroyed and the dryer may be damaged due to possible deformation of the foamed material.
    - Final part of a tumble dryer cycle occurs without heat (cool down cycle), to ensure that the items are left at a temperature that ensures that the items will not be damaged.
    - Switch off the dryer once the programme has ended.
  - Defect
    - Do not use the dryer if it is defective or if you suspect that it is.
    - Repairs must only be carried out by the after-sales service.
    - Do not use the dryer with a faulty mains cable. In order to avoid danger, have the mains lead replaced only by our after-sales service.
  - Spare parts
    - For safety reasons, you must only use genuine spare parts and accessories.
  - Disposal
    - Dryer: Disconnect the mains plug, then cut the mains cable off the appliance.
    - Dispose of the appliance at a municipal waste disposal site.
    - Packaging: Do not allow children access to items of packaging → Risk of suffocation.
    - All materials are environmentally friendly and reusable. Dispose of them in an environmentally responsible manner.
Dryer
WT34A200HK

**en** Instructions for installation and use

⚠️ Observe the safety instructions on page 13.

Read these instructions, the Installation Instructions and the separate Energy-saving mode instructions before operating the dryer.
