Your washing machine

Congratulations – You have opted for a modern, high-quality domestic appliance manufactured by Siemens. The washing machine is distinguished by its economical consumption of water and energy. Each appliance which leaves our factory is inspected thoroughly to ensure that it functions properly and is in perfect condition.

Further information on our products, accessories, spare parts and services can be found at: www.siemens-home.com or contact our customer service centres.

Contents Intended use. Programmes Selecting and adjusting a programme Washing... After washing. Individual settings. Important information. Overview of programmes. Safety instructions... Consumption values... Information about the indicator lights. Maintenance

What to do if .

Protection of the environment/Conservation tips Utilise the maximum amount of washing for the particular

- Wash normally soiled washing without prewash
- The selectable temperatures apply to the care labels on the textiles. The temperatures in the machine may deviate from this so that you get the optimum mix of energy-saving and washing
- Measure detergent according to the manufacturer's instructions
- If the washing is then dried in the tumble dryer, select spin speed according to the instructions of the dryer manufacturer.

Intended use

for use in the household only.

selected programme and programme progress.

Cotton 40°0 60°0

Wool &

Delicates/Silk

Easy-Care

Spin speed can be selected individually irrespective of the

hard-wearing textiles

different types of washing

for hand wash, for starching

extra spin with selectable spin speed

the rinsing water when \varnothing is activated

(rinse stop = without final spin)

for easy-care, washable textiles

hand/machinewashable wool

washing washed by hand:

hard-wearing textiles

extra rinse with spin:

for easy-care textiles

- for washing machine-washable textiles and handwashable wool in wash liquor,
- to be operated with cold drinking water and commercially available detergents and care products which are suitable for use in washing machines.

- Do not leave children unattended near the washing machine! Children and uninstructed persons must not use
- the washing machine! Keep pets away from the washing machine!
- Switch on washing machine only with base strip attached

Preparation

Correct installation according to separate installation instructions.

Checking the machine

Take hold of the plug only!

Turn on the tap

Dispenser II: Detergent for main wash, softener

(* depending on model)

Dilute viscous fabric softener and fabric conditioner with water. Prevents blockage of the overflow.

Before using your washing machine for the first time

Dispenser &: Fabric softener, starch **Dispenser I:** Detergent for prewash

bleach, stain remover

wash once without any washing. \rightarrow Page 9

Add detergent and care produc

Dose according to: amount of washing, soiling, water hardness (available from your water utility company) and manufacturer's instructions. Pour liquid detergent into corresponding dispenser and place in drum. Caution when opening the detergent drawer while the appliance is running!

Setting programmes

Washing

Drainage hose

Detergent-solution pump

Emergency lock release

Turn the programme selector to Off.

Turn off tap

Not required for Agua-Stop models. \longrightarrow Information, Installation Instructions

Remove the washing

Open washing machine door and remove washing. If \mathscr{D} (rinse stop = without final spin) active: Set programme selector to Empty or Spin.

 Remove any foreign objects – risk of rusting. Leave detergent drawer and door open so that residual water can evaporate.

End of programme when ...

... the indicator light **End** is on.

Terminating the programme

For programmes at high temperature:

- Cool washing: select Rinse.
- Select Start/Pause.
- For programmes at low temperature:
- Select Spin or Empty. - Select Start/Pause.

Change programme if ...

- . you have mistakenly selected a wrong programme:
- Reselect programme.
- Select Start/Pause. The new programme starts from the beginning.

Cancel Programme

- Select Start/Pause.
- If required, top up washing (do not leave door open for a long time - water from the washing could run out of the open door).
- Select Start/Pause.

Individual settings

Spin speed → depending on model

You can change the indicated spin speed or select @ (rinse stop = without final spin cycle. washing remains in the water after the last rinse cycle). Effects dependent on the programme

The maximum selectable spin speed depends on the model and the set programme.

Additional functions → Overview of programmes, Page 7 Energy-optimised washing by reducing the temperature while Eco+C achieving a consistent washing result.

The washing temperature is lower than the selected temperature. For special hygiene requirements, it is recommended that a higher temperature be selected.

set volume ** set to ●

Prewash For heavily soiled washing, Prewash at 30 °C.

Less Ironing Special spin sequence with subsequent fluffing. Gentle final spin at reduced spin speed. Residual moisture of the washing slightly

Extra Rinse Additional rinse cycle. Longer programme duration. For areas with very soft water or for further improvement of the rinsing result.

Start/Pause

For starting or interrupting the programme

set volume ** 1 step

** If required, select repeatedly

Important information

Before using your washing machine for the first time Do not put any washing in the washing machine! Turn the tap on. Pour into dispenser II:

- detergent (dosage according to manufacturer's instructions for light soiling and according to
- Set programme selector to **Easy-Care 60 °C** and select **Start/**Pause.
- At the end of the programme set the programme selector to Off.

- Empty pockets. Remove metal parts (paper clips, etc.).
- Wash delicates in the net/bag (tights, curtains, underwired bras).
- Close zips, button up covers. Brush sand out of pockets and collars.
- Remove curtain fittings or include in the net/bag.

Insert large and small items of washing!
Do not jam items of washing between the washing machine door and rubber seal.

Washing with different degrees of soiling

Load washing of the same colour.

Pour soaking agent/detergent into dispenser II according to the manufacturer's instructions. Set ogramme selector to Cotton 30 °C and select Start/Pause. After approx. 10 minutes select Start/Pause to stop the programme. After the required soaking time reselect Start/Pause if the programme is to be continued or change the programme.

Washing should not be treated with fabric softener.

Liquid starch can be used in all wash programmes. Pour starch into the fabric softener dispenser & according to manufacturer's specifications (if required clean beforehand).

Dye in household quantities only. Salt may attack stainless steel! Observe specifications of the dye manufacturer! Do **not** bleach washing in the washing machine!

Emergency release e.g. if power failure occurs

The programme continues running when the power supply is restored. If the washing is still to be removed, the door can be opened as described below:

Risk of scalding:

Detergent solution and washing may be hot. If required, leave to Do not reach into the drum in case it is still rotating.

Do not open the door if you can still see water through the glass.

- 1. Set programme selector to Off, pull out the mains plug.
- **2.** Removing base strip \rightarrow see separate installation instructions.
- 3. Drain the water. \rightarrow Page 10
- 4. Pull down emergency release with a tool and release. Door can then be opened.
- **5.** Attaching base strip \rightarrow see separate installation instructions.

Safety instructions

- Read and follow the operating and installation instructions and all other information enclosed with the washing machine.
- Retain documents for subsequent use.

- **Risk of electric shock** Never pull out the mains plug by tugging the power cord! Insert/pull out the mains plug with dry hands only.
 - On redundant appliances:

Pull out the mains plug!

Sever the power cord and discard together with the plug.
Destroy the lock on the washing-machine door. This will prevent

Risk of suffocation

- Keep packaging, plastic film and packaging parts out of the reach

Risk of poisioning Risk of explosion

Risk of injury

Keep detergents and care products out of the reach of children.

Caused by detergents containing solvents, e.g. stain remover/ items of washing pretreated with solvent naphtha may result in an explosion after being loaded into the washing machine. Before hand thoroughly rinse items of washing by hand.

Washing machine door may become very hot.

children from locking themselves in and suffocating.

- Caution when draining hot detergent solution.
- Do not climb on the washing machine.
- Do not lean on the open washing machine door. Do not reach into the drum in case it is still rotating

Consumption values

Programme	Additonal function	Load	Current***	Water***	Programme duration***
Cotton 20 °C	-	7 kg	0,21 kWh	77 I	1¼ h

Wool ₩ 30 °C	-	2,0 kg	0,20 kWh	40 I	3∕4 h

Programme setting for test according to currently valid European standard 60456. Information about comparability tests:

To test the test programmes, wash indicated load, with **Eco**+ additional function and at maximum selectable spin speed.

Programme	Additonal function	Load	Annual energy consumption	Annual water consumption
Cotton 40°C 60°C	Eco⁺⊂_**	7/3.5 kg	220 kWh	11000 l

- Programme setting for testing and energy labelling according to directive 2010/30/EU with cold
- **The values deviate from the indicated values depending on water pressure, water hardness, water inlet temperature, room temperature, type and amount of washing and degree of soiling, utilised detergent, fluctuations in the mains voltage and selected additional functions.

Insert for liquid detergent depending on model

Position insert for dosing liquid detergent:

- Completely remove detergent drawer. → Page 10 Push insert forwards.

Do not use insert (push upwards):

- For programmes with **Prewash**.

- For gel-like detergents and washing powders,

Care

Risk of electric shock! Pull out the mains plug! Risk of explosion! No solvents!

Machine housing, control panel

- Remove detergent residue immediately. - Wipe with a soft, damp cloth.
- Do not clean the appliance with a water jet.

Clean the detergent drawer .

- 1. Pull out, depress insert, take out drawer all the way.
- 2. Take out insert: using your finger, press insert upwards.
- 3. Clean detergent dispenser and insert with water and a brush and dry. **4.** Attach insert and lock into position (push cylinder onto guide pin).
- **5.** Slide in the detergent dispenser.

Leave washing machine door open so that the drum can dry out.

No washing in the machine!

Not required if detergent dosed correctly. However, if this does occur, follow the instructions of the descaling agent manufacturer. Suitable descalers can be purchased on our website

Information about the indicator lights depending on mode

A signal sounds and the indicator lamps for spin speed and status displays flash:

Other displays: Switch off appliance, wait 5 seconds and switch on again If the display is indicated again, call customer service. → Installation Instructions

- - Allow detergent solution to cool down Turn off the tap!

1. Take the drainage hose out of the holder.

Put the closing cap back on the hose.

Set programme selector to Off, pull out the mains plug.

2. Carefully unscrew the pump cover (residual water).

3. Clean the interior, pump cover thread and pump housing (fan impeller in the detergent-solution pump must rotate).

Remove sealing cap, allow detergent solution to flow out.

4. Reinsert and screw on pump cover. Handle is upright. Insert the drain hose into the holder.

To prevent unused detergent from flowing into the outlet during the next wash: Pour 1 litre of water into dispenser II and start the **Empty** programme.

- Clean drainage hose and siphon spigot
- **3.** Re-attach drainage hose and secure connection point with hose clip.

Do not immerse Aqua-Stop safety device in water (contains electric valve).

Release water pressure in the supply hose:

- 1. Turn off the tap!
- 2. Select any programme (except Spin/Empty).
- 3. Select Start/Pause. Leave programme for approx. 40 seconds. **4.** Turn the programme selector to \bigcirc **Off**. Pull out the mains plug!

and/or for standard and Aqua-Secure models: Remove hose from the rear of the appliance. Take out filter with pliers and clean.

6. Connect the hose and check for leaks.

Important information

i

Before using your washing machine for the first time

Do not put any washing in the washing machine! Turn the tap on. Pour into dispenser II:

approx. 1 litre of water,

 detergent (dosage according to manufacturer's instructions for light soiling and according to degree of water hardness).

Set programme selector to Easy-Care 60 °C and select Start/Pause.
 At the end of the programme set the programme selector to Off.

Pro – WI

Protecting the washing and the machine

- When dosing all detergents, cleaning aids and cleaning agents, always follow the manufacturer's instructions.
- Empty pockets. Remove metal parts (paper clips, etc.).
- Wash delicates in the net/bag (tights, curtains, underwired bras).
- Close zips, button up covers.
- Brush sand out of pockets and collars.
- Remove curtain fittings or include in the net/bag.

Insert laundry

Insert large and small items of washing!

Do not jam items of washing between the washing machine door and rubber seal.

Washing with different degrees of soiling

Wash new items separately.

Light Do not prewash.

— If required, pretreat stains. Select **Eco**⁺ additional function.

Heavy ■ Load less washing. Prewash.

If required, pretreat stains. Select **Eco**⁺ additional function.

Soaking

Load washing of the same colour.

Pour soaking agent/detergent into dispenser II according to the manufacturer's instructions. Set programme selector to **Cotton 30 °C** and select **Start**/Pause. After approx. 10 minutes select **Start/Pause** to stop the programme. After the required soaking time reselect **Start**/Pause if the programme is to be continued or change the programme.

Starching

Washing should not be treated with fabric softener.

Liquid starch can be used in all wash programmes. Pour starch into the fabric softener dispenser & according to manufacturer's specifications (if required clean beforehand).

Dyeing/Bleaching

Dye in household quantities only. Salt may attack stainless steel! Observe specifications of the dye manufacturer! Do **not** bleach washing in the washing machine!

Emergency release e.g. if power failure occurs

The programme continues running when the power supply is restored.

If the washing is still to be removed, the door can be opened as described below:

Risk of scalding!

Detergent solution and washing may be hot. If required, leave to cool down.

Do not reach into the drum in case it is still rotating. Do not open the door if you can still see water through the glass.

- 1. Set programme selector to Off, pull out the mains plug.
- 2. Removing base strip \rightarrow see separate installation instructions.
- 3. Drain the water. → Page 10
- **4.** Pull down emergency release with a tool and release. Door can then be opened.
- **5.** Attaching base strip \rightarrow see separate installation instructions.

When washing at maximum load using programmes marked with *, always select Eco* additional function. Irrespective of the type of washing, **Easy-Care 40°C** at max. selectable spin speed is best suited as a **short programme**. Programmes without Prewash – dour detergent into dispensers I and II.

BSH Hausgeräte GmbH Carl-Wery-Str. 34 81739 München/Deutschland

W112S141GB

Manufactured by BSH Hausgeräte GmbH under Trademark License of Siemens AG

Safety instructions

- Read and follow the operating and installation instructions and all other information enclosed with the washing machine.
- Retain documents for subsequent use.

Danger to life

- **Risk of electric shock** Never pull out the mains plug by tugging the power cord!
 - Insert/pull out the mains plug with dry hands only.

On redundant appliances: – Pull out the mains plug!

- Sever the power cord and discard together with the plug.
 Destroy the lock on the washing-machine door. This will prevent children from locking themselves in and suffocating.

Risk of suffocation

 Keep packaging, plastic film and packaging parts out of the reach of children.

- Keep detergents and care products out of the reach of children.

Risk of poisioning Risk of explosion

- Caused by detergents containing solvents, e.g. stain remover/ items of washing pretreated with solvent naphtha may result in an explosion after being loaded into the washing machine.
- Before hand thoroughly rinse items of washing by hand.

Risk of injury

- Washing machine door may become very hot.
- Caution when draining hot detergent solution.
- Do not climb on the washing machine.
- Do not lean on the open washing machine door.
- Do not reach into the drum in case it is still rotating.

Consumption values

Programme	Additonal function	Load	Current***	Water***	Programme duration***
Cotton 20 °C	-	7 kg	0,21 kWh	77 I	1¼ h
Cotton 40 °C*	Eco+C	7 kg	0,78 kWh	77 I	21/4 h

Wool ₩ 30 °C	-	2,0 kg	0,20 kWh	40 I	3∕₄ h

Programme setting for test according to currently valid European standard 60456. Information about comparability tests:

To test the test programmes, wash indicated load, with Eco+ additional function and at maximum selectable spin speed.

Programme	Additonal function	Load	Annual energy consumption	Annual water consumption
Cotton 40°C 60°C	Eco ⁺ C□**	7/3.5 kg	220 kWh	11000 I

Programme setting for testing and energy labelling according to directive 2010/30/EU with cold

^{***}The values deviate from the indicated values depending on water pressure, water hardness, water inlet temperature, room temperature, type and amount of washing and degree of soiling, utilised detergent, fluctuations in the mains voltage and selected additional functions.

Insert for liquid detergent depending on model

Position insert for dosing liquid detergent:

- Completely remove detergent drawer. → Page 10
- Push insert forwards.

Do not use insert (push upwards):

- For gel-like detergents and washing powders,
- For programmes with **Prewash**.

Care

Risk of electric shock! Pull out the mains plug!

Risk of explosion! No solvents!

Machine housing, control panel

- Remove detergent residue immediately.
- Wipe with a soft, damp cloth.
- Do not clean the appliance with a water jet.

Clean the detergent drawer ...

... if it contains detergent or fabric softener residue.

- 1. Pull out, depress insert, take out drawer all the way.
- 2. Take out insert: using your finger, press insert upwards.
- 3. Clean detergent dispenser and insert with water and a brush and dry.
- **4.** Attach insert and lock into position (push cylinder onto guide pin).
- **5.** Slide in the detergent dispenser.

Leave detergent drawer open so that residual water can evaporate.

Leave washing machine door open so that the drum can dry out. Use chlorine-free cleaning agent, not steel wool.

No washing in the machine!

Not required if detergent dosed correctly. However, if this does occur, follow the instructions of the descaling agent manufacturer. Suitable descalers can be purchased on our website or from customer service.

Information about the indicator lights depending on model

Maintenance

Risk of scalding! Allow detergent solution to cool down! Turn off the tap!

Detergent-solution pump

Set programme selector to Off, pull out the mains plug.

1. Take the drainage hose out of the holder. Remove sealing cap, allow detergent solution to flow out. Put the closing cap back on the hose.

- 3. Clean the interior, pump cover thread and pump housing (fan impeller in the detergent-solution pump must rotate).
- 4. Reinsert and screw on pump cover. Handle is upright. Insert the drain hose into the holder.

To prevent unused detergent from flowing into the outlet during the next wash: Pour 1 litre of water into dispenser **II** and start the **Empty** programme.

Drainage hose on the siphon

Set programme selector to Off, pull out the mains plug.

- 1. Loosen hose clip, carefully remove drainage hose (residual water).
- 2. Clean drainage hose and siphon spigot.
- 3. Re-attach drainage hose and secure connection point with hose clip.

Filter in the water inlet hose Risk of electric shock!

Do not immerse Aqua-Stop safety device in water (contains electric valve).

Release water pressure in the supply hose:

- 1. Turn off the tap!
- 2. Select any programme (except Spin/Empty).
- 3. Select Start/Pause. Leave programme for approx. 40 seconds.
- **4.** Turn the programme selector to Off. Pull out the mains plug!

Clean the filter:

5. Disconnect the hose from the water tap. Clean filter with small brush.

6. Connect the hose and check for leaks.

What to do if ...

	Water is running out.	Correctly attach/replace drainage hose.Tighten screw-fitting on the supply hose.
	Water not flowing in. Detergent not washed in.	 Start/Pause not selected? Tap not open? Filter blocked? Clean the filter. → Page 10 Supply hose kinked or jammed?
	Washing-machine door cannot be opened.	 Safety function active. Stop programme? → Page 4 Ø (without final spin) selected? → Page 3, 4 Can be opened via emergency release only? → Page 6
	Programme does not start.	Start/Pause not selected?Door closed?
•	Detergent solution is not drained.	 Ø (without final spin) selected? → Page 3, 4 Clean the drain pump. → Page 10 Clean outlet pipe and/or drainage hose.
	Water not visible in the drum.	- Not a fault - water below the visible area.
	Spin result not satisfactory, washing wet/too damp:	 Not a fault – unbalanced load detection system has stopped the spir cycle, washing unevenly distributed. Distribute small and large items of washing in the drum. Less Ironing is selected? → Page 5 Too low speed selected? → Page 5
	The programme duration changes during the wash cycle.	 Not a fault – the programme sequence is optimised for the particula wash process. This may result in changes to the programme duration in the display field.
	Spin cycle actuated several times.	 Not a fault – unbalanced load detection system adjusts imbalance.
	Residual water in the dispenser for care product %.	 Not a fault – effect of the care product not impaired. If required, clean insert. → Page 9
	Odour formation in the washing machine.	 Run Cotton 90 °C programme without washing. Use standard detergent.
	Foam is coming out of the detergent drawer.	 Too much detergent used? Mix 1 tablespoon of fabric softener with ½ litre of water and pour into dispenser II (not for outdoor, sports and down-filled textiles!). Reduce detergent dosage for the next wash cycle.
	Loud noise formation, vibrations and "Wandering" during spin cycle.	 Appliance feet fixed? Secure appliance feet. → Installation Instructions Transportation protection devices removed? Remove transportation protection devices. → Installation Instruction
	Noises during spin and drain cycles.	 Clean the drain pump. → Page 10
	Indicator lights do not function while the appliance is running.	Power failure?Fuse tripped? Switch on/replace fuse.If the fault occurs repeatedly, call customer service.
	The programme takes longer than usual.	 Not a fault – unbalanced load detection system adjusts imbalance by repeatedly distributing the washing. Not a fault – foam detection system active – a rinse cycle is switched on.
	Detergent residue on the washing.	 Occasionally phosphate-free detergents contain water-insoluble residue. Select Rinse or brush the laundry after washing.
	In the pause status Start/ Pause flashes very quickly and a signal sounds.	 Water level too high. Washing cannot be reloaded. Immediately close washing machine door. Select Start/Pause to continue the programme.
	If a fault cannot be rectified	(switching the machine on and off) or a repair is required:

- Set programme selector to Off and pull out the mains plug.
 Turn off the tap and call customer service. → Installation Instructions
