Your new washing machine

You have chosen a Bosch washing machine.

Please take a few minutes to read and become familiar with the advantages of your washing machine.

To meet the high quality demands required by Bosch, every washing machine that leaves our factory is carefully checked to ensure that it functions correctly and is in perfect condition.

For more information on our products, accessories, replacement parts and services, see our website www.bosch-home.com or contact our after-sales service centres.

If the operating and installation instructions describe different models, any differences will be pointed out at the relevant points in the text.

Read these operating and installation instructions before switching on the washing machine.

Intended use

For private domestic use only.

The washing machine is suitable for washing machine-washable fabrics and hand-washable wool in detergent solution.

To be operated with cold mains water and standard detergents and care products which are suitable for use in front-loading washing machines. Do not use detergents for hand wash.

When measuring the amount of all detergents/additives/care products and cleaning agents, always check the manufacturer's instructions.

The washing machine may be used by children over the age of 8 years old and by persons with reduced physical, sensory or mental capacity or by persons with a lack of experience or knowledge if they are supervised or have been instructed by a responsible person.

Children must not perform cleaning or maintenance work unsupervised.

Keep children under the age of 3 years away from the washing machine.

Keep pets away from the washing machine.

Read the Instruction Manual and Installation Instructions and all other information supplied with the washing machine and use the machine accordingly.

Retain the documents for subsequent use.
警告
危险！

触电危险！

■ 请勿用湿手触摸或握住电源插座。
■ 请勿拉出电源线的插头，而必须拉出电源插头，以免损坏电源线。
■ 该电器必须接地。 电源连接

风险

警告
风险！

■ 当洗衣机被其突出部分（例如洗衣机门）抬起时，部件可能会断裂并导致受伤。
不要抬起洗衣机时用突出部分。
■ 如果您爬上洗衣机，工作台可能会破裂并导致受伤。
不要爬上洗衣机。
■ 如果您在洗衣机门打开时倚靠在门上，洗衣机可能会翻倒并导致受伤。
不要在洗衣机门打开时倚靠在门上。
■ 伸进旋转的滚筒可能会导致手部受伤。
请等到滚筒停止旋转。

警告
烫伤风险！

当您在高温洗涤时，如果接触热水（例如将热水倒入水槽）可能会导致烫伤。
请勿接触热洗涤剂溶液。

儿童安全

警告
危险！

■ 如果儿童玩洗衣机，他们可能会进入危险的状况或受伤。
不要让儿童单独在洗衣机附近。
■ 不要让儿童玩洗衣机。
⚠️ **Warning**  
**Danger of death!**  
Children may lock themselves in appliances, putting their lives at risk.  
For appliances that have reached the end of their service life:  
- Disconnect the mains plug.  
- Cut through the mains cable and remove it, along with plug.  
- Destroy the lock on the washing machine door.

⚠️ **Warning**  
**Risk of suffocation!**  
Children may become wrapped in packaging/film or packing parts if allowed to play with them, or they may pull them over their heads and suffocate.  
Keep packaging, film and packaging parts out of the reach of children.

⚠️ **Warning**  
**Risk of poisoning!**  
Detergents and care products may be poisonous if consumed.  
Keep detergents and care products out of the reach of children.

⚠️ **Warning**  
**Eye/skin irritation!**  
Detergents and care products may cause irritation if they come into contact with the eyes or skin.  
Keep detergents and care products out of the reach of children.

⚠️ **Warning**  
**Risk of injury!**  
When you wash at high temperatures, the glass in the washing machine door gets hot.  
Do not let children touch the hot washing machine door.
Environmental protection

Packaging/used appliance

Dispose of packaging in an environmentally-responsible manner. The following Do’s and Don’ts provide a framework for the return and recycling of used products when available in your area.

Do’s

- Hand over the old/discarded electronic equipment only to authorized collection centers for disposal
- Consult the authorized service center as to whether the Electronic Equipment can be repaired or not, before discarding
- Consult the retailer about appliance take back schemes

Don’ts

- Don’t dump the discarded Electronic Equipment in the open or in any land fill site, as this will result in contamination of the soil and the ground water
- Don’t dispose of the discarded Electronic Equipment in household bins or Municipal bins
- The product is not meant for re-sale to any unauthorized agencies/scrap dealers
- Don't keep any replaced spare part(s) from the product in an exposed area

Tips on economical use

- Always fill the appliance with the maximum amount of laundry for the relevant programme.
- Wash normally soiled laundry without a prewash.
- Save energy and detergent when washing lightly and normally soiled laundry.
- Energy-saving mode: The display panel lighting goes out after a few minutes and Start/Pause flashes. To activate the lighting, press any button. Energy-saving mode is not activated if a programme is running.
- If the laundry is subsequently dried in a tumble dryer, select the spin speed according to the tumble dryer manufacturer's instructions.
- Overview of programmes → Page 13

Overview of programmes

■ Wash normally soiled laundry without a prewash.
■ Save energy and detergent when washing lightly and normally soiled laundry.
■ Energy-saving mode: The display panel lighting goes out after a few minutes and Start/Pause flashes. To activate the lighting, press any button. Energy-saving mode is not activated if a programme is running.
■ If the laundry is subsequently dried in a tumble dryer, select the spin speed according to the tumble dryer manufacturer's instructions.

   - : Spin
   - : Rinse
   - : Wash
   - : Ready

4. Programme selector for selecting a programme and for switching the machine on and off
Laundry

Prepare the laundry

Caution!
Damage to the appliance/fabrics
Foreign objects (e.g. coins, paper-clips, needles, nails) may damage the laundry or components in the washing machine.

Therefore, note the following tips when preparing your laundry:

- Empty pockets.
- Look out for metal items (paperclips, etc.) and remove them.
- Wash delicates in a laundry bag (tights, underwired bras, etc.).
- Close any zips, button up any cover buttons.
- Brush sand out of pockets and collars.
- Remove curtain fittings or place curtains in a laundry bag.

Sorting laundry

Sort your laundry according to the care instructions and manufacturer's information on the care labels:

- Type of fabric/fibre
- Colour

Note: Laundry can discolour or not be cleaned correctly. Wash white and coloured laundry separately. Wash new bright fabrics separately the first time you wash them.

- Soiling
  Wash laundry with the same level of soiling together.

You can find examples of levels of soiling on → Page 12
- Light: Do not prewash, select the Quick setting if necessary
- Normal
- Heavy: Load less laundry, select a programme with prewash
- Stains: Remove/pretreat stains while they are fresh. First, dab the stain with soapy water/do not rub. Then wash the items of laundry with the appropriate programme. Stubborn/dried-in stains can sometimes only be removed with several washes.

Symbols on the care labels
The numbers in the symbols indicate the maximum washing temperature which may be used.

- M: Suitable for a normal washing process; e.g. Cottons programme
- U: A gentle washing process is required; e.g. Easy-Care programme
- V: An especially gentle washing process is required; e.g. Delicate/Silk programme
- W: Suitable for washing by hand; e.g. Wool programme
- Ž: Do not wash the laundry in the machine.
Detergent

Correct selection of detergent

The care label is crucial for selecting the correct detergent, temperature and treatment of the laundry.

**Note:** Only use detergents for front-loading washing machines, low suds/detergent foam.

- **Standard detergent with optical brighteners**
  Suitable for boil-washable white laundry made from linen or cotton
  Programme: Cottons/
cold - max. 90 °C

- **Detergent for colours without bleach or optical brighteners**
  Suitable for coloured laundry made from linen or cotton
  Programme: Cottons/
cold - max. 60 °C

- **Detergent for colours/delicates without optical brighteners**
  Suitable for coloured laundry made from easy-care fibres, synthetic fibres
  Programme: Easy-Care/
cold - max. 60 °C

- **Detergent for delicates**
  Suitable for delicate, fine fabrics, silk or viscose
  Programme: Delicate/Silk/
cold - max. 40 °C

- **Detergent for woollens**
  Suitable for wool
  Wool programme/
cold - max. 40 °C

---

### Saving energy and detergent

For light and normal soiling, you can save energy (lower washing temperature) and detergent.

<table>
<thead>
<tr>
<th>Saving</th>
<th>Soiling/note</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reduced temperature and detergent quantity as per the recommended dosage</td>
<td><strong>Light</strong></td>
</tr>
<tr>
<td>No visible dirt or stains. Clothing has taken on some body odour, e.g.:</td>
<td></td>
</tr>
<tr>
<td>- Light summer/sports clothing (worn for a few hours)</td>
<td></td>
</tr>
<tr>
<td>- T-shirts, shirts, blouses (worn for up to one day)</td>
<td></td>
</tr>
<tr>
<td>- Guest bed linen and hand towels (used for one day)</td>
<td></td>
</tr>
<tr>
<td>Temperature as per the care label and detergent quantity as per the recommended dosage for heavy soiling</td>
<td><strong>Normal</strong></td>
</tr>
<tr>
<td>Visible dirt or a few light stains, e.g.:</td>
<td></td>
</tr>
<tr>
<td>- T-shirts, shirts, blouses (sweat soaked, worn a few times)</td>
<td></td>
</tr>
<tr>
<td>- Towels, bedding (used for up to one week)</td>
<td></td>
</tr>
<tr>
<td><strong>Heavy</strong></td>
<td></td>
</tr>
<tr>
<td>Dirt and/or stains clearly visible, e.g. tea towels, baby items, work clothing</td>
<td></td>
</tr>
</tbody>
</table>

**Note:** When measuring the amount of all detergents/additives/care products and cleaning agents, please always check the manufacturer's instructions and information.

Measure and add detergent and care products → Page 16
### Overview of programmes

#### Programmes on the programme selector

<table>
<thead>
<tr>

</tbody>
</table>
Starching

Note: Laundry shall not be treated with fabric softener.

Starching is possible in all wash programmes if liquid starch is used. Measure starch into compartment in accordance with the manufacturer's instructions (clean first if necessary).

Dyeing/bleaching

Dye should only be used in normal household quantities. Salt may damage stainless steel. Always follow the dye manufacturer's instructions.

Do not use the washing machine to bleach clothes.

Soaking

1. Pour soaking agent/detergent into compartment in accordance with the manufacturer's instructions.
2. Select desired programme.
3. Press Start/Pause .
4. After approx. ten minutes, press Start/Pause .
5. After the required soaking time, press Start/Pause again to continue or change the programme.

Notes
- Load laundry of the same colour.
- No additional detergent is required; the soaking solution is used for washing.

Additional programme settings

Extra Rinse

Increased water level and additional rinse cycle, extended washing time. For areas with very soft water or for further enhancing the spin result.

Quick

For washing in a shorter time with a washing result comparable to that of the standard programme.

Note: Do not exceed the maximum load.

Preparing the washing machine

Note: The washing machine must be correctly installed and connected.

1. Connect the mains plug.
2. Turn on the water tap.
3. Open the door.
4. Check that the drum is completely drained. Drain if necessary.
Select programme/switch on the appliance

Use the programme selector to select the required programme. Can be turned in either direction.

The machine is switched on.

Select additional programme settings

By selecting additional settings, you can better adapt the washing process to your items of laundry.

The settings can be selected or deselected depending on the programme progress.

The indicator lamp for the button lights up if a setting is active.

The settings are not saved when the appliance is switched off.

Additional settings → Page 15

Overview of programmes → Page 13

Placing laundry into the drum

⚠️ Warning
Danger of death!

Items of laundry pretreated with cleaning agents that contain solvents, e.g. stain remover/cleaning solvent, may cause an explosion after being loaded into the washing machine. Hand-rinse items of laundry thoroughly beforehand.

Notes
- Mix items of laundry of varying sizes. Laundry items of different sizes distribute themselves better during the spin cycle. Individual items of laundry may lead to imbalances.
- Observe the specified maximum load. Overfilling has a negative impact on the washing result and promotes creasing.

1. Place presorted items of laundry unfolded in the washing drum.
2. Make sure that no items of laundry are trapped between the washing machine door and the rubber seal, and close the door.

The Start/Pause button indicator lamp flashes and the programme settings continue to be displayed on the display panel one after another. It is possible to change the settings.

Measure and add detergent and care products

Caution!
Damage to the appliance

Cleaning agents and agents for pretreating laundry (e.g. stain removers, prewash sprays, etc.) may cause damage if they come into contact with the surfaces of the washing machine. Do not allow these agents to come into contact with the surfaces of the washing machine. If necessary, immediately wipe away spray residue and other residues/droplets with a damp cloth.

Measuring

Measure the detergent and care products according to:
- Water hardness; ask your water supply company
- The manufacturer's instructions on the packaging
- The amount of laundry
- Soiling
Filling

Warning
Eye/skin irritation!
Detergent and care products may spray out if the detergent drawer is opened while the machine is in operation. Open the drawer carefully. Rinse eyes or skin thoroughly if they come into contact with detergent/care products. If swallowed accidentally, seek medical advice.

Note: Dilute viscous fabric softener and fabric conditioner with water; this prevents blockages.

Pour the detergent and care products into the appropriate compartments:

Measuring aid* for liquid detergent
*depending on the model

Position the measuring aid for measuring the correct amount of liquid detergent:
1. Pull out the detergent drawer. Press down the insert and fully remove the drawer.
2. Slide the measuring aid forwards, fold it down and click it into place.
3. Reinsert the drawer.

Note: Do not use the measuring aid for gel detergents and washing powder, or for programmes with prewash or when "Ready in" time is selected.

For models without a measuring aid, pour the liquid detergent into the appropriate dispenser and place it in the drum.

Start the programme

Select the Start/Pause button. The indicator lamp lights up and the programme starts.

During the programme status indicators show programme progress (programme sequence).

Changing the programme

If you have started the wrong programme by mistake, you can change the programme as follows:
1. Press Start/Pause .
2. Select the other programme.
3. Press Start/Pause . The new programme starts from the beginning.
Cancel the programme

Programmes at high temperatures:
1. Press Start/Pause ．
2. To cool the laundry: Select Rinse.
3. Press Start/Pause ．

For programmes at low temperatures:
1. Press Start/Pause ．
2. Select Spin or Drain ．
3. Press Start/Pause ．

Programme end

Indicator lamp  for  flashes and the Start/Pause button indicator lamp is off.

Removing laundry/switching off the appliance

1. Open the washing machine door and remove the laundry.
2. Set the programme selector to off position. The appliance is switched off.
3. Turn off the water tap.

Notes

- Do not leave any items of laundry in the drum. They may shrink in the next wash or discolour another item.
- Remove any foreign objects from the drum and the rubber seal – risk of rusting.
- Leave the washing machine door and detergent drawer open so that any residual water can dry away.
- Always wait for the end of the programme, otherwise the appliance may still be locked. Then switch on the appliance and wait for it to unlock.
- If the display panel goes off at the end of a programme, energy-saving mode is active. To activate the panel, press any button.

Sensors

Automatic load sensing

The automatic load sensing function adapts the water consumption ideally to each programme depending on the type of fabric and the load.

Unbalanced load detection system

The automatic unbalanced load detection system detects imbalances and ensures even distribution of the laundry by repeatedly starting and stopping drum spinning.

If the laundry is extremely unevenly distributed, the speed is reduced or the spin cycle is not performed for safety reasons.

Note: Place large and small items of laundry evenly in the drum.
Faults and what to do about them → Page 21
Cleaning and maintenance

⚠️ Warning
Danger of death!
There is a risk of electric shock if you touch live components.
Switch off the appliance and unplug the mains plug.

⚠️ Warning
Risk of poisoning!
Toxic vapours can be produced by cleaning agents that contain solvents, e.g. cleaning solvent.
Do not use cleaning agents that contain solvents.

Caution!
Damage to the appliance
Cleaning agents that contain solvents, e.g. cleaning solvent, can damage surfaces and components in the machine.
Do not use cleaning agents that contain solvents.

Machine housing/control panel
- Wipe the housing and the control panel with a soft, damp cloth.
- Remove the detergent residue immediately.
- Do not clean with a water jet.

Drum
Use chlorine-free cleaning agents and not steel wool.

Descaling
Descaling should not be necessary if the detergent is measured out correctly. However, if it is required, follow the manufacturer's instructions for the descaling agent. Suitable descalers can be obtained via our website or from our after-sales service. → Page 24

Detergent drawer and housing
If the washing machine contains detergent or fabric softener residues:
1. Pull out the detergent drawer. Press down the insert and fully remove the drawer.
2. To remove the insert: Push the insert upwards from below with your finger.
3. Clean the detergent dispenser tray and insert with water and a brush, and dry it. Clean the inside of the housing as well.
4. Fit the insert and lock it in place (push the cylinder onto the guide pin).
5. Push in the detergent drawer.

Note: Leave the detergent drawer open so that any residual water can evaporate.

Detergent solution pump blocked

⚠️ Warning
Risk of scalding!
When you wash at high temperatures, the water gets very hot. If you come into contact with the hot water, you may be scalded.
Allow the water to cool down.

1. Turn off the water tap so that no more water can flow in and has to be drained via the drain pump.
2. Switch off the appliance. Disconnect the mains plug.
3. Open and remove the service flap.

4. Take the drain hose out of the retainer. Remove the sealing cap, allow the detergent solution to flow out into a suitable container. Replace the sealing cap and place the drainage hose in the retainer.

5. Carefully unscrew the pump cover, residual water may leak out. Clean the interior, pump cover thread and pump housing. The impeller in the detergent solution pump must be able to rotate. Refit the pump cover and screw it on tightly. The handle must be in a vertical position.

6. Place the service flap back on, lock it into place, and close it.

**Note:** To prevent unused detergent from flowing straight into the drain during the next wash: Pour 1 litre of water into compartment II and start the Drain programme.

**The drain hose at the siphon is blocked**

1. Switch off the appliance. Disconnect the mains plug.
2. Loosen the hose clamp. Carefully remove the drain hose, residual water may leak out.
3. Clean the drainage hose and siphon connecting piece.

4. Reattach the drainage hose and secure the connection using the hose clamp.

**Filter in the water supply blocked**

For this, first reduce the water pressure in the supply hose:
1. Turn off the water tap.
2. Select any programme (except Rinse//Drain).
3. Press Start/Pause\(\text{⇒}\). Allow the programme to run for approximately 40 seconds.

4. Set the programme selector to off position. Disconnect the mains plug.

5. Clean the filter on the water tap: Remove the hose from the water tap. Clean the filter with a small brush.

6. For standard and Aqua-Secure models, clean the filter on the rear of the appliance: Remove the hose from the rear of the appliance, Remove the filter using pliers and clean the filter.

7. Connect the hose and check for leaks.

However, if the laundry has to be removed, the washing machine door can be opened as follows:

⚠️ Warning
Risk of scalding!
When you are washing at high temperatures, there is a risk of scalding if you come into contact with detergent solution and laundry. If possible, leave it to cool down.

⚠️ Warning
Risk of injury!
You may injure your hands if you reach into the drum while it is turning. Do not reach into the drum when it is turning. Wait until the drum has stopped turning.

Caution!
Water damage
Any escaping water may cause water damage. Do not open the washing machine door if water can be seen through the glass.

1. Switch off the appliance. Disconnect the mains plug.
2. Drain the detergent solution.
3. Pull the emergency release downwards with a tool and release. The washing machine door can then be opened.

Faults and what to do about them.

Emergency release

e.g. in the event of a power outage
The programme will continue running when the power supply has been restored.
### Information on the display panel

<table>
<thead>
<tr>
<th>Display</th>
<th>Cause/remedial action</th>
</tr>
</thead>
<tbody>

### Faults and what to do about them.

<table>
<thead>
<tr>
<th>Faults</th>
<th>Cause/remedial action</th>
</tr>
</thead>
</table>
| Water is leaking out.               | - Attach/replace the drainage hose correctly.  
    - Tighten the screw connection of the supply hose. |
| No water supply.                    | - **Start/Pause ▶️لامبلاي** not pressed?  
    - Tap not turned on?  
    - Filter blocked? Clean the filter.  
      → Page 20  
      **Note:** If an additional water filter has been installed (depending on model)  
      → Page 20, check for contaminants and clean if required → separate installation and cleaning instruction for water filter. |
| Detergent not dispensed.            | - Safety function active.  
    **Note:** For safety reasons, the washing machine door remains locked when the water level or temperature is high (See  
      → Cancel the programme  
      → Page 18) or while the drum is rotating.  
    - Can be opened by emergency release only?  
      → Page 21 |
| Washing machine door cannot be opened. | - **Start/Pause ▶️لامبلاي** pressed?  
    - Washing machine door closed? |
| Programme does not start.           | - Clean the detergent solution pump.  
    → Page 19  
    - Clean the waste pipe and/or drainage hose.  
      → Page 20 |
<p>| Detergent solution is not emptied.  | Not a fault – water below the visible area. |
| Water not visible in the drum.      | Not a fault – water below the visible area. |</p>
<table>
<thead>
<tr>
<th>Faults</th>
<th>Cause/remedial action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Spin result not satisfactory.</td>
<td>Not a fault – the unbalanced load detection system has interrupted the spin because the laundry is unevenly distributed. Distribute large and small items of laundry evenly in the drum.</td>
</tr>
<tr>
<td>Laundry wet/too damp.</td>
<td>Not a fault – the unbalanced load detection system has interrupted the spin because the laundry is unevenly distributed. Distribute large and small items of laundry evenly in the drum.</td>
</tr>
<tr>
<td>Spin cycle started and stopped several times.</td>
<td>Not a fault – the unbalanced-load detection system is adjusting the imbalance.</td>
</tr>
</tbody>
</table>
| The programme duration is longer than usual. |   ■ Not a fault – the unbalanced-load detection system is adjusting the imbalance by repeatedly distributing the laundry.  
   ■ Not a fault – the foam detection system active – adds an additional rinse cycle.                              |
| The programme duration changes during the wash cycle. | Not a fault – the programme sequence is optimised for the particular washing process. This may lead to occasional changes in the programme duration in the display panel. |
| Residual water in the compartment 🌿 for care products. |   ■ Not a fault – the effect of the care product is not affected.  
   ■ Clean the insert if necessary.                                                                 |
| Odours in the washing machine.             | Run the 🌿 Drum Clean programme without laundry. Use standard detergent.                                                                                  |
| Foam escapes from the detergent drawer.    |   ■ Too much detergent used?  
   Mix one tablespoon of fabric softener with 1/2 litre water and pour into compartment II (not for outdoor fabrics, sportswear fabrics or those made with down).  
   Reduce the detergent dosage for the next wash cycle.  
   ■ Improper detergent use? Only use detergent suitable for front-loading washing machines.         |
| Intense noise, vibrations and "wandering" during spinning. |   ■ Is the appliance levelled? Level the appliance. → Page 30  
   ■ Are the appliance feet fixed? Secure the appliance feet. → Page 30  
   ■ Transport locks removed? Remove the transport locks. → Page 30 |
| Indicator lamps do not function during operation. |   ■ Power cut?  
   ■ Circuit breakers tripped? Switch the circuit breakers back on or replace them.  
   ■ If the fault occurs repeatedly, call the after-sales service. → Page 24 |
| Detergent residues on the laundry.         |   ■ Occasionally, phosphate-free detergents contain water-insoluble residues.  
   ■ Select 🌿 Rinse or brush the laundry after washing.                                                  |

If you cannot correct a fault yourself (after switching off/on) or a repair is required:
   ■ Set the programme selector to off position. The appliance is switched off.  
   ■ Unplug the mains plug from the socket.  
   ■ Turn off the tap and call the after-sales service. → Page 24
After-sales service

If you cannot correct the fault yourself, (see section, Faults and what to do about them → Page 21), please contact our after-sales service. → Cover page

We will always find an appropriate solution in order to avoid unnecessary visits by engineers.

Please give the after-sales service the product number (E no.) and the production number (FD) of the appliance.

* Values determined according to IEC 60456.

** Programme setting with maximum spin speed for testing according to IEC 60456.

* Observed values may deviate from the indicated values due to influence of water pressure, hardness and inlet temperature, ambient temperature, type, amount and soiling of laundry, detergent used, fluctuations in power supply and selected additional functions.

## Technical data

### Dimensions:
850 x 600 x 590 mm  
(Height x width x depth)

### Weight
63-83 kg (depending on model)

### Mains connection:
Mains voltage 220-240 V, 50 Hz
Nominal current 10 A
Nominal input 2300 W

### Water pressure:
100-1000 kPa (1-10 bar)

## Positioning and connecting

### Included with the appliance

**Note:** Check the machine for transport damage. Never use a damaged machine. If you have a complaint, please contact the retailer from whom you purchased the appliance, or our after-sales service.
In addition, a hose clamp (24 - 40 mm diameter, available from specialist dealers) is required to connect the water drain hose to a siphon.

Useful tools
- Spirit level for levelling
- Wrench with:
  - WAF 13 for loosening the transport locks, and
  - WAF 17 for aligning the appliance feet

Safety instructions

⚠️ Warning

Risk of injury!
- The washing machine is very heavy. Be careful when lifting/transporting the washing machine.
- When the washing machine is lifted by its protruding parts (e.g. the washing machine door), the components may break off and cause injuries. Do not lift the washing machine by protruding parts.
- If the hose and mains cables are not routed properly, there is a risk of tripping and injury. Lay hoses and cables in such a way that there is no risk of tripping.

⚠️ Caution!

Damage to the appliance
Frozen hoses may rip/burst. Do not install the washing machine in areas exposed to frost or outdoors.

⚠️ Caution!

Water damage
The connection points for the water supply hose and water drain hose are under high water pressure. To prevent leaks and water damage, you must follow the instructions in this section.
Notes
- In addition to the safety information listed here, the local water and electricity supplier may have special requirements.
- If in doubt, have the appliance connected by a specialist.

Installation surface
Note: The washing machine must be stable aligned so that it does not move around.
- The installation surface must be firm and level.
- Soft floors/floor coverings are not suitable.

Installation on a base or a wooden joist floor
Caution! Damage to the appliance
The washing machine may "wander" and tip/topple from the base when spinning. The feet of the appliance must be secured with holding brackets. Order no. WMZ 20490, WZ 20490 WZ 20510, WZ 20520
Note: On wooden joist floors, install the washing machine:
- In a corner, if possible,
- On a water-resistant wooden board (min. 30 mm thick) which is screwed tightly to the floor.

Installing the appliance in a kitchenette
⚠️ Warning
Danger of death!
There is a risk of electric shock if you touch live components. Do not remove the appliance covering plate.

Notes
- Recess width of 60 cm required.
- Only install the washing machine underneath a continuous worktop that is securely connected to adjacent cabinets.

Removing the transport locks
Caution! Damage to the appliance
- The machine is secured for transportation using transport locks. If the transport locks are not removed, the drum, for example, may become damaged when the machine is operated. Before using the appliance for the first time, make sure that you completely remove all four transport locks. Keep the locks in a safe place.
- To prevent transport damage from occurring if the appliance is moved at a later date, you must refit the transport locks before transporting the appliance.

Note: Keep the screws and sleeves in a safe place.

1. Take the hoses out of the holders.
2. Unscrew and remove all four transport brace screws.
Remove the sleeves. To do this, remove the mains cable from the holders.

3. Fit the covers. Lock the covers firmly in place by applying pressure to the snap-in hooks.

Hose and cable lengths

- Left-hand connection

- Right-hand connection

Tip: The following are available from specialist dealers/the after-sales service:
- An extension for Aqua-Stop or cold water supply hose (approx. 2.50 m); order no. WMZ2380, WZ10130, CZ11350, Z7070X0
- A longer supply hose (approx. 2.20 m) for standard model

Water inlet

⚠️ Warning
Danger of death!
There is a risk of electric shock if you touch live components.

Observe the following when connecting the machine:

Notes
- Only operate the washing machine using cold mains water.
- Do not connect the machine to the mixer tap of an unpressurised hot-water boiler.
- Do not use a used supply hose. Only use the supply hose supplied or one that was purchased from an authorised specialist retailer.
- Do not bend, squash, modify or cut through the water supply hose (otherwise its strength is no longer guaranteed).
- Only tighten the screw connections by hand. If the screw connections are tightened too much with a tool (pliers), the thread may be damaged.

**Optimum water pressure in the supply network**

**At least** 100 kPa (1 bar)

**Maximum** 1000 kPa (10 bar)

When the tap is open, the water flow is at least 8 l/min.

If the water pressure is higher than this, a pressure-reducing valve must be installed.

**Connection**

1. Connect the water supply hose to the water tap (¾" = 26.4 mm) and to the appliance:
   - Model: **Standard**

   ![Image of Standard model connection]

   - Model: **Aqua-Secure**

   ![Image of Aqua-Secure model connection]

2. Open the water tap carefully, checking the leak tightness of the connection points. The screw connection is under mains water pressure.

**Water outlet**

**Caution! Water damage**

If the drain hose slips out of the wash basin or the connection point during draining due to high water pressure, any escaping water may cause water damage. Secure the drain hose so that it cannot slip out.

**Note:** Do not kink the water drain hose or put strain on it lengthways.

You can lay the water drain hose as follows:

- **Outlet in a sink**

  ![Warning icon]

  **Warning**

  **Risk of scalding!**

  When you are washing at high temperatures, there is a risk of scalding if you come into contact with hot detergent solution e.g. if hot detergent solution is being drained into a wash basin.

  Do not reach into the hot detergent solution.

  **Caution!**

  **Damage to the appliance/fabrics**

  If the end of the drain hose is immersed in the drained water, water may be sucked back into the appliance and may damage the appliance/fabrics.

  Make sure that:
   - The plug does not block drainage from the sink.
   - The end of the drain hose is not immersed in the drained water.
Positioning and connecting

- The water drains away quickly enough.

Drainage into a siphon
The connection point must be secured using a hose clamp with a diameter of 24-40 mm (available from specialist dealers).

Outlet into a plastic pipe with rubber bushing or into a drainage pit

Levelling
Level the appliance using a spirit level. Incorrect levelling may result in intense noise, vibrations and "wandering".

1. Loosen the lock nuts using a wrench, by turning it in a clockwise direction.
2. Check the alignment of the washing machine with a spirit level, and adjust it if necessary. Change the height by turning the appliance feet. All four appliance feet must stand firmly on the ground.
3. Tighten the lock nut against the housing. In doing so, hold the foot tight and do not adjust its height. The lock nuts on all four appliance feet must be screwed tightly against the housing.

Electrical connection

Warning
Danger of death!
There is a risk of electric shock if you touch live components.
- Never touch or hold the mains plug with wet hands.
- Only pull out the mains cable by the plug and never by the cable, as this could damage it.
- Never unplug the mains plug during operation.

Observe the following information and ensure that:

Notes
- The mains voltage and voltage indicated on the washing machine (rating plate) are the same. The connected load and fuse required are specified on the rating plate.
- The mains plug fits the socket.
- The cable cross-section is adequate.
- The mains cable is only replaced by a qualified electrician (if this is necessary). Replacement mains cables are available from the after-sales service.
- No multiple plugs/couplings or extension cables are used.
Positioning and connecting

- If an earth-leakage circuit breaker is used, only a type which displays this symbol is used: ☑️. Only this symbol guarantees compliance with the currently applicable regulations.
- The mains plug can be accessed at all times.
- The mains cable is not bent, squashed, modified, cut through, or in contact with heat sources.

Grounding Instructions

⚠️ Warning
Danger of death!
Improper connection of the ground may result in electric shock. Have the appliance checked by a qualified technician or licensed electrician if you are in doubt as to whether the washing machine has been properly grounded.

This appliance must be grounded. In the event of malfunction or breakdown, grounding will reduce the risk of electric shock by providing a path of least resistance for the electric current. This appliance is equipped with a cord that has an equipment grounding conductor and a grounding plug. The plug must be plugged into an appropriate outlet that is properly installed and grounded in accordance with local codes and ordinances. To ground the appliance use a 3 pin plug and properly grounded socket of 16 A rating.

Notes
- Do not modify the plug provided with the appliance. If the plug will not fit into outlet have a properly grounded outlet installed by qualified electrician. Do not cut, remove or bypass the grounding prong on the washing machine power cord plug.
- The wiring for the electrical outlet circuit must be sufficient to meet the appliance requirements. Use of Ground Fault Circuit Interrupter (GFCI) is recommended.
- Do not use the machine with an extension box, extension cord, spike busters etc., as this may lead to improper grounding conditions.

Before washing for the first time
The washing machine was thoroughly tested before leaving the factory. In order to remove any water which may be left over from the test, run the first washing cycle without any laundry.

Notes
- The washing machine must be correctly installed and connected → Page 25
- Never use a damaged machine. Inform your after-sales service. → Page 24

1. Check the machine.
2. Remove the protective film from the control panel.
3. Connect the mains plug.
4. Turn on the water tap.
5. Close the washing machine door (do not load any laundry).
6. Select the Drum Clean programme.
7. Open the detergent drawer.
8. Pour approx. 1 litre of water into compartment II.
9. Pour standard detergent into compartment II.
   Note: To prevent foaming, only use half of the amount of detergent recommended by the detergent manufacturer. Do not use detergent for wool or delicates.
10. Close the detergent drawer.
11. Press Start/Pause.
12. Switch off the appliance at the end of the programme.

Your washing machine is now ready to use.
Transportation

e.g. when moving home

Preparatory work:
1. Turn off the water tap.
2. Reduce the water pressure in the supply hose.
   Maintenance – filter in the water supply → Page 20
3. Drain the remaining detergent solution.
   Maintenance – detergent solution pump blocked → Page 19
4. Disconnect the washing machine from the mains.
5. Remove the hoses.

Before initial use:

Notes
- The transport locks must be removed. → Page 27
- To prevent unused detergent from flowing straight into the drain during the next wash: Pour approximately 1 litre of water into compartment II and select and start the Drain programme.

Installing the transport locks:
1. Remove the covers and keep them in a safe place.
   Use a screwdriver if necessary.
2. Insert all four sleeves.
   Clip the mains cable securely in the holders. Insert and tighten the screws.
