M Important safety information

General information

Warning Risk of fire!

- Combustible items stored in the cooking compartment may catch fire. Never store combustible items in the cooking compartment. Never open the appliance door if there is smoke inside. Switch off the appliance and unplug it from the mains or switch off the circuit breaker in the fuse box.
- A draught is created when the appliance door is opened. Greaseproof paper may come into contact with the heating element and catch fire. Do not place greaseproof paper loosely over accessories during preheating. Always weight down the greaseproof paper with a dish or a baking tin. Only cover the surface required with greaseproof paper. Greaseproof paper must not protrude over the accessories.

Marning Risk of burns!

- The appliance becomes very hot. Never touch the interior surfaces of the cooking compartment or the heating elements. Always allow the appliance to cool down. Keep children at a safe distance.
- Accessories and ovenware become very hot. Always use oven gloves to remove accessories or ovenware from the cooking compartment.
- Alcoholic vapours may catch fire in the hot cooking compartment. Never prepare food containing large quantities of drinks with a high alcohol content. Only use small quantities of drinks with a high alcohol content. Open the appliance door with care.

🗥 Warning

Risk of scalding!

- The accessible parts become hot during operation. Never touch the hot parts. Keep children at a safe distance.
- When you open the appliance door, hot steam can escape. Steam may not be visible, depending on its temperature. When opening, do not stand too close to the appliance. Open the appliance door carefully. Keep children away.

 Water in a hot cooking compartment may create hot steam. Never pour water into the hot cooking compartment.

▲ Warning Risk of injury!

- Scratched glass in the appliance door may develop into a crack. Do not use a glass scraper, sharp or abrasive cleaning aids or detergents.
- The hinges on the appliance door move when opening and closing the door, and you may be trapped. Keep your hands away from the hinges.

\Lambda Warning

Risk of electric shock!

- Incorrect repairs are dangerous. Repairs may only be carried out and damaged power cables replaced by one of our trained after-sales technicians. If the appliance is defective, unplug the appliance from the mains or switch off the circuit breaker in the fuse box. Contact the aftersales service.
- The cable insulation on electrical appliances may melt when touching hot parts of the appliance. Never bring electrical appliance cables into contact with hot parts of the appliance.
- Do not use any high-pressure cleaners or steam cleaners, which can result in an electric shock.
- A defective appliance may cause electric shock. Never switch on a defective appliance. Unplug the appliance from the mains or switch off the circuit breaker in the fuse box. Contact the after-sales service.

Warning

Hazard due to magnetism!

Permanent magnets are used in the control panel or in the control elements. They may affect electronic implants, e.g. heart pacemakers or insulin pumps. Wearers of electronic implants must stay at least 10 cm away from the control panel.

Halogen lamp

▲ Warning

Risk of electric shock!

When replacing the cooking compartment bulb, the bulb socket contacts are live. Before replacing the bulb, unplug the appliance from the mains or switch off the circuit breaker in the fuse box.

Cleaning function

Marning Risk of fire!

- Loose food residues, grease and meat juices may catch fire during the cleaning function. Before starting the cleaning function, remove coarse dirt from the cooking compartment and from the accessories.
- The appliance will become very hot on the outside during the cleaning function. Never hang combustible objects, e.g. tea towels, on the door handle. Do not place anything against the front of the appliance. Keep children away from the appliance.

\Lambda Warning

Risk of serious damage to health!

The appliance will become very hot during the cleaning function. The non-stick coating on baking trays and tins is destroyed and noxious gases are released. Never clean non-stick baking trays and baking tins using the cleaning function. Only clean enamelled accessories using the cleaning function.

▲ Warning Risk of burns!

- The cooking compartment becomes extremely hot during the cleaning function. Never open the appliance door or move the locking latch by hand. Allow the appliance to cool down. Keep children away from the appliance.
- A The appliance will become very hot on the outside during the cleaning function. Never touch the appliance door. Allow the appliance to cool down. Keep children away from the appliance.

Causes of damage

General information

Caution!

- Accessories, foil, greaseproof paper or ovenware on the cooking compartment floor: do not place accessories on the cooking compartment floor. Do not cover the cooking compartment floor with any sort of foil or greaseproof paper. Do not place ovenware on the cooking compartment floor if a temperature of over 50 °C has been set. This will cause heat to accumulate. The baking and roasting times will no longer be correct and the enamel will be damaged.
- Aluminium foil: Aluminium foil in the cooking compartment must not come into contact with the door glass. This could cause permanent discolouration of the door glass.
- Water in a hot cooking compartment: do not pour water into the cooking compartment when it is hot. This will cause steam. The temperature change can cause damage to the enamel.
- Moisture in the cooking compartment: Over an extended period of time, moisture in the cooking compartment may lead to corrosion. Allow the cooking compartment to dry after use. Do not keep moist food in the closed cooking compartment for extended periods of time. Do not store food in the cooking compartment.
- Cooling with the appliance door open: Following operation at high temperatures, only allow the cooking compartment to cool down with the door closed. Do not trap anything in the appliance door. Even if the door is only left open a crack, the front of nearby furniture may become damaged over time. Only leave the cooking compartment to dry with the door open if a lot of moisture was produced whilst the oven was operating.
- Fruit juice: when baking particularly juicy fruit pies, do not pack the baking tray too generously. Fruit juice dripping from the baking tray leaves stains that cannot be removed. If possible, use the deeper universal pan.
- Extremely dirty seal: If the seal is very dirty, the appliance door will no longer close properly during operation. The fronts of adjacent units could be damaged. Always keep the seal clean.
- Appliance door as a seat, shelf or worktop: Do not sit on the appliance door, or place or hang anything on it. Do not place any cookware or accessories on the appliance door.
- Inserting accessories: depending on the appliance model, accessories can scratch the door panel when closing the appliance door. Always insert the accessories into the cooking compartment as far as they will go.
- Carrying the appliance: do not carry or hold the appliance by the door handle. The door handle cannot support the weight of the appliance and could break.

Environmental protection

Your new appliance is particularly energy-efficient. Here you can find tips on how to save even more energy when using the appliance, and how to dispose of your appliance properly.

Saving energy

- Only preheat the appliance if this is specified in the recipe or in the tables in the operating instructions.
- Use dark, black lacquered or enamelled baking tins. They absorb heat particularly well.
- Open the appliance door as infrequently as possible during operation.
- It is best to bake several cakes one after the other. The cooking compartment is still warm. This reduces the baking time for the second cake. You can place two cake tins next to each other in the cooking compartment.
- For longer cooking times, you can switch the appliance off 10 minutes before the end of the cooking time and use the residual heat to finish cooking.

Environmentally-friendly disposal

Dispose of packaging in an environmentally-friendly manner.

This appliance is labelled in accordance with European Directive 2012/19/EU concerning used electrical and electronic appliances (waste electrical and electronic equipment -WEEE). The guideline determines the framework for the return and recycling of used appliances as applicable throughout the EU.

Getting to know your appliance

In this chapter, we will explain the displays and controls. You will also find out about the various functions of your appliance. **Note:** Depending on the appliance model, individual details and colours may differ.

Control panel

In the control panel, you can use the various buttons, touch fields and the rotary selector to set the required function of the appliance. The current settings are shown in the display.

1 Buttons

The buttons to the left and right of the rotary selector have a pressure point. Press these buttons to activate them.

2 Rotary selector

You can turn the rotary selector clockwise and anti-clockwise.

3 Display

You can see the current adjustment values, options or notes in the display.

4 Touch fields

There are sensors under the touch fields to the left \leq and right > of the display. Touch the respective arrow to select the function.

Controls

The individual controls are adapted for the various functions of your appliance. You can set your appliance simply and directly.

Buttons and touch fields

Here you can find a short explanation of the various buttons and touch fields.

| Buttons | | Meaning |
|------------|--------------------------------|--|
| on/off | | Switches the appliance on and off |
| menu | Menu | Opens the operating modes menu |
| []~~? | Information Childproof lock | Displays notes Activates/deactivates the child- proof lock |

| Start/Stop | | Starts, pauses or cancels opera- tion |
| Touch fields | | |
| < | Field to the left of the display | Navigates left |
| > | Field to the right of the display | Navigates right |

Rotary selector

Use the rotary selector to change the operating modes and adjustment values shown in the display.

In most selection lists, e.g. types of heating, the first selection follows the last. For temperature for example, you must turn the rotary selector back when the minimum or maximum temperature is reached.

Display

The display is structured so that the information can be read at a glance.

The value that you can currently set is in focus. It is displayed in white lettering with a dark background.

Status bar

The status bar is at the top of the display. The time and set time functions are displayed here.

Progress line

The progress line is under the status bar. The progress line shows you how much time has elapsed, for example. The line over the in-focus value progresses from left to right, the longer the operation continues to run.

The colour of the progress line changes depending on the operating mode.

Lapse of time

If you have started your appliance without a cooking time, you can see how long the operation has already been running for at the top on the right in the status bar.

Temperature check

The temperature indicator bars show the heating phases in the cooking compartment.

| Heating indicator | The heating indicator displays the rising tempera- ture in the cooking compartment. When all bars are complete, the optimum time for placing the dish in the oven has been reached. The bars do not appear when settings are applied for grilling and cleaning. |
|----------------------------|--|
| Residual heat indicator | When the appliance is switched off, a line appears under the status bar which shows how much residual heat is in the cooking compartment. Once the temperature has dropped to approxi- mately 60 °C, the display goes out. |

Note: Due to thermal inertia, the temperature displayed may be slightly different to the actual temperature inside the oven. You can use the i button to check the current heating temperature when heating up.

Operating modes menu

The menu is divided into different operating modes. In this way, you can quickly access the required function.

| Operating mode | Use |

Types of heating

In order for you to find the correct type of heating for your dish, we have explained the differences and scopes of application here.

| Types of | heating | Temperature | Use |
|------------|------------------------|--|--|
| | 4D hot air | 30-275 ℃ | For baking and roasting on one or more levels. The fan distributes the heat from the ring heating element in the back panel evenly around the cooking compartment. |
| | Top/bottom heating | 30-300 °C | For traditional baking and roasting on one level. Especially suitable for cakes with moist toppings. Heat is emitted evenly from above and below. |
| ₿ e | Hot air eco | 30-275 ℃ | For energy-optimised cooking of selected dishes on one level without preheating. The fan distributes the energy-optimised heat from the ring heating element in the back wall evenly around the cooking compartment. |
| e | Top/bottom heating eco | 30-300 °C | For energy-optimised cooking of selected dishes. Heat is emitted evenly from above and below. |
| Т. | Hot air grilling | 30-300 °C | For roasting poultry, whole fish and larger pieces of meat. The grill heating element and the fan switch on and off alternately. The fan circu- lates the hot air around the food. |
| ~~ | Grill, large area | Grill settings: 1 = low 2 = medium 3 = high | For grilling flat items such as steaks, sausages or bread, and for browning food. The whole area of the grill heating element becomes hot. |
| ~ | Grill, small area | Grill settings: 1 = low 2 = medium 3 = high | For grilling small quantities of food such as steaks, sausages or bread, and for browning food. The centre part under the grill heating element becomes hot. |

| » ☆ | CoolStart function | 30-275 °C | For the quick preparation of frozen products on level 3. The temperature depends on the manufacturer's instructions. Use the highest temperature specified on the packaging. The cooking time is as specified or shorter. Preheating is not required. |

Default values

For each type of heating, the appliance specifies a default temperature or level. You can accept this value or change it in the appropriate area.

Further information

In most cases, the appliance provides notes and further information on the action just carried out. To do this, press the i button. The note is shown for a few seconds.

Some notes are displayed automatically, for example as confirmation, or to provide an instruction or warning.

Cooking compartment functions

Some functions make your appliance easier to use. This, for example, enables the cooking compartment to be well lit and a cooling fan to prevent the appliance from overheating.

Opening the appliance door

If you open the appliance door during an operation, the operation is paused. Operation continues to run when you close the door.

Interior lighting

When you open the appliance door, the interior lighting switches on. If the door remains open for longer than 15 minutes, the lighting switches off again.

For most operating modes, the interior lighting switches on as soon as the operation is started. When the operation has finished, the lighting switches off.

Note: You can set the interior lighting not to come on during the operation in the basic settings.

Cooling fan

The cooling fan switches on and off as required. The hot air escapes above the door.

Caution!

Do not cover the ventilation slots. Otherwise the oven will overheat.

So that the cooking compartment cools down more quickly after operation, the cooling fan continues to run for a certain period afterwards.

Note: You can change how long the cooling fan continues to run for in the basic settings. \rightarrow "Basic settings" on page 15

Your appliance is accompanied by a range of accessories. Here, you can find an overview of the accessories included and information on how to use them correctly.

Accessories included

Your appliance is equipped with the following accessories:

Wire rack For ovenware, cake tins and ovenproof dishes.

For roasts and grilled food.

Universal pan

For moist cakes, pastries, frozen meals and large roasts.

It can be used to catch dripping fat when you are grilling directly on the wire rack.

Baking tray

For tray bakes and small baked products.

Only use original accessories. They are specially adapted for your appliance.

You can buy accessories from the after-sales service, from specialist retailers or online.

Note: The accessories may deform when they become hot. This does not affect their function. Once they have cooled down again, they regain their original shape.

Inserting accessories

The cooking compartment has five shelf positions. The shelf positions are counted from the bottom up.

When using shelf positions 1, 3, 4 and 5, always insert the accessory between the two guide rods for a shelf position.

The accessories can be pulled out approximately halfway without tipping. With the pull-out rails at level 2, you can pull the accessories out further.

Ensure that the accessory is placed behind the lug **a** on the pull-out rail.

Example in the picture: Universal pan

The pull-out rails lock in place when they are fully pulled out. This makes it easy to place the accessories in position.To unlock, push the pull-out rails back into the cooking compartment with a certain amount of force.

Notes

- Ensure that you always insert the accessories into the cooking compartment the right way round.
- Always insert the accessories fully into the cooking compartment so that they do not touch the appliance door.

Locking function

The accessories can be pulled out approximately halfway until they lock in place. The locking function prevents the accessories from tilting when they are pulled out. The accessories must be inserted into the cooking compartment correctly for the tilt protection to work properly.

When inserting the wire rack, ensure that lug **a** is at the rear and is facing downwards. The open side must be facing the appliance door and the outer rail must be facing downwards \sim .

When inserting baking trays, ensure that lug **a** is at the rear and is facing downwards. The sloping edge of the accessory **b** must be facing towards the appliance door.

Example in the picture: Universal pan

Combining accessories

You can insert the wire rack and the universal pan at the same time to catch drops of liquid.

When inserting the wire rack, ensure that both spacers **a** are at the rear edge. When inserting the universal pan, the wire rack is on top of the upper guide rod of the shelf position.

Example in the picture: Universal pan

Optional accessories

You can buy optional accessories from the after-sales service, from specialist retailers or online. *You will find a comprehensive range of products for your appliance in our brochures and online.

Both availability and whether it is possible to order online differ between countries. Please see your sales brochures for more details.

When purchasing, please always quote the exact order number of the optional accessory.

Note: Not all optional accessories are suitable for every appliance. When purchasing, please always quote the exact identification number (E-no.) of your appliance. \rightarrow "Customer service" on page 23

Before using for the first time

Before you can use your new appliance, you must make some settings. You must also clean the cooking compartment and accessories.

Initial use

After connecting the appliance to the power or following a power cut, the settings for initial use are shown in the display.

Note: You can change these settings at any time in the basic settings. \rightarrow "Basic settings" on page 15

Setting the language

"German" is the preset language.

- **1.** Use the rotary selector to select the required language.
- 2. Touch the > arrow. The next setting appears.

Setting the time

The time starts at "12:00".

- 1. Turn the rotary selector to set the current time.
- **2.** Touch the > arrow

Setting the date

The default date is "1.1.2014".

- 1. Use the rotary selector to set the current day, month and year.
- Touch the > arrow to confirm. A note appears in the display confirming that the initial use has been completed.

Cleaning the cooking compartment and accessories

Before using the appliance to prepare food for the first time, you must clean the cooking compartment and accessories.

Cleaning the cooking compartment

To remove the new-appliance smell, heat up the cooking compartment when empty and with the oven door closed.

Make sure that the cooking compartment does not contain any leftover packaging, such as polystyrene pellets. Before heating the appliance, wipe the smooth surfaces in the cooking compartment with a soft, wet cloth. Keep the kitchen ventilated while the appliance is heating.

Apply the settings indicated.

| Settings | |
|-----------------|----------------------|
| Type of heating | Top/bottom heating 🗔 |
| Temperature | 240 °C |
| Cooking time | 1 hour |

You can find out how to set the type of heating and the temperature in the next section.

Switch off the appliance after the cooking time indicated using the On/Off button.

After the cooking compartment has cooled down, clean the smooth surfaces with soapy water and a dish cloth.

Cleaning the accessories

Clean the accessories thoroughly using soapy water and a dish cloth or soft brush.

Operating the appliance

You have already learnt about the controls and how they work. Now we will explain how to set your appliance. You will learn about what happens when you switch the appliance on and off, and how to select the operating mode.

Switching the appliance on and off

Before you are able to set the appliance, you must switch it on.

Exception: The childproof lock and the timer can be set when the appliance is switched off.

Displays or information, e.g the residual heat indicator in the cooking compartment, remain visible in the display after the appliance has been switched off.

Switch off your appliance when you do not need to use it. If no settings are applied for a long time, the appliance switches itself off automatically.

Switching the appliance on

Use the On/Off button to switch the appliance on. The on/off symbol above the button is illuminated in blue.

The Siemens logo appears in the display, and then a type of heating and a temperature.

Note: You can specify which operating modes should appear after the appliance is switched on in the basic settings.

Switching off the appliance

Use the On/Off button to switch off the appliance. The lighting above the button goes out.

A set function is cancelled.

The time appears in the display.

Note: You can set whether or not the time should be displayed when the appliance is switched off in the basic settings.

Starting or interrupting operation

To start operation or to interrupt an operation which has started running, press the Start/Stop button. The cooling fan may continue to run after an operation is interrupted.

Press the On/Off button to delete all settings.

If you open the cooking compartment door during operation, operation is interrupted. Close the cooking compartment door to continue operation.

Tip: In the basic settings, you can apply a setting so that operation is not continued after the cooking compartment door is closed. To continue operation, you must then press the Start/Stop button. \rightarrow "Basic settings" on page 15

Selecting an operating mode

If you want to set an operating mode, the appliance must be switched on.

- 1. Press the menu button. The operating modes menu opens.
- Use the rotary selector to select the required operating mode. Depending on the operating mode, different options are available.
- Use the > arrow to reach the required operating mode.
- 4. Use the rotary selector to change the selection. Depending on the option, change different settings.
- 5. Press the Start/Stop button to start.

Setting the type of heating and temperature

After the appliance is switched on, the suggested type of heating appears with the temperature. You can start this setting immediately with the Start/Stop button.

For other settings, you can change the values as shown in the pictures.

Example: Top/bottom heating, 180 °C

1. Use the rotary selector to change the type of heating.

- 2. Press the arrow > to switch to the temperature.
- 3. Use the rotary selector to change the temperature.

4. Press the Start/Stop button.

The set type of heating and the temperature are displayed in the display.

Rapid heat up

You can use the » button to heat up the cooking compartment particularly quickly.

The rapid heat up function is not possible for all types of heating.

Suitable types of heating:

| \bigotimes | 4D hot air |
|--------------|--------------------|
| | Top/bottom heating |

To ensure an even cooking result, do not place your food in the cooking compartment until rapid heat up is complete.

Making settings

Ensure you have selected a suitable type of heating. The temperature must be set to above $100 \,^{\circ}$ C, otherwise the rapid heat up function cannot be started.

- 1. Set the type of heating and temperature.
- 2. Press the »55 button.

The » symbol appears on the left next to the temperature. The progress line begins to move across.

When rapid heat up is complete, a signal sounds. The »\\$\$ symbol goes out. Place your dish in the cooking compartment.

Notes

- If you change the type of heating or the temperature the rapid heat up function is cancelled.
- If a cooking time has been set, this runs independently of the rapid heat up process and counts down immediately when operation is started.

 You can use the i button to check the current cooking compartment temperature during rapid heat up.

Cancelling

Press the \gg % button. The \gg % symbol disappears from the display.

Time-setting options

Your appliance has different time-setting options.

| Time-setting option | | Use |
|---------------------|--------------|---|
| \bigtriangleup | Timer | The timer functions like an egg timer. An audible signal sounds once the set time has elapsed. |
| → | Cooking time | A signal sounds once a set cooking time has elapsed. The appliance switches off automatically. |
| \rightarrow | End | Set a cooking time and an end time. The appliance switches on automatically so that the operation ends at the desired time. |

Notes

• A cooking time of up to one hour can be set exactly to the minute.

A cooking time of over one hour can be set in 5-minute increments.

- Depending on which direction you turn the rotary selector, the cooking time starts at a default value: Anti-clockwise, 10 minutes, Clockwise, 30 minutes.
- The maximum setting you can apply is 23 hours and 59 minutes.
- After a time-setting option has elapsed, a signal sounds.
- Using the i button, you can request information during operation, which then appears briefly in the display.

Timer

You can set the timer at any time, even if the appliance is switched off. It runs parallel to the other time settings and has a separate signal. In this way, you can tell whether it is the timer or a cooking time which has elapsed.

1. Press the 🕒 button.

The field for the timer opens.

2. Use the rotary selector to set the timer duration. The timer starts after a few seconds.

The \bigcirc symbol for the timer and the time counting down are displayed on the left in the status bar.

When the time has elapsed,

a signal sounds. " \bigcirc 00:00" is shown in the display. Use the \bigcirc button to cancel the audible signal early.

Cancelling the timer duration

Press the (b) button to open the time-setting options menu and turn the time back. Press the (b) button to close the menu.

Changing the timer duration

Use the ^(b) button to open the time-setting options menu and change the timer time in the next few seconds using the rotary selector. Start the timer with the ^(b) button.

Cooking time

If you set the cooking time for your food, operation stops automatically once this time has elapsed. The oven stops heating.

Prerequisite: A type of heating and a temperature have been set.

For example: Setting for 4D hot air, 180 $^\circ\text{C}$, cooking time 45 minutes.

1. Press the 🕒 button.

The time-setting options menu opens.

2. Set the cooking time using the rotary selector.

 Press the Start/Stop button to start. You can see the cooking time I→Icounting down in the status bar.

The cooking time has elapsed

A signal sounds. The oven stops heating. You can cancel the audible signal early using the ^(b) button.

Cancelling the cooking time

Press the 🕑 button to open the time-setting options menu. Turn the time back. The type of heating and temperature set are shown in the display.

Changing the cooking time

Press the () button to open the time-setting options menu. Change the cooking time using the rotary selector.

End time

If you change the end time to a later time, please remember that easily spoiled foods must not be allowed to remain in the cooking compartment for too long.

Prerequisite: The selected operation has not already begun. A cooking time has been set. The time-setting options menu \bigcirc is open.

Example in the picture: You put the dish in the cooking compartment at 9:30. It takes 45 minutes to cook and will be ready at 10:15, but you would like it to be ready at 12:45 instead.

- **1.** Touch the > arrow to continue to " \rightarrow I End".
- 2. Set the end time using the rotary selector.

3. Confirm with the Start/Stop button.

The oven is in standby. The \rightarrow Isymbol and the time when operation will be finished appear in the status bar. Operation starts at the appropriate time. You can see the cooking time counting down in the status bar.

The cooking time has elapsed

A signal sounds. The oven stops heating. You can cancel the audible signal early using the 🕒 button.

Correcting the end time

This is possible if the oven is in standby. Press the start/stop button. Use the \bigcirc button to open the time-setting options menu, press the > arrow to change to " \rightarrow I End" and use the rotary selector to correct the end time. Use the \bigcirc button to close the time-setting options menu.

Cancelling the end time

This is possible if the oven is in standby. Use the \bigcirc button to open the time-setting options menu, press the > arrow to change to "End" and use the rotary selector to turn back the end time. The cooking time immediately starts to count down.

Childproof lock

Your appliance is equipped with a childproof lock so that children cannot switch it on accidentally or change any settings.

Activating and deactivating

You can activate and deactivate the childproof lock when the appliance is switched on or off.

In each case, press the \neg button for approx. 4 seconds. A confirmation note appears in the display and the \neg symbol appears in the status bar.

The appliance door is locked

In the basic settings, you can change the settings so that the appliance door is also locked in addition to the control panel.

The appliance door locks if the temperature in the cooking compartment reaches approx. 50 °C. The symbol is displayed in the status bar. When the oven is switched off, the appliance door locks immediately if the childproof lock has been activated.

Basic settings

There are various settings available to you in order to help use your appliance effectively and simply. You can change these settings as required.

Changing settings

- 1. Press the "On/off" button.
- 2. Press the menu button.
- The operating modes menu opens.
- 3. Use the rotary selector to select "Settings".
- 4. Touch the arrow >.
- 5. Use the rotary selector to change the values.
- 6. Use the arrow > to change to the next settings, and change them if necessary.
- Press the menu button to save.
 "Save" or "Discard" appears on the display.

List of settings

This list tells you all the basic settings and how to change them. Depending on the model of the appliance you own, the display will show only those settings that apply to your appliance.

You can change the following settings:

Caution!

For shelves and single rails: "Not retrofitted" setting. For sets of two or three rails: "Retrofitted" setting.

Note: Changes to the language, button tone and display brightness settings take effect immediately. All other changes take effect after the settings have been saved.

Changing the time

You can change the time in the basic settings. For example: Changing from summer to winter time.

- 1. Press the On/Off button.
- 2. Press the Menu button.
- 3. Use the rotary selector to select "Settings".
- 4. Touch the arrow > to move to "Time of day".
- 5. Use the rotary selector to change the time.
- 6. Press the Menu button. Save or Discard appears in the display.

Power cut

Following a long power cut, the settings for initial use are shown in the display.

Reset the language, time and date.

👖 Sabbath mode

With the Sabbath mode, a cooking time of up to 74 hours can be set. You can keep the food in the cooking compartment warm without having to switch the oven on or off.

Starting Sabbath mode

Prerequisite: "Sabbath mode activated" is activated in the basic settings. \rightarrow "Basic settings" on page 15

The cooking compartment heats with top/bottom heating and a temperature between 85 °C and 140 °C.

- 1. Press the on/off button.
 - A type of heating and a temperature are suggested in the display.
- 2. Turn the rotary selector anti-clockwise and select the "Sabbath mode" type of heating.
- Tap the > arrow and set the temperature using the rotary selector.
- Press the button to open the time-setting options menu.
 - 25:00 hours are suggested.
- 5. Use the rotary selector to set the required cooking time.
- Press the start/stop button to start. You can see the cooking time counting down in the status bar.

The cooking time has elapsed

A signal sounds. The oven stops heating.

Setting a later end time

It is not possible to set a later end time.

Cancelling Sabbath mode

Press the On/Off button. All settings are deleted. You can apply new settings.

Cleaning function

You can use the "Self-cleaning" operating mode to clean the cooking compartment effortlessly. The cooking compartment is heated up to a very high temperature. Residues from roasting, grilling and baking will burn.

You can choose from three cleaning settings.

| Setting | Cleaning level | Duration |
|---------|----------------|----------------------------|
| 1 | Light | Approx. 1 hour, 15 minutes |
| 2 | Medium | Approx. 1 hour, 30 minutes |
| 3 | Intensive | Approx. 2 hours |

The dirtier the cooking compartment and the longer the dirt has been there, the higher the cleaning setting should be. It is sufficient to clean the cooking compartment every two to three months. If required, you can clean the oven more frequently. Cleaning requires approximately 2.5-4.7 kilowatt hours.

Note: For your safety, the cooking compartment door locks automatically. It cannot be opened again until the cooking compartment has cooled down and the symbol for the locking mechanism goes out in the status bar. The interior lighting remains off during cleaning.

MWarning

Risk of burns!

- The cooking compartment becomes extremely hot during the cleaning function. Never open the appliance door or move the locking latch by hand. Allow the appliance to cool down. Keep children away from the appliance.
- The appliance will become very hot on the outside during the cleaning function. Never touch the appliance door. Allow the appliance to cool down. Keep children away from the appliance.

Prior to initiating the cleaning function

While cleaning is in progress, you can clean an accessory at the same time, e.g. the universal pan or the baking tray. Before cleaning is started, remove the worst dirt. Slide the accessory in at level 2.

Clean the inside of the appliance door and along the surface edges of the cooking compartment in the area around the seal. Do not scrub the seal.

Note: When using the cleaning function, you can clean the enamel accessory provided at the same time. You cannot clean any of the wire racks when using the cleaning function. The wire racks are not suitable for cleaning using the cleaning function; this will discolour them. Further accessories suitable for cleaning using the cleaning function are listed in the table for special accessories. \rightarrow "Accessories" on page 9

Warning Risk of fire!

- Loose food residues, grease and meat juices may catch fire during the cleaning function. Before starting the cleaning function, remove coarse dirt from the cooking compartment and from the accessories.
- The appliance will become very hot on the outside during the cleaning function. Never hang combustible objects, e.g. tea towels, on the door handle. Do not place anything against the front of the appliance. Keep children away from the appliance.

\Lambda Warning

Risk of serious damage to health!

The appliance will become very hot during the cleaning function. The non-stick coating on baking trays and tins is destroyed and noxious gases are released. Never clean non-stick baking trays and baking tins using the cleaning function. Only clean enamelled accessories using the cleaning function.

Setting the self-cleaning function

- 1. Press the menu button. The operating modes menu opens.
- 2. Use the rotary selector to select "Self cleaning".
- Touch the arrow >. Cleaning setting 3 is suggested. You can start the cleaning process immediately using the "Start/stop" button or
- 4. select a different cleaning setting using the rotary selector.
- Press the "Start/stop" button. Instructions for the cleaning operation appear on the display.
- 6. Press the "Start/stop" button to start the cleaning operation.

The cooking compartment door locks shortly after operation starts. The 🗗 symbol for the locking mechanism appears on the right-hand side of the status bar next to the elapsing duration.

The cooking compartment door cannot be opened until the 🔂 symbol goes out in the status bar.

Once the cleaning has finished

An audible signal sounds. The oven stops heating. Use the button to switch off the audible signal. "Appliance cooling down" appears on the display.

Cancelling the cleaning operation

Use the "On/off" button to switch off the oven. The cooking compartment door cannot be opened until the symbol goes out in the status bar.

Adjusting the cleaning setting

Once cleaning starts, the cleaning setting can no longer be changed.

You can set the cleaning to run overnight

In the section "Time settings", you can find out how to delay the end time. This allows you to use the oven at any time throughout the day. \rightarrow "Time-setting options" on page 13

Once the cleaning function has ended

Once the cooking compartment has cooled down, wipe off the ash that has been left behind in the cooking compartment, on the accessories and around the appliance door with a damp cloth.

After cleaning, the rails may retain some discolouration. This does not affect their function.

Cleaning agent

With good care and cleaning, your appliance will retain its appearance and remain fully functioning for a long time to come. We will explain here how you should correctly care for and clean your appliance.

Suitable cleaning agents

To ensure that the different surfaces are not damaged by using the wrong cleaning agent, observe the information in the table. Depending on the appliance model, not all of the areas listed may be on/in your appliance.

Caution!

Risk of surface damage

Do not use:

- Harsh or abrasive cleaning agents,
- Cleaning agents with a high alcohol content,
- Hard scouring pads or cleaning sponges,
- High-pressure cleaners or steam cleaners,
- Special cleaners for cleaning the appliance while it is hot.

Wash new sponge cloths thoroughly before use.

Tip: Highly recommended cleaning and care products can be purchased through the after-sales service. Observe the respective manufacturer's instructions.

Warning Risk of burns!

The appliance becomes very hot. Never touch the interior surfaces of the cooking compartment or the heating elements. Always allow the appliance to cool down. Keep children at a safe distance.

Notes

- Slight differences in colour on the front of the appliance are caused by the use of different materials, such as glass, plastic and metal.
- Shadows on the door panels, which look like streaks, are caused by reflections made by the interior lighting.
- Enamel is baked on at very high temperatures. This can cause some slight colour variation. This is normal and does not affect operation.
 The edges of thin trays cannot be completely enamelled. As a result, these edges can be rough. This does not impair the anti-corrosion protection.

Keeping the appliance clean

Always keep the appliance clean and remove dirt immediately so that stubborn deposits of dirt do not build up.

Tips

- Clean the cooking compartment after each use. This will ensure that dirt cannot be baked on.
- Always remove flecks of limescale, grease, starch and albumin (e.g. egg white) immediately.
- Use the universal pan for baking very moist cakes.
- Use suitable ovenware for roasting, e.g. a roasting dish.

Rails

With good care and cleaning, your appliance will retain its appearance and remain fully functional for a long time to come. This will tell you how to remove the shelves and clean them.

Detaching and refitting the rails

If your appliance has a self-cleaning function, the rails can also be cleaned.

Warning

Risk of burns!

The rails become very hot. Never touch the hot rails. Always allow the appliance to cool down. Keep children away from the appliance.

Detaching the rails

- Lift the rail slightly at the front **a** and detach it **b** (figure ■).
- Then pull the whole rail towards you and take it out (figure 2).

Clean the rails with cleaning agent and a sponge. For stubborn deposits of dirt, use a brush.

Attaching the rails

The rails only fit on the right or the left side. The pull-out rails must pull out towards you.

- First, insert the rail in the middle of the rear socket a, until the rail rests against the cooking compartment wall, and push it back b (figure ■).
- Then insert the rail into the front socket C, until the rail also rests against the cooking compartment wall here, and press it downwards d (figure 2).

Appliance door

With good care and cleaning, your appliance will retain its appearance and remain fully functional for a long time to come. This will tell you how to remove the appliance door and clean it.

Removing and fitting the appliance door

For cleaning purposes and to remove the door panels, you can detach the appliance door.

The appliance door hinges each have a locking lever. When the locking levers are closed (figure 1), the appliance door is secured in place. It cannot be detached.

When the locking levers are open in order to detach the appliance door (figure 2), the hinges are locked. They cannot snap shut.

Marning Risk of injury!

- If the hinges are not locked, they can snap shut with great force. Ensure that the locking levers are always fully closed or, when detaching the appliance door, fully open.
- The hinges on the appliance door move when opening and closing the door, and you may be trapped. Keep your hands away from the hinges.

Removing the appliance door

- **1.** Open the appliance door fully.
- Fold open the two locking levers on the left and right (figure 1).
- Close the appliance door as far as the limit stop a. With both hands, grip the door on the left- and righthand side b, and pull it out upwards (figure 2).

Fitting the appliance door

Reattach the appliance door in the opposite sequence to removal.

 When attaching the appliance door, ensure that both hinges are inserted straight into the opening (figure
).

Place both hinges at the bottom on the outer panel and use this as a guide.

Ensure that the hinges are inserted into the correct opening. You must be able to insert them easily and without resistance. If you can feel any resistance, check that the hinges are inserted into the correct opening.

 Open the appliance door fully. Fold both locking levers closed again (figure 2).

3. Close the cooking compartment door.

Removing the door cover

The stainless steel inlay in the door cover may become discoloured. To carry out thorough cleaning, you can remove the cover.

- 1. Open the appliance door slightly.
- Press on the right and left side of the cover (figure
 1).
- Remove the cover (figure 2). Close the appliance door carefully.

Note: Clean the stainless steel inlay in the cover with stainless steel cleaner. Clean the rest of the door cover with soapy water and a soft cloth.

 Open the appliance door again slightly. Put the cover back in place and press on it until it clicks audibly into place (figure 3).

5. Close the appliance door.

Removing and installing the door panels

To facilitate cleaning, you can remove the glass panels from the appliance door.

Removing the door from the appliance

- 1. Open the appliance door slightly.
- Press on the right and left side of the cover (figure
 1).
- 3. Rémove the cover (figure 2).

- 4. Loosen and remove the screws on the left and right of the appliance door (figure 3).
- Before closing the door again, trap a tea towel which has been folded several times in the door (figure 4). Pull out the front panel upwards and lay it on a flat surface with the door handle facing downwards.

6. Push both retainers on the intermediate panel upwards, but do not remove it (figure 5). Hold the panel with one hand. Remove the panel.

Clean the panels with glass cleaner and a soft cloth.

Warning Risk of injury!

- Scratched glass in the appliance door may develop into a crack. Do not use a glass scraper, sharp or abrasive cleaning aids or detergents.
- The hinges on the appliance door move when opening and closing the door, and you may be trapped. Keep your hands away from the hinges.

Fitting the door on the appliance

When fitting the intermediate panel, make sure that the arrow is in the top right of the panel and that it aligns with the arrow on the metal panel.

- 1. Insert the intermediate panel at the bottom into the retainer and push it in firmly at the top (figure ■).
- 2. Push both retainers downwards (figure 2).

- **3.** Insert the front panel at the bottom into the retainers (figure **3**).
- 4. Close the front panel until both upper hooks are opposite the opening (figure 4).

- Press the front panel at the bottom until it clicks audibly into place (figure 5).
- 6. Open the appliance door again slightly and remove the tea towel.
- 7. Screw both screws back in on the left and right.
- Put the cover back in place and press on it until it clicks audibly into place (figure 6).

9. Close the appliance door.

Caution!

Do not use the cooking compartment again until the panels have been correctly fitted.

Trouble shooting

If a fault occurs, there is often a simple explanation. Before calling the after-sales service, please refer to the fault table and attempt to correct the fault yourself.

Note: If a dish does not turn out as well as you had hoped, refer to the table section at the end of the instruction manual, where you will find plenty of tips and information.

Warning Risk of electric shock!

Incorrect repairs are dangerous. Repairs may only be carried out and damaged power cables replaced by one of our trained after-sales technicians. If the appliance is defective, unplug the appliance from the mains or switch off the circuit breaker in the fuse box. Contact the after-sales service.

Fault table

If an error message beginning with 'E' is shown, e.g. E0111, switch the appliance off and then on again. If

this message appears again, contact the after-sales service.

| Fault | Possible cause | Information/remedial action |
|--|--|---|
| The appliance does not work | The fuse is faulty | Check in the fuse box to make sure that the fuse for the appliance is in working order |
| | Power cut | Check whether other kitchen appliances are working |
| The appliance door will not open; the symbol is shown in the display | The appliance door is locked until the cooking com- partment has cooled down. | Wait until the 🔂 symbol goes out |

| The cooking compartment does not heat and "Demo mode on" is shown in the display | The appliance is in demo mode | Switch off the fuse in the fuse box and switch it back on again after approx. 10 seconds. Switch on the appliance and select "Demo mode off" in the settings \rightarrow "Basic settings" on page 15 |

Maximum operating time exceeded

Your appliance automatically ends the operation if no duration has been set and the setting has not been changed for a long time.

The point at which this occurs depends on the temperature or grill setting that has been set.

A message appears on the display on the appliance to say that the operation is being ended automatically. The operation is then cancelled.

To use the appliance again, first switch it off. To switch the appliance back on again set the required operation.

Replacing the bulb in the top of the cooking compartment

If the cooking compartment light bulb fails, it must be replaced. Heat-resistant, 35 watt, 230 V halogen bulbs are available from the after-sales service or specialist retailers.

When handling the halogen bulb, use a dry cloth. This will increase the service life of the bulb. Only use these bulbs.

Warning

Risk of electric shock!

When replacing the cooking compartment bulb, the bulb socket contacts are live. Before replacing the bulb,

unplug the appliance from the mains or switch off the circuit breaker in the fuse box.

Marning

Risk of burns!

The appliance becomes very hot. Never touch the interior surfaces of the cooking compartment or the heating elements. Always allow the appliance to cool down. Keep children at a safe distance.

- 1. Place a tea towel in the cold cooking compartment to prevent damage.
- 2. Turn the glass cover anti-clockwise to remove it (figure ■).
- Pull out the bulb do not turn it (figure 2). Insert the new bulb, making sure that the pins are in the correct position. Push the bulb in firmly.

4. Screw the glass cover back in.

5. Remove the tea towel and switch on the circuit breaker.

Glass cover

If the glass cover of the halogen bulb is damaged, it must be replaced. You can obtain a new glass cover from the after-sales service. Please specify the E number and FD number of your appliance.

P Dishes

You can use the "Dishes" operating mode to prepare a wide variety of food. The appliance selects most settings for you.

Information about the programs

- The cooking result depends on the quality of the food and the type of cookware. For an optimal cooking result, use food that is in good condition and chilled meat only.
- The appliance chooses the optimal heating mode and the time and temperature setting for you. You will only be asked to enter the weight. It is not possible to set weights outside of the intended weight range.
- When roasting dishes for which the appliance will apply the temperature selection for you, temperatures of up to 300 °C can be saved. Therefore, make sure that you use cookware that is sufficiently heat resistant.
- Information is provided, e.g. on cookware, shelf position or the addition of liquid when cooking meat. Some food requires turning or stirring, etc., during cooking. This is shown on the display shortly after operation starts. An audible signal will remind you at the right time.
- Information on the right kind of cookware to use and tips and tricks for the preparation can be found at the end of the instruction manual.

Selecting and setting food

- 1. Press the menu button.
- 2. Use the rotary selector to select "Dishes".
- **3.** Touch the arrow >.
- The first dish appears, along with a default value for the weight.
- 4. Use the rotary selector to select the required food.
- 5. Touch the arrow >.

You will be guided through the entire setting process for your chosen food. Always touch the arrow >.

Once you have implemented all the settings, start by pressing the "Start/stop" button.

Notes

- The appliance informs you if the cooking compartment is still too hot for your chosen food.
- If you press the "Start/stop" button during operation, the set mode pauses. None of the settings can be changed. Press the "Start/stop" button to resume operation.

The program has ended

An audible signal sounds. The oven stops heating. You can cancel the audible signal early using the \bigcirc button.

If you are not satisfied with the cooking result, you can increase the cooking time again. Touch the "Extend cooking time" field. A cooking time is suggested. You can change this if you wish.

If you are satisfied with the cooking result, touch "Finish". "Enjoy your meal" appears on the display.

Cancelling the program

Press the "On/off" button. All settings are deleted. You can implement new settings.

Setting a later end time

For some dishes, it is possible to set a later end time. Refer to the time-setting options. \rightarrow "*Time-setting options*" on page 13

Once you have set an end time, the display shows the waiting time. The status bar shows the time at which operation is to start. None of the settings can be changed. Please remember that easily spoiled foods must not be allowed to remain in the cooking compartment for too long.
