**Your new dryer**

**Intended use**

- **Preparing for use** on page 5
- To ensure all safety instructions are read and understood before any use.

**Safety instructions**

- This appliance is intended for use up to a maximum height of 4000 metres above sea level.
- The appliance requires a voltage supply of 230 V, 50 Hz.
- Never operate the dryer if it is damaged.
- For further information about our products, accessories, spare parts and the directive 2012/19/EU concerning used electrical and electronic appliances (waste electrical and electronic equipment - WEEE), see page 8.

**Drying**

- **Programme selector**
- To select the programme, turn the programme selector to Zeitprogramm (c timer programme) (start) button. At the end of the programme, turn the programme selector to Off.

**Cleaning the fluff filter**

- **Cleaning the fluff filter**
- **Flashes**
- **Reduced temperature for delicate fabrics**
- **Reduces creasing and prolongs the anti-creasing phase after the programme**
- Never operate the dryer if the fluff filter is blocked. Remove the fluff filter from the drum, remove any fluff and clean the fluff filter after each drying cycle.

**Notes on laundry ...**

- **Do not iron laundry immediately after drying, fold items up and leave for a while**
- **Do not put any laundry in the machine. Turn the programme selector to Zeitprogramm (c timer programme) (start) button.**
- **Bedding**

Make sure the room is sufficiently ventilated.

The dryer must not be used by children or persons who have not been

Emergency

– Do not turn off the dryer until the drying process ends, unless the laundry

– Connect to an AC earthed socket. If in doubt have the socket checked by a specialist.

– Fasten down loose leads

– Open the door with care. Hot steam may escape.

– Keep pets away from the dryer.

– Never pull the mains plug out of the socket by its cable.

– Only use genuine spare parts and accessories for safety reasons.

– Only use earth-leakage circuit breakers with the following symbol:

– Pay particular attention to cigarette lighters

– Connect the dryer to an AC earthed socket according to specifications, as

– Only use in a dry and stable environment.

– Do not use the dryer if the laundry has been in contact with solvents, oil,

– Do not remove the internal heating element.

– The dryer has an automatic over-temperature protection.

– Only use the dryer for its intended purpose.

– The dryer must be installed in a dry location.

– Never block the air inlets or outlets.

– Only use genuine spare parts and accessories for safety reasons.

– Only use genuine spare parts and accessories for safety reasons.

– Only 100% water-repellent and waterproof materials are suitable for drying.

– The appliance is not intended to dry heavily soiled garments.

– The programme selector is fixed at the “Programme selected?”

Your new dryer

Congratulations - You have chosen to buy a modern, high-quality Siemens domestic appliance. A distinctive feature of your dryer is its low energy consumption.

Every dryer which leaves our factory is carefully checked to ensure that it functions correctly and is in perfect condition. Should you have any questions, our after-sales service will be pleased to help.

Environmentally-responsible disposal

This appliance is labelled in accordance with European Directive 2012/19/EU concerning used electrical and electronic appliances (waste electrical and electronic equipment - WEEE). The guideline determines the framework for the return and recycling of used appliances as applicable throughout the EU.

For further information about our products, accessories, spare parts and services, please visit: www.siemens-home.com

Intended use

- exclusively for domestic use,
- only for drying fabrics which have been washed using water.

Keep children younger than 3 years old away from the dryer.
Do not let children make the cleaning and maintenance work on the dryer without supervision. Do not leave children unsupervised near the dryer. Keep pets away from the dryer.

The dryer may be operated by children from 8 years of age, by persons who have limited physical, sensory or mental abilities and by persons who have inadequate experience or knowledge, provided they are supervised or have been instructed by a responsible person.

This appliance is intended for use up to a maximum height of 4000 metres above sea level.

Preparing for installation, see page 8

Never operate the dryer if it is damaged. Inform your after-sales service.

Only if your hands are dry. Only hold the plug by the plug casing.

Sorting and loading laundry

Remove all objects from pockets. Pay particular attention to cigarette lighters. The drum must be empty before filling.

Selecting and adjusting the programme

Select the drying programme...

... and adapt to individual requirements

For a detailed programme overview, see page 7.

Press the start button of the dryer.

Only operate the dryer with the fluff filter inserted.

Less Ironing
Reduces creasing and prolongs the anti-creasing phase after the programme has finished.

Low Heat
Reduced temperature for delicate fabrics, e.g. polyacrylic, polyamide, elastane, or acetate; for longer drying times.

Clean
Flashes → clean the fluff filter, check the exhaust air duct, and the fluff filter.

Cleaning the fluff filter
Clean the fluff filter after each drying cycle.
1. Open the door and pull out the fluff filter.
2. Remove the fluff (brush your hand over the fluff filter). If the fluff filter is very dirty or blocked, wash it out with warm water and dry thoroughly.
3. Insert the fluff filter so that you hear it engage.
4. Remove fluff from door/door area.

Switching off the dryer
Turn the programme selector to Off.
Do not leave laundry in the dryer.

Removing the laundry
Your dryer has an automatic anti-crease function. The drum is moved at set intervals for 30 minutes after the programme has ended. Laundry remains loose and fluffy (for 90 minutes, if additional Less Ironing function is selected - depending on model).

End of programme as soon as the AntiCrease End indicator light flashes

Interrupting the programme Loading or removing laundry

The drum and door may be hot.

The drying programme can be interrupted briefly for loading or removing laundry. The selected programme must then continue to run to the end.

1. Open the door; the drying process is interrupted.
2. Load or remove laundry and close the door.
3. If required, select a new programme and additional functions.
4. Press the Start/Stop button.

Cleaning the fluff filter
Clean the fluff filter after each drying cycle.

The drying programme can be interrupted briefly for loading or removing laundry. The selected programme must then continue to run to the end.

1. Open the door; the drying process is interrupted.
2. Load or remove laundry and close the door.
3. If required, select a new programme and additional functions.
4. Press the Start/Stop button.
Care and cleaning

**Dryer housing, control panel**
- Wipe off with a soft, damp cloth.
- Do not use abrasive cleaners or solvents.
- Remove detergent and cleaning agent residue immediately.

**Exhaust air duct**
Check the exhaust air duct. Clean the exhaust air duct every six months.
- Do not bend the exhaust air duct.
1. Switch off the dryer and allow it to cool down.
2. Disconnect the mains plug.
3. Remove the exhaust air duct.
4. Clean the exhaust air duct.
5. Refit the exhaust air duct → Installation instructions for exhaust air duct.

**Moisture sensors**
The dryer is equipped with stainless steel moisture sensors.
After sustained, repeated operation, a fine layer of limescale may form on the moisture sensors.
1. Open the door.
2. Clean the moisture sensors using a slightly damp sponge with a rough surface.

Do not use steel wool or abrasive materials.

Notes on laundry ...

**Labelling of fabrics**
Follow the manufacturer's care instructions.
- Drying at a normal temperature.
- Drying at a lower temperature → in addition, select Low Heat.
- Do not machine dry.

Be sure to follow the safety instructions → page 11!
For example, do not use the dryer for the following fabrics:
- Airtight fabrics (e.g. rubber-coated fabrics).
- Delicate materials (silk, curtains made from synthetic material) → they may crease.
- Laundry contaminated with oil.

**Before drying for the first time**
- Do not put any laundry in the machine. Turn the programme selector to Zeitprogramm (timer programme) (→ page 7) and select Start/Stop. At the end of the programme, turn the programme selector to Off.

**Drying tips**
- To ensure a consistent result, sort the laundry by fabric type and drying programme.
- Always dry very small fabrics (e.g. baby socks) together with large items of laundry (e.g. hand towels).
- Fasten zips, hooks and eyelets, button covers and tie together cloth belts, bands, etc.
- Do not overdry easy-care laundry → risk of creasing
  - Allow laundry to finish drying in the air.
- Do not iron laundry immediately after drying, fold items up and leave for a while → the remaining moisture will then be distributed evenly.
- Knitted fabrics (e.g. T-shirts, jerseys) often shrink slightly the first time they are tumble-dried.
  → Do not use the Cupbord Dry Plus programme.
- Starched laundry is not always suitable for dryers → starch leaves behind a coating that adversely affects the drying operation.
- When washing the laundry that is to be tumble-dried, measure the fabric softener in accordance with the manufacturer's instructions.
- Using a timer programme with a small laundry load → optimisation of the drying result.

**Environmental protection / Energy-saving tips**
- Before drying, spin the laundry thoroughly in the washing machine → the higher the spin speed, the shorter the drying time will be (consumes less energy), also spin easy-care laundry.
- Use the maximum recommended fill level but do not overload with laundry → overview of programmes, page 7.
- Make sure the room is well ventilated during drying.
- Clean the fluff filter after every drying cycle → page 4.
Programme overview

Sort the laundry according to type of textile and fabric. Fabrics must be suitable for tumble drying.

After drying, laundry is to be...

-     ironed
-     lightly ironed
-     not ironed
-     mangled

Programme setting for testing and energy labelling in accordance with Directive 2010/30/EU.

**Optional accessories** (from after-sales service using order number, depending on model)

- **WZ 20500**
  - Platform
  - For easier loading and unloading. The basket contained in the drawer can be used to carry the laundry.

- **WZ 20180**
  - Exhaust air duct set
  - The exhaust air is extracted via a hose.

- **WZ 20311**
  - Washer-dryer stack connection set
  - The dryer can be placed on top of a suitable washing machine with the same width and depth to save space. The dryer must be fastened to the washing machine using this connection set. If the worktop of the washing machine is less than 544 mm deep, please consult the after-sales service or your specialist retailer.

---

**What to do if ...**

If you cannot rectify a fault yourself (e.g. switching off/on), please contact our after-sales service. We will always find an appropriate solution and will avoid unnecessary visits by engineers. Trust the expertise of the manufacturer and rest assured that the repair will be carried out by trained service technicians using original spare parts. The contact details of your local after-sales service can be found in the enclosed after-sales service directory, or by calling one of these numbers:

- **GB** 0344 892 8999 (Calls charged at local or mobile rate.)
- **IE** 01 450 26 55 (0.03 € per minute at peak. Off peak 0.0088 € per minute.)

When contacting the after-sales service, please quote the appliance’s product number (E no.) and production number (FD) (see the inside of the door).

- **Start/Stop indicator light does not light up.**
  - Mains plug plugged in? Programmes selected? Check the socket fuse.

- **The display panel light and indicator lights (depending on model) go out and the Start/Stop indicator light flashes.**
  - Energy-saving mode is activated ➔ see the separate Energy-saving mode instructions.

- **Dryer does not start.**
  - Start/Stop button pressed? Door closed? Programme set?

- **Programme terminated shortly after starting.**
  - Ambient temperature greater than 5°C?

- **Water is leaking out.**
  - Make sure the dryer is level.

- **The door opens by itself.**
  - Push the door closed until you hear it engage.

- **The required degree of dryness was not achieved or the drying time was too long.**
  - Clean the fluff filter ➔ page 4.
  - Exhaust air duct blocked or bent? Clean the exhaust air duct ➔ page 6.

- **Start/Stop indicator light flashes.**
  - Programme selected?
  - Programme terminated shortly after starting.

- **Ambient temperature higher than 35°C?**
  - Fine layer of limescale on the moisture sensors. Clean the sensors ➔ page 6.
  - Fine layer of limescale on the moisture sensors. Clean the sensors ➔ page 6.

- **The humidity in the room has increased significantly.**
  - Make sure the room is sufficiently ventilated.

  - Check the installation conditions ➔ page 8.
  - Exhaust air duct blocked or bent? Clean the exhaust air duct ➔ page 6.

- **Condensation in the exhaust air duct.**
  - Exhaust air duct too long? Check the maximum exhaust air duct length. Further information ➔ Installation instructions for exhaust air duct.
Safety instructions

Emergency

- Pull the mains plug out of the socket immediately or disconnect the fuse.
- in rooms inside the house.
- for drying fabrics.

The dryer
ONLY use the dryer...

must
NEVER...

Dangers

- The dryer must not be used by children or persons who have not been instructed in its use.
- Do not leave children unsupervised near the dryer.
- Keep pets away from the dryer.
- Remove all objects from the pockets of garments.
- Pay particular attention to cigarette lighters → risk of explosion
- Do not lean or sit on the door → risk of tipping.
- Open the door with care. Hot steam may escape.

Installation

- Fasten down loose leads → risk of tripping
- Do not operate the dryer where there is a risk of frost.
- The safety information in the separate installation instructions for the exhaust air duct must be observed without fail.

Mains connection

- Connect the dryer to an AC earthed socket according to specifications, as otherwise it cannot be guaranteed that the appliance is completely safe.
- The cable cross-section must be sufficient.
- Only use earth-leakage circuit breakers with the following symbol: 
- The mains plug and socket must be compatible.
- Do not use multiple plugs/couplings and/or extension cables.
- Do not touch or hold the mains plug with wet hands → risk of electric shock.
- Never pull the mains plug out of the socket by its cable.
- Do not damage the mains lead → risk of electric shock.

Operation

- Only load the drum with items of laundry.
- Check what has been loaded before switching the dryer on.
- Do not use the dryer if the laundry has been in contact with solvents, oil, wax, grease or paint (e.g. hair setting spray, nail polish remover, stain remover, cleaning solvent, etc.) → fire/explosion hazard.
- The tumble dryer is not to be used if industrial chemicals have been used for cleaning.
- Dust danger (e.g. coal dust or flour): do not use the dryer → risk of explosion.
- Do not turn off the dryer until the drying process ends, unless the laundry will be removed quickly and spread out, so that the heat can dissipate.
- Do not put laundry containing foamed material/rubber in the dryer → elastic material may be destroyed and the dryer may be damaged due to possible deformation of the foamed material.
- Final part of a tumble dryer cycle occurs without heat (cool down cycle), to ensure that the items are left at a temperature that ensures that the items will not be damaged.
- Switch off the dryer once the programme has ended.

Defect

- Do not use the dryer if it is defective or if you suspect that it is.
- Repairs must only be carried out by the after-sales service.
- Do not use the dryer with a faulty mains cable. In order to avoid risk, have the mains lead replaced only by our after-sales service.

Spare parts

Disposal

- Only use genuine spare parts and accessories for safety reasons.
- Dryer: Disconnect the mains plug, then cut the mains cable off the appliance. Dispose of the appliance at a public disposal site.
- Packaging: Do not allow children access to items of packaging → risk of suffocation
- All materials are environmentally friendly and reusable. Dispose of in an environmentally responsible manner.

en  Installation and operating instructions

Observe the safety instructions on page 11.

Read these instructions, the Installation Instructions and the separate Energy-saving mode instructions before operating the dryer.
