# Your new dryer

**Congratulations** - You have chosen a modern, high-quality Siemens domestic appliance.

The condensation dryer is distinguished by its economical energy consumption.

Every dryer which leaves our factory is carefully checked to ensure that it functions correctly and is in perfect condition.

Should you have any questions, our after-sales service will be pleased to help.

### Disposal in an environmentally-responsible manner

This appliance is labelled in accordance with European Directive 2012/19/EU concerning used electrical and electronic appliances (waste electrical and electronic equipment - WEEE). The guideline determines the framework for the return and recycling of used appliances as applicable throughout the EU.

For further information about our products, accessories, spare parts and services, please visit: www.siemens-home.com

### ntended use

#### for domestic use only.

only to be used for drying fabrics that have been washed with water.

Keep children younger than 3 years old away from the dryer.

Do not let children make the cleaning and maintenance work on the dryer without supervision. Do not leave children unsupervised near the dryer. Keep pets away from the dryer.

The dryer can be operated by children 8 years old and older, by persons with reduced physical, sensory or mental abilities and by persons with insufficient experience or knowledge if they are supervised or have been instructed in its use by a responsible adult.

This appliance is intended for use up to a maximum height of 4000 metres above sea level.

# **Preparing for** installation, see Page 8

Never start the drver if it is damaged! Inform your after-sales service.

Inspecting the

Make sure your hands are dry. Hold the plug only.

### Sorting and loading laundry

Remove all items from pockets. Check for cigarette lighters. The drum must be empty prior to loading.

See programme overview on page 7. See also separate instructions for "Woollens basket" (depending on model)

### Selecting and adjusting the programme

Select the drying programme .

# Information on laundry ...

### Labelling of fabrics

Drying at normal temperature. Do not machine drv.

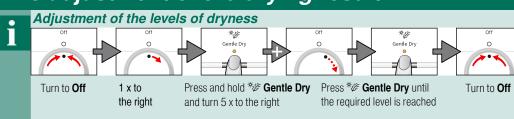

- Impermeable fabrics (e.g. rubber-coated fabrics).
- Delicate materials (silk or curtains made from synthetic material)  $\rightarrow$  they may crease Laundry contaminated with oil.

- To ensure a consistent result, sort the laundry by fabric type and drying programme. Always dry very small items (e.g. baby socks) together with large items of laundry
- (e.g. hand towel). - Close zips, hooks and evelets, and button up covers.
- Tie fabric belts, apron strings, etc. together
- Allow laundry to finish drying in the air.
- Programme (depending on model)
- of the drying result  $\rightarrow$  Page 5/6.

### Environmental protection / Energy-saving tips

- Before drying, spin the laundry thoroughly in the washing machine  $\rightarrow$  the higher the spin speed the shorter the drying time will be (consumes less energy), also spin easy-care laundry
- Put in, but do not exceed, the maximum recommended quantity of laundry  $\rightarrow$ programme overview  $\rightarrow$  Page 7.
- Make sure the room is well ventilated during drying.
- Keep the air cooler clean  $\rightarrow$  Page 6 "Care and cleaning"

# Fine adjustment of the drying result

- Follow the manufacturer's care information.
- $\Box$  Drying at low temperature  $\rightarrow$  also select \* Gentle Dry.
- Observe safety instructions without fail  $\rightarrow$  Page 11!
- Do not tumble-dry the following fabrics for example:

- Do not over-dry easy-care laundry  $\rightarrow$  risk of creasing!
- Do not dry woolens in the dryer, only use to freshen them up  $\rightarrow$  Page 7. Woollens Finish
- Do not iron laundry immediately after drying, fold items up and leave for a while  $\rightarrow$  the remaining moisture will then be distributed evenly.
- The drying result depends on the type of water used during washing.  $\rightarrow$  Fine adjustment
- Machine-knitted fabrics (e.g. T-shirts or jerseys) often shrink the first time they are dried  $\rightarrow$  do not use the **Cupboard Dry Plus** programme.
- Starched laundry is not always suitable for dryers  $\rightarrow$  starch leaves behind a coating that adversely affects the drying operation.
- Use the correct dosage of fabric softener as per the manufacturer's instructions when washing the laundry to be dried.
- Use the timer programme for small loads  $\rightarrow$  this improves the drying result.

- Do not obstruct or seal up the air inlet.

# Fine adjustment of the drying result

- Drying, Iron Dry, Cupboard Dry, AntiCrease/End are displayed in sequence.
- Short signal when changing from level 3 to 0, otherwise ona sianal.

0000	0000	0000	000
0 0	0 0 1	0 0 2	0 0 3

# Care and cleaning

### Dryer housing, control panel, air cooler, moisture sensors

- Wipe with a soft, damp cloth.
- Do not use harsh cleaning agents and solvents.
- Remove detergent and cleaning agent residue immediately.
- During drying, water may collect between the door and seal. This does not affect your dryer's functions in any way.

Clean the protective filter 5 - 6 times a year or if i (Clean filter) flashes after cleaning the fluff filter.

Only when switched off!

### Air cooler / Protective filter

- When cleaning, only remove the protective filter. Clean the air cooler behind the protective filter once a year.
- Allow the drver to cool.
- Residual water may leak out, so place an absorbent towel underneath the maintenance door.
- 1. Unlock the maintenance door.
- **2.** Open the maintenance door fully.
- **3.** Turn both locking levers towards each another.
- 4. Pull out the protective filter/air cooler.

Do not damage the protective filter or air cooler. Clean with warm water only. Do not use any hard or sharp-edged objects.

- 5. Clean the protective filter/air cooler thoroughly Allow to drip dry.
- 6. Clean the seals.
- 7. Re-insert the protective filter/air cooler. with the handle facing down.
- 9. Close the maintenance door until the lock clicks into place.

### Moisture sensors

- The dryer is fitted with stainless steel moisture sensors. The sensors measure the level of moisture in the laundry. After a long period of operation, a fine layer of limescale may form on the sensors.
- **1.** Open the door and clean the moisture sensors with a damp sponge which has a rough surface.

600 rpm	60 min	51 min			1.65 kWh

\* Programme setting for testing in accordance with the applicable IEC61121 standard.

The values may differ from those specified, depending on the type of fabric, composition of laundry to be dried, residual moisture in the fabric, the degree of dryness that has been set, the amount of laundry being loaded and the environmental conditions.

## **Optional accessories** (from after-sales service using order number)

For easier loading and unloading. The basket contained in the drawer can be used to carry the laundry.

#### Washer-dryer stack connection set

The dryer can be placed on top of a suitable washing machine with the same width and depth to save space. The dryer must be fastened to the washing machine using this connection set. With pull-out worktop: WZ 20300

#### Connection fittings for condensation outlet

The condensation is conveyed directly via a hose.

#### Installation underneath the worktop

Instead of the appliance covering plate, you **must** have a metal cover fitted by a specialist.

# Safety instructions

**cy** – Pull the appliance plug out of the socket immediately or disconnect the fuse. – in rooms inside the house.

- ... to dry fabrics.
- be used for other purposes than those described above. **ER...** – be modified in terms of its technology or attributes.
- The dryer must not be used by children or persons who have not been instructed in its use.
- Do not leave children unsupervised near the drver.
- Keep pets away from the dryer.
- Remove all objects from pockets. Make especially sure that cigarette lighters are removed as they constitute an  $\rightarrow$  explosion hazard.
- Do not lean or sit on the door  $\rightarrow$  risk of tipping.
- Secure loose cables  $\rightarrow$  tripping hazard.
- Do not operate the dryer if there is a risk of frost.
- Connect the dryer according to specifications to an AC earthed socket, as otherwise it cannot be guaranteed that the appliance is completely safe. - The cable cross-section must be sufficient.
- Only use earth-leakage circuit breakers with the following symbol: - The appliance plug and socket must be compatible.
- Do not use multiple plugs/couplings and/or extension cables.
   Do not hold the appliance plug with wet hands → risk of electric shock.
   Never pull the appliance plug out of the socket by its cable. - Do not damage the mains lead  $\rightarrow$  risk of electric shock.
- Only load the drum with laundry. Check the contents before you switch the dryer
- Do not use the dryer if the laundry has been in contact with solvents, oil, wax, grease or paint (e.g. hair setting spray, nail polish remover, stain remover, cleaning solvent, etc.)  $\rightarrow$  fire/explosion hazard.
- The tumble dryer is not to be used if industrial chemicals have been used for
- Dust (e.g. coal dust, flour) poses a danger: do not use the dryer  $\rightarrow$  explosion hazard.
- Do not turn off the dryer until the drying process ends, unless the laundry will be removed quickly and spread out, so that the heat can dissipate.
- Do not put laundry containing foamed material/rubber in the dryer
- $\rightarrow$  elastic material may be destroyed and the dryer may be damaged due to possible deformation of the foamed material.
- Light things, such as long hair, may be sucked into the air inlet of the dryer  $\rightarrow$  risk of injury.
- Final part of a tumble dryer cycle occurs without heat (cool down cycle), to ensure that the items are left at a temperature that ensures that the items will not be damaged.
- Switch off the dryer once the programme has ended.
- The exterior of the appliance's rear panel becomes very hot during operation. Never touch the hot surface of the appliance's rear panel. Keep children away from the appliance  $\rightarrow$  risk of burns.
- Condensation is not drinking water and may be contaminated with fluff.
- Do not use the dryer if it is defective or if you suspect it is.
- Repairs must only be carried out by the after-sales service.
- Do not use the dryer if the mains cable is defective. To avoid danger, only have the defective mains cable replaced by the after-sales service.
- Always pull the mains plug out of the socket before changing the bulb for the interior light  $\rightarrow$  risk of electric shock.
- **ts** Only use genuine spare parts and accessories for safety reasons.
- Dryer: pull out the appliance plug, then cut off the mains cable from the appliance. Dispose of at municipal waste disposal facility. - Packaging: do not leave children alone with packing parts  $\rightarrow$  risk of suffocation.
- All materials are environmentally sound and can be reused. Dispose of in an environmentally-responsible manner.

uire

## Emptying condensation

Empty container after each drying operation!

- 1. Pull out condensation container keeping it horizontal.
- 2. Pour out condensation.
- 3. Always push container in fully until it clicks into place. If <sup>a</sup> (Empty water) flashes in the display panel → What to do if..., Page 10.

## Cleaning the fluff filter

Clean the fluff filter after each drying operation.

- 1. Open the door, remove fluff from door/door area.
- 2. Pull out and fold open the fluff filter.
- 3. Remove the fluff (by wiping the filter with your hand). If the fluff filter is very dirty or blocked, rinse with warm water and dry thoroughly.
- 4. Close and reinsert the fluff filter.

## Switching off the dryer

Turn the programme selector to Off. Do not leave laundry in the dryer.

## **Removing the laundry**

The automatic anti-crease function causes the drum to move at specific intervals, the washing remains loose and fluffy for an hour (two hours if the additional **Iron Dry** function is also selected-depending on model).

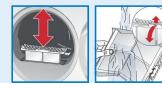

### **Programme end** once lights up in the display.

Interrupt programme removing or adding laundry.

The drying cycle can be interrupted for a brief period so that laundry may be added or removed. The programme selected must then be resumed and completed.

Never switch the dryer off before the drying process has ended. Drum and door may be hot!

- Open door, the drying process is interrupted. 1.
- Load or remove laundry and close door.
- If required, select a new programme and additional functions.
   Press the 
   Start button.

\* → 🏾

<u>'!</u>`

# Information on laundry ...

#### Labelling of fabrics

#### Follow the manufacturer's care information.

Drying at normal temperature.  $\bigcirc$  Drying at low temperature  $\rightarrow$  also select \* Gentle Dry.  $\boxtimes$  Do not machine dry.

Observe safety instructions without fail  $\rightarrow$  Page 11!

- Do not tumble-dry the following fabrics for example:
- Impermeable fabrics (e.g. rubber-coated fabrics).
- Delicate materials (silk or curtains made from synthetic material) → they may crease
- Laundry contaminated with oil.

#### Drying tips

- To ensure a consistent result, sort the laundry by fabric type and drying programme.
- Always dry very small items (e.g. baby socks) together with large items of laundry (e.g. hand towel).
- Close zips, hooks and evelets, and button up covers. Tie fabric belts, apron strings, etc. together
- Do not over-dry easy-care laundry  $\rightarrow$  risk of creasing! Allow laundry to finish drying in the air.
- Do not dry woolens in the dryer, only use to freshen them up  $\rightarrow$  Page 7, Woollens Finish Programme (depending on model).
- Do not iron laundry immediately after drying, fold items up and leave for a while  $\rightarrow$  the remaining moisture will then be distributed evenly.
- The drying result depends on the type of water used during washing.  $\rightarrow$  Fine adjustment of the drying result  $\rightarrow$  Page 5/6.
- Machine-knitted fabrics (e.g. T-shirts or jerseys) often shrink the first time they are dried  $\rightarrow$  do not use the **Cupboard Dry Plus** programme.
- Starched laundry is not always suitable for dryers  $\rightarrow$  starch leaves behind a coating that adversely affects the drying operation.
- Use the correct dosage of fabric softener as per the manufacturer's instructions when washing the laundry to be dried.
- Use the timer programme for small loads  $\rightarrow$  this improves the drying result.

#### Environmental protection / Energy-saving tips

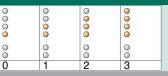

- Before drying, spin the laundry thoroughly in the washing machine  $\rightarrow$  the higher the spin speed the shorter the drying time will be (consumes less energy), also spin easy-care laundry.
- Put in, but do not exceed, the maximum recommended quantity of laundry  $\rightarrow$ programme overview  $\rightarrow$  Page 7.
- Make sure the room is well ventilated during drving.
- Do not obstruct or seal up the air inlet.
- Keep the air cooler clean  $\rightarrow$  Page 6 "Care and cleaning".

# Fine adjustment of the drying result

# Fine adjustment of the drying result

- Drying, Iron Dry, Cupboard Dry, AntiCrease/End 0 are displayed in sequence.
  - Short signal when changing from level 3 to 0, otherwise lona sianal.

# Care and cleaning

Dryer housing, control panel, air cooler, moisture sensors

- Wipe with a soft, damp cloth.
- Do not use harsh cleaning agents and solvents.
- Remove detergent and cleaning agent residue immediately.
- During drving, water may collect between the door and seal. This does not affect your dryer's functions in any way.

Clean the protective filter 5 - 6 times a year or if i (Clean filter) flashes after cleaning the fluff filter.

Only when switched off!

#### Air cooler / Protective filter

When cleaning, only remove the protective filter. Clean the air cooler behind the protective filter once a year.

- Allow the drver to cool.
- Residual water may leak out, so place an absorbent towel underneath the maintenance door.
- **1.** Unlock the maintenance door.
- 2. Open the maintenance door fully.

- 3. Turn both locking levers towards each another.
- 4. Pull out the protective filter/air cooler.

# Do not damage the protective filter or air cooler.

Clean with warm water only. Do not use any hard or sharp-edged obiects.

- 5. Clean the protective filter/air cooler thoroughly, Allow to drip dry.
- 6. Clean the seals.
- 7. Re-insert the protective filter/air cooler. with the handle facing down.

- 9. Close the maintenance door until the lock clicks into place.

### Moisture sensors

- The dryer is fitted with stainless steel moisture sensors. The sensors measure the level of moisture in the laundry. After a long period of operation, a fine layer of limescale may form on the sensors.
- **1.** Open the door and clean the moisture sensors with a damp sponge which has a rough surface.

## Installation

- Delivery specification: dryer, instructions for installation and use, woollens basket (depending on model).
- Check dryer for transport damage.
- The dryer is very heavy. Do not attempt to lift it on your own.
- Be careful to avoid sharp edges.
- Do not lift the dryer by any of the protruding parts (e.g. the door) as they may break off.
- Do not set up in a room that is susceptible to frost. Freezing water may cause damage.
- If in doubt, have the appliance connected by an expert.

### Setting up the dryer

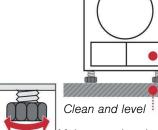

- Take all accessory parts out of the drum. The drum must be empty.
- Ensure that the appliance is installed on a clean, level and solid surface.
- Keep the cooling grille at the front of the dryer unobstructed.
- Keep the area around the dryer clean.
- Make the dryer level using the threaded feet and a spirit level.

Do not remove the threaded feet under any circumstances.

2.

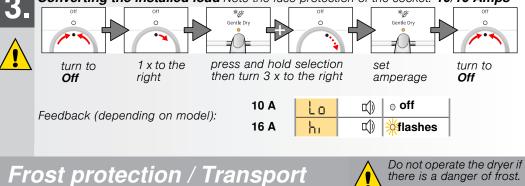

Do not set up the dryer behind a door or sliding door as this may obstruct or prevent the dryer door from opening. This will prevent a potentially fatal danger to children from locking themselves in.

Make sure that the air inlet remains unobstructed

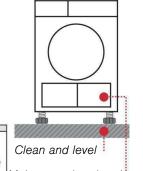

- **Mains connection** see safety instructions  $\rightarrow$  Page 11.
- Connect to an AC earthed socket. If in doubt have the socket checked by an expert.
- The mains voltage and the voltage shown on the rating plate ( $\rightarrow$  Page 9) must correspond.
- The connected load and necessary fuse protection are specified on the rating plate.

### Converting the installed load Note the fuse protection of the socket. 10/16 Amps

### Preparation

- 1. Empty the condensation container  $\rightarrow$  page 4.
- Select any programme using the programme selector. 2.
- 3. Press the  $\oplus$  **Start** button  $\rightarrow$  condensation is pumped into the container.
- 4. Wait 5 min., and then empty the condensation container again.
- 5. Turn the programme selector to Off.

7

# Technical data

	Dimensions (DxWxH)	60 x 60 x 85 cm (height adjus	table)	
	Weight	approximately 45 kg		
	Max. capacity	7 kg		
	Condensate container	4.21		
	Connection voltage			
	Connected load			
	Fuse protection	see appliance ratin	g plate	
	Ambient temperature			
	Product number/ Production number			
	You can find the rating plate on the back of the d	ryer.		
	Power consumption when switched off		0.10 W	
	Power consumption when ready for use (left	-on mode)	1.00 W	

### Consumption values table

Programme	Spin speed which is used for spinning the laundry		Duration**			Energy consumption**
		7	kg	3,5	kg	7 kg

	1000 rpm	131 min	115 min	100 min	70 min	4.13 kWh
	800 rpm	150 min	133 min	116 min	86 min	4.72 kWh
Iron dry*	1400 rpm	93 min	69 min	78 min	48 min	2.55 kWh
	1000 rpm	111 min	82 min	87 min	57 min	3.22 kWh
	800 rpm	130 min	94 min	98 min	68 min	3.90 kWh
Easy-Care		3.	5 kg			3.5 kg
Cupboard dry*	800 rpm	48 min	42 min			1.35 kWh
	600 rpm	60 min	51 min			1.65 kWh

Programme setting for testing in accordance with the applicable IEC61121 standard.

\* The values may differ from those specified, depending on the type of fabric, composition of laundry to be dried, residual moisture in the fabric, the degree of dryness that has been set, the amount of laundry being loaded and the environmental conditions.

### **Optional accessories** (from after-sales service using order number)

#### NZ Platform

For easier loading and unloading. The basket contained in the drawer can be used to carry the laundry.

#### WZ 20310 Washer-dryer stack connection set The dryer can be placed on top of a sui

The dryer can be placed on top of a suitable washing machine with the same width and depth to save space. The dryer **must be** fastened to the washing machine using this connection set. With pull-out worktop: WZ 20300

#### WZ Connection fittings for condensation outlet

60 The condensation is conveyed directly via a hose.

#### Installation underneath the worktop

Instead of the appliance covering plate, you **must** have a metal cover fitted by a specialist.

## What to do if ...

If you cannot rectify a fault yourself (e.g. switching off/on), please contact our after-sales service. We will always find an appropriate solution and will avoid unnecessary visits by engineers. Trust the expertise of the manufacturer and rest assured that the repair will be carried out by trained service technicians using original spare parts. The contact details of your local after-sales service can be found in the enclosed after-sales service directory. When contacting the after-sales service, please quote the appliance's product number (E no.) and production number (FD) (see the inside of the door). Set the programme selector to Off and remove the appliance plug from the socket. The **Start** indicator lamp does Mains plug plugged in? not light up. Programme selected? Check the socket fuse Energy-saving mode is activated  $\rightarrow$  see the separate Energy-saving The display panel light and mode instructions. indicator lights (depending on model) go out and the **Start** indicator light flashes. The 🛎 (Empty water) and 🗘 Start Empty the condensate container. indicator lamp flash. If featured, check hose for condensation outlet. Them (Clean filter) and () Start Clean the fluff filter and/or air cooler under running water indicator lamp flash.  $\rightarrow$  Page 4/6. ♦ Start button selected? Door closed? Ambient temperature Drver does not start. greater than 5°C? The optimum ambient temperature for drying is between 5 °C and 35 °C. Align dryer horizontally.Clean air cooler seal. Water is running out. The door opens by itself Push the door closed until you hear it engage. Creasing. Laundry load exceeded? Remove articles of clothing immediately after the end of the programme, hang up and pull into shape. Unsuitable programme selected  $\rightarrow$  Page 7. Laundry is not dried correctly or is After the end of the programme, warm laundry feels damper than it actually is. Spread the laundry out and allow the heat to disperse. still too damp. Finely adjust the dryness level - this extends the drying time but does not increase the temperature. Your laundry will become drier. Select a programme with a longer drying time or increase the drving level. This does not increase the temperature. Select a time programme for extended drying of laundry that is still damp. If you have exceeded the maximum load for the programme, the laundry may not be dried correctly. Clean the moisture sensor in the drum. A fine layer of limescale may adversely affect the performance of the sensors and your washing will not dry properly. Drying has been interrupted as a result of a power cut, because the condensate container is full or because the maximum drying time has been exceeded. Drying time too long. Rinse the fluff filters under running water  $\rightarrow$  Page 4. Insufficient supply of air  $\rightarrow$  ensure that air can circulate. Air inlet possibly blocked  $\rightarrow$  Clear inlet  $\rightarrow$  Page 8. Ambient temperature higher than 35  $^{\circ}C \rightarrow$  ventilate the room. The optimum ambient temperature for drying is between 5 °C and 35 °C. Outside of this range, the drying time may increase. The humidity in the room Make sure the room is sufficiently ventilated. increases significantly. Remove laundry from the dryer immediately and spread out. Power failure. This allows the heat to dissipate. Be careful as the door, the drum and the laundry may be hot. Clean filter and air cooler  $\rightarrow$  Page 4/6. One or more indicator lights for programme status are flashing. Check installation conditions  $\rightarrow$  Page 8. Switch off, leave to cool down, switch on again, restart programme. The  $\odot$  Start indicator lamp does Mains plug plugged in?Programme selected? not light up. Check the socket fuse.

# Safety instructions

a	iely ins	SILUCIIONS	
	Emergency	- Pull the appliance plug out of the socket immediately or disconnect the fuse.	
7	ONLY use the dryer	<ul> <li>in rooms inside the house.</li> <li>to dry fabrics.</li> </ul>	
	The dryer must NEVER	<ul> <li>be used for other purposes than those described above.</li> <li>be modified in terms of its technology or attributes.</li> </ul>	
	Dangers	<ul> <li>The dryer must not be used by children or persons who have not been instructed in its use.</li> <li>Do not leave children unsupervised near the dryer.</li> <li>Keep pets away from the dryer.</li> <li>Remove all objects from pockets. Make especially sure that cigarette lighters are removed as they constitute an → explosion hazard.</li> <li>Do not lean or sit on the door → risk of tipping.</li> </ul>	
	Installation	<ul> <li>Secure loose cables → tripping hazard.</li> <li>Do not operate the dryer if there is a risk of frost.</li> </ul>	
	Mains connection	<ul> <li>Connect the dryer according to specifications to an AC earthed socket, as otherwise it cannot be guaranteed that the appliance is completely safe.</li> <li>The cable cross-section must be sufficient.</li> </ul>	
		<ul> <li>Only use earth-leakage circuit breakers with the following symbol:</li></ul>	Ĩ
	Operation	<ul> <li>Only load the drum with laundry. Check the contents before you switch the dryer on.</li> <li>Do not use the dryer if the laundry has been in contact with solvents, oil, wax, grease or paint (e.g. hair setting spray, nail polish remover, stain remover, cleaning solvent, etc.) → fire/explosion hazard.</li> <li>The tumble dryer is not to be used if industrial chemicals have been used for cleaning.</li> <li>Dust (e.g. coal dust, flour) poses a danger: do not use the dryer → explosion hazard.</li> <li>Do not turn off the dryer until the drying process ends, unless the laundry will be removed quickly and spread out, so that the heat can dissipate.</li> <li>Do not put laundry containing foamed material/rubber in the dryer → elastic material may be destroyed and the dryer may be damaged due to possible deformation of the foamed material.</li> <li>Light things, such as long hair, may be sucked into the air inlet of the dryer → risk of injury.</li> <li>Final part of a tumble dryer cycle occurs without heat (cool down cycle), to ensure that the items are left at a temperature that ensures that the items will not be damaged.</li> <li>Switch off the dryer once the programme has ended.</li> <li>The exterior of the appliance's rear panel becomes very hot during operation. Never touch the hot surface of the appliance's rear panel. Keep children away from the appliance → risk of burns.</li> <li>Condensation is not drinking water and may be contaminated with fluff.</li> </ul>	
	Defect	<ul> <li>Do not use the dryer if it is defective or if you suspect it is. Repairs must only be carried out by the after-sales service.</li> <li>Do not use the dryer if the mains cable is defective. To avoid danger, only have the defective mains cable replaced by the after-sales service.</li> <li>Always pull the mains plug out of the socket before changing the bulb for the interior light → risk of electric shock.</li> </ul>	1
	Spare parts	<ul> <li>Only use genuine spare parts and accessories for safety reasons.</li> </ul>	
	Disposal	<ul> <li>Dryer: pull out the appliance plug, then cut off the mains cable from the appliance. Dispose of at municipal waste disposal facility.</li> <li>Packaging: do not leave children alone with packing parts → risk of suffocation.</li> <li>All materials are environmentally sound and can be reused.</li> </ul>	

- All materials are environmentally sound and can be reused. Dispose of in an environmentally-responsible manner.
