"We don't just pursue visions.
We make dreams a reality."

- Werner von Siemens

We bring the future closer to people. In their homes.

For more than 165 years, Siemens has been a German industrial and technological brand. It is in our genes to look further into the future than others in order to offer technical solutions to the major challenges of our times. This holds true especially for those innovations with which we improve the quality of life in people's homes.

No invention contributes more to our well-being than those we come into contact with on a daily basis. And no environmental technology is more valuable than one that is used a million-fold. From the first washing machine in the 1920s to the first fully automatic dishwasher and the invention of Zeolith drying technology – the innovative strength of our global enterprise ensures that the future finds its way into people's homes.

Siemens Home Appliances set standards in the market. They are the expression of progressive ideas, a consistent quest for performance and a strong, stylistic awareness to satisfy the most diverse demands of a modern lifestyle. Our timeless and contemporary designs continue to receive recognition from many international design awards, including iF and reddot.

A finely developed taste for high fashion.
And advanced features for everything else.

Smart features that bring a human touch.

Delicate satin, sportswear, outdoor jackets, white shirts - every wardrobe is full of clothes that vary in fabric and colour. And they all need different types of care. With iSensoric, a washing machine offers the best possible use of resources, ideal time management, custom handling of different fabric types – and ideal washing results with every load.

Supported by information collected from the sensors, the iSensoric Control Unit can identify load volume, distinguish between different types of fabrics, spot excessive degrees of soiling and more – to handle each and every load individually.

This technology opens up endless possibilities.

iSensoric: Wash smart with three intelligent sensors.

Temperature Sensor

Flow Sensor

Load Sensor

Save time or save energy - with varioPerfect.

Save up to 30% of energy with ecoPerfect and up to 60% of time with speedPerfect. With the "flow sensor" and "load sensor", the machine detects the load volume and kind of textile and hence adapts the washing process time-efficiently to the specific load. Also, cuts out wasteful electricity consumption while giving you the wash results you desire.

Time Comparison Chart

Programme	Normal wash cycle	With Speed
Cottons	120 MIN	60 MIN
Synthetics	119 MIN	59 MIN
Daily Wash	63 MIN	45 MIN

iQdrive motor: durable and quiet.

The iQdrive is a frictionless, brushless, magnetic motor, which withstands wear and tear effortlessly. It can wash 9kg. loads for years with consistent long-lasting performance. The confidence in Siemens' innovative technology offers a 12-year warranty for its motor. The iSensoric washing machine is designed for reliable noise-free washing. The high-precision stabilization sensor and automatic stabilization system housed within the antiVibration - designed sidewalls ensure low noise levels, even at high spin speeds. So much so that laundry cleaning happens without disturbing your sleep.

*T&C apply.

Innovative functions not only ensure optimal results, they also make your life easier.

easyIron

easyIron: makes ironing easy with gentle spins.

This option reduces the spin speed, which in turn reduces the tangling and creasing of clothes. Additionally, the water is drained out slowly, letting the fabric retain moisture longer, which makes ironing easier.

Hygiene

Hygiene: Removes up to 99.99% germs even at low temperatures.

The hygiene program is particularly suitable for delicate textiles that cannot be washed in a high-temperature wash program. Thanks to the use of active oxygen, the laundry gets hygienically clean even at low temperatures down to 40°C.

reloadFunction

reloadFunction: Adding items mid-cycle.

How often do you put on a load of laundry and then discover a stray item that should also have been included? The reloadFunction allows you to throw in those extra items as soon as the wash cycle allows.

waterPerfect

waterPerfect: Optimal water use for every load.

With the information from the flow sensor and the load sensor, the machine measures the precise amount of water that enters the system. The amount of water required changes according to the load volume and absorbency of the textile. Based on this detailed information, only the necessary level of water is calculated and added to the system, guaranteeing perfectly cleaned laundry.

waveDrum

waveDrum: thorough cleaning with a gentle touch.

The innovative waveDrum is designed to ensure optimal distribution of the laundry and deliver a wash that is extremely gentle on the clothes. Its unique wave pattern with steep and flat sides, creates a wash that's both tough and gentle. The specially designed paddles in the drum also ensure optimal water flow through and around the clothes, generating an excellent wash result. Accurate sensors and precise control electronics determine the best wash cycle for your favourite clothes. Optimum drum and temperature operation ensure customized care to safeguard the quality of your laundry.

touchControl

touchControl: For easy & intuitive control at the touch of a finger.

With integrated touchControl panel you can maintain perfect control for maximum safety.

anti-vibration sidewalls

anti-vibration sidewalls: zero noise.

The signature anti-vibration design on the sidewalls of each Siemens washing machine helps stabilise the unit even further, ensuring it remains quietly still at even the highest spin speeds. On the inside, automatic stabilisation sensors constantly monitor the balance of the load, whilst the intelligent anti-vibration system then continually adjusts the drum rotation to eliminate vibrations caused by imbalance.

When fresh-smelling clothes are
as important as fresh-looking ones.

sensoFresh[#] with active oxygen:
removes stubborn odours quickly
and effectively without washing.

Cigarette smoke, cooking smells, body odour stick to
the clothes. Now you can get rid of them without washing
with water. Even for sensitive and non-washable fabric.
Thanks to active oxygen and an intelligent network
of sensors. Wear your perfectly refreshed clothes in
30-45 minutes.

[#]Feature available in select models.

sensoFresh

sensoFresh - eliminates odours without washing.

If you enjoy living life to the fullest, your clothes will accumulate odours no matter what you do. Siemens' innovative sensoFresh technology makes it quick and easy to remove smell and bacteria from fabrics, clothing and dry-clean only items. It represents a real revolution in washing machines by using active oxygen to neutralize odours in 30-45 minutes without water or detergent.

Hygiene

Low temperature option for sensitive fabrics.

The Hygiene programme is particularly suited for delicate fabrics that cannot be washed at high temperatures. Look forward to the removal of up to 99.99% germs even at low temperatures with active oxygen. Based on new technology, the sensoFresh eliminates harsh, persistent odours, such as tobacco smoke and cooking fumes, without water.

drumClean

Prevents the formation of odours inside the drum.

The drumClean programme ensures that not just your clothes but also the wash drum contains no traces of odour. active oxygen effectively prevents the accumulation of odour-causing bacteria and soil and ensures a completely clean machine. With a built-in reminder function to prevent odour build-up, live life to the fullest with the sensoFresh system.

Removes odour even without washing with water.

Step 1

Select sensoFresh programme to freshen up your clothes.

Step 2

Machine activates waterless programme for 30 or 45 mins.

Step 3

Your laundry is treated with Ozone.

Result

100% odour less and cupboard dry clothes with revolutionary sensoFresh system.

A Siemens washer-dryer unit is prominently displayed on a light-colored concrete pedestal. The unit is white with a large circular glass door and a control panel at the top. The background is a modern, minimalist interior with a curved concrete wall and a large window or opening that reveals a city skyline at night. A person is visible in the background, sitting in a pool of water, looking towards the city.

Introducing Washer-Dryers: Save effort, space and time with Siemens washer-dryers.

The ideal all-rounders for your laundry care. Get perfect wash and cupboard-ready clothes in under 60 minutes*. With its huge display and clear operation, you can select and control your laundry cycles for washing and drying from a wide range of options available. Siemens washes and dries without any interruption. Just lean back and relax until your laundry comes out of the machine, clean and dry.

*As per Cottons 40°C programme without additional options selected. May vary according to the models.

iQdrive motor: durable and quiet.

The iQdrive is a frictionless, brushless, magnetic motor, which withstands wear and tear effortlessly. It can wash 9 kg. loads for years and with consistent long-lasting performance. This innovative technology allows Siemens to have full confidence in its motor and offer a 10-year warranty.

Wash and Dry – 60 minutes*. From wash to cupboard-ready clothes in an hour.

This feature washes and completely dries your clothes within 60 minutes# in one seamless programme. Dump the wash load, select the feature and go back to what you were doing. In an hour, get clean, dry and ready-to-wear clothes.

Outdoor programme: Finally, outdoor wear can be kept perfectly clean and functional without any extra effort.

Since outdoor wear is mostly made of synthetic fiber, the dirt stays on the surface and needs to be rinsed with a lot of water. The exact amount of water in relation to the load volume is monitored by the 'flow sensor' and the 'load sensor'. And because most outdoor wear is welded, the 'temperature sensor' controls the heat level to not damage the seam.

waterPerfect Plus: technology that optimizes water usage.

This intelligent water sensor system recognizes the fabric-type and precise load size. Using these two inputs, it dispenses the right amount of water, automatically and precisely. This ensures you always achieve a perfect wash result with optimal water consumption.

*As per Cottons 40°C programme without additional options selected. May vary according to the models.

Perfectly dried laundry - gentle,
quick and sustainable.

All Siemens dryers are equipped with the latest technology. Whether normal or sensitive laundry - the iSensoric technology adjusts the entire drying process individually and sensor-controlled to your laundry. In this way, the laundry is dried gently and exactly according to your wishes - whether iron, cupboard or extra dry.

autoDry: your dryer makes the decision.

Achieving perfect dry laundry is an advanced science, mastered by autoDry and powered by iSensoric. autoDry works by emitting a current through the load, and using a conductance sensor to monitor the level of conductivity (less current equals dryer clothes). By constantly collecting information about how wet the laundry is, autoDry will automatically adjust its settings. When the clothes are perfectly dry, iSensoric knows.

softDrying system: intelligent design for the most delicate drying care.

A large drum and smooth door interior combine with curved paddles to give your clothes the perfect finish. The curved paddles lift the clothes and move them gently around the drum, allowing them to dry more efficiently. The design creates a cushion of air between the clothes and drum walls, reducing frictional impact and protecting the fibers.

selfCleaning condenser: keep drying performance high, for life.

The selfCleaning condenser prevents itself from getting clogged by fluff and lint particles that get into the system during a drying cycle. The relevant area is automatically cleared of lint several times during every cycle by flushing it out with the water that was extracted from the wet fabrics. Thanks to the functional interaction of the time sensor and the water level sensor, the intelligent software always knows the available amount of water and the right flushing times. In this way, the dryer stays enduringly energy-efficient, just as on day one.

Rapid 40: Fast and careful drying of small loads.

The Rapid 40 programme carefully dries small loads (1 kg) of laundry in just 40 minutes while moisture levels are constantly measured during the drying process. This is ideal for synthetic fibres, light cotton or mixed fabrics (non-sensitive textiles). When used in conjunction with the super 15' wash programme, you can have a freshly laundered outfit in under an hour.

Contact Siemens

Your local Siemens dealer will be pleased to provide more detailed information and advice you on your choice of appliance. However, if you have questions or comments about any of our appliances, we would be pleased to hear from you.

Authenticity

Every Siemens appliance is carefully created to the exacting standard that our customers deserve. There is no compromise, no cutting corners, owning a Siemens appliance brings confidence and style to your home life. We draw on many years of manufacturing experience and feedback with customers to design machines that meet your everyday needs. Extensive research and testing of every component gives you a level of confidence that will last for many years.

Customer Care

Siemens has been the pioneer of in-house customer care service. This is because once you own a Siemens appliance, you'll own it for a lifetime. Our in-house customer service is geared up to solve all your problem send queries.
