The future moving in.

Siemens Home Appliances

For a life less ordinary.

Siemens presents the appliances of the iQ700 series. Each individual built-in appliance is eye-catching on its own. But together, they provide an exceptional kitchen experience – with the perfect built-in design and unique innovations.

Colors of actual products may vary from illustration and pictures.
Some of the appliances pictured in this catalogue are not available in Hong Kong.

"...of an enterprise that, through its own inventions and its entrepreneurial vision, contributes to enhancing the knowledge and well-being of humanity."

Werner von Siemens

We don't just pursue vision and bring the future closer to people's homes – We make dreams in reality.

When the founder of our company, Werner von Siemens, came to Berlin at the age of 17, he had nothing more than just a dream "of an enterprise that, through its own inventions and its entrepreneurial vision, contributes to enhancing the knowledge and well-being of humanity."

For more than 165 years, Siemens is a German industrial and technological brand with activities spanning the entire breadth of the electrical engineering industry. The brand personifies the timeless vision of Mr Siemens: "progress in the service of mankind". Management of the home appliances business under the Siemens brand has been exercised by BSH Siemens Hausgeräte GmbH since 1967.

It's in our genes to look further into the future than others in order to offer technical solutions to the major challenges of our time. This also holds true for those innovations with which we improve the quality of life in people's homes. No invention contributes more to our well-being than those we come into contact on a daily basis. And no environmental technology is more valuable than one that is used a million-fold. From the first stoves and washing machines in the 1920s to the first fully automatic dishwasher and the invention of Zeolith® drying technology – with the innovative strength of our global enterprise, we ensure that the future finds its way into people's homes.

Siemens home appliances set standards in the market. They are the expression of progressive ideas, a consistent quest for performance and a strong stylistic awareness to satisfy the diverse demands of a modern lifestyle. Our timeless and contemporary designs receive continued recognition from many major international design awards, including iF and reddot.

Intelligent home appliances do almost everything better – and automatically.

Automatic and precise gear changes, more efficient fuel consumption, arrival at the right destination almost automatically – this kind of intelligent technology that we tend to take for granted in our cars should also be present in our homes to provide constant convenience. Enter the intelligent home appliances from Siemens, which automatically perform almost every task better and even more efficiently than we could possibly do ourselves. We've provided each Siemens home appliance with the knowledge it needs, for example, to automatically remove 16 different types of stain on laundry, automatically clean dryer condensers, automatically cook roasts, automatically keep vegetables and meats fresh for a longer period, and automatically wash dishes both quickly and efficiently. Just as human beings rely on their five senses to make wise decisions, the intelligent systems in Siemens home appliances rely on their "eyes and ears" to take precise and unerring control of processes. Highly sensitive sensors are constantly transmitting precise information to the "brain" of the appliances so that they can automatically implement the next correct step. Find out how even housework can become a favorite pastime – with intelligent home appliances from Siemens.

Intelligent refrigeration

Now you can enjoy fresh foods anytime – and trust Siemens refrigeration appliances to know the best conditions for cold storage. Thanks to their innovative features and intelligent inverter compressor technology, these appliances register every change in temperature while constantly, quietly and highly efficiently adjusting refrigeration conditions. With freshSense, they can instantly respond to temperature changes and maintain a constant level. Besides, the vitaFresh compartments keep produce, meat, and fish fresh for longer.

Intelligent cooking

Experience more joy in your kitchen – and a new freedom in cooking. You can place your pots and pans anywhere on the unique flexInduction hob without the restrictions of cooking zones. The innovative surface induction automatically detects the shape and size of the cookware. Siemens' full range of iQ700 ovens offers conventional heating, steam and microwave cooking methods developed as a feast for your eyes and your sensors. And thanks to the automatic function, Siemens' chimney hood always adapts automatically to the density of the steam.

Intelligent laundry care

Look forward to laundry that is flawlessly clean and dry and to the fact that your Siemens washer and washer dryer do almost all the work automatically for you. All of our washing machines feature the autoloading system, which automatically tailors the wash programme to suit the size of the load, optimising energy and water usage. Thanks to the duoTronic technology, a set of internal sensors to the drum air temperature and humidity instructs an accurate drying time for clothing, hence avoids excessive drying and overheating.

Intelligent dishwashing

Experience the brilliant shine of sparkling clean dishes – and the satisfaction of having a Siemens dishwasher to reliably relieve you of this tedious kitchen task. Being the winner of international award, Siemens' innovative Zeolith® Drying delivers brilliant dishwashing results.

Siemens appliances
don't just work incredibly well –
they are incredible.

"At Siemens, design always starts
with technological innovations, which
requires new approaches to design."

Gerhard Nüssler
Head of Design, Siemens

In design, form follows function

Siemens develops and designs technological worlds where progress can be experienced first hand and design plays a key role. The Siemens design is characterized by straight lines, architectural clarity and the use of groundbreaking materials and processing technologies. New lighting, sensor, and interactive technologies lend highly expressive accents. Technology becomes an experience for all the senses and Siemens design becomes an unmistakable mark of quality that guarantees the enjoyment of well-crafted products for many years to come.

iQ700. Perfect built-in design

iQ700 stands for a new evolutionary stage in the design of Siemens built-in appliances. The functional center and design code of the appliance series is the 2-zone front panel with fine chrome strips. Its purely horizontal alignment and consistent height allow perfection in both horizontal and vertical arrangements. The hybrid user interface is based on a simplex design. For more complex appliances, such as networked ovens, the interface combines the best of the mechanical and digital world.

- Iconic Awards: Innovative Interior
- German Design Award Gold

Siemens home appliances don't just look fantastic – they are fantastic

You'll enjoy the clear, bold lines, high-quality materials and high-precision craftsmanship of the Siemens design for years to come. Many design juries agree. For instance, Siemens home appliances have won the following design awards:

- the "iF product design award"
- the "red dot design award winner"
- the "red dot best of the best"

Ideas for more efficiency.

You can save the most resources where they are used – at your home

Environmental protection starts at home, since cooking and refrigeration consume 39%* of the total energy used in a common household. Of the 130 litres of water used in household per person per day in Hong Kong#, almost 1/6 is used for washing clothes and dishes. The use of new energy-saving appliances can make a difference here, for the environment and against the inexorably rising cost of living.

The sign of efficiency

Siemens' technology innovations make possible top efficiency and performance alike. Our appliances are at the top of EU energy savings classifications and some are much better. As a sign of their especially low energy consumption, the best Siemens appliances make it easier to identify better energy-efficient appliances when you're shopping, to help you save money and the environment.

The population is growing.

Unfortunately, our resources are not Today the world is home to over 7 billion people. They watch TV, cook, heat, bathe, wash, and refrigerate. Each of them uses electricity and naturally also raw materials like water. The population continues to grow, and with it the demand for energy and drinking water. Yet already over 1 billion do not have access to clean water, and that number is rising. Thus, saving resources only makes sense.

Knowledge and expertise about built-in appliances only Siemens can provide.

Kitchen planning

We understand that working on the kitchen can be quite tiring if it is not well-planned ahead especially from ergonomic point of view. Our expert could pay an onsite visit before installation and work hand in hand with your kitchen specialist to create a perfect and harmony kitchen for your home.

Precise delivery

Our logistic team ensures the appliances arrive safely and timely at your home as we know how much you care about your purchase. We deliver and unload the appliances exactly where you desire them to be located* even it requires staircase uplifted or remote area delivery such as Discovery Bay.

Choosing the most suitable appliances

We learn from our customers and take their cooking habit into consideration when it comes to choosing appliances. Not to mention we will also take note on the layout of your kitchen to ensure your appliances can be fully utilized. At Siemens, our experienced team could give valuable advices and make certain your appliances are your best choice.

Professional installation

At Siemens, we ensure all installations are carried out at high quality standard. The built-in appliances are well fitted into the kitchen cabinets. What's more, we will test your appliance after installation and also offer you a briefing on basic setting and operation. At Siemens, we are determined to bring you a worry-free and enjoyable purchase experience.

* Terms and conditions apply. For details, please consult Siemens Product Hotline.

Siemens, being a built-in expert in Hong Kong, meaning we will take care of everything for you, from planning your kitchen layout, choosing the best appliances for you, to delivery and installation. We will look after every step so you can sit back and relax.

A world of possibilities. Connected to your home.

Redefine your daily life: With Siemens and Home Connect.

With the Home Connect App, you can interact with your Siemens home appliances in a completely new way and discover all possibilities that let you take the next steps into the future.

Discover more about
Home Connect

Smart appliances management. Anywhere. Anytime.

As innovation moves on, new possibilities arise. Thanks to Wi-Fi-enabled Siemens home appliances with Home Connect functionality, they make their way into your home and enrich your everyday life.

The combination of Wi-Fi-enabled appliances, intelligent software and the intuitive Home Connect App offers a wide range of exciting use cases. Some, easing the workload – some, opening up completely new possibilities. Making your everyday life as efficient and comfortable as never before and allowing you to spend more time and attention on the things you really love to do.

Personalize your appliance.

Home Connect Favorites saves time by putting you in the fast lane to your frequently used programs. Instead of going through the same process every time you start a particular program, you can now simply tap on your specific favorite. With your pre-defined individual settings.

Your digital household assistant.

Delicate or eco? And what temperature? Leave all these dilemmas behind – thanks to Easy Start Assistant, you'll always make the right choice. It's designed to easily and intuitively help you pick programs for all the appliances with Home Connect based on several key factors – and Easy Start Assistant will suggest a program that is suitable for your needs. From there, it's just one tap on the screen to start your appliance.

Enhance your lifestyle, tickle your taste buds.

Cooking at a professional level has never been easier, with an extensive selection of recipes in your Home Connect App. Once you have picked your favorite one, you can transfer the ideal settings to your oven, and even remotely start the heating process. Time to enjoy convenient cooking and delicious meal.

Discover the specific benefits that Home Connect offers you with every appliance categories

The image is a composite of two scenes. The left scene shows a modern kitchen with dark, textured cabinetry and two built-in ovens. The right scene shows a woman in a dark dress standing by a dining table with a white tablecloth, set with glassware and food. The background of the right scene is a dark space with glowing orange and blue light trails, suggesting a futuristic or cosmic theme.

iQ700 Built-in cooking products.
For a life less ordinary.

iQ700 oven series

Not just a kitchen, but a space for thrills and a stage for the professional cook.

Developed for a life less ordinary.

With the iQ700 oven series, you can achieve perfect alignment regardless of a vertical or horizontal installation.

The new iQ700 appliances range is a feast for the eyes.

The iQ700 oven series features impeccably matching perfect built-in design. Thanks to the front which is coordinated with one another down to the very last detail. Each appliance is unique on itself and combined, they become an extraordinary design experience.

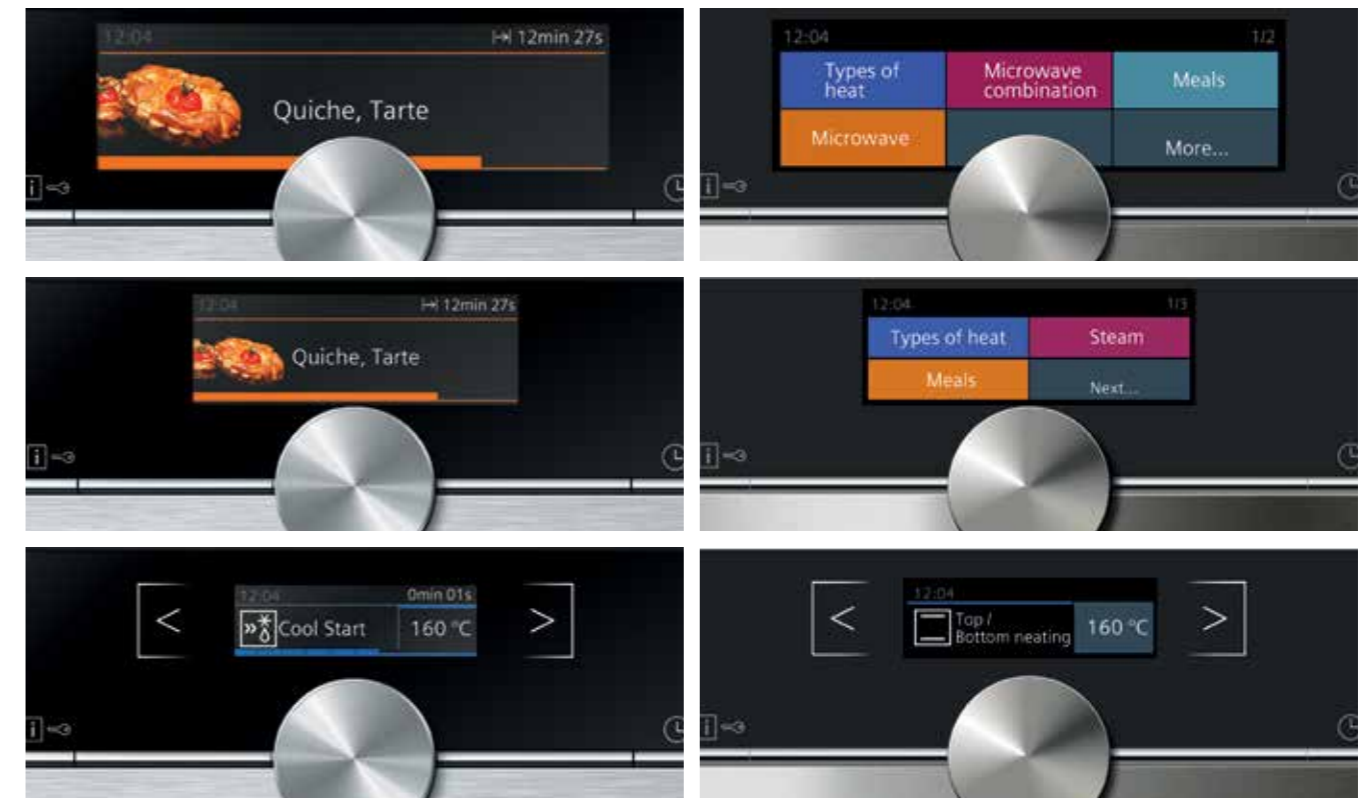

Feast for the senses

With Siemens' new iQ700 built-in range, anything is possible.

One touch. That's all it takes to prepare culinary delights

Featuring different display screen sizes and cookControl plus

It's never been this easy to keep an eye on everything. Bigger size, brighter colours, higher contrast and better resolution. The new TFT-Touchdisplay Plus also boasts a new menu structure optimized for convenience and intuitiveness.

Pre-installed setting recommendations guarantee the best results for numerous dishes: cookControl Plus.

Simply select the required dish and enter the weight – the cookControl Plus function immediately provides individual recommended settings for perfect cooking. Therefore, you achieve the best results for many dishes contained in cookControl Plus in a reliable manner.

Be connected at home to make life easier

With the Home Connect app, you can easily control your Wi-Fi-enabled home appliances from Siemens on your smartphone.

You are in safe hands.

Siemens ovens are equipped with cooking sensors to help you get the best results with your dishes. Use the 'dishes' section on the app and let it suggest the best cooking settings for your dish.

From the app, you can also preheat, control the temperature and find the right baking time easily. Also adjust your oven settings from display to lighting and have your appliance instruction manual always at hand.

The constantly growing network of partner solutions opens up completely new perspectives and networking possibilities for you. For an everyday life that is efficient and exciting like never before.

Browse the recipe section of the Home Connect app and let yourself be inspired by new and selected recipes that meet even the highest demands. Then send the cooking settings of your chosen recipe directly to your oven intuitively from the app.

Every connection lets your world grow.

Connect your Wi-Fi-enabled oven to a wide range of smart devices and services. Check the settings of your device and receive push notifications directly to your phone, like when your oven cooking programme had ended – wherever you are.

Discover the countless applications that are precisely tailored to your needs. With Home Connect and the relevant partner, you can now control your household with just one click. Create your own personal scenarios by turning off various devices when you want to leave your home. Enjoy the all-in-one solution for intelligent home automation.

Take your time.
Your oven won't.

iQ700 varioSpeed ovens.

There are things in life that are worth spending more time on like a business meeting or getting to read a few more pages of a bedtime story. Or – for something more exotic – learning how to spearfish. Whenever you find yourself in a situation where you want to spend your time differently, but not necessarily cooking, varioSpeed allows you to. No matter whether it's a little snack or a masterful salmon recipe, you can now adjust the cooking time to your own speed of life. Ultimately giving you all the flexibility your less ordinary life requires.

Use a fraction of the time.

Taste needs exactly the time you have.

Twice as fast in combination: by additionally activating the integrated microwave to complement conventional heating methods, you can speed up the preparation of your dishes – always with the perfect quality you would expect. Save up to 50% of the time usually needed and use it at your own disposal.

Finally, pre-heating is no longer necessary and you can save time: the coolStart function.

Cooking frozen food in the oven is now even faster – thanks to the innovative coolStart function. With the support of this intelligent heating phase, you can now successfully cook frozen food quickly and without pre-heating – which is particularly time saving.

Achieve the best roasting results – easier than ever before: roastingSensor Plus.
Thanks to three measuring points, the innovative roasting thermometer is able to precisely and reliably measure the internal temperature of your dishes. This is suitable for numerous dishes and can even be combined with the integrated microwave and the pulseSteam function.

Every model put in a good light.
Depending on the model, you have different kinds of illumination. Whether it's the standard Halogen, the LED or the most advanced Multilevel LED-Illumination, they all provide a brilliant view to draw full attention to your dishes.

The oven itself detects when the baking process is complete: the bakingSensor.
All that's left for you to do when baking: prepare the pastry and select the required dish. Innovative sensor technology automatically controls the baking process. The bakingSensor measures the moisture levels in the oven interior and is therefore able to tell when the dish is ready.

The oven door opens and closes gently and quietly thanks to intelligent damping: softMove.
Relaxed operation of the oven without pressing and pulling. The intelligent damping mechanism ensures that the oven door opens and closes gently.

You can enjoy preparing food without bothering about the usual consequences. No matter how flamboyant it gets in the oven interior, you no longer need any chemical treatment to get it clean again – you only need the push of a button. If you want, the oven can clean itself thoroughly with activeClean. It does so, by heating up to very high temperatures – turning all residues into ashes, which can easily be wiped away. This process is called pyrolysis and it is the most comfortable and efficient way to clean the whole interior of your oven, since even the telescopic rails are specially designed to be activeClean-proof.

ecoClean® Plus has just become easier than before.
The new ecoClean® Plus technology provides excellent cleaning performance. It is innovative and far more efficient than the standard catalytic liners. It renders the oven with smooth seamless surfaces which facilitates easy cleaning.

Have fun cooking in your kitchen

With the many clever, innovative functions, Siemens built-in appliances make cooking much simpler and more convenient and relaxing. Siemens ovens offer a wide choice of heating methods providing ideal cooking options for all types of food.

Conventional (top and bottom heating)
Ideal for single shelf cooking and gives you a more crispy and drier result. Good for meat and fruit pies. Rich fruit cakes will not be peaked in the centre when using this cooking method. The oven needs to be pre-heated on this setting.

Bottom heating
Ideal for casseroles, curries and any slow cooking. Good for bain-marie cooking of crème caramels.

coolStart
Ideal for successfully cooking frozen food without pre-heating.

Drying
Ideal for drying fruit and vegetables as healthy snacks or drying your herbs for longer preservation.

Hot air eco
The most popular cooking program from our ovens now becomes eco. With this program, special temperature control optimized for cooking on one level, hence saving energy is now possible.

Hot air grilling
This cooking system is ideally suited for poultry and duck up to 2.5kg / 5lb and for smaller cuts of meat. Also ideal for crisping the crackling on pork (use this for the last 30 minutes of the cooking time for the perfect crispy finish).

Grill, large area
The three stage variable grill gives you precision grill temperature control for a full width grill.

Grill, small area
Using only the centre of the grill is perfect for cooking smaller quantities.

Best baking results regardless of which shelf you choose: 4D hotAir.
Choose which shelf you want to cook your food on with the greatest possible flexibility. The innovative technology of the fan motor enables optimum heat distribution in the interior of the oven. Your dish therefore always turns out perfectly just as you want it, regardless of which shelf you place it on.

Intensive heat
This type of heat uses the heating elements from the top of the oven with the addition of a more powerful bottom heating element. Ideal for cheesecakes, crispy cake bases and baking tins that have poor heat conduction.

Pizza setting (Intensive hot air)
A crisp underside to pizza bases, quiches and pastry cases can be achieved by activating the intensive hot air setting. Pre-heating is not necessary when using this setting for cooking from frozen.

Slow cook
For good quality meat and poultry trimmed of all fat. Meat is pan fried to seal in the juices and then transferred to an oven proof dish with a lid. This is then placed in the oven at a pre-defined, fixed low temperature without any additional liquid added. The oven will slowly cook the meat keeping it moist, juicy and tender, without overcooking.

Defrost
Gently defrost a delicate gateaux or large joint of meat or turkey. This setting circulates room temperature air around the food, whilst keeping the food away from pests.

Keep warm
Food can be kept warm in the oven on this setting until it's ready to be served.

Pre-heat (Plate warm)
As food stays warm for longer on pre-heated plates, you can warm up your plates and serving dishes with this function.

Sabbath setting*
The oven is automatically set to conventional heat at a temperature of 85°C. You can adjust the Sabbath setting duration for between 24 to 73 hours. Designed to keep pre-heated food warm for the period.

The iQ700 Steam Ovens.

The iQ700 steam ovens can steam or combine steaming with hot air to offer even more possibilities to prepare tasty dishes without added grease or oil.

Use fullSteam, to cook vegetables without losing taste, colour or vitamins.

Or prepare perfectly crispy and juicy dishes with the pulseSteam function.

Stable temperature, more comfort

Using a traditional wok for steaming requires your constant attention to continually lift the lid to monitor progress. Steam escapes and the drop in temperature prolongs cooking time and uses more energy. Siemens steam oven keeps watch for you, ensuring a constant temperature over a specified time period sounding a warning when ready, so that you can relax and enjoy time with your family.

Coffee

The iQ700 Coffee Center.

aromaDouble Shot:
For extra-strong coffee and great aroma
Our aromaDouble Shot function is a double grinding and brewing process designed to create the very best aroma. The shorter extraction time prevents bitter aftertaste, to guarantee that only the best of the beans get into your cup ideal for brewing a lot of coffee with the most intense aroma.

Home Connect:
Perfectly connected to your espresso machine
Control your fully automatic espresso machine with any smart device. And discover the exclusive world of the Home Connect App. For example coffeeWorld, offers a variety of international coffee specialities.

ceramDrive: Finely ground beans for a fuller flavor.
The high-quality ceramic grinder grinds coffee beans to a particularly even consistency, allowing all the different flavours to develop, for an exceptionally aromatic coffee experience. Since ceramics are virtually non-wearing, long-lasting enjoyment of premium-quality coffee is guaranteed.

coffeeSensor System:
Making the most of every coffee bean.
Different varieties of beans have differing characteristics, like size, moisture and oil content. The intelligent coffeeSensor System grinder automatically adapts grinding time to the bean variety being ground, so you always get the perfect quantity for your preferred coffee strength.

oneTouch DoubleCup:
A drink with a touch, or two at once.
No matter which coffee specialties you choose – whether a strong espresso, creamy cappuccino or a latte macchiato: With oneTouch DoubleCup your beverage is prepared with just a touch of a button – it's as easy as that. And even better: you can get two cups at once.

autoMilk Clean: Auto cleaning of the entire milk system.
Making really good, aromatic coffee specialties is a delight – cleaning the milk system not so much. So Siemens developed the autoMilk Clean function. This fully automatic steam cleaning process operates after every drink, allowing you to simply sit back and enjoy a great cup of coffee.

Warming drawers are more than just drawers

The drawers are suitable for dinnerware warming and also food warming. They can take up to either 12 or 40 plates, can be used to safely and hygienically keep food hot for up to 1 hour and can also be used to prove dough, gently thaw delicate items and warm up breads and pancakes. Depending on what you want the drawer to do, the adjustable temperature range allows the temperature to be adjusted between 30°C and 80°C. The fully extendable pull-out warming drawer allows easy access to the contents and can accommodate up to 25kg.

Striking elegance
Designed to co-ordinate with Siemens ovens and Compact45 series, the range consists of models with height of 29cm and 14cm. Both warming drawers come with a handle-free “press-and-pull” open door, which allows users to open and retract gently.

Elegance and practicality combined
Siemens built-in appliances are designed so that a warming drawer can be aligned below to appear integral to the unit. This is particularly useful when you have built-in side-by-side appliances of different height. The seamless fit of warming drawer provides a uniform appearance to both appliances and is pleasing to the eye. The additional warming drawer provides valuable storage space in a beautiful flowing style.

Ovens with an appliance height of 595 mm can be installed above a warming drawer. An intermediate floor is not required.

Compact ovens with an appliance height of 455mm can be installed above a warming drawer. An intermediate floor is not required.

Hob

Featuring new cooking zones that grow with your appetite.
The Siemens iQ700 induction hobs with maximum flexibility. For a life less ordinary.

Flex your culinary muscles with flexInduction

flexInduction

No-compromise cooking at its best. Entertain the world's cultures with just a single surface.

Discover the benefits of flexInduction Plus
Scan our QR code to find out more.

Tailored to your needs

flexInduction is a must for diverse cooking. The cooking area is tailored to your needs. You can use a small area for sauce pan, or the whole strip for large cookware.

Excellent heat distribution

The innovative elongated shape of the inductors means that larger pans enjoy more evenly distributed heat, which means your dish will be beautifully and evenly cooked.

Precise, intuitive control: dual lightSlider

Create endless cuisine possibilities with 17 power levels that can be controlled by simply gliding your finger along our dual lightSlider. When switched off, the dual lightSlider is completely invisible.

Infinite possibilities

flexInduction hobs featuring flexInduction Plus have extra large heating zones. The additional zones automatically initiates upon sensing your cookware.

iQ700 Hobs – a perfect blend of precision and art.

flexInduction hob, complemented by the finest apparatus

Griddle plate (HZ390522)

The griddle plate converts your hob into a grill. It is ideal for cooking meat, fish and vegetables. It also gives your steak a perfect finish.

Teppan Yaki (HZ390512)

It heats up extremely quick, and requires little oil, making it great for cooking healthy stir-fries.

Stainless steel roaster with steaming rack (HZ390011, HZ390012)

This multipurpose roaster is a must when cooking for a crowd. A removable steamer insert is available to compliment this roaster and perfect for steaming vegetables.

Glamorous yet intelligent

No more burning: fryingSensor Plus

Simply choose the type of food being cooked and fryingSensor Plus will apply the ideal setting. It precisely measures and maintains the temperature in the pan when the ideal frying temperature has been reached, sparing you the trouble of making manual adjustments.

Step up the heat by shifting the pan: powerMove Plus

powerMove Plus defines three different heating zones for your convenience. From roasting at highest temperatures (level 9) in the front to keeping meals warm (level 1) at the back – the individual zones are activated by simply placing the cookware on them.

Any place is the right place: flexMotion

flexMotion remembers the heat settings for individual pieces of cookware, so you can move them freely across the hob – the temperature on the new cooking zone automatically adapts.

Speed, safety, efficiency
and power into one.

More efficient

The energy that induction generates travels straight to your pot and heats its contents, meaning that virtually no energy is wasted. As the heat arrives so quickly, you will use less energy than a conventional hob. Induction helps you to lower your carbon footprint and reduces your utility bills. You can even monitor the power used after each cooking session through our energy consumption feature.

All the power with powerBoost

Speed. Power. Efficiency. powerBoost increases the power output of the selected zone by 50% – perfect when time is of the essence.

Minimum fuss, maximum safety

Induction hobs are easy to clean as heat is only transferred from the inductors to the cookware directly. Spillages are unlikely to burn and there is no need to wait for the glass top to cool off before wiping it over with a cloth.

In addition, the control panel wide protection lock helps by locking the panel for 35 seconds to ensure no alterations are made.

A safety lock can be activated to ensure the hob is not switched on accidentally.

Nine steps to cooking on a higher level

Discover more about
stepFlame Technology

Siemens presents: The new Gas Cooktops with stepFlame Technology

No more leaning over to check the flame size, no more hoping that it is at the right heat level. All this guesswork has been removed from cooking with gas. From now on, whatever level you choose – you'll get exactly the heat and the flame size you need. Just as easy to operate as it sounds. That is stepFlame Technology: A groundbreaking innovation to precisely control the flame. Your meals will be delicious, and your guests will be delighted.

Favourite way to Asian specialties: Up to 6.0kW gas hob with inner flame

With the wok burner gas hob, the high temperature can be reached in seconds to ensure food color is maintained and meat is still tender and juicy. In addition, the center flame in the inner ring can be adjusted according to every different need.

Domino hobs. Cook your own way

The modular domino hobs give you the freedom to design your own cooking center. Use Siemens domino range to prepare different cuisines to suit different cultures. Available for choice, is a combination of built-in gas, induction or Teppan Yaki. They can be built-in separately, combined together or linked to full size induction and gas hobs of the same styling.

Hood

Siemens hoods are designed to impress. Developed for a life less ordinary.

Excellent control with stunning look

The new iQ700 cooker hood comes with the touchControl interface, all functions can be intuitively selected.
The air in the kitchen stays clean and fresh, no matter what you're cooking. The high-performance iQ700 hoods are both wear-resistant and pleasantly silent – thanks to the frictionless iQdrive motor. With cleanAir, it neutralises up to 95% of all cooking fumes while the air quality sensor enables it to automatically adapt the venting performance precisely as required. In addition, selected hoods are equipped with metal filters which can absorb more than 90% of the fat from the cooking fumes and convinces with its modern design.

Quiet, durable and enhanced performance
All our hoods now come with a frictionless, brushless magnetic motor - iQDrive. It reduces energy consumption, operating noise and wear and tear arising from daily usage. Siemens has full confidence in its motor and offers a 10-year warranty on our iQDrive.

Sleek designs allied with seriously innovative technology
Our chimney hoods are perfect for modern kitchens. All iQ700 hoods are designed to match our iQ700 ovens and hobs.

All our hoods come fully fitted with a number of features and benefits

Powerful speed level

Siemens hoods have made very high air flow speed possible together with the fact that the grease vapour is filtered directly via an air passage, maximum extraction rate can be achieved. In addition, selected hoods are equipped with metal filters which can absorb more than 90% of the fat from the cooking fumes and convinces with its modern design while the grease filters can be placed into the dishwasher for cleaning.

Precise control

Our wall mounted and island hoods offer 3 speed levels and 2 intensive settings which means more precise and accurate extraction levels suited to your cuisine choice and cooking style.

climateControl sensor

An intelligent climateControl sensor automatically adjusts the hood power level according to the level of steam and odour, which leads to a pleasant ambience in the kitchen. When activated, this precision both minimizes noise levels and also saves electricity, as the hood never uses more energy than is required at the time.

An illuminating experience

Siemens hoods offer excellent illumination of the hob space underneath. All our hoods feature bright, long-lasting and super energy efficient LED lights, using even less energy than a single low-voltage halogen light.

Dimmer light function

Enjoy atmospheric lighting with different levels of brightness using our dimmer light function.

Filter saturation:

Ensure maximum performance

By keeping up-to-date on maintenance information

The Home Connect App enables you to comfortably take a look at the status of the grease filter and the carbon filter in your hood. It automatically remind you when you need to clean, exchange or regenerate them in order to ensure maximum performance of your hood at any time.

For optimum performance, your extractor hood should be ducted to the outside of the house, so that the extracted air is vented outside. But sometimes, this is not practical. Therefore, all Siemens hoods can also operate in the re-circulating mode; where the air is passed through the metal filter to remove grease, and then through a carbon filter to remove odours before being directed back into the kitchen.

Re-circulate mode*

Exhaust mode

* Note: Sufficient ventilation space is required for re-circulating mode

* The pipe connecting the hood and the recirculation kit is not included.

Cooling

Life outside, freshness at home. Siemens cooling appliance keeps your food at its best for longer while saving time and energy. Siemens freshness system with iSensoric technology enables a full range of freshness-features that keeps food at its optimum temperature.

Fresh, fresher, hyperFresh.

Reduce food wastage and take control of what you eat and when, with hyperFresh.

Experience freshness innovation
Scan our QR code to find out more.

hyperFresh premium 0°C.
Fresh for up to three times longer.
Enjoy fresher food for up to three times longer, thanks to hyperFresh premium 0°C. With the 0°C drawer, fish and meat can also be stored in the perfect temperature.

hyperFresh. Enjoy freshness longer.
The rippled bottom allows cool air to circulate around your fruit and vegetables easily. As a result, you can see the quality and feel the freshness.

hyperFresh plus.
Fresh for up to two times longer.
The new hyperFresh plus drawer doesn't just store fruit and vegetables, it provides them with the right conditions to keep them fresh for up to two times longer than usual. Whether it's fruits or vegetables, simply switch the control, and the humidity will be adjusted for optimum storage of your food.

hyperFresh (plus) 0°C.
Custom freshness for fish and meat.
The hyperFresh (plus) 0°C drawers ensure that fish and meat stay fresh in ideal conditions. To create these excellent freshness promoting conditions, the temperature in this zone is around 2 - 4°C cooler than the rest of the refrigerator. The separate compartments also avoid unpleasant odour transfer.

freshSense
The inverter compressor works with minimum 3 thermal sensors inside the fridge and freezer to form the freshSense system. The sensors detect the temperature inside the compartment, taking into account the external temperature fluctuations, and automatically adjusts the temperature to its best state to keep food fresh.

* hyperFresh 0°C freshness preservation technology means that when stored in the 0°C compartment, food temperature is near 0°C and maintains a certain humidity in the storage space. Foods can thus be stored in an ultimate fresh environment. Storage conditions and results may vary depending on the type, freshness and weight of the food.

The perfect environment for fresh food

You need fresh ingredients for good meals. Siemens' freshness systems make keeping food fresh easy and flexible, so meals are always delicious regardless of when you find the time to shop.

Fruit & Vegetables

Fish & Meat

* In-house test compared with current freshness system and previous models.

For every kind of food, designed for an easy life

Although they may be behind closed doors, Siemens elegant and functional range of built-in fridge freezers are going to become the talking point in any kitchen.

airFresh filter

Strong smelling foods can be stored without worry. An efficient integrated carbon filtering net with a special honeycomb surface absorbs pungent smell and secures the flavour of each item.

Discover more

Extraordinary standard for food preservation

The multiAirflow System in the refrigerator ensures that cold air is distributed evenly throughout the interior and along the inside of the door. This keeps the temperature constant, even if the door is opened for a short period of time.

Smart and precision temperature control

Allows you to easily and precisely set and adjust the temperature and select modes such as super cooling / super freezing functions.

Super function
Adding warm or large amounts of stuff to a refrigerator can lead to an increase in the internal and food temperatures. By switching on the super cool or super freeze function before you go shopping ensures fast and safe storage of food added to the fridge or freezer without affecting the temperature of the food already in the refrigerator.

Showcase of all your food: full extension drawer
All drawers in the fridge section can be easily extended to the fullest without falling out, giving a better overview of the refrigerated food.

Deep and roomy: the bottle shelf
The bottle shelf is 115mm deep, giving plenty of room to accommodate bottles of different sizes and diameters.

Always securely closed: the softClosing door
The new softPull system makes sure that the door closes properly. In addition, a door closer is integrated into all flat hinges. Even heavily loaded, doors are closed easily and securely.

Flush folding hinge
Most models in the range feature a flush folding hinge door design that enables quick and easy fitment of the furniture door without the need for extra drilling. This hinge design holds a door weight of up to 45kg, gives an increased door opening angle of 115°, and features automatic door closing at an angle of less than 20°.

When French styling meets German ingenuity: French door refrigerator

Elegant, function and packed with iSensoric technology, your new French door refrigerator has the WOW-factor to become a talking point in your kitchen.

With a stylish design that fits into your modern home, this high quality refrigerator is not just a place to store your favorite foods. The energy efficient appliance is equipped with food preservation and flexible storage solutions that are designed to support your busy lifestyle.

Discover more

German Engineered Freshness with iSensoric

The new, giant hyperFresh premium 0°C freshness drawer

The new French door refrigerator features a new iSensoric operating concept. Thanks to integrated handle displays with motorized humidity control operated by touch, setting the temperature and humidity level have never been easier. The metal telescopic rails with two 40 litre removable boxes are pure luxury, with the added benefit that the optimal humidity level keeps food fresh for longer*.

* Food stored in hyperFresh premium 0°C drawer give a longer life span comparing to normal fridge compartment. Spinach received a longer shelf life, less weight loss and Vitamin C loss in hyperFresh premium 0°C drawer with high humidity setting. Wolfberry and milk powder received a longer shelf life, less weight gain in hyperFresh premium 0°C drawer with low humidity setting. Milk powder recorded less oxidation and lower bacterial content when it stored in hyperFresh premium 0°C drawer with low humidity setting. - Test WB-18-106 (5 Mar.2018) at China Testing & Inspection Institute for Household Electric Appliances.

Connected, and control anytime, anywhere

Fridge with Home Connect offer you the ability to flexibly control your appliances using your smart device, such as your smart phone or tablet. You can control your appliance out of home; for example activating superFreezing to cool down the freezer as you are on your way home from shopping, or setting your fridge to holiday mode whilst at the airport. You can even set up push notifications to alert you if the door has accidentally been left open, or if the temperature has risen above a certain level.

IZA airFresh filter separate smells and ensure the food hygiene in the refrigerator. With antibacterial rate up to 99.99%*, it effectively prohibit bacteria and mold development. So your refrigerator not only smells fresh all times, but always looks hygienically clean and tidy.

Premium LED lighting concept with brilliant and invisible LEDs illuminate the entire fridge compartment. An LED spotlight also lights up the hyperFresh premium 0°C drawer ideally. Lights are anti-dazzling with soft start design, and brightness can be precisely adjusted to the desired intensity.

3D multiAirflow System works with iSensoric technology to optimize the air circulation within the fridge, hyperFresh premium 0°C drawer and freezer compartments to ensure even cooling throughout the appliance. Wherever you place your groceries in the refrigerator, it will cool them quickly. The hidden open vents at the back wall of the appliance draw cold air into each compartment.

Precise, easy and intuitive
All functions such as temperature, humidity level and eco mode can be set using the duo electronic LED displays with touchControl. The touchControl display is also the communication hub for iSensoric, data is collected from various sensors for controlling other functions. Fridge, hyperFresh premium 0°C drawer and freezer temperature can be set separately.

* Up to 99.99% reduction on Escherichia coli, Staphylococcus aureus and ability to resist mould attack. – test WCI-18-30455 (13 Sept. 2018) at China Testing & Inspection Institute for Household Electric Appliances and test 2017FM03509R03D (5 Jun. 2018) at Guangdong Detection Center of Microbiology.

Side by side inverter refrigerator

Inverter compressor

The intelligent inverter technology is a clever combination of the inverter compressor and iSensoric. The sensors register every change in temperature and humidity, e.g. when the door is opened or warm foods are stored. The inverter compressor adapts its need with this information to cool food intelligently, energy-efficiently and incredibly quiet.

Automatic ice & water dispenser

- Three different modes are available: ice cubes, crushed ice or cold water. At a gentle touch of the button, you can enjoy whichever you most desire.
- The ice dispenser equips with a water filter for water quality.
- LED lighting at dispenser provides extra illumination with a beautiful and appealing effect.

Dishwasher

Our dishwashers save time and energy alongside with complete flexibility and versatility. They also come fully equipped with an array of innovative technology, stylish design and user-friendly functions.

Do your family bonding while I do your dishwashing

Making life easier with Dishwashers from Siemens.

- Delegate your cleaning.**
Indulge in your favorites activities after a well-deserved meal. “Just live life” Siemens dishwasher will take care of the rest.
- Free from bacteria and germs.**
Siemens dishwasher can reach up to 70°C high temperature during the rinsing cycle, killing 99.999%¹ of all bacteria, giving you the most hygienic wash possible.
- Deploy Siemens’ intelligent troops.**
Siemens dishwashers have built-in intelligent sensors. They can intelligently adjust the water consumption, temperature and cycle time, ensuring your dishes are always perfectly cleaned and dried, saving time and energy.

¹ 99.999% reduction on Escherichia coli, Staphylococcus aureus in Eco 50°C program, HKTEC2005316801 (date 01/2021), HKTEC2102323201 (date 06/2021), HKTEC2004455101 (date 11/2020), HKGEC2000415202 (date 08/2020) issued by SGS Hong Kong Limited.

Dishwasher vs. Traditional washing

There are many reasons to own a dishwasher:

Dishwasher	Hand wash
	
1) Protect the environment by saving 84% ¹ of water.	
	
2) Remove 99.999% ² of all bacteria and germs, protecting your family against Salmonella and E.coli.	
	
3) High water pressure, giving you an effective wash, without damaging your delicate china or glassware.	

¹ Assuming 60 litres of water is used for hand washing per day. Apply to SN65EX56CE using Eco Wash 50°C Programme.
² 99.999% reduction on Escherichia coli, Staphylococcus aureus in Eco 50°C program, HKTEC2005316801 (date 01/2021), HKTEC2102323201 (date 06/2021), HKTEC2004455101 (date 11/2020), HKGEC2000415202 (date 08/2020) issued by SGS Hong Kong Limited.

With Siemens dishwasher,
everything is under control.

Take your time and let the dishwasher do the rest
The Auto Wash 45°C - 65°C washing programme with intensiveZone option can help to clean the dirty dishes as well as the wok and pot after a meal.

Care for your loved ones
Hygiene is very important for a healthy family. Use the Intensive Wash 70°C washing programme with hygienePlus option to wash and sterilize your utensils, cutlery and milk bottles. During the rinse cycle, a high temperature of approximately 70°C is maintained for an extra period of time, killing many of the bacteria and germs, so your loved ones are well protected.

Host parties with ease
During a party, a lot of dishes would require a quick wash for reuse again, the Quick Wash 45°C washing programme would become handy at this point. A full load of dishes could be washed around 35 minutes. The Extra Dry option can be added to ensure the dishes are dry.

Sometime things have to be done fast
If you need clean plates in a hurry, varioSpeed Plus is the perfect time saver. When activated, the washing time is reduced by up to 66%. * Apply Extra Dry to ensure better drying performance.

* Does not apply to the Pre-rinse or Quick Wash cycle

Treasure your wine glasses
Washing the delicate wine glasses is not easy, but with Siemens dishwasher anything is possible. Simply place the glasses on the wine glass tray and apply the security lock; select the Glass Wash 40°C washing programme with Shine & Dry option. The result: delicate glasses look as good as new, producing better result than washing by hand.

So quiet, you won't notice the difference
The noise of washing dishes after a late dinner could be very disturbing, specially if you have an open-plan kitchen. Choose Night Wash program 50°C from Siemens dishwasher with only 42 decibels making them even quieter than whispering.

Take your mind off the household chores using the Home Connect App.

Remotely monitor your dishwasher whenever you are, whenever you want.

With Remote Monitoring, you can monitor all type of real-time information related with your connected dishwasher. You can easily check program status such as remaining cycle time or the details as salt/rinse aid level, water hardness level and be sure everything is running smoothly.

Select the ideal cleaning program easily via Home Connect App - Easy start.

The easyStart menu on the Home Connect App helps you to find the correct setting for your load quickly and easily. Just answer a few simple questions and the app will suggest the most optimum programme for your load. It is easy to adjust your dishwasher settings via the app on your mobile or tablet to keep it running at maximum efficiency.

Tab Counter: Get notified before the dishwasher tablets run out.

Tab Counter allows you to track the number of your remaining dishwasher tablets. After each purchase of tablets, just enter the number of tablets to the Home Connect app and the Tab Counter counts down the number of tablets in each cycle. It sends a notification via Home Connect app when the remaining is below the identified number. So your dishwasher tablets are always in your control when you need them.

Easily select and start cleaning programs via Home Connect App - Remote control.

Start the dishwasher remotely when away from home, check the washing time or even receive push notifications for machine maintenance on your smart device.

Added kitchen convenience.

infoLight

Projects a beam of light onto the floor to show the dishwasher is running. This prevents needing to open the door while the cycle is still active to see if it is finished.

timeLight

Check the status of the cycle easily. Useable on any surface of any colour, the innovative timeLight projects the remaining time as well as other essential information of the dishwasher cycle onto the floor.

With quiet dishwashers, this solution lets you know the dishwasher is running and how long is left at a glance, so you can avoid opening the door mid-cycle.

autoOpen dry

Gentle drying thanks to autoOpen dry. During the drying process, the door opens automatically and gently. This allows the natural drying of the dishes without the need for additional energy.

dosageAssist

Quickly and evenly dissolves dishwasher tablets throughout the entire machine, leaving no mess to clean at the end of the cycle. This also prevents the tablet getting stuck in your dishware ensuring no cleaning product residue is left after the cycle.

Favourite

Your personal favourites in one push: The Favourite button makes your dishwasher even more personal. Simply enter your most used combination of dishwashing programmes and options, and then start them conveniently at the touch of a button, via the Home Connect app or via your voice assistant.

aquaSensor

Makes sure that the optimum temperature is used depending on how dirty the dishes are, meaning that dishes are perfectly clean the first time round.

Heat exchanger

Protect your glasses from cracking with gentle water heating. Heat generated during the wash cycle is used to pre-heat the rinsing water to stop glasses being put under stress. Standard on all models.

Machine Care with Siemens dishwashers

For excellent results when washing and drying, it is important to look after your dishwasher correctly. Machine Care Programme is designed to be used together with a dishwasher cleaning detergent and provides a short, high temperature, high pressure wash designed to remove limescale and grease build up inside your dishwasher and outlet pipes. The dishwasher will remind you every 30 cycles or so to run this programme, to keep your appliance running as efficiently as possible.

flexComfort baskets and drawers – ease of use

Comfortable and fast tidying guaranteed: the new flexComfort baskets with elegant design give you a lot of freedom when loading and unloading. Whether plates, pots, cups, or wine glasses - in Siemens dishwashers with flex baskets, every dish quickly finds its place.

Thanks to new safety features, you can now place your best glasses in your dishwasher without hesitation. In addition, the new low-friction wheels make loading and unloading smoother.

Create more room above, or below

rackMatic Plus™ allows you to effortlessly adjust the height of the top basket through three different levels to provide you with ultimate loading flexibility.

Loading dishes is easier than ever

Loading and unloading with a single hand

The high quality easy glide telescopic rail in our dishwasher enable the baskets to slide smoothly and almost without any help on all 3 basket levels.

So flexible, it is suitable for all type of culinary.

Laundry

The iSensonic washing machine from Siemens Home Appliances is the secret to best laundry care. An intelligent software orchestrates its numerous sensors in highest precision for optimal use of resources and perfect washing results, always.

Extremely quiet
Siemens built-in washer dryer is some of the quietest on the market, which also set the benchmark for low noise when spinning. Relax in the comfort that your Siemens built-in laundry appliance will minimise any noise when running.

selfCleaning condenser: continuous auto-clean for conserving energy
A selfCleaning function keeps the air condenser free of lint and other dirt accumulating after the drying cycle. This enables efficient heat exchange in the condenser and protects laundry best from excessive drying and saves time and energy.

aquaSecure
The aquaSecure safety system provides protection against water leakage. If a leak does occur, aquaSecure immediately cuts off the water supply from the tap to prevent harm to the machine or other furnitures.

foamSensor
Any residual foam in the machine is alleviated by automatic rinsing procedures combined with a low speed spinning process. This design protects sensitive skin from allergy caused by chemicals in detergent.

Siemens Home Appliances Experience Centre

At its core, Siemens Home Appliances believes that life is full of possibilities. As modern living places greater emphasis on home and kitchen design, an efficient foundation means greater freedom in exploring the world.

As you personally progress through the Siemens Home Appliances Experience Centre, you'll experience the legacy of Siemens Home Appliances by an elegantly streamlined private show space that presents the iQ700 series in action. It is a visual catalogue displaying the full potential of the brand's 170-plus years of industry-leading experience, and a tradition of excellence and refined craftsmanship.

Making a life less ordinary for the end user, Siemens Home Appliances connects you with a world of timeless design, architectural aesthetics, innovation and foresight, allowing you to experience the future today. At the reimagined, state-of-the-art Experience Centre in Central, consumers will be able to personally experience the end result of this dedication to excellence.

Some of the appliances pictured in this catalogue are not available in Hong Kong.

Model numbers and specifications are for reference only and are subject to change without prior notice. Siemens is continuously seeking to improve specification, design and production of its appliances and alterations may take place regularly. All descriptions and installation diagrams are intended as a guide only. For additional technical information, full dimensional and installation details, please refer to the instruction manual supplied with the appliance. Electrical and gas connections should only be made in accordance with the regulations of the national authorities.

Right of technical modification reserved, delivery subject to availability, colors of actual products may vary from illustrations.
