Communication on progress of the realization of the UN Global Compact's principles

June 2022

The Board's introduction to the progress report on the UN Global Compact

BSH joined the Global Compact in 2004 and played a leading role in drawing up a code of conduct based on the Global Compact for Home Appliances Europe (APPLiA) in 2005. These principles are integrated in BSH's Business Conduct Guidelines and implemented throughout the Group. Our code of conduct for suppliers is also based on the UN Global Compact and ensures compliance with social and environmental standards in the upstream value chain.
