Siemens Home Appliances

Distinguishing home with Siemens' breathtaking design and technology.

For those who want to set themselves apart.

Siemens coolModul series constantly challenges the status quo to create new, fascinating combinations of technology and design.

We all place great demands on ourselves. We strive to be the best in every aspect of our lives. And just as we expect the best from ourselves, we expect it from the things that surround us. This aspiration can now be fulfilled when it comes to the kitchen. The new range of coolModul cooling appliances and its modular concept opens up new possibilities. Create your individual cooling zones and express yourself with endless products arrangements.

The coolModul range includes fridges, freezers and wine cabinets as well as a French-Door fridge freezer in one unit. coolModul accessories are sold separately, please speak to your preferred kitchen specialist for installation options and more information.

Models shown: CI36TP02 French door refrigerator with impressive wine storage space (two wine cabinets: CI24WP03)

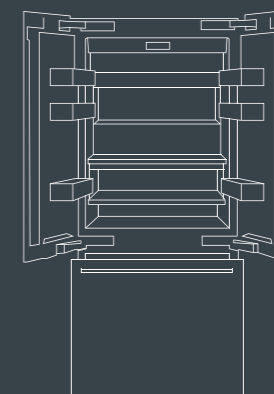

Grand opening day. Every day.

A new perspective on your food: Packed with innovative features, the all-new coolModul premium built-in fridge freezers open up to give you the best view of what is inside.

The large built-in French Door Bottom Mount has ample storage space and ensure your kitchen gets the statement it deserves. With hyperFresh plus and freshSense technologies, you will experience a truly fresh way of food storage. The storage layout provides clear-cut food separation, exact humidity levels and a more stable temperature management for prolonged food freshness.

French door refrigerator:

■ 91.4cm width

Living, the large way.

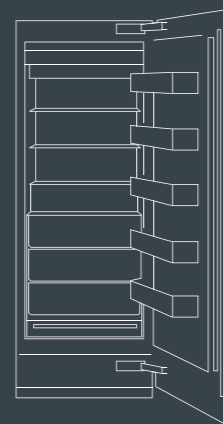

Quench your taste for more. Column by column. With these premium single door fridge and freezer.

Each of these appliances can easily become a part of side-by-side arrangement. Both deliver big when it comes to creating the cooling space you desire. Thanks to the range's great flexibility – simply decide whether fridge on the left, the freezer on the right? Or the other way round? Or rather a grand opening in the middle? An elegant wine cabinet can side the fridge or the freezer – coolModul makes sure you get it.

Single door fridge and freezer:

61cm width

61cm width

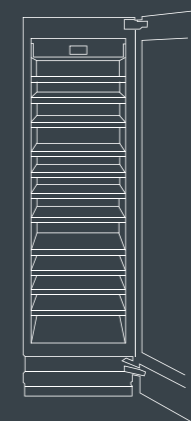

Beautifully displayed. Immaculately stored.

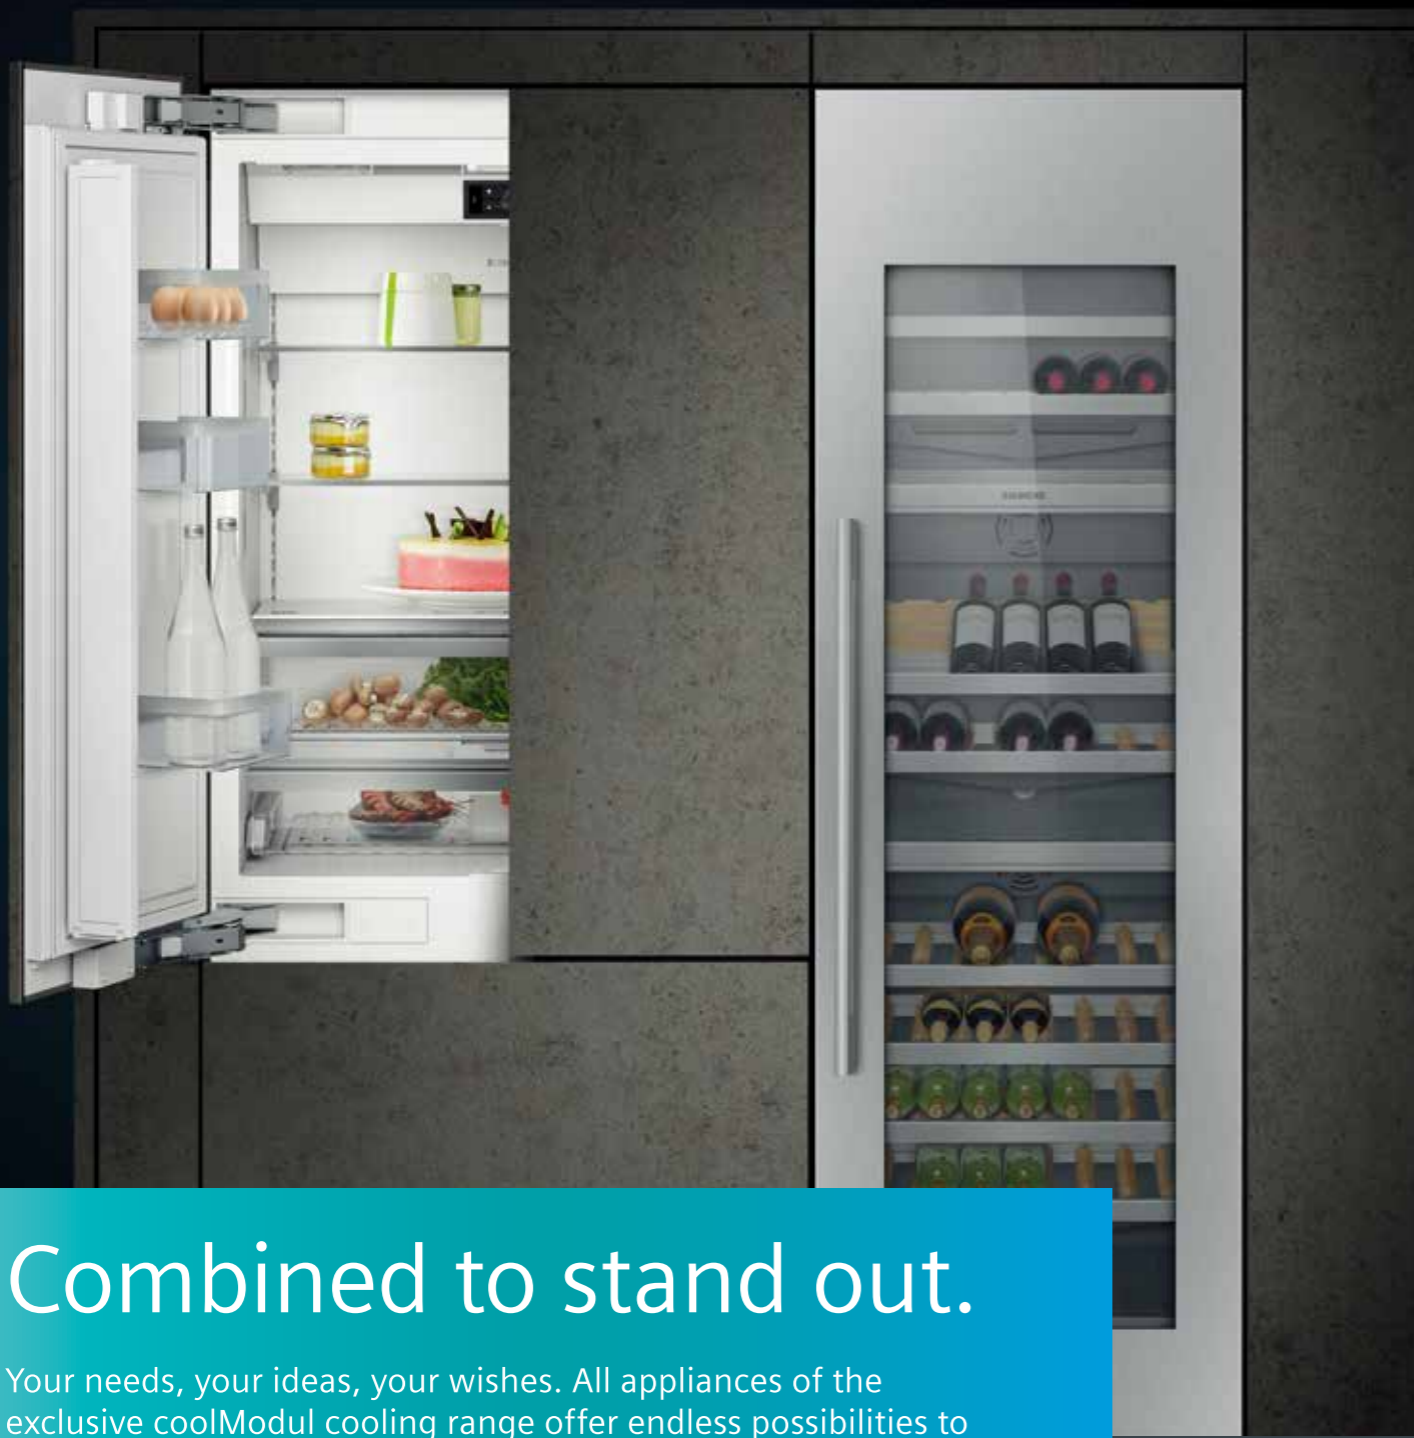

Truly understanding the culture of wine, means you respect its peculiarities. The premium built-in wine cabinets were designed specifically to create optimal conditions.

There is no need for an elaborate wine cellar if you can store your precious goods in perfect conditions in your kitchen. Our intelligently designed wine cabinet make wine cellars redundant. Now you can store your favorite liquid treasures in absolutely immaculate conditions. With up to three different cooling zones, each zone comes with independent humidity control, delivering immaculate precision with regards to storage

Wine cabinet available in two sizes:

- 45.7cm width
- 61cm width

Combined to stand out.

Your needs, your ideas, your wishes. All appliances of the exclusive coolModul cooling range offer endless possibilities to meet highest demands. They are modules that allow you to make a personal statement and possess the power to impress.

The closer to perfection you get, the more you'll find it in the details. That's why every single one of our products follows the principle of the ideal fit.

We understand that you do not want anything to restrict your idea of an immaculate solution for your cooling zone. And that's precisely the reason we designed the coolModul series – to be combined with any restrictions, but as individually as you want them to be.

Ready for anything, optimal space arrangement
 Combine the French door refrigerator with the elegant wine cooling unit to create one all-round cooling zone.
 - CI36TP02 French door refrigerator (91.4cm)
 - CI18WP03 wine cabinet (45.7cm)

Three columns of freedom, luxury with all the conveniences
 Choose three or more different columns that allow you to store large amounts of fresh and frozen goods and a carefully chosen selection of exquisite wines.
 - FI24NP32 1-door freezer (61cm)
 - CI24RP02 1-door fridge (61cm)
 - CI24WP03 wine cabinet (61cm)

A possible connoisseur's choice, with a taste for more
 The French door refrigerator is accompanied by one or two wine cabinets, displaying your distinguished taste in an impressive manner. For the wine cellar feeling, without the cellar.
 - CI36TP02 French door refrigerator (91.4cm)
 - CI24WP03 wine cabinet (61cm) or a pair

Designed to make an impact.

Design is as much about intuition as it is about quality. Amidst impressive statement designs, the coolModul range delivers multiple highlights.

Exquisite design is an essential part of the coolModul heritage. The new line of cooling appliances is further remarkable proof of this, both from the inside and the outside. Take, for example, the high-end materials and surfaces that you can't help but reach out and touch, from a splendid blend of metal and wood components to the enchanting light of the dazzling illuminations.

Smart living with your smart appliance

The coolModul range equip with Home Connect, you can control your appliances using your smart devices, such as smart phone or tablet anytime and anywhere.

You are buying frozen foods for the weekend party at supermarket, just activate superFreezing with your mobile to cool down your freezer for the new items. You are choosing a champagne to share with your loved one, just cool down your wine cabinet temperature from your mobile to get wine cabinet prepared for chilling the champagne tonight. The fridge door has accidentally been left open? You will get a push notifications to alert you.

Fronts that express your style.

Make a statement that lasts: Choose the fronts that fit your style, your vision of a kitchen. You decide whether your individual cooling space will be smoothly integrated with your cabinets behind warm wooden fronts. Or if you'd rather go for the elegant high-end stainless steel fronts that leave an instant impression – making you want to open the door to explore the inside.

Handles that fit your personality.

If you have chosen the cool and modern appearance of metal fronts, you will need to go for a set of high-grade handles, too. If you have picked the wooden fronts for your kitchen, you may wish to select our high-quality handles that can be attached to the outside, fostering a unified look in the room. In case you have already decided for different handles for your kitchen, you may as well attach them to all appliances, gaining a unify look through the whole room. Or perhaps you prefer the beauty of the integrated handles, which allow plain integration with your kitchen cabinets – with no details giving away the impressive cooling space behind the door.

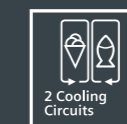

Sophisticated storage, Stunning functions

With a digital display that shows the precise temperature and helps navigate easily through the operating menus, a door sensor that sets off a warning alarm if the door is left open for any reason. The eco mode helps you to save energy, whilst the holiday setting keeps your items cooled or frozen while you are away for longer periods. coolModul series from Siemens features top of the range technologies.

Discover quality of high standards

Exclusive to CI36TP02 French door refrigerator, fridge and freezer compartments are powered by separate cooling circuits with individual temperature controls using 2 evaporators. The 2 Cooling System ensures constant even temperatures and ideal humidity. The cold air is hence not shared between the freezer and the fridge.

An intelligent freshness technology: freshSense

Fresh food helps to promote good health. The freshSense technology ensures long-lasting freshness in fridges and freezers. A combination of temperature sensors with smart electronics constantly cross-check the outsides and inside temperatures. They create a controlled environment and optimum temperature, keeping the refrigeration of the food steady. As a result, foods stay fresh and aromatic longer.

Good cooking begins with freshest ingredient

Your fresh food can now last twice as long as it would than in a standard vegetable drawer with the Siemens hyperFresh plus drawer. With an innovative humidity control feature, the drawer retains minerals and nutrients from your vegetables, salads and fruits, increasing their durability longer.

Fully extendable drawers on telescopic rails

The drawers in the fridge and freezer section can be easily pulled out completely and gives a better overview of the refrigerated food. This is ideal because nothing can fall out while getting food items stored at the back of the refrigerator even when stacked fully.

Heavy duty fixed hinge

A fixed hinge means that the furniture door is mounted to the appliance door. Advantages of Siemens fixed hinge can offer heavy duty softClosing doors that automatically close at an angle of less than 20° so you don't accidentally leave the door open. This hinge design holds a door weight of up to 62.5kg, gives an increased door opening angle of 115°.

Optimum conditions for all types of wine: adjustable temperature zones and humidity mode

An ideal solution for wine connoisseurs to store all kinds of wine together. Independently adjustable temperature zones enable you to store red and white wines and even premium champagne at optimal conditions without the need for a separate storage unit. Precisely separated compartments allow you to set up to three different temperature levels in the range of 5°C to 20°C and set dry or moist climate in each cooling compartment separately. By ensuring an optimum level of humidity, cork brittling or mould on your valuable bottles can be avoided effectively.

Chilled air breezes through your food on every level

Initial freshness and quality of food can be retained in the coolModul range for longer. The multiAirflow system actively distributes cooled air around the refrigeration compartment, ensuring an uniform temperature on all levels of the fridge. Foods cool more quickly when they are placed in the refrigerator – 40% quicker than in a standard fridge, with less humidity and no condensation build-up.

The perfect environment for food

The airFresh filter separates the odours, ensuring that the fridge smells fresh at all times. The filter neutralizes odours in the fridge, ensuring that different smells don't transfer between foods, while the anti-microbial filter stops the transfer of germs and bacteria.

Individual flare

Great for showcasing large collections, the premium LED lighting enables to create a unique atmosphere interiors, presenting wines in individual lightings. With five selectable light scenarios, it lets you find the optimal level of illumination you desire. Depending on the model, there are up to three compartments where lighting intensity can be regulated. Fitted flush on the top of each compartment, it is both elegant and long-lasting.

Quality you can see, difference you will feel

High-end quality is apparent in every detail of this range. The smoothness of the stainless steel reflects the light and conveys a certain sense of luxury. Wine cabinet shelves made of white oak draw your eye to the strong aesthetic, underlining the elegant interior and exterior at once. Fully extendable pyramid bottle trays with applications of solid aluminium in silver accentuate the quality further. You can showcase your premium wine collection in style.
