SIEMENS

Freestanding Appliances

2022 Collection

Siemens Home Appliances
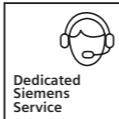

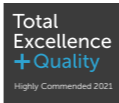

Intuitive sensor-controlled appliances, rooted in cutting-edge technology.

The Siemens premium freestanding range of appliances showcase an outstanding range of sensor-controlled products that can automatically detect, evaluate and regulate the appliances' key operational elements to deliver outstanding performance and results. The technology includes everything, from dishwashers that will automatically adjust their cycle time based on the degree of dirt, sensor-controlled cooling appliances that deliver long-lasting food freshness, washing machines with automatic detergent dosing features, and oven sensors that will prevent any food from being overcooked.

With the range including iQ700, iQ500 and iQ300 appliances, you can experience uncompromising design, innovation and technology. Be inspired when power meets intelligence, and enjoy outstanding results from Siemens Home Appliances.

German Engineering Excellence
Stunning design and high quality materials come as standard with all Siemens appliances.

They have been engineered and designed in Germany and give you the satisfaction of Quality, Durability and Reliability.

Dedicated Siemens Service
With more than 340 engineers across the UK, all employed and trained by us, our engineers have unrivalled knowledge in repairing our appliances. Each team member goes though over 400 hours of training before attending customer call outs, all for your peace of mind.

Total Excellence + Quality
Highly Commended 2021
Domestic & General
Siemens has been highly commended by D&G for the Total Excellence and Quality award. This award is based on surveys sent to customers of most of the major home appliance manufacturers and confirms our commitment to offering Siemens customers the very best service.

Warranties.

5 Year Warranty   2 Year Warranty
Siemens are proud to offer a 5 Year Warranty across the majority of our freestanding range for added peace of mind. This warranty covers all manufacturing and material faults. To register your warranty, please refer to the information on page 77. Appliances without a 5 Year Warranty come with a 2 Year Warranty as standard.

Anti-Rust 10 Year Warranty   Compressor Drive 10 Year Warranty   iQdrive® Motor 10 Year Warranty   AquaStop Lifetime Warranty
For the machines featured in this brochure, we are also able to offer longer warranties on certain parts. This includes a 10 Year Anti-Rust warranty on all dishwashers, a 10 Year Compressor Drive warranty on selected cooling appliances, a 10 Year iQdrive® warranty on selected washing machines and an AquaStop lifetime warranty on selected washing machines and dishwashers.

For further details, please refer to page 79 or visit our Siemens Home UK or Siemens Ireland website.

Welcome home

The virtualBrochure

You can now experience the entire Siemens range without leaving your house. We have developed an innovative virtualBrochure app which brings the Siemens product range to life, giving you full control of the products, where you can rotate, zoom and interact with every element.

There is also an Augmented Reality feature within the app, that allows you to visualise the range in your own home. Perfect for planning your dream kitchen.

You can download the app from both the Apple Store and Google Play Store.

Every connection
lets your world grow

Take the next step into the future: Discover how new connections redefine your daily life with Siemens and Home Connect.

To learn more about Home Connect visit siemens-home.bsh-group.com/uk

Open up a world full of exciting possibilities and gain better control over a busy lifestyle: with a range of selected Wi-Fi enabled Home Appliances, you can now also operate your appliances easily and remotely. Use the Home Connect App to access extensive functions and additional partner services – turning your house into a connected home.

Ovens
• Recipes: Discover a large and delicious variety of Siemens approved recipes. Select your favourite via the app and send the settings directly to the oven, straight from your mobile, tablet or smart device.
• Operate the oven intuitively from wherever you are, for instance preheat your oven while you are on your way home.

Coffee Centre
• coffeeWorld: Explore a wide range of additional coffee specialties from around the world. Select your choice via the app and send the drink instruction straight to your coffee machine.
• coffeePlaylist: Impress your guests by asking them to submit their coffee preferences via the app. Transfer the beverage list remotely to the coffee machine and the drinks will be prepared one after the other.
• Operate the coffee machine intuitively from wherever you are, like from your bed when you wake up in the morning, ready for the day ahead.

Hobs and Hoods
• Push notifications are a helpful guide notifying you when your appliance needs maintenance attention, such as letting you know when the filters need replacing.
• emotionLight Pro: Change the ambience of the kitchen by changing the light colour of your hood. Choose from up to 256 colours via the Home Connect App, perfect for parties.
• Cooking assistant: Use the assist tab on the Home Connect App when using the hob to help you find and select cooking methods. Send the settings directly to your hob for easier and quicker evening meals.
• Conveniently monitor your hob or hood's cooking status, turn appliances on or off or change the cooking settings via the Home Connect App, from wherever you are.

Fridge Freezers
• Manage your appliance remotely and intuitively select and activate the ideal setting for your refrigerator. Whether you are returning from a food shop or boarding a flight, adjust your fridge temperature or setting directly using the app. Receive helpful push notifications directly to your app, such as when you leave the door open.

Dishwashers
• Operate the dishwasher from wherever you are to fit around your lifestyle. Check the washing status, receive push notifications to your mobile such as when the programme has finished, or if the rinse aid needs topping up and even start the machine remotely when out of home.
• easyStart: simply select the kind of dishes and your cleaning preference on the app and Home Connect will suggest the correct cycle for your load, making chores stress free and straightforward.

Washing Machines and Tumble Dryers
• Operate laundry appliances from wherever you are and receive push notifications when the cycle is finished.
• easyStart: select from 5 easy options via the Home Connect App to identify the best wash or drying setting. Send this cycle type direct from your app to the machine.
• intelligentDry: The easiest and fastest way to obtain excellent drying results. Select the washing programme, the load volume of the laundry and the residual moisture level desired. With Home Connect mode enabled, your Siemens washing machine and dryer will communicate with each other. Thanks to intelligent process technology, your washing machine transfers all relevant data to your dryer. Your dryer automatically selects the programme and the most suitable temperature and makes an accurate estimate of the duration of the programme.

Try demo

If you have not yet registered appliances on the app you can still try out the demo function to get a better understanding of the features available to you.
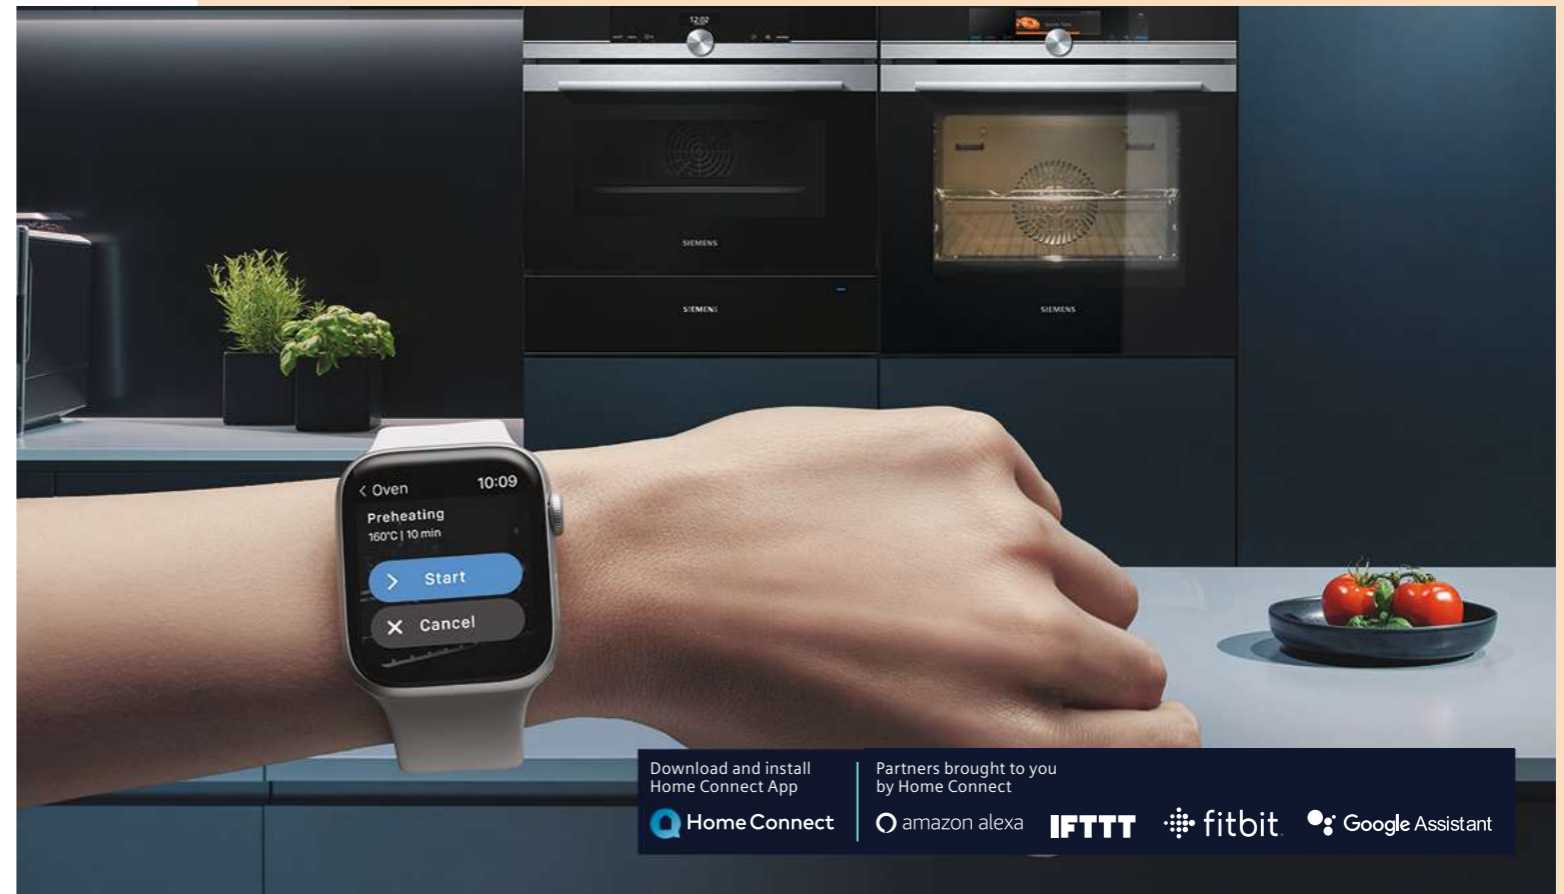

To experience the demo mode use the QR codes to download the free Home Connect app for your device, tap 'add appliances' on the home screen and choose from a range of demo appliances to experiment with.

Home Connect

Partners brought to you by Home Connect
amazon alexa   IFTTT   fitbit   Google Assistant
Our world has turned into an ever-growing network of partner services, to help you turn your house into a fully connected home.

Raise your voice and reduce your efforts with Amazon Alexa and Google Assistant.
Food and ambience are equally important when it comes to pleasing your guests, but how can you be in two places at the same time – preparing dishes in the kitchen, whilst entertaining in the living room? Now with Home Connect and the right partner, it just became possible. With just one voice command, you can start the laundry program, preheat the oven, check the dishwashing progress or ask for your favourite coffee. A world of exciting possibilities awaits – just ask your voice assistant.

There are more important things to think of than dishwasher tablets.
Make life easier with Smart Reorder via the Alexa app.
Replenishing consumables is a small thing, but it can also become a big thing when you discover you have just run out of essentials like dishwasher tablets. With Smart Reorder via the Amazon Alexa app, you can experience automatic replenishment. This feature can be set up easily, so you never need to worry about the dishwashing again.

Define your unique with IFTTT.
With IFTTT (If This Then That), you can integrate your Home Connect appliances seamlessly into your life and allow them to communicate with one another, allowing you to create your own automated applets which are perfectly tailored to your needs. Design bespoke triggers, for example, connect your coffee machine to your smart watch and your sleeping rhythm will then be recorded and directly sent to your coffee machine, which can then prepare you the most appropriate morning coffee - a double espresso after a rough night, or a latte after a good rest. There are so many possibilities to be creative; the smart lamp in your living room blinks when the laundry is done, the hood emotionLight lights up when your dinner is ready... Be inspired by checking the IFTTT partner app to learn about the latest "triggers" available.

Manage your appliances while on the run with Fitbit.
Fitbit and Home Connect can help you make sure a warm meal or your favourite cup of coffee is waiting for you after every training session. Thanks to remote control capabilities of the app, you can control your oven, coffee machine, washing machine, washer dryer, tumble dryer and dishwasher, directly from your Fitbit smartwatch. You can also monitor the status of your appliances in real time from your watch, so you can check, for example, how long is left on your washing machine cycle.

blackSteel warranties.

5 Year Warranty — All of the appliances in the blackSteel collection come with a Siemens Five Year Warranty.

Anti-Rust 10 Year Warranty — The dishwasher in the blackSteel collection has a 10 Year Anti-Rust Warranty to protect against rust in the inner cavity of the appliance.

Compressor Drive 10 Year Warranty — blackSteel cooling appliances KG39NXXDFG, KG36NXXDF, KS36VAXEP and GS36NAXFV come with a 10 Year Compressor Drive Warranty.

AquaStop Lifetime Warranty — The dishwasher in the blackSteel collection also has a lifetime AquaStop Warranty to protect against water damage caused by a defective AquaStop system.

For more information on our warranties, please see page 79.

A new class of energy efficiency

The new Energy Label, valid from March 2021.

Technological development over the past few years has resulted in a higher concentration of products that were carrying labels with a value of A+ or better. Consequently, the label with the A+++ to D scale had not been fulfilling its original function as an aid for making purchasing decisions as well as it had done formerly. Other basic conditions like user behaviour have also changed. That is why it was time to adapt the energy label. The first appliances to have the new label are washing machines, washer dryers, dishwashers, cooling appliances and wine cabinets. The new label has been appearing on these products since 1st March 2021.

The most significant change in the new energy labels is the elimination of the energy efficiency plus classes, for example A+++. Classification is now from A to G. New methods are also being used for measuring energy consumption and determining the label class. The new specifications take into account real-life usage of the product as much as possible and reflect average consumer behaviour. This means for example, that energy consumption for washing machines, washer dryers and dishwashers is no longer specified by year, but per 100 operating cycles of the particular appliance.

The duration of the label programme to be tested is also specified for these products. In the case of washing machines and washer dryers, there is even a maximum programme duration that must not be exceeded.

The test programme for labelling washing machines and washer-dryers has also changed. The new "Eco 40-60" programme can now be found on the control panel. In addition, these devices now have an even higher washing performance requirement, as well as a minimum requirement for the rinsing effect.

For dishwashers, the components of the standard place setting has also changed to reflect modern usage. For these and other reasons, it is not possible to directly convert the old (A+++ to D) efficiency classes to the new classes.

In addition, you will be able to access further product information directly via a QR code that is displayed on the energy label. The QR code forwards you to a data sheet relating to the appliance.

Look out for the new energy efficiency class icons throughout our brochure and on our product pages.

Sample energy label for dishwashers.

The energy efficiency class for dishwashers continues to be based on the "Eco" programme. However, the test standard has been changed. For example, cups, pots, and plastic utensils will be used to determine cleaning and drying performance to better reflect actual usage behavior.

What is new is the specification of the duration of the Eco programme. This programme is especially eco-friendly, is ideal for normally soiled dishes and is the most efficient programme in the combination "energy and water consumption". As with washing machines and washer dryers, energy consumption will be based on 100 cleaning cycles.

Key

1. QR code
2. Energy efficiency class
3. Energy consumption in kWh/100 operating cycles (in Eco programme)
4. Number of standard place settings for the Eco programme
5. Water consumption in litres/operating cycle (in Eco programme)
6. Duration of the "Eco" programme
7. Noise emissions expressed in (dB[A] re 1pW) and noise emission class

Home laundry. Welcome to a range designed around you

Siemens washing machines, washer dryers and tumble dryers deliver outstanding results every time.

Sleek, streamlined, and stylish, Siemens home laundry appliances not only look great in your home, they perform perfectly too. With state-of-the-art technology Siemens washing machines are extremely energy efficient, easy to use, and most importantly designed to save you time and money.

All Siemens tumble dryers feature sensor drying, which provides uniform drying results, and makes over-drying a thing of the past. All Siemens tumble dryers have been developed to make laundry easier and less of a chore.

Siemens washer dryers combine the innovative functions of the modern washing machines and dryers in one appliance to save effort, time and space. At the touch of a button, with their large display and clear operation, you can conveniently control both washing and drying cycles.

Home laundry

Siemens laundry appliances are packed full of innovative features to make it as easy as possible to keep your clothes looking and feeling great.

Time saving programmes, targeted stainRemoval feature, reduced ironing cycles, the sensoFresh odour removal system and smart connection between the washer and dryer simplify every aspect of doing the laundry.

A new level of convenience.
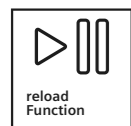

reload
The reload function allows the machine to be paused and the door opened at the next safe opportunity. It is the perfect solution when an extra item needs to be added to the load.

reload Function

antiVibration
Having antiVibration technology built-in to the design of the machine makes the appliance more stable, which, in turn, makes it quieter.

antiVibration Design
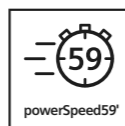

powerSpeed 59 system
With the new powerSpeed system, the laundry gets evenly soaked and heated up much faster and more consistently, for more thorough washing. Suited for up to 5kg of cottons or blended fabrics, the powerSpeed 59 result is achieved by a second pump that feeds the water into the drum at the beginning of the washing process. In parallel, the detergent is mixed with water and gets sprayed into the centre of the load, shortening the run time to only 59 minutes and increasing the wash performance.

powerSpeed59'
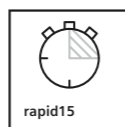

rapid15 and rapid30
What can you do in an hour? Add the laundry to your list. Need a shirt cleaning an hour before you are due to leave the house? The rapid15 and rapid30 wash, rinse and spin washing programme will save the day.

rapid15

rapid30

Drum interior light
The drum is lit after switching on the appliance, after opening and closing the door and after starting the programme for extra convenience. The light switches off automatically.

Drum interior light

Less Ironing option
At the touch of a button, 'Less Ironing' can be added to a selected programme. This ensures the machine gently and evenly drains the water and reduces the spin speed, helping to keep creases to a minimum.

Less Ironing

Outdoor
Specialised programme for washing waterproof clothing with membrane technology to protect the fabric and seams. For use with outdoor fabric detergent.

Outdoor

Outdoor/waterproof
This programme can be used to apply a waterproof treatment to breathable fabrics, prolonging the life of high-quality functional clothing like winter jackets, fleeces and ski wear.

Outdoor/ waterproof

Home Connect	just ask alexa · works with Ok Google · IFTTT

Take a load off your mind with Home Connect.

Siemens Wi-Fi-enabled washing machines with Home Connect cannot take the loading and unloading away, but they will add exciting features to give you more flexibility and choice when doing your laundry.

easyStart
The easyStart feature available in your Home Connect App helps you to find the best programme for your load. Just answer a few simple questions, for example, defining the types of fabric and the degree of soiling. The machine will then remotely suggest and send the recommended wash settings to your appliance. Go from finding the ideal programme to starting the laundry in just a few seconds. Within the app, you will discover specialist programmes for those tricky-to-wash items, from delicates, to work shirts.

Push notifications
Receive alerts to your app when the i-Dos compartment drawers need to be refilled with detergent or when the cycle is finished so you can focus on the important things.

Manage your laundry wherever, whenever. Let your laundry adjust to your timetable
A washing machine you can monitor from wherever you are provides a lot of convenience. With the Home Connect app, you always know if the laundry is ready or not, and you do not have to approach the machine to check it several times just to see if it is still running.

intelligentDry
Siemens tumble dryers with Home Connect feature intelligentDry which takes the guesswork out of selecting the right drying programme for the clothes you have just washed. Provided your Siemens washing machine with Home Connect is also connected to your home network and paired in your Home Connect account, both appliances will talk to one another. This means your washing machine tells the tumble dryer exactly what wash programme it has used and the dryer will determine the best drying programme.

By making use of easyStart in Home Connect with your washing machine and enabling intelligentDry, your Siemens laundry appliances will wash and dry your clothes to perfection.

Connected partners
With our connected partners - Amazon Alexa, Google Assistant and IFTTT - you can truly turn your living space into a fully connected home. You can speak to your appliance simply by asking your voice assistant. With the IFTTT app, connect your Home Connect appliance with a wider range of smart devices. Set up applets and digital commands to create bespoke solutions such as programming smart lights to flash when the laundry cycle ends.

For more information about Home Connect, visit Siemens Home UK: siemens-home.bsh-group.com/uk

Siemens washing machines take the hassle out of doing the washing.

Our machines take full advantage of the latest technology and innovation, and are designed to make laundry less of a chore.

Automatic programmes
Whether normal or delicate items – the automatic programme's 'Auto' function adjusts the entire wash cycle to the needs of your laundry for optimum effect. Perfect for hard-wearing fabrics this mode will even add extra detergent if your washing is heavily soiled.

Hygienically clean laundry: The hygiene programme
The hygiene programme is particularly suitable for allergy sufferers.

Meets your highest hygiene standards: The Drum Clean programme
An automatic alert after 20 washes to run the Drum Clean programme on a 90°C or 60°C wash which keeps the appliance clean and odour free.

Get perfectly clean laundry in up to 65% less time with varioSpeed
Available on all our washing machines, this feature can automatically detect when time can be saved. The smart sensors identify load volume and type of textile, hence adapting the washing machine's process time efficiently to suit the specific load.

Washing machine key features

Clear displays for easy selection.

With the Siemens Laundry collection, choose from TFT, Toledo LED or LED.

TFT
Operation is simple with a wide selection of programme options displayed on a high resolution TFT display.

Toledo LED
Available programme options are clearly displayed and can be selected via the full touch LED display.

LED
The large LED comfort display panel with touch buttons provides you with a full overview and makes operation effortless.

Just add laundry with i-Dos.

i-Dos

The i-Dos system automatically determines how much detergent is needed for each of your wash loads, based on the weight of the laundry and programme used. Saving you time, the i-Dos washing machine allows you to simply place your clothes in the drum, select your desired programme and relax. The i-Dos system uses a combination of all the sensors to automatically determine the exact amount of liquid detergent needed for each of your laundry cycles, depending on the weight of the load and what programme is being used.

With the built-in drawer conveniently holding enough liquid detergent for around 20 washes, not only does this mean you do not have to measure and fill the container for every wash, but as the correct amount of liquid detergent is used every time, your clothes will receive the perfect wash whilst saving you time, water and detergent. The result, a hassle-free laundry and perfectly clean clothes.
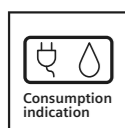

Consumption indication
See which programmes use less energy and water with the consumption value indicator. This display option provides information about the relative energy consumption in selected cycles. The more the indicators light up, the higher the consumption. So, if you are conscious about energy and water, this feature will help you decide which cycle to choose.

Fast and efficient washing machines with added peace of mind.

For futher information on washing machine warranties, please see page 79.

5 Year Warranty

iQdrive® Motor 10 Year Warranty

AquaStop Lifetime Warranty
Tough on stains, gentle on your washing.

stainRemoval System

Remove tough stains without the need for specialist products or pre-washing. Keeping your life uncluttered, our specially designed autoStain removal system (ASR) takes the effort out of cleaning tough stains. Simply load your clothes in the machine, choose a wash programme, select up to 16 stain treatments* and let ASR do the rest. This saves you time and removes the need for specialist products or pre-washing.

It happens to the best of us, a stain on your favourite dress or best shirt is part of life. However, we have a solution that is going to save you time and effort when it comes to removing stubborn stains. So next time you need to remove last night's wine from your shirt sleeve or a lipstick smudge on your favourite dress, look no further than your Siemens washing machine.

Whether it is red wine or coffee, dirt or grass, blood or even cosmetics, our autoStain removal system automatically optimises the wash settings to remove individual stains from your laundry. The system eradicates the need to pre-wash stained clothes and the use of special detergents, tackling up to 16 different types of stain. The system tailors the wash according to the nature of the stain, creating the perfect balance between the mechanical drum action, water level, wash time and temperature, thus, saving you time and money on buying specialist products. Those unforeseen accidents need not ruin your clothes anymore.

*16 stain treatments available on ASR systems with TFT displays and 4 stain treatments available on ASR systems with LED/LCD displays.
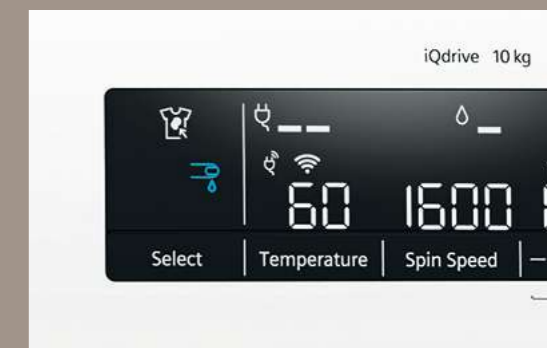

Stain selection is made easy with the large LCD Display screen.

Model shown: WM16XM81GB

A breath of fresh air:

Siemens Washer Dryers

With a Siemens washer-dryer combo, you can enjoy the luxury of complete laundry care without needing a lot of space.

A+++ **D**

Model shown: **WD4HU541GB** washer dryer
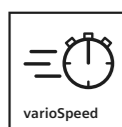

varioSpeed
Get perfectly clean laundry in up to 65% less time. This feature can automatically detect when time can be saved. The smart sensor identifies load volume and textile kind, hence adapting the washing machine's process time efficiently to suit the specific load.
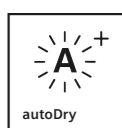

autoDry
Do not shrink away from drying with autoDry. autoDry technology prevents overheating or uneven drying. Sensors precisely measure and control the temperature and moisture of your laundry, preventing it from shrinking.

selfCleaning condenser
(Washer Dryers and Tumble Dryer)
An automatic selfCleaning condenser is integrated into many Siemens laundry appliances helping to keep the condenser lint free. This sensor-controlled programme is intuitive and collects lint during each drying cycle. The result is a continually lint-free condenser that helps to keep energy consumption constantly low at all times. You just need to clean the fluff from the lint filter after every cycle.

2 Year Warranty

iQdrive® Motor 10 Year Warranty

Fast and efficient washer dryers with added peace of mind.

For futher warranty information, please visit page 79.

Wash&Dry60
With just one push of the button, the washer dryer perfectly washes and carefully dries up to 1kg of laundry in only 60 minutes. Perfect for when you need to prepare your clothes quickly.

The 10kg washer dryer
The 10kg washer dryer model provides ultimate convenience. Ideal for families, you can achieve everything in one go with the ability to wash and dry a larger-than-average load.

smartFinish
The smartFinish programme uses gentle steam to reduce wrinkles, cutting down your ironing time. Even badly wrinkled shirts and blouses are significantly smoothed out.

Intelligent drying:
Siemens Tumble Dryers
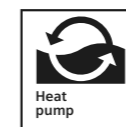

High-performance and highly-efficient (Tumble Dryers only)
Let yourself be fascinated by the state-of-the-art technology of Siemens heat pump dryers. Heat pump dryers are condensation dryers equipped with a special heat pump technology. In contrast to classic condensation dryers, energy in the form of heat is not discharged into the environment; instead it is retained for the drying process.

Siemens heat pump dryers achieve impressive energy values and consume significantly less energy than condensation dryers. Siemens heat pump dryers can also be set up, like all condensation dryers, in multiple places within the home, since the condensed water is collected in a separate container integrated into the appliance. Alternatively, if preferred, the water can be drained out if your plumbing allows.

Heat pump
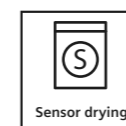

Sensor drying
All Siemens tumble dryers feature sensor drying, which provides uniform drying results, and makes over-drying a thing of the past. Sensors in the drum continually monitor the residual moisture in the laundry. They detect when the load has reached the selected drying level, and move the programme to the final cool-down period.

Sensor drying

A lot less ironing
The Less Ironing option extends the anti-crease phase period at the end of the cycle by up to 120 minutes leading to fewer creases in your laundry – so you can spend less time ironing.

Less Ironing

intelligentCleaning System
By transporting fluff through a strainer and down into a fluff depot at the bottom of the appliance, you only have to clean the filter when the sensor detects it needs emptying – instead of every cycle.

intelligent Cleaning System
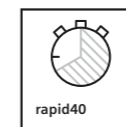

The rapid40 drying programme
With this programme, your washing will be perfectly dry in only 40 minutes, thanks to optimised temperature control and a customised cool-down phase.

rapid40

Wool or shoe drying basket
To further protect your garments and materials during the drying process, Siemens iQ500 and iQ700 tumble dryers come with a drying basket. Warm air is then passed gently around your garments, rather than tumbling them.

Wool drying basket

With the latest technology built into our appliances, Siemens offers energy-efficient and stunning looking appliances for stylish kitchens and utility spaces.
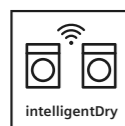

Home Connect intelligentDry feature
With intelligentDry, there is no need to select the right drying programme anymore. All relevant information from the last washing programme, e.g. load quantity and degree of moisture are sent directly to the dryer via Home Connect, and your tumble dryer automatically selects the perfectly coordinated programme, precisely calculating the expected drying time.

intelligentDry

Wool drying basket

Shoe drying basket

Stacking kits
Not only helping to stabilise your dryer on top of your washing machine, the shelf allows you to easily load or unload your dryer.

Product codes: WZ27410 (standard) / WZ27400 (with pull-out shelf).

Stacking kit

5 Year Warranty

iQdrive® Motor 10 Year Warranty

State-of-the-art technology is at the heart of all Siemens tumble dryers.

Dishwashers.
Cutting-edge
innovations for
extra shine

Siemens dishwashers take full advantage of the latest technologies.

Designed to fit in around your busy lifestyle, our standard 60cm and slimline 45cm dishwashers feature efficient, time saving and environmentally conscious programmes, sure to make your dishes shine. With a sleek and stylish design, both inside and out, Siemens dishwashers are designed to complement your home.

Dishwashers

Siemens dishwasher warranties:

5
Year Warranty

5 Year Warranty
A Siemens Five Year Warranty is available on all Siemens freestanding dishwasher models to protect against any manufacturing and material faults and defects during this warranty period.

Anti-Rust
10
Year Warranty

10 Year Anti-Rust Warranty
All Siemens dishwashers purchased from the 1st January 2012 onwards have a 10 Year Anti-Rust Warranty to protect against rust in the inner cavity of the appliance.

AquaStop
Lifetime
Warranty

Lifetime AquaStop Warranty
All Siemens freestanding dishwashers listed in this brochure have a lifetime AquaStop warranty to protect against water damage caused by a defective AquaStop system.

To find out more about your warranty and for registration, please refer to page 79.

Welcome to a new era of dishwashing with brilliantShine.

brilliantShine

Our new 60cm dishwashers feature the brilliantShine programme – a one touch solution that combines the Glass 40°C programme and the Shine & Dry option to ensure your glassware is always left sparkling clean.

Straight from dishwasher to table, Shine & Dry gives you streak-free, shining glasses. Harnessing the power of Zeolith® at its best, the special drying cycle also works just as well on plastics, pots and pans, saving you time as you no longer need to give them an extra towel dry. The brilliantShine programme with Zeolith® Drying produces sparkling glasses that you can be proud of, keeping your glassware ready to shine for your guests, even unexpected ones.

There are three factors in dishwashing that influence the shine of your glassware: temperature, cycle time, and the use of detergent. The new brilliantShine programme offers three intelligent solutions that take care of these factors:

• Zeolith® drying uses a Zeolite mineral that absorbs moisture and converts it into a gentle heat.

• The Shine & Dry option swills all residues of detergent with extra rinsing water, resulting in streak-free, shining glassware.

• The Glass 40°C programme ensures that your glassware is not exposed to excessive temperatures or spray pressures, and keeps the cycle time shorter.

Zeolith®: Super efficient drying technology.

Zeolith®-Drying

Using advanced drying technologies, Siemens dishwashers keep energy consumption to a minimum. Zeolith®, a form of zeolite mineral, has the astonishing ability to absorb moisture and convert it to heat. What does this mean for you? The heat produced naturally by the Zeolith® is used for the drying cycle. No additional energy is therefore required to heat up the contents of your dishwasher for the drying process (as with a standard drying system). This leads to excellent drying results, with less energy usage than models without Zeolith® technology.

Zeolith® is stored in the depths of the dishwasher; it regenerates itself and keeps working for the lifetime of the machine, meaning you never have to replace it. Combine this with the economy 50°C programme to get brilliant results with minimal energy.

Cleaning phase
As the mineral is heated during the cleaning cycle, it is recharged and ready to absorb moisture once more.

Drying phase
Zeolith® absorbs moisture and converts it to heat energy.
The new priority zone for gentle and thorough washing of the most valuable glasses.
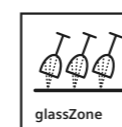

glassZone
Thanks to the new glassZone, you can now put even your most valuable glasses in the dishwasher with peace of mind. Six integrated nozzles ensure continuous but gentle water supply and thus enable thorough cleaning without damaging sensitive materials. In addition, integrated soft anti-slip elements give secure hold, protect against mechanical stress and prevent damage to glass rims.

Dishwashing key features

Take your mind off the household chores using the Home Connect App.

Connect your Wi-Fi-ready dishwasher with the Home Connect App to easily select programmes and options to start your dishwasher from wherever you are, whenever you want. Thanks to this app technology, you can control your appliance out of home and have the dishes ready exactly when you need them. Perfect for busy lifestyles. When the cycle is finished, the Home Connect App will send you a push notification to let you know, so you can focus on other things.

You can also select a number of great features through the Home Connect app, such as Speed on demand, Silence on demand, autoOpen Dry and you can set your Favourite programme and alter your wash cycle options from wherever you are to sync perfectly with your day.

easyStart menu
The easyStart menu on the Home Connect App helps you to find the correct setting for your load quickly and easily. Just answer a few simple questions and the app will suggest the optimum programme for your load. It is easy to adjust your dishwasher settings via the app on your mobile or tablet to keep it running at maximum efficiency.

Home Connect partner Services
You can even use our partner services, Amazon Alexa, Google Assistant and IFTTT to manage your machine. With Amazon Alexa, you can control your appliance by using your voice. Whether you want to start or finish the cycle, or check the remaining cycle time, just ask Alexa.

You can also benefit from automatic tablet replenishment, through Smart reorder within the Amazon Alexa app. This feature can be set up easily, so you never need to worry about running out of tablets again.

Setting your water settings has never been easier too. Whether your area experiences hard or soft water, you can set this easily within the app in seconds.

IFTTT technology allows you to integrate the Home Connect App with a wider array of connect devices. You can then produce customised applets, demands between two devices, so you can really bring your smart home to life. For example you could make your lights flash when your cycle finishes.

Learn more about Home Connect by visiting Siemens Home UK: www.siemens-home.bsh-group.com/uk

Basket systems for added flexibility and better results.
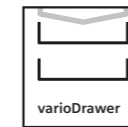

varioDrawer
By adding a third shelf for cutlery, varioDrawer removes the need for a cutlery basket and creates more space.

flex basket system
The flex basket has 2 flexible areas in the top rack and 4 in the bottom, giving you extra flexibility within the dishwasher to create more space for those larger items.

flexComfort basket system
These baskets have the ability to fold down certain compartments within the cavity for extra room – the top rack has 2 areas that can be adjusted for extra flexibility whilst the bottom basket has 8 areas that can be adjusted to create more space so the inside of your dishwasher is constantly adaptable. Anti-slip elements and stemware support hold have also been added, meaning it has never been as easy to load your dishwasher.

flexComfort Pro basket system
The flexComfort Pro basket system is designed to hold larger plates and allows you to create extra space for pots and pans with ease. Choose from up to 6 flexible areas in the top rack and up to 8 flexible areas in the bottom basket to create extra space. Blue touchpoints inside the baskets indicate all the adjustment options available at a glance, and the new easyGlide wheels on the upper basket make loading the dishwasher even easier. Other new features such as anti-slip elements and stemware support hold means you can easily and securely load your glassware and get on with your day, chore free.
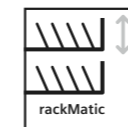

rackMatic™
Available across all storage solutions, this feature conveniently allows the user to raise and lower the height of the top basket to create more or less space, even when the dishwasher is loaded.

varioDrawer

flexComfort Pro basket

Let the dishwasher do the work, with the automatic programme sensor.

auto 45°–65° Automatic programme

Doing the dishes is now easier than ever before with sensor technology included in every one of our dishwashing appliances. From soiled pots and pans to delicate plates – every item gets the right care and treatment.

For example, the autoProgramme sensor gives brilliant results at the push of a button. As soon as the autoProgramme is activated, the aqua sensor automatically measures the cloudiness of the water to precisely adapt the amount and temperature of water needed for optimal cleaning. The sensor controls the entire washing and drying process and automatically adjusts water consumption, water temperature and cycle time to suit each load. The sensor control unit steers the whole washing and drying process to deliver brilliant results every time.

Model shown left:
SN27YI03CE 60cm freestanding dishwasher

Enhanced performance
and sparkling results

Model shown: **SN27YI03CE** 60cm dishwasher

Standard features on all models.
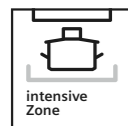

intensiveZone
Delicate items and pots and pans can be cleaned together in the same wash. The intensiveZone option increases the spray pressure and temperature in the bottom basket to handle burnt on pans, whilst delicate items can be washed safely in the top basket.

Silence programme
You will barely hear our dishwashers running. When the Silence programme is selected the dishwashers noise level is reduced by 2-3dB so you can relax in peace. This is achieved by decreasing water pressure and extending run time. Values stated in matrix under noise level.

Silence on demand
If you need silence during the wash cycle, why not pause the dishwasher for up to 30 minutes by selecting Silence on demand via the Home Connect App.
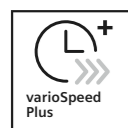

varioSpeed Plus
Use the varioSpeed Plus button to run the dishwasher significantly faster without compromising on wash quality. Standard on all models.

Speed on demand
An advanced functionality of varioSpeed Plus that cleans and dries the dishes in the shortest possible time for individual needs. This option can be selected, even if a programme is already running, activate this feature via the Home Connect App.

dosageAssist
Quickly and evenly dissolves dishwasher tablets throughout the entire machine, leaving no mess to clean at the end of the cycle.

Favourite
Your personal favourites in one push: The Favourite button makes your dishwasher even more personal. Simply enter your most used combination of dishwashing programmes and options and then start them conveniently at the touch of a button, via the Home Connect app or via the Alexa voice assistant.
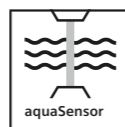

aquaSensor
Makes sure that the optimum temperature is used depending on how dirty the dishes are, meaning that dishes are perfectly clean the first time round.
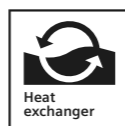

Heat exchanger
Protect your glasses from cracking with gentle water heating. Heat generated during the wash cycle is used to pre-heat the rinsing water to stop glasses being put under stress. Standard on all models.
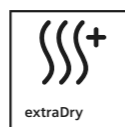

extraDry
The extraDry option can be added to any programme and will extend the drying cycle. This can be useful for harder to dry loads.
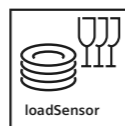

loadSensor
By monitoring that the optimum amount of water is flowing through the dishwasher throughout the cycle, the loadSensor helps to ensure that dishes are cleaned thoroughly.

Machine Care with Siemens dishwashers
For excellent results when washing and drying, it is important to look after your dishwasher correctly. All of our freestanding Siemens dishwashers include the Machine Care Programme. This is designed to be used together with a dishwasher cleaning detergent and provides a short, high temperature, high pressure wash designed to remove limescale and grease build up inside your dishwasher and outlet pipes. The dishwasher will remind you every 30 cycles or so to run this programme, to keep your appliance running as efficiently as possible.

Highlight features, available on selected models.
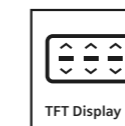

TFT display with real-time clock
The clear, touch control high resolution TFT display makes it easy to select programmes and settings and check the status of your dishwasher at a glance. Thanks to the real-time clock, it is now possible to set the exact time that you want your dishes to be ready by, for extra convenience. Perfect for delivering warm plates to the dinner table.
autoOpen dry
Gentle drying thanks to autoOpen dry. During the drying process, the door opens automatically and gently. This allows the natural drying of the dishes without the need for additional energy.

Hygiene Plus
The Hygiene Plus setting eradicates 99.9% of germs by super heating the final rinse. Ideal for chopping boards and food containers, Hygiene Plus helps to keep your family fit and healthy.

emotionLight
The emotionLight uses LED lights to create a cool blue glow emanating from inside your dishwasher.

Cooling.
Super efficient, super stylish

Elegant, functional and packed with technology, your new Siemens fridge freezer is going to become a talking point in your kitchen.

Whether you want an American Style fridge freezer that has wow-factor, a side by side fridge and freezer for extra space, or a single appliance, Siemens has a wide range of products to choose from. Our energy efficient appliances are packed with food preservation technology.

Cooling

A↑G **E**

Model shown: **KF96RSBEA**
Multi Door / American style fridge freezer

Siemens cooling warranties:

5 Year Warranty — A Siemens five year warranty is available on the Multi Door / American Style fridge freezer and all Siemens freestanding American Style fridge freezers listed in this brochure to protect against manufacturing or material faults and defects during this warranty period.

2 Year Warranty — **2 Year Warranty**
All other Siemens cooling appliances have a two year manufacturer's warranty as standard to protect against manufacturing or material faults.

Compressor Drive **10** Year Warranty — **10 Year Compressor Drive Warranty**
Available on all Siemens freestanding fridge freezers, covers defects in compressor motor.

To find out more about your warranty and for registration, please refer to page 79.

Keep your food
fresher for longer:

hyperFresh technology

Set the right conditions to ensure your food stays fresher for longer:
hyperFresh humidity drawers and near 0°C chiller drawers.
Freshness controlled: hyperFresh
Simply use the stylish control panel to adjust the humidity in the fridge. The hyperFresh drawer with rippled base allows cool air to circulate around your fruit and vegetables easily. As a result, the quality and freshness of your food will be retained.

Shelf life maximised: hyperFresh Plus
The hyperFresh Plus drawer does not only store food, it provides the right conditions to keep them fresher for longer. Whether it is fruits or vegetables, increase shelf life and reduce food wastage. Simply switch between the 2 control settings, and the humidity will be adjusted for optimum storage of your food.

Food stays fresh for longer: hyperFresh Premium
Enjoy fresher food with hyperFresh Premium. With a choice of 3 humidity controls, simply select whether you want to store fruits, vegetables, or both. The hyperFresh Premium drawer will regulate how much humidity your food receives. Be in control; these innovative drawers help to keep in nutrients and minerals to create delicious meals and fewer trips to the supermarkets, saving you time, effort and money. hyperFresh Premium is available in selected Siemens single door fridges only.

hyperFresh near 0°C chiller drawers. Perfectly fresh for fish and meat:
hyperFresh and hyperFresh plus models: The two hyperFresh near 0°C chiller drawers are especially designed for the storage needs of fish and meat. Keep them fresher in ideal conditions near 0°C to retain the vitamins and minerals for longer. With two separate compartments the transfer of unpleasant smells will be avoided.

hyperFresh Premium models: These variants come complete with a larger full-length near 0°C chiller drawer, where fish and meat are stored at the perfect temperature.

Technology that helps make life easier

With noFrost technology you will never have the job of defrosting the freezer again.

noFrost
Defrosting the freezer is now done automatically. Siemens freezers are equipped with intelligent sensor-controlled technology to save the hassle of defrosting the freezer. An air-circulation system guides the humidity to the outside of the refrigerator into an external evaporation tray, and sensors measure the degree of humidity and any frost production – ensuring the appliance is periodically defrosted without the need to turn off the appliance or empty it out. Also, ice no longer forms on the inside of the refrigerator, and the appliance's energy consumption remains consistently low.

lowFrost
Thanks to the innovative lowFrost technology with the special evaporator, not only is there less icing that is more homogeneous, but also defrosting is much faster than in conventional systems. All lowFrost models have a water drainage system, to allow removal of all thawed water during the defrosting process.

Freezer storage made easy with bigBox.

Big enough for your lifestyle, the bigBox has the capacity for storing whole frozen turkeys, an entire leg of lamb, several pizzas, as well as the height to hold dessert glasses upright.

The bigBox gives you plenty of space to accommodate and stack everything. And when you need an even larger space, all the drawers and shelves can be easily removed from the freezer compartment, quickly putting the entire freezer space at your disposal. Ideal for the holidays and entertaining.
Stay connected in your kitchen, with Home Connect.

Home Connect fridges
Cooling appliances with Home Connect offer you the ability to flexibly control your appliances using your smart device, such as your smart phone or tablet. This means you can control your appliance out of home; for example adjusting the fridge temperature to cool down as you are on your way home from a food shop, or setting your fridge to holiday mode whilst at the airport. You can even set up push notifications to alert you if the door has accidentally been left open, or if the temperature has risen above a certain level.

For more information about Home Connect visit www.siemens-home.bsh-group.com/uk

Premium cooling options

for every size and style of kitchen

Choose your style and size.

When considering which appliance to purchase look at what height space you have available, consider the width, do you need more capacity, would you like more freezer space than fridge?

Height and width
Siemens has many different sizes of cooling models to suit your needs from: 176cm-203cm high and between 60cm and 91cm in width.

French Style / Multi door	American Style	Fridge Freezers	Single Door Fridges	Single Door Freezers
183 x 81cm	178 x 91cm 179 x 91cm	203 x 70cm 186 x 60cm 203 x 60cm 176 x 60cm 201 x 60cm	186 x 60cm 161 x 60cm	186 x 60cm 161 x 60cm

The perfect fit for your kitchen.

Some of the Siemens range for 2022 feature our Latest Condenser Technology (Perfect fit)* which means space around the appliance is not required for ventilation purposes, making these products perfect should they need to be fitted into tight spaces or form part of an overall sleek built-in look.
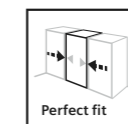

Perfect fit
Fully integrated on both sides of the appliance, models with latest condenser technology offer flexibility and convenience when positioning your fridge as no distance is needed between the wall or the furniture for ventilation, offering a Perfect fit solution.

This means it is easy to update your current cooling appliance with an efficient Siemens fridge freezer, single door fridge or single door freezer. For example, a 60cm refrigeration appliance will fit perfectly into that exact niche in your kitchen.

*Please check individual product descriptions and look for "Latest Condenser Technology (Perfect fit)" in the product matrix to see if this feature is included.

Tried and tested.

All Siemens fridges and freezers are built to last. And rigorous testing ensures that our products meet all the requirements of our customers. Every single one of our appliances is tested before it leaves the factory. For 24 hours a day, components are tested continuously to the maximum tolerance possible for the equivalent lifetime of the appliance.

Our doors are weighted and then opened and closed by the handle 200,000 times during testing to ensure they are robust (200,000 times is equivalent to opening and closing the door 27 times per day for 20 years). Materials are not only tested for suitability and longevity, we also look at how they sound and feel when we use them.

Fridge Freezer split options

Siemens fridge freezers are split into two separate compartments so you can choose what split proportions you need depending on your food usage.

Total Height: 176cm 50/50 door split	Total Height: 186cm 60/40 door split	Total Height: 201cm 70/30 door split	Total Height: 203cm 70/30 door split	Total Height: 203cm 70/30 door split

Create the perfect pair.

For extra internal space pair a Siemens upright fridge alongside a Siemens upright freezer, like the iQ500 KS36VAXEP (fridge) and the iQ500 GS36NAXFV (freezer) shown, to re-create the style of an American fridge freezer with our easy access shelving zone.

To complete this look you will need to purchase a joining strip to secure the two appliances. This can be bought through our website or through a retailer.

The joining strip product codes are as below:

KS39ZAX00 – Black Steel
KS39ZAL00 – Stainless Steel Easy Clean
KS39ZAW00 – White

Models shown:

KS36VAXEP
(fridge)   A↑G **E**   **GS36NAXFV**
(freezer)   A↑G **F**

Cooling
key features

Colour finish options.

Choose from a selection of colour finishes for your Siemens cooling appliances. There is an option to suit every kitchen:
Black Glass (dot pattern) **Black glass** **Metallic silver** **Stainless steel antiFingerprint** **Black steel antiFingerprint** **White**

Handle options.

Depending on your preference, choose from stylish quality bar handles or handles that are integrated into the appliance for a more seamless look.

Integrated Vertical **Vertical Bar Handle (Long)** **Vertical Bar Handle (Short)**

Temperature displays.

Whether you are looking for a cooling appliance with a large front display, or would prefer the controls to be hidden on the inside of the appliance, our Siemens cooling range varies from large digital screens visible on the front door of the appliance to internal LED controls.

Exterior Electronic Display

Interior Digital LED Display (iQ300)
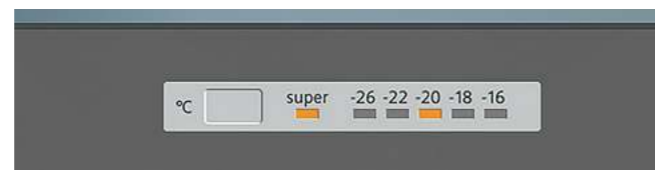

Interior Electronic LED Display

easyAccess shelving

easyLift door trays

LED Illumination

autoAirflow system

Bottle rack

easyAccess shelving zone – single door freezers
Creates additional space whilst delivering the design of an American fridge freezer interior compartment.

LED Illumination
Integrated seamlessly into the top or the side walls of our cooling appliances, LED lighting is very efficient and gives maximum illumination of your fridge and freezer.
autoAirflow system
This system works with the electronics to optimise the air circulation within the fridge and freezer compartments to ensure even cooling throughout the appliance. This means however you organise your groceries it will cool them quickly no matter where they are placed. The back wall of the appliance has open vents which work with the cooling circuit to draw cold air into each compartment.
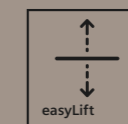

easyLift
Adjustable door trays and glass shelves that can be moved even when full for optimal convenience.

Bottle rack
Available on some models which is the perfect place to store wine of all varieties and make the best use of space in your fridge.

Experience intelligent cool

Model shown: **KG39NXXDFG** fridge freezer

A
↑
G **D**

Fresher food for longer with sensor controlled cool.
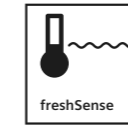

freshSense
Fresh food, guaranteed for longer. With conventional fridges, varying surrounding temperatures and the continuous opening of the refrigerator door lead to temperature changes inside the appliance. To ensure this does not affect your food, sensors immediately react. The freshSense sensors activate the moment a change in temperature is registered, for example when products are stored away, and compensates for this change in an instant. Therefore the temperature always remains within the optimum range, and your food stays fresh and delicious for longer.

Inverter motor
The intelligent inverter technology is a clever combination of the inverter motor and sensor. The sensors register every slight change in temperature or humidity inside the refrigerator, for example when the door is opened or warm food is stored. This information is then passed to the inverter motor, which adapts its need for energy accordingly. This means you can cool food intelligently and energy efficiently, and thanks to the high-quality inverter motor, incredibly quietly.
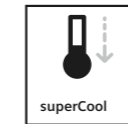

superCool
Ensures that warmer food entering the fridge does not increase the fridge temperature, which can affect other food.

superFreeze
superFreeze makes sure that warmer food added to the freezer does not raise the freezer temperature, stopping food partially defrosting.

Wrap around evaporator
This new technology creates more space in the freezer cavity, allowing for more innovations like bigBox for large food items, plus removable glass drawers.

iceTwister
Enjoy your own personal ice cube service. Simply activate the iceTwister and receive up to 20 ice cubes at once right away. The water tank is very easy to remove for reliable refilling.

Explore more features that work around your lifestyle.

Shatterproof and easy to clean: the safetyGlass shelves
All saftey glass shelves are made from extra strong, easy-to-clean safety glass. If something tips over, the spillage is contained and does not spill into the rest of the refrigerator compartment.
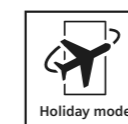

Holiday mode
When you are on holiday or a business trip, Holiday Mode will ensure that food in the freezer stays cold enough to maintain freshness whilst reducing its energy output. Our fridges also feature a warning alarm that signals when the door has been left open, ensuring that energy is not needlessly wasted and preserving the food inside.

Make a stylish statement in your kitchen.

Introducing the Multi Door / American Style fridge freezer.

From the premium double-width shelving to the sleek outer finishes – the Multi Door / American Style fridge freezer is designed to stand out in your kitchen. Behind the scenes, our cooling technologies such as multiAirFlow and fresh boxes provide the optimum temperatures to keep all your food and drink at their best while adjustable shelving and smart compartments make it easy to personalise your fridge space and keep your shopping organised. Also with noFrost technology, you will never have to defrost your freezer. With an external width of 91cm, this model is a great option if you are looking to replace or upgrade your standard American Style fridge freezer.

5 Year Warranty
A Five Year Warranty is offered on the Multi Door / American Style fridge freezer appliance to cover manufacturing or material faults.

UnEQualled coffee shop experiences. At home. In style.

Siemens EQ innovation.
Your in-home barista.

Model shown:
EQ.700 TQ703GB7 bean-to-cup coffee machine

The Siemens EQ fully automatic bean-to-cup coffee machines are designed for those that settle for nothing less than exceptional coffee.

With intelligent iAroma technology, 3 key innovations are combined together in a high quality brewing unit to deliver truly sensational tasting beverages. These intuitive appliances stand out on any premium kitchen surface with their stunning design, elegant display panels and optimal usability. From the entry-level compact EQ.300 models to the fine-tuned Wi-Fi-connected EQ9 plus, S700 model, rediscover your love for outstanding coffee with the new Siemens EQ range.

Introducing new brewing technology: iAroma system

Pioneering Siemens iAroma system: Our innovative system is engineered to release the full aroma of each bean for pure coffee enjoyment.

High performance ceramic grinder
Precise and hard wearing, the ceramic grinder ensures coffee beans are ground to an even consistency, allowing the aroma of the coffee to develop.

Smart water pump
Delivering the perfect balance of water pressure and water flow speed to extract maximum flavour.

sensoFlow intelligent heater
Sensor technology ensures an optimal drink temperature is consistently achieved; enhancing the taste of every bean.

High-quality brewing unit
All features come together in a high-quality unit, which can be easily removed to allow for fast and simple cleaning.

Perfect pleasure at the touch of a button: oneTouch function.

No matter what coffee speciality you desire, whether it is latte macchiato, creamy cappuccino or extra-strong espresso, thanks to the oneTouch Function your fully automatic coffee machine can serve you up pure coffee indulgence at the touch of a button.

For longer-lasting coffee indulgence: calc'nClean.
Maximise beverage quality, product lifetime and overall hygiene of your EQ coffee machine with the combined cleaning and descaling program. Easy to use, calc'nClean provides a thorough clean and rinse, keeping your machine perfectly clean inside.

For busy mornings and tired evenings: Drinks on demand.

All of the machines in our range offer a minimum of 4 drinks that are pre-set in the machine. From the EQ.300 models that have the option of Americano, Cappuccino, Espresso and Latte Macchiato all the way through to the top EQ.9 model that offers all of these plus 7 more drink options. Through the Home Connect App, available on model EQ.9 plus, S700 only, you are able to pick from an even wider ever-growing range of beverage options.

Enjoy café culture right at home: EQ.700

Download and install Home Connect App

Home Connect

Partners brought to you by Home Connect

just ask alexa | works with Ok Google | IFTTT

Model shown:
EQ.700 TQ703GB7 bean-to-cup coffee machine

Our most exclusive coffee machines yet.

Home Connect
With Siemens bean-to-cup coffee machines with Home Connect, you can discover the world of great coffee in just one app and benefit from exclusive styles and intuitive remote functions directly with a smartphone or tablet.

Explore new coffee styles, by selecting drinks through the app, design coffee playlists so you and your guests can select drink preferences and remotely transfer your playlist to the coffee machine so your drinks are automatically prepared one after the other. Discover new coffee styles with coffeeWorld on your smart device, and then ask Alexa to make it for you. You will even receive push notifications for your machine, for example, when the beans are running low and when the machine needs cleaning.

Connected partners including Amazon Alexa and Google Assistant, allow you to ask your coffee machine to make you a drink just by voice control whilst IFTTT allows you to create bespoke applets so that you can connect your coffee machine to other smart home appliances in order to create your own personalised routine.

baristaMode: individualise your coffee creation
There are five essential parameters of baristaMode that contribute to the quality of coffee and espresso: coffee strength, amount, temperature, coffee-to-milk ratio and brewing speed. By switching to baristaMode, you can make even finer, fully customised adjustments to please any coffee taste. This optimised setting lets you celebrate the fine art of coffee preparation.

dualBean System: separate bean containers for a pure taste
Two separate coffee bean containers, each with its own grinder, ensure that your beans never get mixed up and guarantee that the desired flavour will always be achieved. There is also easy access for the dualBean System within the Home Connect app.

Try something new, or rediscover an old favourite. Our bean-to-cup coffee machines give you the flexibility to explore a diverse and rich coffee culture, with a perfected result every time. For more information and to review the full specifications of our full range of appliances please visit the Siemens Home Appliances UK website: **siemens-home.bsh-group.com/uk**

this information and any liability is expressly disclaimed. To the extent permitted by law, BSH Home Appliances
Ltd expressly excludes: i) all conditions, warranties and other terms which might otherwise be implied by
statute, common law or the law of equity and ii) any liability for any direct, indirect or consequential loss or
damage (including, without limitation, damages for loss of business or loss of profits) arising in contract, tort
or otherwise from the use of or reliance on any information contained within this brochure or from any action
or decision taken as a result of such use or reliance. BSH Home Appliances Ltd reserves the right to modify
technical data and all other information contained within this brochure without notice. All rights reserved.
No part of this publication may be reproduced in any form or without the prior written permission of
BSH Home Appliances Ltd.

This brochure should not be regarded as an infallible guide nor as an offer of sale for a particular product.

Due to variables in the reproduction process, colours of actual products may vary slightly from those depicted.
We recommend a visit to a Siemens dealer to confirm that specifications and colours are to your satisfaction.
