FAQ | General

- **Is the declaration mandatory?**

Yes. The regulations are a prerequisite to be able to sell products in the affected states. As a supplier to BSH, thus, we depend on the information on your supplies to do so. In consequence, if we do not get the information, this may result in reduction or stop of business, if we do not have the necessary information on the day of the legal deadline latest.

- **Our company is not in the US – does the declaration obligation apply?**

Yes. While you may not be affected by the regulations directly, your products are/may be used in BSH products intended for the US market.

- **How can I protect my Intellectual Property when declaring?**

The provided template is asking only for the legally relevant substances, and if those are intentionally added. It is not required to make a full material declaration or otherwise communicate IP-relevant data. Likewise, we will not forward your data to outside business. The intention for us to know is for the official authorities asking to proof the BSH compliance with the regulation.

- **What to do, if I do not have all required information within the deadline?**

We are aware, that it may take some time to get the information from your own supply chain. If for some material codes you can not send us the information within the deadline, please do not just send nothing. Please mark the goods you are not yet able to give information correspondingly and send back the template to us. Should you require assistance, do not hesitate to ask.

- **Do I have to provide analytical tests, too?**

No. If test reports would be required, we would explicitly state that; as well what they need to contain and how you should provide them to us.

- **What happens, if I declare something wrong?**

This depends on the question if you have been providing false information by mistake or intentionally. In general, liability and consequences are identical to similar cases of providing wrong technical information on a product to a customer (e.g. wrong datasheets).

- **How often do I have to update my declaration?**

As long as the legal regulations remain unchanged, you only have to re-declare, if the declaration status of your products changes, e.g. by material change, design changes, etc.. In case of a change of the legal regulations, of course, there must be a new declaration according to the new regulation.

- **I do not sell a certain material anymore to BSH – do I still have to declare?**

Yes, as long as BSH is using a certain product, the obligation to provide information on its legal properties exist.

FAQs – Filling the template

BSH material number or VIB as well as the corresponding material description is prefilled.

Step 1

For each material number, choose a declaration status:

- *intentionally added substance contained* → Yes
- *no intentionally added substance contained* → No

BSH material no./ VIB	Product description	Declaration Status: intentionally added substance on the CA DTSC Candidate Chemical List contained
123	ABC	Yes

List of products containing DTSC Candidate Chemicals
Version 1.0

Company name:	
Date:	

California Safer Food Packaging and Cookware Act (AB 1200) requires cookware manufacturers to disclose hazardous chemicals. Chemicals to be disclosed are those from the CA Department of Toxic Substances Control's (DTSC) Candidate Chemical List:

<https://dtsc.ca.gov/scp/candidate-chemicals-list/>

Show Substance Filter

Step 2

For a material no. or VIB, where the status yes was selected, either the CAS-No. or the substance name(s) of the contained substance(s) must be filled in.

Select the line to be filled in and use the provided substance filter by pushing on the "Show Substance Filter" button

Result List 1 / 12034 Substances found

DTXSID	CAS No.	PREFERRED NAME	IUPAC NAME
DTXSID7047724	9002-84-0	Polytetrafluoroethylene	

Push substance to selected line

- In the substance filter interface, you can type in the CAS-No. or the substance name and choose the suitable entry from the list*

*Please note: the substance name can only be found if the first letter is skipped, e.g. when searching for *Perfluoroalkyl and Polyfluoroalkyl Substances (PFASs)* you have to type in **erfluoroalkyl and Polyfluoroalkyl Substances (PFASs)*

- Click on „Push substance to selected line“ and close the substance filter
- CAS-No. and substance name will then be automatically transferred to the selected line

BSH material no./ VIB	Product description	Declaration Status: intentionally added substance on the CA DTSC Candidate Chemical List contained	CAS-No.	Substance name	Sub Proj
123	ABC	Yes		Perfluoroalkyl and Polyfluoroalkyl Substances (PFASs)	(Aut)

- In case you need to declare more than one substance for a material number, copy the line and declare twice

FAQs – Filling the template

Step 3

The remaining columns are autopopulated.

There is a quick check automatically done in the last column. If everything is okay, this will be displayed accordingly in **green**. In case something is missing, this will be indicated in **red**.

CA Candidate ID <small>(Autopopulated)</small>	Hazard Trait(s) <small>(Autopopulated)</small>	Authoritative List(s) <small>(Autopopulated)</small>	Quick check
25782	Endocrine Toxicity	EC EDs	Ok
