Siemens Home Appliances

For a century, Siemens has been shaping the way you cook and live at home. In 2026, we celebrate 100 years of oven innovation – a journey that began in 1926 with the People's Cooker, a pioneering invention that transformed kitchens and redefined everyday cooking.

A century of visionary progress

Since its founding in 1847, Siemens has stood for inventive spirit, openness, and a deep understanding of people's needs. As electricity spread into German homes in the 1920s, Siemens recognised an opportunity to make daily life easier and safer. In 1926, the company introduced the People's Cooker, featuring the first "baking tube" – a tube with a heating coil. For the first time, families could prepare their Sunday roast electrically, without wood or coal. This marked the birth of Siemens ovens and the beginning of a new era in home cooking.

Over the decades, Siemens has continued to set benchmarks in technology and design. From the first-ever universal built-in cooker in 1962, who marked a milestone in the evolution of the modern kitchen, over the revolutionary pyrolytic self-cleaning function, introduced in the 1970s, or the launch of Europe's first compact combination of microwave and conventional oven in 1984, to today's ovens with integrated cameras and AI-powered functions, Siemens ovens have been a trusted partner in millions of households.

And as we step into the next century of oven evolution, the mission remains clear: to push boundaries, ask bold questions, and craft intelligent innovations that shape the future of cooking – making life at home more enjoyable, connected, and inspiring.

Kitchen design

with no limits

The perfect symbiosis of cooktop, ventilation and inspiration.

The inductionAir System combines two great appliances: a flexInduction Cooktop and the revolutionary new integrated ventilation. Thanks to this space-saving concept, you can enjoy more freedom and create a kitchen based on your personal vision. And when this vision has become reality, the exciting part only begins. Your daily cooking experience will also be more convenient and enjoyable.

Designed to impress

The design of the inductionAir System reflects a deep understanding of the modern kitchen concepts: Cooktop and ventilation merge into one appliance that is both refined and eye-catching. Above all, the ventilation keeps in line with the design of the cooktop and its user interface: complex in its idea, yet simple in the execution.

Installed to save space

The inductionAir System is easy to install and doesn't require much room inside the lower cabinet of your worktop to allow you to install standard drawers. This way, you will keep necessary storage space for your cookware and other kitchen utensils. Whatever you plan to do with your kitchen: the inductionAir System will make it possible.

Pays attention to your pans: fryingSensor Plus

Sensors in the cooktop measure the pan's temperature. Once a desired heat level has been reached, you receive a signal and the pan stays at that very level. Without worries and scorching, you always get the best results.

Powerful and quiet: iQdrive motor

The iQdrive motor is always up to the task of removing unpleasant kitchen odours. Thanks to its brushless mechanism, the motor is outstandingly long-lasting, efficient and quiet.

EX875LX67E

Rs. 4,88,990

- 80cm
- Induction Hob with Integrated Ventilation System
- 2 Flex Zones with powerMove function
- Dual lightSlider Touch Control

Coffee Centre

Meant for the coffee connoisseurs

The finishing touch for your kitchen or dining area, the Siemens coffee machine is the ultimate appliance for coffee lovers and those who like to entertain. The central control dial and TFT full colour display with interactive menu continues the iQ700 design story, whilst the concealed milk container achieves the classically understated Siemens look.

The sophisticated, fully automatic built-in iQ700 Coffee Center offers a wide selection of beverages, ranging from a strong and aromatic ristretto to an impeccably made, milk-froth cappuccino - all available at the touch of the oneTouch Function. With all these options, it's truly your Barista at home. For a life less ordinary, indeed!

Ristretto | Espresso | Espresso Macchiato | Café Crème | Cappuccino | Latte | Macchiato | Café Latte | Milk froth | Warm milk | Hot water for varieties of tea

Warmer Drawers

A Siemens warmer drawer is the ideal addition to any kitchen

We know you believe in less ordinary kitchen experiences! So whether you are keeping food warm, preheating crockery, thawing delicate frozen foods or simply in need of extra storage space, a fully coordinated Siemens warmer or accessory drawer is a must-have for your kitchen. The iQ700 range also has a push and pull mechanism, so the door opens and closes with just a touch of a button.

Upgrade your lifestyle with Siemens Dishwashers

With state-of-the-art technology, the new Siemens built-in dishwashers make washing and drying faster and more flexible than ever. The premium range of dishwashers boast of the patented Zeolith® drying technology which optimises water usage to make your kitchen experience more convenient for your urban lifestyle. With their neat and clean built-in design, they blend in perfectly with the rest of your Siemens built-in kitchen.

Zeolith®: A leap in super-efficient drying technology

Faster drying and lower energy consumption naturally

The dishwasher features a special container of Zeolith®, a mineral with the ability to absorb moisture and convert it into heat. It facilitates a faster drying process, which reduces time taken and energy consumed. This brings the energy consumption down to 0.73 kWh - the world's best energy consumption. Hence the Siemens dishwasher has been awarded the 'Innovative Prize for Climate and Environment' by the German government.

Lifelong drying The Zeolith® minerals are stored in the depths of the dishwasher and thanks to the regeneration process, it keeps on working for the entire lifetime of the dishwasher.

Steam Assist
The First Step to the Highest Cleaning Performance.

Automatic Filter Cleaning
Automatic Filter Cleaning For Excellent Results.

Tested Hygiene
Quality Viruses + Bacteria
Scientifically certified virus and bacteria protection.

Laundry solutions

Siemens innovation for complete laundry solutions

A combination of aesthetically pleasing design with ground breaking innovation, truly takes the humble chore of washing clothes into a whole new dimension.

Designs where form follows function

Siemens is known for its contemporary yet timeless iconic design.

Built-in

Subtly brilliant, the built-in washing machine or washer dryer from Siemens come with pure, clean design. The control and display elements are located inside, catching your eye only when you open the washing machine. Innovative technology couldn't be any more discreet.

Built under / Free-standing

Simplicity at its best! Easy to set up and install so that you can enjoy all the convenience. Loaded with an array of innovative functions and programmes. Free-standing or built under washing machines, tumble dryers and washer dryers are attractively designed with a worktop, base, and side walls in the same colour as the front. It looks great no matter where you put it and don't have to hide it in a recess.
