Your washing machine

Congratulations – You have opted for a modern, high-quality domestic appliance manufactured by Siemens. The washing machine is distinguished by its economical use of water and energy. Each appliance which leaves our factory is inspected thoroughly

to ensure that it functions properly and is in perfect condition. For further information and a selection of our products go to our web site: http://www.siemens-international.com or contact our customer

service centres.

Page Intended use Programmes Set and adjust programme After washing Individual settings Important information Emergency release Overview of programmes Safety instructions Consumption values Information on the display panel What to do if

Protection of the environment/

- Utilise the maximum amount of washing for the particular
- Wash normally soiled washing without prewash.
- Instead of Cottons/Coloureds 90 °C programme, select Coloureds eco 60 °C and additional function Intensive Wash. Comparable cleaning result with significantly lower energy
- Meter detergent according to the manufacturer's instructions and water hardness.
- If the washing is then dried in the tumble dryer, select spin speed according to the instructions of the dryer manufacturer.

tended use

- for use in the household only.
- for the washing of machine-washable textiles in a detergent solution,
- to be operated with cold drinking water and commercially available detergents and care products which are suitable for use in washing machines.

- Do not leave children unattended near the washing machine!

– Keep pets away from the washing machine!

* Programme setting to be tested in accordance with European standard 60 456.

Note on comparative tests: test the test programme with maximum load, **Intensive Wash** additional function selected, maximum spin speed.

A short programme which can be used for coloured items is 4 Easy-Care 40 °C, without the Intensive Wash additional function selected and set to maximum spin speed.

The values deviate from the indicated values depending on water pressure, water hardness, water inlet temperature, room temperature, type and amount of washing and degree of soiling, utilised detergent, fluctuations in the mains voltage and selected additional functions.

Care

Risk of electric shock! Pull out the mains plug: isk of explosion! No solvents!

Machine housing, control panel

- Wipe with a soft, damp cloth.
- Do not use any abrasive cloths, sponges or cleaning agents (stainless-steel cleaner).
- Immediately remove washing and cleaning agent residue.
- Do not clean the appliance with a water jet.

Clean the detergent drawer ...

... if it contains detergent or fabric softener residue.

- 1. Pull out, depress insert, completely remove. Remove insert: Press insert upwards with finger.
- 2. Clean detergent dispenser and insert with water and a brush and dry.
- 3. Attach insert and engage (connect cylinder to guide pin).
- 4. Insert detergent drawer.

Leave washing machine door open so that the drum can dry out.

Rust stains - use chlorine-free cleaning agent, not steel wool.

Not necessary if detergent dispensed correctly. However, follow the instructions of the descaler manufacturer.

depending on model

Insert for liquid detergent

Position insert for dispensing liquid detergent:

- Completely remove the detergent drawer -> Page 9.
- Push insert forwards.

Do not use insert (push up):

- for gelatinous detergents and washing powders;
- for programmes with **Prewash** and **Finish in** option.

Information on the display panel depending on model

F: 16	Close the washing machine door properly; washing may be caught.
F: 17, 29	Turn the tap on fully, supply hose kinked/jammed; Clean filter -> <i>Page 10;</i> water pressure too low.

- F: 18 Clean detergent solution pump -> Page 10; outlet pipe/drainage hose blocked.
- F: 23 Water in the base pan, appliance leaking. Call customer service!
- F: 42, 43, 44 Motor fault. Call customer service!

Other displays

Switch off the appliance, wait for 5 seconds and switch it back on. If the display appears again, call customer services -> Installation instructions, Page 7

Maintenance

- Risk of scalding! Allow deterngent solution to cool down!

Detergent solution pump

Set programme selector to Off, pull out the mains plug.

- 1. Take the drainage hose out of the holder. Remove sealing cap, allow detergent solution to flow out. Put the closing cap back on the hose.
- 2. Carefully unscrew the pump cover (residual water).
- 3. Clean the interior, pump cover thread and pump housing (fan impeller in the detergent solution pump must rotate).
- Re-insert pump cover and screw on tight, handle is upright. Insert the drain hose into the holder

To prevent unused detergent from flowing into the outlet during the next wash: Pour 1 litre of water into dispenser II and start the **Empty** programme.

Filter in the water inlet hose

Risk of electric shock! Do not immerse Aqua-Stop safety device in water (contains electric valve).

Release water pressure in the supply hose:

- 1. Turn off the tap!
- Select any programme (except Spin/Empty).
- 3. Select Start/Pause. Leave programme for approx. 40 seconds.
- 4. Set programme selector to Off. Pull out the mains plug.

Clean filter:

- 1. Depending on model:
- Remove hose from tap. Clean filter with small brush.

- Remove hose from the rear. Remove filter with pliers and clean.
 - Connect the hose and check for leaks.

What to do if ...

V V I	iat to ao ii	•••
	Water is running out.	Correctly attach/replace drainage hose.Tighten screw-fitting on the supply hose.
	Water not flowing in. Detergent not washed in.	 Start/Pause not selected? Tap not open? Filter blocked? Clean filter -> Page 10. Supply hose kinked or jammed?
	Washing machine door cannot be opened.	 Safety function active. Programme stopped? -> Page 4. Ø (Rinse stop = without final spin) selected? -> Page 4. Can be opened via emergency release only -> Page 6.
	Programme does not start.	Start/Pause or Finish in selected?Washing machine door closed?
	Detergent solution is not drained.	 Clean detergent solution pump -> Page 10. Clean outlet pipe and/or drainage hose.
	Water not visible in the drum.	- Not a fault - water below the visible area.
	Spin result not satisfactory.	 Wash small and large items of washing together. Less Ironing selected? -> Page 5. Too low speed selected? -> Page 3.
	Spin cycle actuated several times.	 Not a fault – unbalanced load detection system adjusts imbalance.
	Dispenser & not completely rinsed out.	- Remove the insert. Clean detergent drawer and insert -> Page 9.
	Odour formation in the washing machine.	 Run Cottons/Coloureds 90 °C programme without washing. Use standard detergent.
	Foam is coming out of the detergent drawer.	 Too much detergent used? Mix 1 tablespoon of fabric conditioner with ½ litre of water and pour into dispenser II in the detergent drawer. Reduce detergent dosage for the next wash cycle.
	Intense noise formation, vibrations and "wandering" during spin cycle.	 Appliance feet fixed? Secure appliance feet -> Installation instructions, Page 5. Transportation safety devices removed? Remove transportation protection devices -> Installation instructions, Page 4.
	Display panel/indicator lights do not function while the appliance is running.	Power failure?Fuse tripped? Switch on/replace fuse.If the fault occurs repeatedly, call customer service.
	Programme progress longer than usual.	 Not a fault – unbalanced load detection system adjusts imbalance by repeatedly distributing the washing. Not a fault – foam detection system active, a rinse cycle is started.
	Detergent residue on the washing.	 Occasionally phosphate-free detergents contain water-insoluble residue. Select Rinse or brush the laundry after washing.
	In the pause state Start/Pause flashes very quickly and a signal sounds.	Water level too high. Top up washing is not possible.If required, close door immediately.Select "Start/Pause" to continue the programme.
		d or a repair is required: r to Off and pull out the mains plug. stomer service -> <i>Installation instructions, Page 7</i> .
