For pre-dried, multi-layered, sensitive fabrics made of acrylic fibres, or separate small items of laundry.

For non-iron laundry made of synthetic fibres and blended fabric, cotton.

The required degree of

60 x 60 x 85 cm (height adjustable)

The door opens by itself. Push the door closed until you hear it engage.

The moisture content of the room
Your new dryer

Congratulations - You have chosen a modern, high-quality Siemens domestic appliance.
The condensation dryer is distinguished by its economical energy consumption.
Every dryer which leaves our factory is carefully checked to ensure that it functions correctly and is in perfect condition.
Should you have any questions, our after-sales service will be pleased to help.

Disposal in an environmentally-responsible manner
Dispose of packaging in an environmentally-responsible manner.
This appliance is labelled in accordance with the European guideline 2002/96/EG on waste electrical and electronic equipment - WEEE.
The guideline provides an EU-wide framework for the return and recycling of old appliances.

For further information about our products, accessories, spare parts and services, please visit: www.siemens-home.com

Intended use
- for domestic use only,
- only to be used for drying fabrics that have been washed with water.
Emptying condensation
Empty container after each drying operation!
1. Pull out condensation container keeping it horizontal.
2. Pour out condensation.
3. Always push container in fully until it clicks into place.
If Empty water flashes in the display panel ➔ What to do if..., Page 10.

Cleaning the fluff filter
Clean the fluff filter after each drying operation.
1. Open the door, remove fluff from door/door area.
2. Pull out and fold open the fluff filter.
3. Remove the fluff (by wiping the filter with your hand).
If the fluff filter is very dirty or blocked, rinse with warm water and dry thoroughly.
4. Close and reinsert the fluff filter.

Switching off the dryer
Turn the programme selector to Off.
Do not leave laundry in the dryer.

Removing the laundry
The automatic anti-crease function causes the drum to move at specific intervals, the washing remains loose and fluffy for an hour (two hours if the additional Less Ironing function is also selected—depending on model).

Programme end once lights up in the display.
Interrupt programme removing or adding laundry.

Never switch the dryer off before the drying process has ended. Drum and door may be hot!
1. Open door, the drying process is interrupted.
2. Load or remove laundry and close door.
3. If required, select a new programme and additional functions.
4. Press the Start/Stop button.
Information on laundry ...

### Labelling of fabrics

Follow the manufacturer’s care information.

- Drying at normal temperature.
- Drying at low temperature → also select Low Heat.
- Do not machine dry.

Observe safety instructions without fail → Page 11!

Do not tumble-dry the following fabrics for example:
- Impermeable fabrics (e.g. rubber-coated fabrics).
- Delicate materials (silk or curtains made from synthetic material) → they may crease
- Laundry contaminated with oil.

### Drying tips

- To ensure a consistent result, sort the laundry by fabric type and drying programme.
- Always dry very small items (e.g. baby socks) together with large items of laundry (e.g. hand towel).
- Close zips, hooks and eyelets, and button up covers.
  Tie fabric belts, apron strings, etc. together
- Do not over-dry easy-care laundry → risk of creasing!
  Allow laundry to finish drying in the air.
- Do not dry woolens in the dryer, only use to freshen them up → Page 7, Woolens Finish Programme (depending on model).
- Do not iron laundry immediately after drying, fold items up and leave for a while → the remaining moisture will then be distributed evenly.
- Machine-knitted fabrics (e.g. T-shirts or jerseys) often shrink the first time they are dried → do not use the Cupboard Dry Extra programme.
- Starched laundry is not always suitable for dryers → starch leaves behind a coating that adversely affects the drying operation.
- Use the correct dosage of fabric softener as per the manufacturer’s instructions when washing the laundry to be dried.
- Use the timer programme for small loads → this improves the drying result.

### Environmental protection/energy-saving tips

- Before drying, spin the laundry thoroughly in the washing machine → the higher the spin speed the shorter the drying time will be (consumes less energy), also spin easy-care laundry.
- Put in, but do not exceed, the maximum recommended quantity of laundry → programme overview → Page 7.
- Make sure the room is well ventilated during drying.
- Do not obstruct or seal up the air inlet.
- Keep the air cooler clean → page 6 “Care and cleaning”.

### Care and cleaning

#### Dryer housing, control panel, air cooler, moisture sensors

- Wipe with a soft, damp cloth.
- Do not use harsh cleaning agents and solvents.
- Remove detergent and cleaning agent residue immediately.
- During drying, water may collect between the door and seal. This does not affect your dryer’s functions in any way.

Clean the air cooler 5 - 6 times a year or if Clean filter flashes after cleaning the fluff filter.

#### Air cooler

- Allow the dryer to cool.
- Residual water may leak out, so place an absorbent towel underneath the maintenance door.

1. Unlock the maintenance door.
2. Open the maintenance door fully.
3. Turn both locking levers towards each other.
4. Pull out the air cooler.
5. Clean the air cooler thoroughly, Allow to drip dry.
6. Clean the seals.
7. Re-insert the air cooler, with the handle facing down.
8. Turn back both locking levers.
9. Close the maintenance door until the lock clicks into place.

#### Moisture sensors

The dryer is fitted with stainless steel moisture sensors. The sensors measure the level of moisture in the laundry. After a long period of operation, a fine layer of limescale may form on the sensors.

1. Open the door and clean the moisture sensors with a damp sponge which has a rough surface.

Do not use steel wool or abrasive materials.
After drying: laundry is to be ...

- Ironed
- Slightly ironed dry
- Not ironed
- Passed through a mangle

*The values may differ from the those specified depending on the type of fabric, mixture of laundry to be dried, residual moisture in the fabric and loading capacity.

Drum interior light (depending on model) (bulb E14, 25 W)
The drum is illuminated after the door is opened or closed, and also after the programme is started. It goes out automatically. Replacing the bulb (bulb E14, 25 W).

Optional accessories (order from the after-sales service using the order number)

Connection fittings for condensation outlet

WZ 20160 The condensation is conveyed directly via a hose.

WZ 20310 Washer-dryer stack connection set

The dryer can be placed on top of a suitable washing machine with the same width and depth to save space. This connection set must always be used to secure the dryer to the washing machine.

Same as WZ 20310, but with pull-out worktop.

Installation underneath the worktop Risk of electric shock!

Instead of the appliance covering plate, you must have a metal cover fitted by an expert.

Technical data

What to do if ...

If you cannot rectify a fault yourself, please contact our after-sales service. We will always find an appropriate solution and will avoid unnecessary visits by engineers. Trust the expertise of the manufacturer and rest assured that the repair will be carried out by trained service technicians using original spare parts. The contact details of your local after-sales service can be found in the enclosed after-sales service directory, or by calling one of these numbers:

- GB 0844 6928999 (Calls from a BT landline will be charged at up to 3 pence per minute.
- A call set-up fee of up to 6 pence may apply.)
- IE 01450 2655

When contacting the after-sales service, please quote the appliance’s product number (E no.) and production number (FD) (see the inside of the door).

Set the programme selector to Off and remove the appliance plug from the socket.

- The Start/Stop indicator lamp does not light. Mains plug plugged in?
- Programme selected?
- The Empty water and Start/ Stop indicator lamp flash. Empty the condensation container.
- If featured, check hose for condensation outlet.
- The Clean filter and Start/Stop indicator lamp flash. Clean the fluff filter and/or air cooler → Page 4/6.
- Dryer does not start. Start/Stop button selected?
- Door closed?
- Programme set?
- Ambient temperature greater than 5 °C?
- Water is running out. Align dryer horizontally.
- Clean air cooler seal.
- The door opens by itself. Push the door closed until you hear it engage.
- The required degree of dryness was not achieved or the drying time was too long. Clean the fluff filter and air cooler → Page 4/6.
- Empty condensation container → Page 4.
- Check water outlet (if featured).
- Ambient temperature higher than 35 °C → airing.
- Air inlet may be blocked → keep unobstructed.
- Was an unsuitable programme selected? → Page 7.
- Has the dryer been installed with sufficient space on all sides? Ensure that air can circulate.
- Fine layer of scale on the moisture sensors → Clean the moisture sensors → page 6.
- Laundry damp. Use the next drying programme up or use the timer programme as a supplement → Page 10.
- Warm laundry feels damper than it really is!
- The moisture content of the room has increased significantly. Make sure the room is sufficiently ventilated.
- Air inlet blocked? → keep unobstructed.
- Ensure that the air cooler has been inserted.
- Mains failure. Remove laundry from the dryer immediately and spread out. This allows the heat to dissipate.
- One of more indicator lights for programme status are flashing. Clean filter and air cooler → Page 4/6.
- Check installation conditions → Page 8.
- Switch off, leave to cool down, switch on again, restart programme.
- The interior light is not working (depending on model). Pull out the appliance plug, remove the cover cap in the interior above the door (use Torx 20 screw driver) and replace the bulb. Close the cover cap.
- Never operate the dryer without a cover cap.
Emergency
ONLY use the dryer...

- Pull the appliance plug out of the socket immediately or disconnect the fuse.
- In rooms inside the house.
- To dry fabrics.

The dryer must
NEVER...

- Be used for other purposes than those described above.
- Be modified in terms of its technology or attributes.

Dangers

- The dryer must not be used by children or persons who have not been instructed in its use.
- Do not leave children unsupervised near the dryer.
- Keep pets away from the dryer.
- Remove all objects from pockets.
- Make especially sure that cigarette lighters are removed as they constitute an explosion hazard.

Installation

- Secure loose cables → tripping hazard.
- Do not operate the dryer if there is a risk of frost.
- Connect the dryer according to specifications to an AC earthed socket, as otherwise it cannot be guaranteed that the appliance is completely safe.
- The cable cross-section must be sufficient.

Mains connection

- Only use earth-leakage circuit breakers with the following symbol: 🍀
- The appliance plug and socket must be compatible.
- Do not use multiple plugs/couplings and/or extension cables.
- Do not hold the appliance plug with wet hands → risk of electric shock.
- Do not pull the appliance plug out of the socket by its cable.
- Never pull the appliance plug out of the socket by its cable.
- Do not damage the mains lead → risk of electric shock.

Operation

- Do not lean or sit on the door → risk of tipping.
- Check the contents before you switch the dryer on.
- Dust (e.g. coal dust, flour) poses a danger: do not use the dryer → explosion hazard.
- Do not put laundry containing foamed material/rubber in the dryer → elastic material may be destroyed and the dryer may be damaged due to possible deformation of the foamed material.

Defect

- Do not use the dryer if it is defective or if you suspect it is.
- Repairs must only be carried out by the after-sales service.
- Always pull the mains plug out of the socket before changing the bulb for the interior light → risk of electric shock.

Spare parts

- Only use genuine spare parts and accessories for safety reasons.

Disposal

- Dryer: pull out the appliance plug, then cut off the mains cable from the appliance.
- Packaging: do not leave children alone with packing parts → risk of suffocation.
- All materials are environmentally sound and can be reused. Dispose of in an environmentally-responsible manner.
