Operating and Installation Manual
for Cooker Hoods

LC38S953..
Thank you for choosing Siemens cooking appliance.

Before using your appliance for the first time, please read these instructions for use carefully. They contain important information concerning your personal safety as well as on use and care of the appliance.

Any failure or losses caused by disregarding the precautions mentioned in this manual will not be covered under Siemens warranty.

Keep the instructions in a safe place for reference or for the subsequent owner. If in doubt, kindly contact our service centre or dealer.

## Key Information

### Packaging of New Cooker Hood
- You will receive your new appliance in a protective shipping carton. All packaging materials are environment friendly and recyclable. Please contribute to a better environment friendly manner.
- Do not let children play with the appliance or the packaging material.

### Disposal of Used Cooker Hood
- You should discard the used cooker hood when it cannot be used any more. Please pull out the plug of the power cord and cut off the power cord.
- Old appliances are not worthless rubbish. Valuable raw materials can be reclaimed by recycling old appliances. Before disposing of your old appliance, render it unusable.

### Before You Begin
- This appliance is intended for use in the private household and the home environment only. Use the appliance only for preparing food, not for heating rooms.
- Before using the appliance for the first time, please read this Operating and Installation Manual carefully. It contains important information concerning your personal safety as well as the use and care of the appliance.
- This Operating and Installation Manual applies to several different models. Accordingly, you may find descriptions of individual features that do not apply to your specific appliance.
- Check the appliance after unpacking it. Do not connect the appliance if it has been damaged during transport.
- The appliance must be connected to the mains only by a licensed and trained technician.

### Product Standards

- The product conforms to the following national standards:
  - IEC 60335-2-31: 2006 (Ed 4.1) Household and similar electrical appliances –safety- Part 2-31 Particular requirements for range hoods and other cooking extractors

### Safety Precautions

- **Risk of Carbon Monoxide Intoxication!**
  - When the cooker hood is operated in exhaust air mode simultaneously with a different burner which also makes use of the same chimney, care must be taken to ensure that there is an adequate supply of fresh air which will be needed by the burner for combustion.

- **Burn Risk!**
  - NEVER touch the lamp cover when the lamp is turned on or off immediately as you may get burnt.

- **Fire Risk!**
  - Gas burners operated without cookware in position produce a great amount of heat. The appliance or an extractor hood fitted above it may be damaged or set on fire. Only operate gas burners with cookware in position.
Product Introduction

Overheated fat or oil is highly inflammable. Only prepare food cooked in fat or oil when cooking can be fully supervised.

Under no circumstances attempt to extinguish burning fat or oil with water. Choke the fire using a lid or fire blanket.

Before using for the first time:

- Make sure the light bulb, grease filter frame, and oil collector of the cooker hood have already been correctly installed.

In Use:

- Accumulated oil and grease in the filter and oil collector increases the risk of fire and influences the efficiency of the cooker hood.

- Adults and children must not operate the appliance without supervision, if they are physically or mentally incapable of doing so, or if they lack the knowledge and experience required to operate the appliance correctly and safely.

- Light bulbs must always be fitted before the cooker hood is in use. Defective bulbs should be replaced immediately to prevent the remaining bulbs from overloading.

- NEVER insert or remove an electric plug with wet hands.

- DO NOT drag the wire to remove the electric plug.

After Use:

- If the cooker hood is not used for a long time, please remove the electric plug from power supply for safety.
Getting Familiar with Your New Cooker Hood

Control Panel

This appliance uses advanced touch control. The surface is easy to clean up and it has a long life time.
1. “Fan Power” button
   To turn on and off the fan power.
2. “Light” button
   To turn on and off the lamp. It can be controlled individually, without influence of other buttons.
3. The four button “ ”
   To set time, alarm, self cleaning, ventilation, and lock function.
4. “Fan Speed” button
   To control the fan speed.
5. “Time-delay” button
   To set delay time to turn off the fan power.
6. “” Gas hob → Cooker hood” Interlink function
   The cooker hood can be connected with applicable hob. (this symbol has no operating function).
   The operation of applicable hobs please follow the Operating and Installation Manual for applicable hob.
1. Every time the power is reconnect, the clock shows 88:88 and flash. Only after adjust the clock and press “ok/esc”, the flashing shops. All other function can use at all time.

2. Set clock: press “- +” till “ ” flash. And press “ok/esc” enter setting clock status. The hour will flash, press “+/-” to adjust the hour. Press “ok/esc” again. The minutes will flash, press “+/-” to adjust the minutes. After adjust the right value, press “ok/esc” finish setting clock. Normally display the clock. When go into the set the process of “+/- ok/esc” for more than 1 minutes, the setting could be automatically retreat and the program change to normal mode.

3. Turn on the fan: first press switch button “ ” fan start the 3rd speed, the window display “ ”, can be adjusted. Press fan speed button “ ” the speed can be adjusted and show the fan symbol. Press switch button “ ” again, the fan will be turn off.

4. Lamp control: Press lamp button “ ”, the lamp turn on, press again, the lamp turn off.

5. Delay function: when hood working, press delay button “ ”, window right top corner show “ ”, press “+/-” adjust the delay time, max 15 Minutes. If the time arrives, the display and motor turn off automatically.

6. If set to “0”, and no adjust in 3 seconds, it will exit the delay function, the fan will keep running. If press the switch button “ ” before delay time arrive, the fan will turn off directly.

7. Set clock, alarm, ventilation and function: First press “ ” button, show symbol “ ” and flash. Press “ ” again, 4 symbol “ ” flash, press “ok/esc” button. Enter relevant function. Set clock please reference 2nd. Set alarm function: press “ ” till symbol “ ” flash, press “ok/esc” display residual time, re-press “ok/esc” in 5 second, enter setting alarm function. The minutes, flash, press “+ -” adjust to right hour. Press “+ -” adjust to right hour. Press “ok/esc” finish the alarm setting, exit to the clock display, startup the alarm function and show “ ” till alarm finish, the buzzer will remind.
If in the setting status, in 1 minute no press “+ -ok/esc” will exit alarm to “00:00” or press “ok/esc” keep in 3s in setting status, can cancel the alarm function.

Self cleaning function: When the hood is used for a certain time, the self cleaning function icon on the display will flash. It indicates the self cleaning function should be activated. Any other functions except light and linkage function should be closed, then press the “ok/esc” button to start the self-cleaning function.

As the down-counter is shown on right-up corner of the display. The self cleaning function will keep running for about 30 minutes. When finished, the display will automatically close. During self cleaning, a long-time press on the “ok/esc” button for about 3 seconds will shop self cleaning function ahead of time. If the self cleaning lasts less than 10 minutes and is shut off, the “ ” Icon may flash which reminds of another self cleaning. When ” ” icon is flashing, users could press “ ” button for 3 seconds to cancel the reminding compulsively. During self cleaning, all buttons will not work except the following buttons- “ ” “ ” and “ok/esc”.

When the displayer doesn’t show the self cleaning icon and any other functions except light are off, press “ ” for 3 times till the “ ” icon flashes. Press “ok/esc” button again to activate the self cleaning function with the “ ” icon on. If this operation is not finished in one minute, it will exit the menu mode. During self cleaning, a long-time press on the “ok/esc” button for about 3 seconds will halt the self cleaning function ahead of time.

Attentions: Before self cleaning, clean the grease collector in case of grease spilling. During self cleaning, keep an eye on the spot in case of unexpected problems.

Remarks: please clean up the pil collector, every time before self cleaning, to prevent overflowing. During self cleaning, please don’t move away, to prevent dangerous case.

Ventilation function: when blower is not working status, press “ ” till “ ” flash, press “ok/esc” enter the ventilation function. Show “ ”, the fan will running for 5 minutes in every hour. During the 5 minutes the display will shows the symbol “ ”.
Operating Instruction

During the stop 55 minutes, the display shows “ Netz ”. During the fan running, press the “ Netz ” till “ Netz ” flash. If press “ ok/esc”, it will no respond and can not enter the ventilation function. Press any key except “ Netz ”, it will cancel ventilation functional.

Setting lock function: If the fan is stopped, press “ Netz ” till “ Netz ” flash, press “ ok/esc” to startup the lock. Except “ Netz ” and “ ok/esc”, other key no function respond. When fan running, press “ ok/esc” no respond. Exit the lock status: press “ Netz ” for 3s till “ Netz ”. Flashing, press “ ok/esc” in 5s to cancel the lock function.

8. Gas hob → Cooker hood” Interlink function:
(Tips: Symbol “ Netz ” is not an operating function.)

Condition of starting interlink: the installed distance between cooker hood and gas hob is less than 5 m. A gas hob can only match one cooker hood.

Matching code for first use: the cooker hood and gas hob are both electrified. Push “ Netz ” on cooker hood for 3 sec., it is twinkling with display “ Netz ” waiting for matching. Then do the operation according to operating manual of gas hob.

Cooker hood beeps once after matching finish, display “ Netz ” for 2 sec. so the interlink function of cooker hood and gas hob is done.

Interlink : when turning on the gas hob, the interlinked cooker hood starts under speed 3 automatically. While turning off the gas hob, the cooker hood shuts down after 3 min. under speed 1.

Light, Fan speed, Time-lapse, Turn on/off cooker hood, Auto-ventilation and Locked functions can all operate when interlinked.

Interlink function can not work when self cleaning function is running.
Read these instructions carefully and keep them in a safe place. Safety during use can only be ensured if the appliance is fitted correctly according to these installation instructions. The installer is responsible for ensuring that the appliance operates perfectly at the point of installation.

For installation, currently applicable building regulations and the regulations of local electricity and gas suppliers must be observed.

The appliance must be connected to the mains only by a licensed and trained technician.

If your kitchen is under renovation, please do not expose the cooker hood outside, as building materials, dusts, paints and volatilized gas can corrode and stain the surface of the cooker hood. The cooker hood must be installed only after decoration or renovation.

To move and install the cooker hood, do not move it while grasping the glass frame and the front panel with hands, so as to avoid breaking or loosening the glass.

If the connecting cable for this appliance is damaged, the cable must be replaced by the manufacturer or his customer service or a similarly qualified person in order to prevent serious injury to the user.

Do not install the cooker hood on a wall made of inflammable substances such as wood. The wall must be non-combustible.

Do not let the cooker hood and other gas equipments (e.g. gas water heater) share the same chimney duct.

The cooker hood follows all the relevant safety regulations.

The cooker hood must be grounded. A three pin plug is provided, and this plug must be inserted in a truly grounded receptacle. In case of current leakage, a current loop is formed by the grounding to avoid an electric shock.
Installation Instruction

Installation Position and Height

- Install the cooker hood in a dry place and avoid direct sunlight.
- The cooker hood is intended to be mounted onto the kitchen wall.
- Always mount the cooker hood over the centre of the hob.
- Ensure that the minimum distance between
  - the cooker hood and a gas hob is maintained at 750mm
  - the cooker hood and an electric hob is maintained at 650mm.

Each cooker hood is equipped with an adjustable cover. The adjustable hood is installed in the decorative cover, which may be drawn upwards to cater the installation height. Please read the dimensions shown in the figure before using the adjustable cover. The adjustable cover is fixed on the wall by using fixing brackets via screws.

Installation Instruction

Installation of Fasteners

- Determine the installation positions of the fasteners (fixing brackets and mounting rails) on the wall and follow steps indicated in photo below. If the adjustable cover is not needed, skip step 5.

- Draw a line on the wall from the ceiling to the lower edge of the hood at the centre of the location where the hood is going to be mounted.

- After determining installation positions of the fasteners on the wall, use a driller with a diameter of 10 mm to drill holes in the wall.

- Insert the accessory wall plug into the drilling holes and fix the fasteners (fixing brackets and mounting rails) onto the wall with the accessory fixing screws.

<table>

Note:
The lower edge of dimension B is the bottom point of cooker hood (Oil collector is not included).
Installation Instruction

Fixing Cooker Hood

- Hang the cooker hood on to the fixing brackets on the wall. Make sure the cooker hood does not shake or hook off. Keep the cooker hood horizontal.

- Install the accessory fixing screws in the notch as shown in the figure to prevent the cooker hood falling off from the mounting rails.

Connection of Exhausted Pipe

- Each cooker hood is equipped with an exhausted plastic pipe in a diameter of 175mm. The exhausted pipe is 1.65m long when completely stretched.

- Please connect one end of the exhausted pipe to the outlet duct on the cooker hood and connect the other end of the exhausted pipe to the common chimney duct or the drilling hole in the external wall (the diameter of the drilling hole is 180mm).

For optimum extractor hood efficiency:

1. Diameter of pipe should be as large as possible and no tight bends in pipe.

2. The exhausted pipe can not be bent into a “χ” shape (as few bends as possible).

3. Do not connect the exhausted pipe to another pipe with a diameter smaller than 175mm.

4. Do not use a pipe with a diameter smaller than 175mm with an intermediate connecting pipe.
5. If you need to connect the exhausted pipe to the common chimney duct, DO NOT deeply insert the exhausted pipe into the common chimney duct in case the resistance increased when exhausting.

6. If you need to connect the exhausted pipe directly outside the wall, a shutter (purchase additionally) is recommended to be mounted at one end of the exhausted pipe to prevent the external wind from flowing back inside. Meanwhile, make sure the exhausted pipe extending outside the wall is at least 30 mm.

7. The exhausted gas must not enter other hot flue pipes, also for exhausting smoke of other fuels.

- Fix the decorative cover and the adjustable cover on the cooker hood according to the figure.

1. Insert the decorative cover into the cooker hood vertically.

2. Draw out the adjustable cover from the decorative cover, and fix it with the fixing brackets via screws.

- Install the oil collector into the slot of the grease filter frame according to the figure.
Cleaning, Maintenance and Repair

Test Run

After installation, clean the surface of the cooker hood. Insert the electric plug of the cooker hood into the receptacle. Test run operation is performed according to the “Operating Instruction”.

Pull off the electric plug before cleaning or maintaining the cooker hood.

Wear protection gloves when cleaning or maintaining the cooker hood, to prevent injuring yourself.

DO NOT clean the cooker hood directly with water.

The cooker hood should be cleaned regularly depending on the using frequency and surrounding environment to keep a good exhausting effect and have a longer service life.

Clean Filter Frame
Clean the metal grease filter at regular intervals. For cleaning, a soft cloth can be used to clean the external surface.

Clean the Inner Frame
A soft wet cloth is used instead of a hard object or steel wire ball.

Clean the Screen
Use neutral abradant-free detergents to clean the surface of the outer shell.

Use a detergent special for glass to clean the glass surface.

DO NOT use grinding sponge, sand cleaner, soda, acid or chloride to clean the stainless steel surface.

DO NOT use any tool (e.g. steel wire ball) that may easily damage the surface of cooker hood to wipe on it.

DO NOT use industrial detergents to clean the cooker hood.

Clean the Filter Layer
Unscrew the screws for fixing the filter screen, take down the filter screen, and immerse it in water containing a detergent for over ten minutes. Then wipe the inner filter screen with cloth.

Cleaning and Maintaining Your Cooker Hood
Cleaning, Maintenance and Repair

- When two third of the oil collector is filled up, the oil collector should be cleaned to avoid any oil spills. Detach the oil collector according to the figure.

Caution!!!
The cooker hood may cause a fire, if the oil collector is not cleaned according to the methods mentioned in the operation instruction.

Caution!!!
Maintenance of the cooker hood should only be done by qualified technicians.

Refer to the following table for any possible malfunctions and remedy. If the malfunction is still present, pull out the plug of the cooker hood and contact our customer service centre.

<table>

</tr>
</tbody>
</table>

If one of the following malfunction occurs, please pull out the electric plug of the cooker hood at once and contact our customer service centre.

- Irregular operating sounds are heard after turned on.
- Vibration occurs during the operation.
- Smell, smoke or heat release from the cooker hood.
Steps to change the fluorescent lamp:

1. Switch off the extractor hood and pulling out the main plug or switching off the fuse on the installation side.

**Caution!!!**
When switched on, the fluorescent lamp becomes very hot. Even for some time after the lamp have been switched off there is still a risk of burns.

2. Using screw driver to disassembly the lamp assembly.
3. Push down the lamp assembly then take out the lamp assembly.
4. Disconnect the lamp wire.

5. Removing adhesive tape
6. Push the lamp canopy top panel and disassembly the lamp cover and lamp canopy top panel.

7. Circumrotating the fluorescent bulb until the fluorescent bulb can be move out.
8. Replace the fluorescent lamp (conventional fluorescent lamp , 220 Volt, max. 12Watt ).

**Caution!!!**
Risk of breakage !

9. Reassemble all parts according contrary sequence.

**Note:**
If the light does not function, check that the bulbs have been inserted correctly.
Considerable injuries may be caused by faulty repairs. Repairs to the appliance must only be carried out by a trained technician. If a repair is required, please call the after-sales service.

When cleaning things around the cooker hood (such as ceiling, cabinet) which may touch the hood, please wear protection glove or take other protection measures to prevent injuries.

The manufacturer accepts no responsibility for damage which arises as a result of disregarding the instruction manual.

If your cooker hood does not work properly, check the possible explanations in “Trouble Shooting” page before calling our customer service. When you call, please quote the E-Nr. (product number), serial No. and FD (production date). Information are shown on the rating label as below:

</table>

**Attention**
- Avoid turning on the gas hob without a pan or with an empty pan, so as to protect the product.
- Select a proper detergent, to avoid the coating peels off the surface of the product.
- The cooker hood needs to be cleaned regularly to remove water and grease stains on the surface. (make sure no water enter the electric components such as switch and motor)
- Wear rubber gloves when cleaning the cooker hood, to prevent your finger from being hurt in cleaning.
- Unscrew the screw nut with hands in a clockwise direction.
- Pull off the electric plug before cleaning.
- Laymen are forbidden to change and detach internal circuits of the electric appliance.
Guarantee: The guarantee conditions for this appliance are as defined by our representative in the country in which it is sold. Details regarding these conditions can be obtained from the dealer from whom the appliance was purchased. The bill of sale or receipt must be produced when making any claim under the terms of this guarantee.
