Important information...

**Avoid drying laundry items that produce a lot of fluff.**

The fluff filters must therefore be cleaned after every drying cycle.

Even if the display does not show a specific fault or error, you should always check the lint filter, the air duct opening, and the drum.

The drying time is determined by the amount of laundry, its size, and the load factor. Other factors, such as the type of fabric, the moisture content, and the room temperature, also influence the drying time.

During drying, the compressor and the pump generate some noise which is entirely normal.

The contact details of your local service center are displayed in the display panel.

If you cannot rectify a fault yourself (e.g. by switching the dryer off/on), please contact our customer service.

- Use this dryer for drying textiles. Do not use it for other purposes.
- Do not use the dryer if it is defective or if you suspect that it is. Repairs must only be carried out by the after-sales service.
- This dryer must NEVER be used for drying items that produce a lot of fluff. The fluff must be removed before drying.
- Clean the lint filter under running water.
- Use only laundry detergents that are suitable for tumble dryers.

The dryer’s heat exchanger is cleaned automatically during drying.

The process of pumping the condensation into the condensate container generates a whirring sound.

If the filter in the condensate container is dirty, it may impair the heat exchange process.

The dryer's heat exchanger is cleaned automatically during drying.

Other intermittent noises may be due to the room temperature or the load factor.

**Normal noises**

- During drying, the compressor and the pump generate some noise which is entirely normal.
- The process of pumping the condensation into the condensate container generates a whirring sound.
- *Other intermittent noises* may be due to the room temperature or the load factor.

**What to do if...**

- The drying time is too long:
  - Clean the fluff filters under running water.
  - Please clean lint filter.

- Fluff filters are full:
  - Remove the laundry from the dryer immediately.

- Other intermittent noises:
  - Power failure: Remove the laundry from the dryer immediately.

- The moisture sensor in the drum is contaminated with fluff:
  - A fine layer of fluff can impair the drying process.
  - Do not use the dryer if the laundry has been in contact with solvents, oil, wax, grease or paint (e.g. hair styling products, nail varnish remover, stain remover, cleaning solvent, etc.).

- The items are left at a temperature that ensures that the items will not be contaminated with fluff:
  - Do not turn off the dryer until the drying process ends, unless the laundry will be removed quickly and spread out, so that the heat can dissipate.

- Light things, such as long hair, may be sucked into the air inlet of the dryer:
  - Do not damage the mains lead.
  - Do not use the dryer if the laundry has been in contact with solvents, oil, wax, grease or paint (e.g. hair styling products, nail varnish remover, stain remover, cleaning solvent, etc.).

- The items are left at a temperature that ensures that the items will not be contaminated with fluff:
  - Do not damage the mains lead.
  - Do not use the dryer if the laundry has been in contact with solvents, oil, wax, grease or paint (e.g. hair styling products, nail varnish remover, stain remover, cleaning solvent, etc.).

- The items are left at a temperature that ensures that the items will not be contaminated with fluff:
  - Do not damage the mains lead.
  - Do not use the dryer if the laundry has been in contact with solvents, oil, wax, grease or paint (e.g. hair styling products, nail varnish remover, stain remover, cleaning solvent, etc.).

- Do not use the dryer if it is defective or if you suspect that it is. Repairs must only be carried out by the after-sales service.
Congratulations – you have chosen to buy a modern, high-quality Siemens domestic appliance.

A distinctive feature of the condensation dryer with heat pump and automatic cleaning of the heat exchanger is its low energy consumption.

Every dryer which leaves our factory is carefully checked to ensure that it functions correctly and is in perfect condition. Should you have any questions, our after-sales service will be pleased to help.

Environmental disposal

This appliance is labelled in accordance with European Directive 2012/19/EU concerning used electrical and electronic appliances (waste electrical and electronic equipment - WEEE). The guideline determines the framework for the return and recycling of used appliances as applicable throughout the EU.

Programmes / Fabrics

Detailed overview of the programmes and fabrics

Programme overview, Page 7.

Observe the care information on the care label.
Dryness level, timer programming and options can be individually selected depending on the selected programme and the progress of the programme.

Cottons
- Hard-wearing fabrics

Easy-Care
- Fabrics made from synthetic or blended fabrics

Mixed Fabrics
- A mixed load of fabrics made of cotton or synthetic fabrics

Shoes in basket
- Shoes

Drying Basket
- Hand or machine-washable fabrics made of wool or containing wool

Towels
- Terry-towelling laundry e.g. towels and bathrobes

Blankets
- All types of fabric except for wool and silk

Shirts / Blouses
- Shirts and blouses made of cotton and blended fabrics

Down Wear
- Cushions and quilts

Outdoor
- Weatherproof and outdoor clothing with a membrane coating and water-repellent fabrics

Super Quick 40'
- Synthetic fibres, light cotton or mixed fabrics

Dark Wash
- Fabrics made from jeans/denim

Jeans
- Large quilled fabrics containing synthetic fibres

Blankets
- Very delicate synthetic, cotton or blended fabrics

Programme selector / Off

The dryer is switched on and off by pressing the button in the programme selector.
Select the programme by turning the outer ring on the programme selector (the programme selector can be turned in both directions). The selected programme is displayed.

Display panel / Buttons

The display shows the programme duration, timer programming and options selected.
Change the functions in the display panel.

Basic Settings 3 sec.

ecoPerfect
- Energy-saving programme sequence

speedPerfect
- Accelerated programme sequence

Memory 1
- Saves or calls individual settings

Memory 2
- Start or pause the programme

Start/Pause

Drying Target
- Reduces the drying time

Less Ironing
- Reduces the pressing time

Finish in
- Time delay

Options
- Starts the programmes

Note: After-sales service is available in the EU.
**Drying**

- **Empty the condensate container**
  1. Remove the container after each drying cycle, and not during the cycle.
  2. Pour out the condensate. Push the container back in until it clicks into place.
  You must also observe the → Installation and maintenance instructions, Page 3.

- **Clean the fluff filters**
  - Clean fluff filters reduce energy consumption.
  1. Open the door. Remove fluff from the door/dor area.
  2. Pull out the inner and outer fluff filter after every drying cycle.
  3. Remove any fluff, rinse both fluff filters under running water and dry thoroughly.
  4. Fold the fluff filters closed, put them back together and reinsert into the appliance.

- **Remove the laundry and switch off the dryer**

**End of the programme ...**

**Interrupt the programme**

1. Open the door or press the Start/Pause button; the drying cycle is cancelled.
2. Add or remove laundry and close the door.
3. If required, select a new programme and close the door.

Further information can be found on Page 5.
Display panel and buttons

- **Display panel**
  - **Please clean lint filter**
  - **Please empty condensate container**
  - **Heat exchanger is being rinsed**

- **Buttons**
  - **Drying Target**
    - Select the dryness level (e.g. C/board dry) or the drying time (20 mins up to 3 hrs: 30 mins., depending on the model and programme).
  - **Less Ironing**
    - After the programme finishes, the drum moves at regular intervals to prevent creases.
    - Automatic reduced ironing function can be set in 30-minute intervals up to 120 minutes.
    - The standard setting for each programme is 60 minutes.
  - **Finish in**
    - When a programme is selected, the anticipated drying time for the maximum load is displayed. While drying, the moisture sensors detect the actual load and correct the programme length.
    - The Finish in time can be delayed in one-hour steps, up to a maximum of 24 hours.
    - Press the Finish in button repeatedly until the required number of hours is displayed (h=hour)
  - **Options**
    - **Spin Speed**; **Adjust drying level**; **low heat**

  - **Spin Speed**: The spin speed that was used for the spin in the washing machine used exclusively to display the anticipated drying time (Finish in time) more precisely.
  - **Adjust drying level**: The drying result (e.g. C/board dry) can be increased in three stages (+1 - max. +3); exception: Timer programme → default setting = 0. If one programme has been finely adjusted, the setting is retained for the others.
  - **low heat**: Reduced temperature for delicate fabrics e.g. polyacrylic, polyamide or elastane, with a longer drying time.

- **ecoPerfect**
  - For drying in a shorter time at a higher level of energy consumption.

- **Memory 1/2**
  - For saving individual programme settings that are used frequently. Use the programme selector to select the required programme. Press and hold the Memory 1/2 button for 3 seconds until the required programme has been saved.
  - To select the saved programme, briefly press the Memory 1/2 button. The programme that is called from Memory 1 or 2 is displayed on the display panel.

- **Basic Settings 3 sec**.
  - **End signal, button signal, auto power-off and language**

  - **End signal**: The end signal can be activated off/quiet/medium/loud very loud.
  - **auto power-off**: Activate/deactivate by pressing the Basic Settings 3 sec. buttons. The dryer automatically switches off, depending on your selection, after 15, 30 or 60 minutes. The setting is active after Less Ironing or the programme ends.
  - **language**: Select the required language.

Information on laundry...

**Labelling of fabrics**

- Follow the manufacturer’s care information.
- Suitable for tumble drying
- Dry at normal temperature.
- Dry at low temperature.
- Do not tumble dry.

- **Do not tumble-dry the following fabrics**:
  - Non-breathable fabrics (e.g. rubber-coated).
  - Delicate materials (silk, curtains made from synthetic material) → these may crease.
  - Oil-stained laundry.

**Drying tips**

- To ensure a consistent drying result, sort the laundry by fabric type and drying programme.
- Always dry very small fabrics (e.g. baby socks) together with large items of laundry (e.g. towels).
- Close zips, hooks and eyelets, and button up covers. Tie cloth belts, apron strings, etc. together or use a laundry bag.
- Do not over-dry easy-care laundry → Risk of creasing. Allow laundry to finish drying in the air.
- Do not iron laundry immediately after drying; fold items up and leave for a while → residual moisture will then be distributed evenly.
- Knitted fabrics (e.g. T-shirts, jerseys) often shrink slightly the first time they are tumble-dried.
- Do not use the C/board dry extra programme.
- Starched laundry is not always suitable for dryers → starch leaves behind a coating that reduces the drying effect.
- When washing laundry that is to be tumble-dried afterwards, use the correct amount of fabric softener as specified in the manufacturer's instructions.
- With a small load, use the Timed programme.

**Environmental protection / Energy-saving tips**

- Before drying, spin the laundry in the washing machine → the higher the spin speed, the shorter the drying time will be, thus less energy is consumed. Also spin easy-care laundry.
- Use the maximum recommended capacity, but do not exceed it → Programme overview, Page 7.
- Make sure the room is well ventilated during drying.
- Clean the fluff filters after every drying cycle → Cleaning the fluff filters, Page 4.
- Keep the supply of cool air unobstructed → Do not cover or block the air inlet.
### Overview of Programmes

Refer to the table of consumption rates on Page 9 and the notes on Page 6.

---

- **Sort the laundry according to type of textile and fabric.** Fabrics must be suitable for tumble drying.

- **Dryness levels can be individually selected.** Cboard dry extra, Cboard dry and Iron dry (depending on the model and programme). Degree of dryness can be finely adjusted (depending on the programme). Multi-layered fabrics require a longer drying time than single-layered items of clothing.

Recommendation: Dry separately.

Manufactured by BSH Hausgeräte GmbH under Trademark License of Siemens AG

---

BSH Hausgeräte GmbH
Carl-Wery-Straße 34
81739 München/GERMANY

Manufactured by BSH Hausgeräte GmbH under Trademark License of Siemens AG
Your dryer is designed to be particularly energy efficient. Its technical features include a refrigeration circuit, which uses energy efficiently in a similar way to a refrigerator. The dryer's heat exchanger is cleaned automatically during drying.

The fluff filters and filter in the condensate container must be cleaned regularly.

Never operate the dryer without the fluff filters and without filter in condensate container!

**Fluff filters**

During drying, fluff and hair from the laundry is trapped by the fluff filter. A blocked fluff filter may impair the heat exchange process. The fluff filters must therefore be cleaned after every drying cycle.

Rinse regularly under running water → Page 4.

When cleaning the fluff filter, make sure that no foreign material (down, filling material) enters the air duct opening. If necessary, clean the drum beforehand with a vacuum cleaner. If foreign material should still enter the air duct → call the after-sales service.

**Filter in the condensate container**

The filter in the condensate container cleans the condensation. This condensation is required for the automatic cleaning process. The filter should be cleaned regularly under running water. Empty the condensate container before cleaning the filter → Installation and maintenance instructions, Page 3.

**Fabrics**

Do not dry any fabrics that have come into contact with solvents, oil, wax, grease or paint: e.g. hair styling products, nail varnish remover, stain remover, cleaning solvent, etc.

Empty all pockets.

Do not dry non-breathable fabrics.

Avoid drying laundry items that produce a lot of fluff.

Woollens should be refreshed or dried using the woollens programme only.

---

* Test programmes according to DIN EN 61121 with option ecoPerfect®

** The values may differ from those specified, depending on the type of fabric, composition of laundry to be dried, residual moisture in the fabric, the degree of dryness that has been set and the amount of laundry being loaded.
Normal noises

During drying, the compressor and the pump generate some noise which is entirely normal.

The compressor in the dryer may occasionally generate a humming noise. The volume and pitch of this may vary depending on the selected programmes and the progress of the drying.

The compressor in the dryer is ventilated from time to time, which creates a whirring sound.

The automatic cleaning process causes a clicking noise.

The process of pumping the condensation into the condensate container generates pumping noises.

What to do if ...

If you cannot rectify a fault yourself (e.g. by switching the dryer off/on), please contact our after-sales service. We will always find an appropriate solution and will avoid unnecessary visits by engineers. Trust the expertise of the manufacturer and rest assured that the repair will be carried out by trained service technicians using original spare parts. The contact details of your local after-sales service can be found in the enclosed after-sales service directory:

- GB 0344 892 8999 (Calls charged at local or mobile rate.)
- IE 01450 2655 (0.03 € per minute at peak. Off peak 0.0088 € per minute.)

When contacting the after-sales service, please specify the product number (E-Nr.) and production number (FD) of your appliance (see inside of door).

Switch the dryer off using the programme selector and unplug the mains plug from the socket.

- Please empty condensate container is displayed. Emptying the condensate container → Page 4. Press any button. Press the Start/Pause button again.
- Please empty condensate container is displayed and the drying cycle is interrupted. Is the filter in the condensate container dirty? → Clean the filter in the condensate container → Installation and maintenance instructions, Page 3.
- Please clean lint filter is displayed. Clean the fluff filters → Page 4. Press the Start/Pause button again.
- Dryer does not start. Has the Start/Pause button been pressed? Door closed? Ambient temperature greater than 5 °C?
- Water is leaking out. Make sure the dryer is level. Push the condensate container back in until it locks fully into place.
What to do if ...

- Laundry is not dried correctly or is still too damp.
  - After the end of the programme, warm laundry feels damper than it actually is. Spread the laundry out and allow the heat to disperse.
  - Finely adjust the dryness level – this extends the drying time but does not increase the temperature. Your laundry will become drier.
  - Select a programme with a longer drying time or increase the drying level. This does not increase the temperature.
  - Select a time programme for extended drying of laundry that is still damp.
  - If you have exceeded the maximum load for the programme, the laundry may not be dried correctly.
  - Clean the moisture sensor in the drum. A fine layer of limescale may adversely affect the performance of the sensors and your washing will not dry properly.
  - Drying has been interrupted as a result of a power cut, because the condensate container is full or because the maximum drying time has been exceeded.

- Drying time too long.
  - Clean the fluff filters under running water → Page 4.
  - Insufficient supply of air → Ensure that air can circulate.
  - Air inlet may be obstructed? Clear the inlet → Installation and maintenance instructions, Page 1.
  - Ambient temperature higher than 35 °C → Ventilate the room.

- The humidity in the room increases significantly.
  - Make sure the room is sufficiently ventilated.

- Heat exchanger is being rinsed is displayed in the display panel.
  - Not an error. Automatic cleaning of the heat exchanger.
  - Do not empty the condensate container during the cleaning process.
  - Remove the laundry from the dryer immediately and spread out. This allows the heat to dissipate. Be careful as the door, the drum and the laundry may be hot.

- Power failure.
  - Remove all objects from pockets, and lighters in particular → Risk of explosion.
  - Open the door carefully. Hot steam may escape. Fabrics and drum may be hot → Risk of burns.

- Other intermittent noises and vibrations.
  - Normal noises → Page 10.

Safety instructions

- Emergency
  - ONLY use the dryer...
  - Pull the appliance plug out of the socket immediately or disconnect the fuse.
  - in rooms inside the house.
  - to dry fabrics.
Observe the safety instructions on page 13.

You must read this instruction manual and the installation and maintenance instructions before using the dryer.
