Remove the washing

Open washing machine door and remove washing If \Box (Rinse stop = without final spin) active: Set programme selector to **Empty** or **Spin**.

 Remove any foreign objects – risk of rusting.
 Leave detergent drawer and door open so that residual water can evaporate.

End of programme when ...

... - \Box - is indicated on the display panel.

Terminating the programme

For programmes at high temperature: Cool washing: select Rinse.

or programmes at low temperature:

Select Spin or Empty.

- Select Start/Pause.

Change programme if ...

... you have mistakenly selected a wrong programme:

Reselect programme. Select Start/Pause.

The new programme starts from the beginning. **Cancel Programme**

Select Start/Pause.

If required, top up washing (do not leave door open for a long time – water from the washing could run out of the open door). Select Start/Pause.

Individual settings

You can change the spin speed and temperature beforehand and while the selected programme is running. Effects dependent on the programme progress

Temp. (Temperature °C)

You can change the indicated washing temperature. The maximum washing temperature which can be selected depends on the set programme.

rpm (Spin speed, revolutions per minute)/ ☐ (Rinse stop = without final spin)

You can change the indicated spin speed or select \smile (Rinse stop = without final spin cycle, washing remains in the water after the last rinse cycle). The selectable maximum spin speed depends on the model and the selected programme.

The respective programme duration is displayed by selecting the programme. The programme start can be delayed before the programme begins. The "Finish in" time can be set in hour steps up to maximum 24h. Keep pressing the Finish in button until the required number of hours is indicated (h=hour). Select Start/Pause. Settings cannot be made when the programme has started.

Additional functions → Overview of programmes, Page 7

Extension of the washing time for a more intensive washing of highly soiled washing. Prewash For heavily soiled washing, Prewash at 30 °C Less Ironing Special spin sequence with subsequent fluffing. Gentle final spin at reduced spin speed. Residual moisture of the washing slightly increased.

Extra Rinse Additional rinse cycle, Longer programme duration. For areas with very soft water or for further improvement of the rinsing result.

Start/Pause

For starting or interrupting the programme

Activate setting mode for signal volume

2. Set volume for ..

* If required, select repeatedly

Important information

Before using your washing machine for the first time Do not put any washing in the washing machine! Turn the tap on. Pour into dispenser II:

Detergent (dosage according to manufacturer's instructions for light soiling and according to degree of

Set programme selector to **Easy-Care 60 °C** and select **Start/**Pause.

At the end of the programme set the programme selector to **O Off**.

Protecting the washing and the machine

Remove metal parts (paper clips, etc.).

Wash delicates in the net/bag (tights, curtains, underwired bras). Close zips, button up covers.

Brush sand out of pockets and collars.

Remove curtain fittings or include in the net/bag

Insert large and small items of washing! Do not jam items of washing between the washing machine door and rubber seal.

Washing with different degrees of soiling

- When dosing all detergents, cleaning aids and cleaning agents, always follow the manufacturer's instructions.

Pour soaking agent/detergent into dispenser II according to the manufacturer's instructions. Set programme selector to

Cotton 30 °C and select Start/Pause. After approx. 10 minutes select Start/Pause to stop the programme. After the required soaking time reselect **Start/**Pause if the programme is to be continued or change the programme.

Washing should not be treated with fabric softener.

🛂 Liquid starch can be used in all wash programmes. Pour starch into the fabric softener dispenser 🏶 according to manufacturer's specifications (if required clean beforehand).

Dye in household quantities only. Salt may attack stainless steel! Observe specifications of the dye manufacturer! **Do not** bleach washing in the washing machine!

Outdoor Wear The laundry must not be treated with fabric softener.

Special detergents suitable for machine wash available in particular from sports shops. Dosage according to manufacturer's instructions. Dose special detergent for outdoor textiles in dispenser **II.**

Set programme selector to **Outdoor Wear**. Select temperature and **Start/Pause** mergency release e.g. if power failure occurs.

The programme continues running when the power supply is restored. If the washing is still to be removed, the door can be opened as described below:

Detergent solution and washing may be hot. If required, leave to cool down. Do not reach into the drum in case it is still rotating. Do not open the door if you can still see water through the glass.

1. Set programme selector to O Off, pull out the mains plug. **2.** Drain the water. \rightarrow Page 10

3. Pull down emergency release with a tool and release. Door can then be opened.

Safety instructions

Read and follow the operating and installation instructions and all other information enclosed with the washing

Retain documents for subsequent use.

Risk of electric shock Never pull out the mains plug by tugging the power cord! Insert/pull out the mains plug with dry hands only.

Danger to life

On redundant appliances:

Pull out the mains plug! Sever the power cord and discard together with the plug.

Destroy the lock on the washing-machine door. This will prevent children from locking themselves in and suffocating.

Risk of suffocation Risk of poisioning

Keep packaging, plastic film and packaging parts out of the reach of children.

Risk of explosion

Keep detergents and care products out of the reach of children.

Caused by detergents containing solvents, e.g. stain remover/items of washing pretreated with solvent naphtha may result in an explosion after being loaded into the washing machine.

Risk of injury

Caution when draining hot detergent solution.

Before hand thoroughly rinse items of washing by hand. Washing machine door may become very hot.

Do not climb on the washing machine.

Do not lean on the open washing machine door.

Do not reach into the drum in case it is still rotating. Consumption values

Programme setting for test according to currently valid European standard 60456. Information about comparability tests: To test the test programmes, wash indicated load, with **Eco**+ additional function and at maximum selectable spin speed.

Annual water consumption consumption $7/3.5 \, \text{kg}$

Programme setting for testing and energy labelling according to directive 2010/30/EU with cold water (15 °C). The values may deviate from the stated values depending on water pressure and hardness, room temperature, type and amount of laundry, detergents used, fluctuations in the mains voltage and selected additional functions.

Risk of electric shock! Pull out the mains plug!

Risk of explosion! No solvents!

Insert for liquid detergent depending on model

Completely remove detergent drawer. → Page 10

- For gel-like detergents and washing powders.

Machine housing, control panel

Remove detergent residue immediately.

Do not clean the appliance with a water jet.

... if it contains detergent or fabric softener residue.

1. Pull out, depress insert, take out drawer all the way.

Use chlorine-free cleaning agent, not steel wool.

2. Take out insert: using your finger, press insert upwards.

3. Clean detergent dispenser and insert with water and a brush and dry.

Leave detergent drawer open so that residual water can evaporate.

Leave washing machine door open so that the drum can dry out.

Not required if detergent dosed correctly. However, if this does occur, follow the instructions of the descaling agent

manufacturer. Suitable descalers can be purchased on our website or from customer service.

For starting or interrupting the programme.

Signal

1. Activate setting mode for signal volume

^{*} If required, select repeatedly

Important information

Before using your washing machine for the first time

Do not put any washing in the washing machine! Turn the tap on. Pour into dispenser II:

- approx. 1 litre water.

- Detergent (dosage according to manufacturer's instructions for light soiling and according to degree of water hardness).

Set programme selector to Easy-Care 60 °C and select Start/Pause.

At the end of the programme set the programme selector to **O Off**.

Protecting the washing and the machine

- When dosing all detergents, cleaning aids and cleaning agents, always follow the manufacturer's instructions,
- Empty pockets.
- Remove metal parts (paper clips, etc.).
- Wash delicates in the net/bag (tights, curtains, underwired bras).
- Close zips, button up covers.
- Brush sand out of pockets and collars.
- Remove curtain fittings or include in the net/bag.

Insert laundry

nsert large and small items of washing!

Do not jam items of washing between the washing machine door and rubber seal.

Washing with different degrees of soiling

Do not Prowach

Wash new items separately.

Ligiti	 DO HOLL LEWASH.
	If required, pretreat stains. Select Eco ⁺ additional fu
Heavy	Load less washing. Select programme with Prewash.
	If required, pretreat stains. Select Eco ⁺ additional fu

Select **Eco**⁺ additional function

Select Eco+ additional function

Soakina

Load washing of the same colour.

Pour soaking agent/detergent into dispenser II according to the manufacturer's instructions. Set programme selector to Cotton 30 °C and select Start/Pause. After approx. 10 minutes select Start/Pause to stop the programme. After the required soaking time reselect **Start**/Pause if the programme is to be continued or change the programme.

Starchina

Washing should not be treated with fabric softener.

Liquid starch can be used in all wash programmes. Pour starch into the fabric softener dispenser & according to manufacturer's specifications (if required clean beforehand).

Dyeing/Bleaching

Dve in household quantities only. Salt may attack stainless steel! Observe specifications of the dve manufacturer! **Do not** bleach washing in the washing machine!

Outdoor Wear

The laundry must not be treated with fabric softener.

Special detergents suitable for machine wash available in particular from sports shops. Dosage according to manufacturer's instructions. Dose special detergent for outdoor textiles in dispenser II. Set programme selector to **Outdoor Wear**. Select temperature and **Start/Pause**.

Emergency release e.g. if power failure occurs.

The programme continues running when the power supply is restored. If the washing is still to be removed, the door can be opened as described below:

Risk of scalding!

Detergent solution and washing may be hot. If required, leave to cool down. Do not reach into the drum in case it is still rotating.

Do not open the door if you can still see water through the glass.

- 1. Set programme selector to O Off, pull out the mains plug.
- **2.** Drain the water. \rightarrow Page 10
- 3. Pull down emergency release with a tool and release. Door can then be opened.

Delicates/Silk	※ - 40 °C		Delicate, washable textiles, e.g. made of silk, satin, synthetic fibres or blended fabrics	Eco ⁺ , Prewash, Less Ironing, Extra Rinse No spin cycle between the rinse cycles
Outdoor Wear	* - 40 °C	2 kg	Weather, sport and outdoor textiles also with climate protection membrane	Eco ⁺ , Less Ironing, Extra Rinse Reduced final spin at intervals
Wool	* - 40 °C		Hand or machine-washable wool or rich-wool textiles	Especially gentle wash programme to prevent shrinkage, longer programme pauses (textiles rest in wash liquor)
Rapid 15'	※ - 40 °C		Easy-Care textiles made of cotton, linen, synthetic fibres or blended fabrics	Short programme approx. 15 minutes, suitable for lightly soiled washing
Additional programmes			Rinse, S	Rinse, Spin, Empty, Low spin

The programmes are time-controlled for lightly soiled textiles. If textiles are heavily soiled, reduce the load or select additional function, e.g. Eco 🕇 using programmes marked with a dways select **aco** additional influent.

1g, **Easy-Care 40 °C** at max, selectable spin speed is best suited as a **short programme**, pour detergent into dispenser II, programmes with Prewash – divide detergent between dispensers I and III. mespective of the type of washin Programmes without Prewash –

Carl-Wery-Str. 34 81739 München/Deutschland Siemens Electrogeräte GmbH

WI14S440GB

Safety instructions

- Read and follow the operating and installation instructions and all other information enclosed with the washing
- Retain documents for subsequent use.

Risk of electric shock

- Never pull out the mains plug by tugging the power cord!
- Insert/pull out the mains plug with dry hands only.

Danger to life

On redundant appliances:

- Pull out the mains plug!
- Sever the power cord and discard together with the plug.
- Destroy the lock on the washing-machine door. This will prevent children from locking themselves in and suffocating.

Risk of suffocation Risk of poisioning Risk of explosion

Risk of injury

- Keep packaging, plastic film and packaging parts out of the reach of children.
- Keep detergents and care products out of the reach of children.
- Caused by detergents containing solvents, e.g. stain remover/items of washing pretreated with solvent naphtha may result in an explosion after being loaded into the washing machine.

Before hand thoroughly rinse items of washing by hand.

- Washing machine door may become very hot.
 - Caution when draining hot detergent solution.
 - Do not climb on the washing machine.
- Do not lean on the open washing machine door.
- Do not reach into the drum in case it is still rotating.

Programme	Additonal function	Load	Current***	Water***	Programme duration***
Cotton 30 °C*	Eco+	7 kg	0.55 kWh	751	2:12 h
Cotton 40 °C*	Eco ⁺	7 kg	0.85 kWh	751	2:12 h
Cotton 60 °C*	Eco+	7 kg	1.50 kWh	751	2:12 h
Cotton 90 °C	Eco ⁺	7 kg	2.51 kWh	901	2:12 h
Easy-Care 40 °C*	Eco+	3.5 kg	0.55 kWh	551	1:12 h
Delicates/Silk 30 °C	-	2 kg	0.20 kWh	391	0:40 h
₩ Wool 30°C	-	2 kg	0.20 kWh	401	0:36 h

Programme setting for test according to currently valid European standard 60456. Information about comparability tests: To test the test programmes, wash indicated load, with **Eco**+ additional function and at maximum selectable spin speed.

Programme	Additonal function	Load	Annual energy consumption	Annual water consumption
Coton eco 40/60 °C	Eco+**	7/3.5 kg	218 kWh	105601

Programme setting for testing and energy labelling according to directive 2010/30/EU with cold water (15 °C).

Consumption values

The values may deviate from the stated values depending on water pressure and hardness, room temperature, type and amount of laundry, detergents used, fluctuations in the mains voltage and selected additional functions.

Insert for liquid detergent depending on model

Position insert for dosing liquid detergent:

- Completely remove detergent drawer. → Page 10
- Push insert forwards.

Do not use insert (push upwards):

- For gel-like detergents and washing powders.
- For programmes with **Prewash** or **Finish in** option.

Care

Risk of electric shock! Pull out the mains plug! Risk of explosion! No solvents!

Machine housing, control panel

- Remove detergent residue immediately.
- Wipe with a soft, damp cloth.
- Do not clean the appliance with a water jet.

Clean the detergent drawer ...

... if it contains detergent or fabric softener residue.

- 1. Pull out, depress insert, take out drawer all the way.
- **2.** Take out insert: using your finger, press insert upwards.
- **3.** Clean detergent dispenser and insert with water and a brush and dry.
- **4.** Attach insert and lock into position (push cylinder onto guide pin).
- **5.** Slide in the detergent dispenser.

eave detergent drawer open so that residual water can evaporate.

Drum Leave washing machine door open so that the drum can dry out.

Use chlorine-free cleaning agent, not steel wool.

No washing in the machine!

Not required if detergent dosed correctly. However, if this does occur, follow the instructions of the descaling agent manufacturer. Suitable descalers can be purchased on our website or from customer service.

Information on the display panel depending on model

F: 15	Close the washing machine door properly; washing may be caught.
F: 17, 29	Turn on tap fully, supply hose kinked/jammed; clean filter \longrightarrow Page 10, water pressure too low.
F: 18	Drain pump blocked; clean drain pump. \longrightarrow Page 10 Drainage hose/outlet pipe blocked; clean drainage hose on the siphon. \longrightarrow Page 10
F:23	Water in the base pan, appliance leaking. Call customer service!
F: 42, 43, 44	Motor fault. Call customer service. \longrightarrow Installation instructions
Other displays	Switch off appliance, wait 5 seconds and switch on again. If the display is indicated again, call customer service. Installation instructions

Maintenance

Turn off the tap!

Detergent-solution pump

Set programme selector to O Off, pull out the mains plug.

- 1. Take the drainage hose out of the holder. Remove sealing cap, allow detergent solution to flow out. Put the closing cap back on the hose.
- 2. Carefully unscrew the pump cover (residual water).
- **3.** Clean the interior, pump cover thread and pump housing (fan impeller in the detergent-solution pump must rotate).

4. Reinsert and screw on pump cover. Handle is upright. Insert the drain hose into the holder.

To prevent unused detergent from flowing into the outlet during the next wash: Pour 1 litre of water into dispenser II and start the Empty programme.

Drainage hose on the siphon

Set programme selector to O Off, pull out the mains plug.

- 1. Loosen hose clip, carefully remove drainage hose (residual water).
- 2. Clean drainage hose and siphon spigot.
- 3. Re-attach drainage hose and secure connection point with hose clip

Filter in the water inlet hose

Risk of electric shock!

Do not immerse Agua-Stop safety device in water (contains electric valve).

Release water pressure in the supply hose:

- 1. Turn off the tap!
- 2. Select any programme (except Spin/Empty).
- 3. Select Start/Pause. Leave programme for approx. 40 seconds.
- **4.** Turn the programme selector to **O Off**. Pull out the mains plug.

5. Disconnect the hose from the water tap. Clean filter with small brush.

6. Connect the hose and check for leaks.

What to do if ...

	Water is running out.	Correctly attach/replace drainage hose.Tighten screw-fitting on the supply hose.
•	Water not flowing in. Detergent not washed in.	 Start/Pause not selected? Tap not open? Filter blocked? Clean the filter. → Page 10 Supply hose kinked or jammed?
•	Washing-machine door cannot be opened.	 Safety function active. Stop programme? → Page 4 □ (Rinse stop = without final spin) selected? → Page 3, 4 Can be opened via emergency release only? → Page 6
	Programme does not start.	Start/Pause or Finish in time selected?Door closed?
•	Detergent solution is not drained.	 — (Rinse stop = without final spin) selected? → Page 3, 4 Clean the drain pump. → Page 10 Clean outlet pipe and/or drainage hose.
	Water not visible in the drum.	- Not a fault - water below the visible area.
•	Spin result not satisfactory. Washing wet/too damp.	 Not a fault – unbalanced load detection system has stopped the spin cycle, washing unevenly distributed. Distribute small and large items of washing in the drum. Less Ironing selected? → Page 5 Too low speed selected? → Page 5
	The programme duration changes during the wash cycle.	 Not a fault – the programme sequence is optimised for the particular wash process. This may result in changes to the programme duration in the display field.
	Spin cycle actuated several times.	- Not a fault - unbalanced load detection system adjusts imbalance.
	Residual water in the dispenser for care product %.	 Not a fault - effect of the care product not impaired. If required, clean insert. → Page 9
	Odour formation in the washing machine.	 Run Cotton 90 °C programme without washing. Use standard detergent.
•	Foam is coming out of the detergent drawer.	 Too much detergent used? Mix 1 tablespoon of fabric softener with ½ litre of water and pour into dispenser II (not for outdoor, sports and down-filled textiles!). Reduce detergent dosage for the next wash cycle.
•	Loud noise formation, vibrations and "Wandering" during spin cycle.	 Appliance feet fixed? Secure appliance feet. → Installation instructions Transportation protection devices removed? Remove transportation protection devices. → Installation instructions
	Noises during spin and drain cycles.	 Clean the drain pump. → Page 10
•	Display panel/indicator lights do not function while the appliance is running.	Power failure?Fuse tripped? Switch on/replace fuse.If the fault occurs repeatedly, call customer service.
•	The programme takes longer than usual.	 Not a fault – unbalanced load detection system adjusts imbalance by repeatedly distributing the washing. Not a fault – foam detection system active – a rinse cycle is switched on.
	Detergent residue on the washing.	 Occasionally phosphate-free detergents contain water-insoluble residue. Select Rinse or brush the laundry after washing.
•	In the pause status Start/Pause flashes very quickly and a signal sounds.	 Water level too high. Washing cannot be reloaded. Immediately close washing machine door. Select Start/Pause to continue the programme.

If a fault cannot be rectified (switching the machine on and off) or a repair is required:

- Set programme selector to O Off and pull out the mains plug.
 Turn off the tap and call customer service. → Installation instructions

Follow the safety instructions on Page 8!

Washing machine

Operating instructions

en

Do not switch on the washing machine until you have read these instructions and the separate Installation/Maintenance instructions!
