Your washing machine

Congratulations – You have opted for a modern, high-quality domestic appliance manufactured by Siemens. The washing machine is distinguished by its economical consumption of water and energy. Each appliance which leaves our factory is inspected thoroughly to ensure that it functions properly and is in perfect condition.

Further information on our products, accessories, spare parts and services can be found at: www.siemens-home.com or contact our customer service centres.

Contents Intended use. Programmes. Selecting and adjusting a programme Washing... After washing.. Individual settings. Important information. Overview of programmes Safety instructions.. Consumption values... Care.... Information about the indicator lights Maintenance What to do if

Protection of the environment/Conservation tips

- Wash normally soiled washing without prewash.
- Instead of the Cotton 90 °C programme, select Cotton Eco 60 °C and Eco+ additional function. Comparable cleaning
- result with significantly lower energy consumption.
- Measure detergent according to the manufacturer's instructions and water hardness.
- If the washing is then dried in the tumble dryer, select spin speed according to the instructions of the dryer manufacturer.

ntended use

for use in the household only,

Detailled overview of programmes → Page 7

selected programme and programme progress

Spin speed can be selected individually irrespective of the

- for washing machine-washable textiles and handwashable wool in wash liquor.
- to be operated with cold drinking water and commercially available detergents and care products which are suitable for use in washing machines.

Easy-Care

- Do not leave children unattended near the washing machine!
- Children and uninstructed persons must not use the washing machine!
- Keep pets away from the washing machine!

Preparation

Correct installation according to separate installation instructions.

Remove the washing

Open washing machine door and remove washing. f \mathscr{O} (rinse stop = without final spin) active: Set programme selector to **Empty** or **Spin**.

 Remove any foreign objects – risk of rusting. Leave detergent drawer and door open so that residual water can evaporate.

End of programme when ...

... the indicator light **End** is on.

Terminating the programme

For programmes at high temperature:

- Cool washing: select Rinse.

Select Start/Pause.

For programmes at low temperature:

Select Spin or Empty. - Select Start/Pause.

Change programme if ...

- . you have mistakenly selected a wrong programme:
- Reselect programme.
- Select Start/Pause. The new programme starts from the beginning.

Cancel Programme

- Select Start/Pause.
- If required, top up washing (do not leave door open for a long time – water from the washing could run out of the open door).
 - Select Start/Pause.

Individual settings

Spin speed → depending on model

You can change the indicated spin speed or select @ (rinse stop = without final spin cycle, washing remains in the water after the last rinse cycle). Effects dependent on the programme

The maximum selectable spin speed depends on the model and the set programme.

Additional functions → Overview of programmes, Page 7 Extension of the washing time for a more intensive washing of highly soiled washing.

Prewash For heavily soiled washing, Prewash at 30 °C Less Ironina Special spin sequence with subsequent fluffing. Gentle final spin at reduced spin speed. Residual moisture of the washing slightly

Extra Rinse Additional rinse cycle. Longer programme duration. For areas with very soft water or for further improvement of the rinsing result.

Start/Pause

For starting or interrupting the programme

Eco+ mode for signal

Optional: Short signal - function off Blind mode ON-OFF

Important information

Before using your washing machine for the first time

Do not put any washing in the washing machine! Turn the tap on. Pour into dispenser II:

approx. 1 litre of water,

 detergent (dosage according to manufacturer's instructions for light soiling and according to degree of water hardness).

Set programme selector to Easy-Care 60 °C and select Start/Pause.
 At the end of the programme set the programme selector to Off.

Protecting the washing and the machine

 When dosing all detergents, cleaning aids and cleaning agents, always follow the manufacturer's instructions.

- Empty pockets. Remove metal parts (paper clips, etc.).

- Wash delicates in the net/bag (tights, curtains, underwired bras).

- Close zips, button up covers.

- Brush sand out of pockets and collars.

- Remove curtain fittings or include in the net/bag.

Insert laundry

Insert large and small items of washing!

Do not jam items of washing between the washing machine door and rubber seal.

Washing with different degrees of soiling

		Wash new items separately.
Light		Do not prewash.
	_	If required, pretreat stains. Select Eco + additional function.
Heavy		Load less washing. Prewash.
		If required, pretreat stains. Select Eco + additional function.

Soaking Load washing of the same colour.

Pour soaking agent/detergent into dispenser II according to the manufacturer's instructions. Set programme selector to **Cotton 30 °C** and select **Start**/Pause. After approx. 10 minutes select **Start/Pause** to stop the programme. After the required soaking time reselect **Start**/Pause if the programme is to be continued or change the programme.

/11111

Starching Washing should not be treated with fabric softener.

Liquid starch can be used in all wash programmes. Pour starch into the fabric softener dispenser & according to manufacturer's specifications (if required clean beforehand).

Dyeing/Bleaching

Dye in household quantities only. Salt may attack stainless steel! Observe specifications of the dye manufacturer! Do **not** bleach washing in the washing machine!

i

Emergency release e.g. if power failure occurs

The programme continues running when the power supply is restored.

If the washing is still to be removed, the door can be opened as described below:

Risk of scalding!

Detergent solution and washing may be hot. If required, leave to cool down.

Do not reach into the drum in case it is still rotating.

Do not open the door if you can still see water through the glass.

- 1. Set programme selector to Off, pull out the mains plug.
- 2. Drain the water. \rightarrow Page 10
- 3. Pull down emergency release with a tool and release. Door can then be opened.

Maintenance

Risk of scalding! Allow detergent solution to cool down! Turn off the tap!

Detergent-solution pump

Set programme selector to **Off**, pull out the mains plug.

- **1.** Take the drainage hose out of the holder. Remove sealing cap, allow detergent solution to flow out. Put the closing cap back on the hose.
- 2. Carefully unscrew the pump cover (residual water).
- 3. Clean the interior, pump cover thread and pump housing (fan impeller in the detergent-solution pump must rotate).
- 4. Reinsert and screw on pump cover. Handle is upright. Insert the drain hose into the holder.

To prevent unused detergent from flowing into the outlet during the next wash: Pour 1 litre of water into dispenser II and start the **Empty** programme.

Drainage hose on the siphon

Set programme selector to Off, pull out the mains plug.

- 1. Loosen hose clip, carefully remove drainage hose (residual water). 2. Clean drainage hose and siphon spigot.
- 3. Re-attach drainage hose and secure connection point with hose clip.

Filter in the water inlet hose Risk of electric shock!

Do not immerse Aqua-Stop safety device in water (contains electric valve).

Release water pressure in the supply hose:

- 1. Turn off the tap!
- 2. Select any programme (except Spin/Empty).
- 3. Select Start/Pause. Leave programme for approx. 40 seconds.
- 4. Turn the programme selector to Off. Pull out the mains plug!

5. Disconnect the hose from the water tap. Clean filter with small brush.

and/or for standard and Aqua-Secure models: Remove hose from the rear of the appliance. Take out filter with pliers and clean.

6. Connect the hose and check for leaks.

What to do if ...

	Water is running out.	Correctly attach/replace drainage hose.Tighten screw-fitting on the supply hose.
	Water not flowing in. Detergent not washed in.	 Start/Pause not selected? Tap not open? Filter blocked? Clean the filter. → Page 10 Supply hose kinked or jammed?
•	Washing-machine door cannot be opened.	 Safety function active. Stop programme? → Page 4 Ø (without final spin) selected? → Page 3, 4 Can be opened via emergency release only? → Page 6
	Programme does not start.	Start/Pause not selected?Door closed?
•	Detergent solution is not drained.	 Ø (without final spin) selected? → Page 3, 4 Clean the drain pump. → Page 10 Clean outlet pipe and/or drainage hose.
	Water not visible in the drum.	- Not a fault - water below the visible area.
	Spin result not satisfactory, washing wet/too damp:	 Not a fault – unbalanced load detection system has stopped the spin cycle, washing unevenly distributed. Distribute small and large items of washing in the drum. Less Ironing is selected? → Page 5 Too low speed selected? → Page 5
•	The programme duration changes during the wash cycle.	 Not a fault – the programme sequence is optimised for the particular wash process. This may result in changes to the programme duration in the display field.
	Spin cycle actuated several times.	 Not a fault – unbalanced load detection system adjusts imbalance.
	Residual water in the dispenser for care product %.	 Not a fault – effect of the care product not impaired. If required, clean insert. → Page 9
	Odour formation in the washing machine.	 Run Cotton 90 °C programme without washing. Use standard detergent.
	Foam is coming out of the detergent drawer.	 Too much detergent used? Mix 1 tablespoon of fabric softener with ½ litre of water and pour into dispenser II (not for outdoor, sports and down-filled textiles!). Reduce detergent dosage for the next wash cycle.
	Loud noise formation, vibrations and "Wandering" during spin cycle.	 Appliance feet fixed? Secure appliance feet. → Installation Instructions Transportation protection devices removed? Remove transportation protection devices. → Installation Instructions
	Noises during spin and drain cycles.	 Clean the drain pump. → Page 10
•	Indicator lights do not function while the appliance is running.	Power failure?Fuse tripped? Switch on/replace fuse.If the fault occurs repeatedly, call customer service.
	The programme takes longer than usual.	 Not a fault – unbalanced load detection system adjusts imbalance by repeatedly distributing the washing. Not a fault – foam detection system active – a rinse cycle is switched on.
	Detergent residue on the washing.	 Occasionally phosphate-free detergents contain water-insoluble residue. Select Rinse or brush the laundry after washing.
	In the pause status Start/ Pause flashes very quickly and a signal sounds.	 Water level too high. Washing cannot be reloaded. Immediately close washing machine door. Select Start/Pause to continue the programme.
	It a tault cannot he rectified	(switching the machine on and off) or a repair is required:

If a fault cannot be rectified (switching the machine on and off) or a repair is required:

- Set programme selector to **Off** and pull out the mains plug.
 Turn off the tap and call customer service. → *Installation Instructions*

Observe the safety instructions on page 8.

Washing machine

Instruction manual

en

Read these instructions and the separate Installation instructions before operating the washing machine.
