Your washing machine

Congratulations – You have opted for a modern, high-quality domestic appliance manufactured by Siemens. The washing machine is distinguished by its economical consumption of water and energy.

Each appliance which leaves our factory is inspected thoroughly to ensure that it functions properly and is in perfect condition.

Further information on our products, accessories, spare parts and services can be found at: **www.siemens-home.com** or contact our customer service centres.

Safety instructions

Read and follow the operating and installation instructions and all other information enclosed with the washing

Retain documents for subsequent use.

Risk of electric shock

Never pull out the mains plug by tugging the power cord! Insert/pull out the mains plug with dry hands only.

Danger to life

On redundant appliances

Pull out the mains plug! Sever the power cord and discard together with the plug.

Destroy the lock on the washing-machine door. This will prevent children from locking themselves in and suffocating.

Risk of suffocation Risk of poisioning Risk of explosion

Keep packaging, plastic film and packaging parts out of the reach of children.

Keep detergents and care products out of the reach of children.

Caused by detergents containing solvents, e.g. stain remover/items of washing pretreated with solvent naphtha may result in an explosion after being loaded into Before hand thoroughly rinse items of washing by hand.

Programme setting for test according to currently valid European standard 60456.

Washing machine door may become very hot.

Caution when draining hot detergent solution. Do not climb on the washing machine.

Do not lean on the open washing machine door.

Do not reach into the drum in case it is still rotating.

Consumption values

and at maximum selectable spin speed. Annual water consumption **Eco**+ ** 7/3.5 kg 10560 I 218 kWh

Information about comparability tests: To test the test programmes, wash indicated load, with **Eco**⁺ additional function

Programme setting for testing and energy labelling according to directive 2010/30/EU with cold water (15 °C). The values may deviate from the stated values depending on water pressure and hardness, room temperature, type and amount of laundry, detergents used, fluctuations in the mains voltage and selected additional functions.

Maintenance

Risk of electric shock! Pull out the mains plug!

Risk of explosion! No solvents!

Insert for liquid detergent depending on model

Position insert for dosing liquid detergent

Push insert forwards.

Care

Do not use insert (push upwards):

Wipe with a soft, damp cloth.

5. Slide in the detergent dispenser.

Clean the detergent drawer if it contains detergent or fabric softener residue.

Completely remove detergent drawer. → Page 10

For gel-like detergents and washing powders.

Machine housing, control panel

Remove detergent residue immediately.

- Do not clean the appliance with a water jet.

1. Pull out, depress insert, take out drawer all the way.

Use chlorine-free cleaning agent, not steel woo

2. Take out insert: using your finger, press insert upwards.

3. Clean detergent dispenser and insert with water and a brush and dry.

Leave detergent drawer open so that residual water can evaporate.

Leave washing machine door open so that the drum can dry out.

Not required if detergent dosed correctly. However, if this does occur, follow the instructions of the descaling agent

manufacturer. Suitable descalers can be purchased on our website or from customer service.

Drain pump blocked; clean drain pump. \longrightarrow Page 10

call customer service. → Installation instructions

: 42, 43, 44 Motor fault. Call customer service. \longrightarrow Installation instructions

Information on the display panel depending on model

Close the washing machine door properly; washing may be caught.

F: 17, 29 Turn on tap fully, supply hose kinked/jammed; clean filter $\longrightarrow Page 10$, water pressure too low.

Water in the base pan, appliance leaking. Call customer service!

Drainage hose/outlet pipe blocked; clean drainage hose on the siphon. \rightarrow Page 10

Switch off appliance, wait 5 seconds and switch on again. If the display is indicated again,

4. Attach insert and lock into position (push cylinder onto guide pin).

For programmes with Prewash or Finish in option.

Risk of scalding! Allow detergent solution to cool dov

Set programme selector to O **Off**, pull out the mains plug.

To prevent unused detergent from flowing into the outlet during the next wash: Pour 1 litre of water into dispenser II and start the **Empty** programme.

2. Clean drainage hose and siphon spigot.

3. Re-attach drainage hose and secure connection point with hose clip.

Do not immerse Aqua-Stop safety device in water (contains electric valve).

Release water pressure in the supply hose:

1. Turn off the tap!

2. Select any programme (except Spin/Empty). **3.** Select **Start/**Pause. Leave programme for approx. 40 seconds.

4. Turn the programme selector to O **Off**. Pull out the mains plug.

Clean the filter: **5.** Disconnect the hose from the water tap. Clean filter with small brush.

and/or for standard and Agua-Secure models: Remove hose from the rear of the appliance Take out filter with pliers and clean.

6. Connect the hose and check for leaks.

Water is running out.	Correctly attach/replace drainage hose.Tighten screw-fitting on the supply hose.
Water not flowing in. Detergent not washed in.	 Start/Pause not selected? Tap not open? Filter blocked? Clean the filter. → Page 10 Supply hose kinked or jammed?
Washing-machine door cannot be opened.	 Safety function active. Stop programme? → Page 4 → (Rinse stop = without final spin) selected? → Page 3, 4 Can be opened via emergency release only? → Page 6
Programme does not start.	Start/Pause or Finish in time selected?Door closed?
Detergent solution is not drained.	 — (Rinse stop = without final spin) selected? → Page 3, 4 Clean the drain pump. → Page 10 Clean outlet pipe and/or drainage hose.
Water not visible in the drum.	- Not a fault - water below the visible area.
Spin result not satisfactory. Washing wet/too damp.	 Not a fault – unbalanced load detection system has stopped the spin cycle, washing unevenly distributed. Distribute small and large items of washing in the drum. Less Ironing selected? → Page 5 Too low speed selected? → Page 5
The programme duration changes during the wash cycle.	 Not a fault – the programme sequence is optimised for the particular wash process. This may result in changes to the programme duration in the display field.
Spin cycle actuated several times.	- Not a fault - unbalanced load detection system adjusts imbalance.
Residual water in the dispenser for care product %.	 Not a fault – effect of the care product not impaired. If required, clean insert. → Page 9
Odour formation in the washing machine.	 Run Cotton 90 °C programme without washing. Use standard detergent.
Foam is coming out of the detergent drawer.	 Too much detergent used? Mix 1 tablespoon of fabric softener with ½ litre of water and pour into dispenser II (not for outdoor, sports and down-filled textiles!). Reduce detergent dosage for the next wash cycle.
Loud noise formation, vibrations and "Wandering" during spin cycle.	 Appliance feet fixed? Secure appliance feet. → Installation instructions Transportation protection devices removed? Remove transportation protection devices. → Installation instructions
Noises during spin and drain cycles.	− Clean the drain pump. \longrightarrow <i>Page 10</i>
Display panel/indicator lights do not function while the appliance is running.	Power failure?Fuse tripped? Switch on/replace fuse.If the fault occurs repeatedly, call customer service.
The programme takes longer than usual.	 Not a fault – unbalanced load detection system adjusts imbalance by repeatedly distributing the washing. Not a fault – foam detection system active – a rinse cycle is switched on.
Detergent residue on the washing.	 Occasionally phosphate-free detergents contain water-insoluble residue. Select Rinse or brush the laundry after washing.
In the pause status Start/Pause flashes very quickly and a signal sounds.	 Water level too high. Washing cannot be reloaded. Immediately close washing machine door. Select Start/Pause to continue the programme.

If a fault cannot be rectified (switching the machine on and off) or a repair is required:

Set programme selector to ○ Off and pull out the mains plug.
 Turn off the tap and call customer service. → Installation instructions

^{*} If required, select repeatedly

Important information

Before using your washing machine for the first time

Do not put any washing in the washing machine! Turn the tap on. Pour into dispenser II approx. 1 litre water.

- Detergent (dosage according to manufacturer's instructions for light soiling and according to degree of water hardness).

Set programme selector to Easy-Care 60 °C and select Start/Pause.

At the end of the programme set the programme selector to O Off.

Protecting the washing and the machine

- When dosing all detergents, cleaning aids and cleaning agents, always follow the manufacturer's instructions.
- Remove metal parts (paper clips, etc.).
- Wash delicates in the net/bag (tights, curtains, underwired bras).
- Close zips, button up covers.
- Brush sand out of pockets and collars.
- Remove curtain fittings or include in the net/bag.

Insert laundry

nsert large and small items of washing!

Do not jam items of washing between the washing machine door and rubber seal

Washing with different degrees of soiling

Wash new items separately

Light		Do not Prewash.
	Н	If required, pretreat stains. Select Eco ⁺ additional function.
Heavy		Load less washing. Select programme with Prewash. If required, pretreat stains. Select Eco ⁺ additional function.

Soaking

Load washing of the same colour.

Pour soaking agent/detergent into dispenser II according to the manufacturer's instructions. Set programme selector to Cotton 30 °C and select Start/Pause. After approx. 10 minutes select Start/Pause to stop the programme. After the required soaking time reselect **Start**/Pause if the programme is to be continued or change the programme.

Starching

Washing should not be treated with fabric softener.

Liquid starch can be used in all wash programmes. Pour starch into the fabric softener dispenser 🍪 according to manufacturer's specifications (if required clean beforehand).

Dyeing/Bleaching

Dye in household quantities only. Salt may attack stainless steel! Observe specifications of the dye manufacturer! Do not bleach washing in the washing machine!

Outdoor Wear

The laundry must not be treated with fabric softener.

Special detergents suitable for machine wash available in particular from sports shops. Dosage according to manufacturer's instructions. Dose special detergent for outdoor textiles in dispenser II. Set programme selector to **Outdoor Wear**. Select temperature and **Start/Pause**.

Emergency release e.g. if power failure occurs.

The programme continues running when the power supply is restored. If the washing is still to be removed, the door can be opened as described below:

Risk of scalding!

Detergent solution and washing may be hot. If required, leave to cool down. Do not reach into the drum in case it is still rotating. Do not open the door if you can still see water through the glass.

- 1. Set programme selector to O Off, pull out the mains plug.
- 2. Removing base strip → see separate installation instructions.
- **3.** Drain the water. \longrightarrow Page 10
- 4. Pull down emergency release with a tool and release. Door can then be opened.
- 5. Attaching base strip → see separate installation instructions.

→ Observe table of consumption values on Page 8 and instructions on Page 6! Overview of programmes

Outdoor Wear	※ - 40 °C	2 kg	Weather, sport and outdoor textiles also with climate protection membrane	Eco ⁺ ←, Less Ironing, Extra Rinse Reduced final spin at intervals
Wool	- 40°C		Hand or machine-washable wool or rich-wool textiles	Especially gentle wash programme to prevent shrinkage, longer programme pauses (textiles rest in wash liquor)
Rapid 15'	※ - 40 °C		Easy-Care textiles made of cotton, linen, synthetic fibres or blended fabrics	Short programme approx. 15 minutes, suitable for lightly soiled washing
Additional programmes			Rinse, S _t	Rinse, Spin, Empty, Low spin

Siemens Electrogeräte GmbH Carl-Wery-Str. 34 81739 München/Deutschland ing, **Easy-Care 40 °C** at max. selectable spin speed is best suited as a **short programme**. - pour detergent into dispenser **II**, programmes with Prewash - divide detergent between dispensers I and **II**. WI14S440GB

The programmes are time-controlled for lightly soiled textiles. If textiles are heavily soiled, reduce the load or select additional function, e.g. **Eco***

Irrespective of the type of wash Programmes without Prewash

Safety instructions

- Read and follow the operating and installation instructions and all other information enclosed with the washing
 machine.
- Retain documents for subsequent use.

Risk of electric shock

- Never pull out the mains plug by tugging the power cord!
- Insert/pull out the mains plug with dry hands only.

Danger to lifeOn redundant appliances:

- Pull out the mains plug!
- Sever the power cord and discard together with the plug.
- Destroy the lock on the washing-machine door. This will prevent children from locking themselves in and suffocating.

Risk of suffocation Risk of poisioning Risk of explosion

Risk of injury

- Keep packaging, plastic film and packaging parts out of the reach of children.
- Keep detergents and care products out of the reach of children.
- Caused by detergents containing solvents, e.g. stain remover/items of washing pretreated with solvent naphtha may result in an explosion after being loaded into the washing machine.

Before hand thoroughly rinse items of washing by hand.

- Washing machine door may become very hot.
- Caution when draining hot detergent solution.
- Do not climb on the washing machine.
- Do not lean on the open washing machine door.
- Do not reach into the drum in case it is still rotating.

Consumption values

Programme	Additonal function	Load	Current***	Water***	Programme duration***
Cotton 20 °C	-	7 kg	0,21 kWh	77 I	11⁄4 h
Cotton 40 °C*	Eco+C	7 kg	0,78 kWh	77 I	21/4 h
Cotton 60 °C	-	7 kg	1,30 kWh	77	13⁄4 h
Cotton 90 °C	-	7 kg	2,26 kWh	901	2 h
Easy-Care 40 °C*	Eco+C	3,5 kg	0,58 kWh	57 I	11⁄4 h
Delicates/Silk 30 °C	-	2 kg	0,17 kWh	301	3/4 h
₩ Wool 30 °C	-	2 kg	0,20 kWh	40 I	3∕4 h

Programme setting for test according to currently valid European standard 60456.

Information about comparability tests: To test the test programmes, wash indicated load, with **Eco**⁺ additional function and at maximum selectable spin speed.

Programme	Additonal function	Load	consumption	consumption
Coton	Eco ⁺ C**	7/3.5 kg	218 kWh	105601

^{**} Programme setting for testing and energy labelling according to directive 2010/30/EU with cold water (15 °C).

^{***} The values may deviate from the stated values depending on water pressure and hardness, room temperature, type and amount of laundry, detergents used, fluctuations in the mains voltage and selected additional functions.

Insert for liquid detergent depending on model

Position insert for dosing liquid detergent:

- Completely remove detergent drawer. → Page 10
- Push insert forwards.

Do not use insert (push upwards):

- For gel-like detergents and washing powders.
- For programmes with **Prewash** or **Finish in** option.

Care

- **Risk of electric shock!** Pull out the mains plug!
- Risk of explosion! No solvents!

- Wipe with a soft, damp cloth.
- Do not clean the appliance with a water jet.

Clean the detergent drawer ...

.. if it contains detergent or fabric softener residue.

- 1. Pull out, depress insert, take out drawer all the way.
- **2.** Take out insert: using your finger, press insert upwards.
- **3.** Clean detergent dispenser and insert with water and a brush and dry.
- **4.** Attach insert and lock into position (push cylinder onto guide pin).
- **5.** Slide in the detergent dispenser.

_eave detergent drawer open so that residual water can evaporate.

Leave washing machine door open so that the drum can dry out. Use chlorine-free cleaning agent, not steel wool.

No washing in the machine!

Not required if detergent dosed correctly. However, if this does occur, follow the instructions of the descaling agent manufacturer. Suitable descalers can be purchased on our website or from customer service.

Information on the display panel depending on model

F: 15	Close the washing machine door properly; washing may be caught.
F: 17, 29	Turn on tap fully, supply hose kinked/jammed; clean filter \longrightarrow Page 10, water pressure too low.
F: 18	Drain pump blocked; clean drain pump. \longrightarrow Page 10 Drainage hose/outlet pipe blocked; clean drainage hose on the siphon. \longrightarrow Page 10
F: 23	Water in the base pan, appliance leaking. Call customer service!
F: 42, 43, 44	Motor fault. Call customer service. → Installation instructions
Other displays	Switch off appliance, wait 5 seconds and switch on again. If the display is indicated again, call customer service. Installation instructions

Maintenance

Risk of scalding!

Allow detergent solution to cool down! Turn off the tan!

Detergent-solution pump

Set programme selector to O Off, pull out the mains plug.

 Take the drainage hose out of the holder. Remove sealing cap, allow detergent solution to flow out. Put the closing cap back on the hose.

3. Clean the interior, pump cover thread and pump housing (fan impeller in the detergent-solution pump must rotate).

To prevent unused detergent from flowing into the outlet during the next wash: Pour 1 litre of water into dispenser II and start the **Empty** programme.

Drainage hose on the siphon

Set programme selector to O Off, pull out the mains plug.

- 2. Clean drainage hose and siphon spigot.
- 3. Re-attach drainage hose and secure connection point with hose clip.

Filter in the water inlet hose

Risk of electric shock!

Do not immerse Aqua-Stop safety device in water (contains electric valve).

Release water pressure in the supply hose:

- 1. Turn off the tap!
- 2. Select any programme (except Spin/Empty).
- **3.** Select **Start**/Pause. Leave programme for approx. 40 seconds.
- **4.** Turn the programme selector to O Off. Pull out the mains plug.

5. Disconnect the hose from the water tap. Clean filter with small brush.

and/or for standard and Aqua-Secure models: Remove hose from the rear of the appliance. Take out filter with pliers and clean.

Connect the hose and check for leaks.

What to do if ...
