**Information about comparability tests:**

- **Risk of explosion**
  - Keep detergents and care products out of the reach of children.
  - Do not reach into the drum if it is still rotating.
  - Do not climb onto the washing machine.
  - Be careful when emptying hot detergent solution.

- **Danger of suffocation**
  - Use the washing machine for bleaching clothes.
  - Empty pockets.
  - Fasten zips, do up any buttons.

- **Starching**
  - Starching is possible in all wash programmes if liquid starch is used. Pour starch into the compartment in accordance with the manufacturer's instructions (rinse first if necessary).

- **Consumption**
  - Note that approx. 2.5 kg of laundry requires approx. 60 l of water.

- **Dye**
  - Dye should only be used in normal household quantities. Salt may damage stainless steel. Always follow the dye manufacturer's instructions.

- **Spin**
  - For optimum spin behaviour, load large power consumption ideally to each programme, depending on the type of fabric and the load.

- **Start/Stop**
  - Push in the detergent drawer.

- **Filter**
  - Clean the filter:
    - Insert for liquid detergent
    - Turn off the tap.
    - Remove the sealing cap, allow the detergent solution to flow out.
    - Push the sealing cap back on.

- **Washing agent**
  - Use the washing agent of your choice. Never exceed the dosing quantities recommended by the manufacturer. Do not add a second detergent.

- **Top-up**
  - Top-up not poss.; this should not be necessary if the detergent is measured out correctly. If it does become necessary, however, proceed according to the descaling agent manufacturer's instructions. Suitable descalers can be obtained via our website or in the consumer distribution.

- **Start/Reload**
  - To continue, press the Start/Reload button.

- **Emergency release**
  - In case of emergency, press the Start/Reload button.

- **What to do if...**
  - Washing machine door cannot be opened:
    - The programme selector to Off and/or Off. Let the programme run for approximately 40 seconds.
    - Filter blocked? Clean the filter.
    - Rinse stop:
      - Rinse stop by pressing the Start/Reload button.
      - Tap not turned on?
      - Not a fault - unbalanced-load detection system is adjusting the imbalance by delaying the drum rotation.
      - Power cut?
      - Not a fault - unbalanced-load detection system is adjusting the imbalance by delaying the drum rotation.
      - Water level too high. Close the washing machine door immediately.
    - Too much detergent used?
      - Select the programme or brush out the laundry after washing.
      - Occasionally, phosphate-free detergents contain water-insoluble residues. These may not all be removed by water.
      - Dye was used?
      - Not a fault - the action of the care product is not affected.
      - Detergent residue?
      - Remove detergent residue immediately.
      - Do not clean with a jet of water.
      - Do not reach into the drum after washing, even if programme is not finished.
      - Drum open:
        - The programme must be interrupted. To finish the programme, open the washing machine door and disconnect the mains plug.
        - Drum cannot be opened:
          - The programme must be interrupted. To finish the programme, open the washing machine door and disconnect the mains plug.
    - Detergent compartment:
      - Detergent compartment a: Insert for liquid detergent
      - Detergent compartment b: This should not be necessary if the detergent is measured out correctly. If it does become necessary, however, proceed according to the descaling agent manufacturer's instructions. Suitable descalers can be obtained via our website or in the consumer distribution.
    - Water pressure too low:
      - Do not use the washing machine for bleaching clothes.
      - Do not operate the washing machine with a water pressure of less than 1.5 bar. This should not be necessary if the detergent is measured out correctly. If it does become necessary, however, proceed according to the descaling agent manufacturer's instructions. Suitable descalers can be obtained via our website or in the consumer distribution.
      - Tap not turned on?
      - Not a fault - unbalanced-load detection system is adjusting the imbalance by delaying the drum rotation.
      - Power cut?
      - Not a fault - unbalanced-load detection system is adjusting the imbalance by delaying the drum rotation.
      - Water level too high. Close the washing machine door immediately.

- **Installation instructions**
  - See operating instructions.
  - Refer to the safety instructions on page 5 for important information on appliance installation.
Your washing machine

Congratulations – you have chosen a modern, high-quality domestic appliance manufactured by Bosch. A distinctive feature of the washing machine is its economical water and energy consumption. Each machine that leaves our factory is inspected thoroughly to ensure that it functions properly and is in perfect condition.

For more information on our products, accessories, replacement parts and services, see our website www.bosch-home.com or contact our after-sales service centres.

Environmental protection/Conservation tips

- Always fill the washing machine with a maximum amount of laundry for the relevant programme.
- Wash laundry with normal soiling without a pre-wash.
- The selectable temperatures apply to the care labels on the textiles. The temperatures in the machine may deviate from this so that you get the optimum mix of energy-saving and washing results.
- Measure the detergent according to the manufacturer’s instructions and water hardness.
- Energy saving mode: The display panel lighting goes out after a few minutes; start/reload flashes. Press any button to turn the light back on.
- If the laundry is then to be dried in the tumble dryer, select the appropriate spin speed according to the instructions from the dryer manufacturer.

Automatic stain removal
Automatic treatment of 16 different types of stain possible. No pretreatment of stains required - the washing machine automatically adapts the washing process → page 6.

Intended use

- For domestic use only
- For machine-washable fabrics and hand-washable wool in detergent solution
- To be operated with cold drinking water and commercially-available detergents and care products that are suitable for use in washing machines.
  - Do not leave children unattended near the washing machine.
  - The washing machine is not to be used by children or persons not familiar with the operating instructions.
  - Keep pets away from the washing machine.

Programmes

Detailed programme overview → page 7.
Temperature and spin speed can be selected individually, depending on the selected programme and programme progress.

Preparing

Before the first wash
Run a wash cycle without laundry → Page 8

特点

- Install correctly, according to the separate Installation instructions.
- Integrated, the water softener, bleach, stain remover
- Compartments: fabric softener, starch
- Compartments: Detergent for pre-wash

Check the machine

- Never use a damaged machine.
- Inform the after-sales service.

Connect the mains plug

Make sure your hands are dry.
Take hold of the plug only.

Turn the tap on

Insert for liquid detergent (depending on model) → page 10

Display panel/options buttons/change buttons

- 0, 400 - 1600 rpm Set the spin speed (* model-dependent) (0 = no spin during the programme sequence)
- –20° - 90°C °C Set the temperature (– = cold)

All buttons are sensitive and need only to be touched lightly.

Page 1
Sorting the laundry

Follow the manufacturer's care information.

According to the information on the care labels.

According to type, colour, soiling and temperature.

Do not exceed the maximum load → page 7.

Observe the important information → page 9.

Detergents and care products

Measure accordingly:
Amount of laundry, level of soiling, water hardness (ask your water supply company) and
manufacturer's instructions.

Models without insert for liquid detergent:
Pour liquid detergent into the appropriate dispenser and place in the drum.

During operation: Open the detergent drawer with care.

Dilute thick fabric softener and care products with water.

This prevents blockages.

Open the door/set the programme**

"If the childlock is active → Deactivate, page 5.

Follow the instructions in the display panel.

Add detergent and care products

Observe the dosage recommendation for detergent on the display panel → page 9.

Close the washing machine door

Selecting individual settings → page 5.

Select stain → page 6.

Setting the temperature/spin speed → page 2.

Washing

Press D Start/Reload

Switching off

Turn the programme selector to Off.

Turning off the tap

Not required for AquaStop models → Installation instructions, page 7.

Removing the washing

Open the washing machine door and remove the washing.

If Drain or Spin is active: turn the programme selector to Drain or Spin. Select the spin speed if necessary.

Press D Start/Reload.

- Remove any foreign objects - risk of rusting.
- Leave the washing machine door and detergent drawer open so that any residual water can dry.

Programme finished when ...

... Finished, Remove washing
appears on the display panel.

If the display panel lighting is off, press any button → Energy saving mode, page 1.

Cancelling the programme

Programmes at high temperatures:
- Cool laundry: Select Rinse.
- Select D Start/Reload.

Programmes at lower temperatures:
- Select Spin or Drain.
- Select D Start/Reload.

Changing the programme, if ...

... you have selected the wrong programme by mistake:
- Reselect the programme.
- Press D Start/Reload. The new programme starts from the beginning.

Adding laundry, if ... → page 6

... D Start/Reload is selected and Top-up possible appears on the display panel.

- Do not leave the washing machine door open for too long as water from the washing could leak out.
- Load display not active when reloading.

Press D Start/Reload.
Individual settings

Select options < / >
Information on programme sequence; with progress or load bar, as appropriate.

Change settings -> + available depending on the selected programme.
* If the buttons are held for longer, the appliance automatically scrolls through the subsequent setting options.

Options see also the Overview of programmes

VarioPerfect *
SpeedPerfect - Standard - EcoPerfect

SpeedPerfect: For washing in a shorter time with a washing outcome comparable to that of the standard programme. Maximum load

Overview of programmes, page 7

EcoPerfect: Energy-optimised washing by reducing the temperature while achieving a consistent washing result. The washing temperature is lower than the selected temperature. For special hygiene requirements, the Allergy+ programme is recommended.

end time *
When you select the programme, the respective time to the end of the programme is displayed. It can be adjusted to a maximum of 24 hours in 1-hour increments. Press the -> + Change button repeatedly until the required number of hours is displayed (h=hour). It is not possible to make adjustments once the programme has started.

Prewash off - on
For heavily soiled items. Prewash at max. 30 °C.

Easy-iron off - on
Special spin sequence with subsequent fluffing. Gentle final spin at reduced speed. Residual moisture in the laundry is increased slightly.

Signal *
Select the volume of the information signals. off - quiet - medium - loud - very loud

button signal *
Select the volume of the button signals. off - quiet - medium - loud - very loud

language *
Select the language of the display texts.

Water Plus off - on
Increased water level. Gentler treatment of the laundry.

Rinse stop off - on
After the final rinse, the laundry remains in the water.

Rinse Plus *
max. +3 Rinse cycles
Extra rinse. Prolonged programme duration. Recommended use: for particularly sensitive skin and/or in areas with very soft water.

Display symbols

Childproof lock/appliance lock
off - on
You can lock the washing machine to prevent the functions you have set from being changed inadvertently.
To activate: Press and hold the < Options button for 5 seconds.
The symbol lights up.
To deactivate: Press and hold the < Options button for 5 seconds.
- If the programme selector is adjusted after the appliance has started: The symbol flashes. First, reset the programme selector to the original programme, then deactivate.
- The childlock can remain activated until you start the next programme, even after the machine has been switched off (the name of the last programme runs appears on the display panel). Then you can deactivate the childlock again before starting the programme and activate it again as necessary once the programme has started.

Foam detection
Too much foam in the washing machine. Foam detection system active - special programme sequence to reduce foam.

Personalised programme
You can store a programme and all of its settings permanently under Memory 1 and Memory 2.
- Turn the programme selector to Memory 1 or Memory 2.
- Using the -> + buttons, select the desired programme.
- Select the desired option with the < / > button, and, if necessary, change the setting with the -> + buttons.
- Make your desired settings with the °C °C (temperature) and °C °C (spin) buttons.
- Press the Start/Reload button.

Select stain

The correct treatment for every stain
Do not let stains dry. Remove any solid residue beforehand. Sort items of laundry as usual and load the washing machine. Select a type of stain (cannot be combined).

A total of 16 different stains can be selected. The washing machine adjusts the washing temperature, drum movement and soaking time to suit the type of stain. Hot or cold water, gentle or intensive washing control (thanks to the new drum structure) and a long or short soaking time ensure that the wash programme has a special sequence for each type of stain.

Using the > Options button, select Fleckenwahl (Select stain); change with the -> + Change buttons; select a stain.

Stains

Baby food
Cosmetics
Strawberry
Blood
Egg
Grass
Sweat
Tea
Butter/edi. oil
Orange
Tomatoes
Bott. sock dirt
Chocolate
Red wine stain
Chocolate
Coffee
Soil + sand

Stain treatment in detail - 2 examples

Egg
Soaked in lukewarm water, selected wash cycle with a higher water level and additional rinse cycles to remove particles

Blood
Blood is first "loosened" in cold water, then the selected wash programme starts.

For the other types of stain, we have formulated comparable solutions in our intensive studies.

Reload

If you want to add additional items of laundry after the programme has started, choose Start/Reload. The machine checks whether topping up laundry is possible. Follow the instructions in the display panel.

For safety reasons, the washing machine door remains locked when the water level and/or temperature is high, or while the drum is rotating.

To continue the programme, press the Start/Reload button.
**Overview of programmes**  
Check the consumption values table on page 8 and the instructions on page 9.

</table>

**Additional programmes**  
- Rinse, Spin, Drain

*reduced load for SpeedPerfect option

Mixed Load 40 °C with maximum available spin speed is ideal as a short programme.
Programmes without pre-wash - add detergent to compartment II; programmes with pre-wash - divide the detergent between compartments I and II.
**Safety instructions**

- Read the Instruction manual and Installation instructions and all other information enclosed with the washing machine and act accordingly.
- Retain the documents for subsequent use.

**Risk of electric shock**
- Never pull the cable to disconnect the mains plug.
- Only insert/pull out the mains plug with dry hands.

**Danger to life**
For appliances that have reached the end of their service life:
- Disconnect the mains plug.
- Sever the mains cable and discard along with the plug.
- Destroy the lock on the washing machine door. This will prevent children from locking themselves in and risking their lives.

**Danger of suffocation**
- Keep packaging, film and packaging parts out of the reach of children.

**Risk of poisoning**
- Keep detergents and care products out of the reach of children.

**Risk of explosion**
- Items of laundry pretreated with cleaning agents containing solvents, e.g. stain remover/cleaning solvent may cause an explosion after being loaded into the washing machine. Rinse items of laundry thoroughly by hand beforehand.
- The washing machine door can become very hot.
- Be careful when emptying hot detergent solution.
- Do not climb onto the washing machine.
- Do not lean on the open washing machine door.
- Do not reach into the drum if it is still rotating.

**Risk of injury**
- The washing machine door can become very hot.
- Risk of injury
- Keep packaging, film and packaging parts out of the reach of children.

---

**Important information**

**Before washing for the first time**
- Do not put any laundry in the machine. Turn the tap on. Pour into compartment II:
  - approx. 1 litre water
  - detergent dosage according to the manufacturer’s instructions for light soiling and according to water hardness
- Set programme selector to Easy-Care 60 °C and press Start/Reload. At the end of the programme, turn the programme selector to Off.

**Protecting the laundry and the machine**
- When determining the dosage of all washing powders, additives and cleaning agents, you must follow the manufacturer’s instructions.
- Empty pockets.
- Look out for metal items (paperclips, etc.).
- Wash delicates in a laundry bag (tights, curtains, underwired bras).
- Fasten zips, do up any buttons.
- Brush sand out of pockets and collars.
- Remove curtain fittings or place in the laundry bag.

**Load laundry**
- For optimum spin behaviour, load large and small items of laundry together.
- Individual items may lead to considerable imbalances.
- Take care not to trap items of laundry between the washing machine door and the rubber seal.

**Soaking**
- Load laundry of the same colour.
- Pour soaking agent/detergent into compartment II in accordance with the manufacturer’s instructions. Turn the programme selector to Easy-Care 30 °C and press Start/Reload. After approx. 10 minutes, press Start/Reload to stop the programme. Once the required soaking time has elapsed, press Start/Reload again to continue the programme, or select a different programme.

**Starching**
- Laundry must not be treated with fabric softener.
- Starching is possible in all wash programmes if liquid starch is used. Pour starch into the compartment in accordance with the manufacturer’s instructions (rinse first if necessary).

**Dyeing/bleaching**
- Dye should only be used in normal household quantities. Salt may damage stainless steel. Always follow the dye manufacturer's instructions.
- Dyeing/bleaching
- Starching
- Soaking
- Load display
- The load sensor detects how heavily the washing machine is loaded. The laundry is not weighed.

**Recommended dosage**
Based on the selected programme and the detected load, the recommended dosage function provides a recommendation for the detergent dosage in %. The % figure refers to the recommendation of the detergent manufacturer.

**Load adjust**
Independently of the load display, the automatic load sensing function uses additional sensors to adapt the water and power consumption ideally to each programme, depending on the type of fabric and the load.

* Programme setting for testing and energy labelling in accordance with EU directive 2010/30/EU with cold water (15 °C).
** Programme setting for testing and energy labelling in accordance with EU directive 2010/30/EU with cold water (15 °C).
*** The values may deviate from the stated values depending on water pressure and hardness, room temperature, type and amount of laundry, detergents used, fluctuations in the mains voltage and selected additional functions.
Insert for liquid detergent  model-dependent

Position the insert for dispensing liquid detergent:
- Remove the detergent drawer completely  page 10.
- Slide the insert forwards.
- Do not use the insert (slide upwards):
  - for gel detergents and washing powder
  - for programmes with the Prewash and end time options.

Care

Machine housing, control panel
- Remove detergent residue immediately.
- Wipe with a soft, damp cloth.
- Do not clean with a jet of water.

Cleaning the detergent drawer...
- If it contains detergent or fabric softener residues.
  1. Pull out, press insert down, remove drawer completely.
  2. To remove the insert: press the insert upwards from below with your finger.
  3. Clean the detergent dispenser tray and insert with water and a brush and dry it.
  4. Fit the insert and engage (connect the cylinder to the guide pin).
  5. Push in the detergent drawer.

Leaving the detergent drawer open so that any residual water can evaporate.

Drum

Use chlorine-free cleaning agent, not steel wool.

Descaling
No laundry in the machine.
This should not be necessary if the detergent is measured out correctly. If it does become necessary, however, proceed according to the descaling agent manufacturer’s instructions. Suitable descalers can be obtained via our website or from our after-sales service (page 13).

Information on the display panel  depending on model

Door open?
Close the washing machine door properly; laundry may be caught.

Tap closed?
Open the tap completely, supply hose kinked or trapped; Clean the filter  page 11, water pressure too low.

Pump blocked?
Detergent solution pump blocked; Clean the detergent solution pump  page 11.
Drainage hose/waste pipe blocked; Clean the drainage hose at the siphon  page 11.

Pause
Top-up not poss.; Water level too high or Temperature too high

F: 23
Water in the base tub, appliance leaking. Call the after-sales service.

F: 34
Washing machine door cannot be locked. Open the washing machine door and close it so that you hear it "click", switch the appliance off and on again, set the programme and make your settings, start the programme.

Other displays
Switch off the appliance, wait for 5 seconds and switch it back on. If the display appears again, call the after-sales service  page 13.

Information about blockages

Detergent solution pump

Turn the programme selector to Off and disconnect the mains plug.

1. Open and remove the service flap.

2. Take the drainage hose out of the retainer.
Remove the sealing cap, allow the detergent solution to flow out.
Push the sealing cap back on.

3. Unscrew the pump cover carefully (residual water).
4. Clean the interior, pump cover thread and pump housing (the impeller in the detergent solution pump must be able to rotate).

5. Replace the pump cover and screw it on tightly. The handle points upright. Replace the drainage hose in the holder.
6. Refit the service flap and close it.

To prevent unused detergent from flowing straight into the empty during the next wash:
Pour 1 litre of water into compartment II and start the Drain programme.

Drainage hose at the siphon

Turn the programme selector to Off and disconnect the mains plug.

1. Loosen the hose clamp, remove the drainage hose carefully (residual water).
2. Clean the drainage hose and siphon connecting piece.
3. Reattach the drainage hose and secure the connection with the hose clamp.

Filter in the water supply

Risk of electric shock
Do not immerse the Aqua-Stop safety device in water (it contains an electric valve).

Reduce the water pressure in the supply hose:
1. Turn off the tap.
2. Select any programme (except Spin/ Drain).
3. Press Start/Reload. Let the programme run for approximately 40 seconds.
4. Turn the programme selector to Off. Disconnect the mains plug.

Clean the filter:
5. Disconnect the hose from the tap.
Clean the filter with a small brush.
and/or for Standard and Aqua-Secure models:
Remove the hose from the rear of the appliance.
Remove the filter with pliers and clean.
6. Connect the hose and check for leaks.
What to do if...

- Water is escaping:
  - Attach/replace the drainage hose correctly.
  - Tighten the screw connection of the supply hose.

- No water is entering the drum:
  - Start/Reload not selected?
  - Tap not turned on?
  - Filter blocked? Clean the filter ➞ page 11.
  - Supply hose kinked or trapped?

- Washing machine door cannot be opened:
  - Rinse stop (no final spin) selected? ➞ page 3.4.
  - Can be opened by emergency release only? ➞ page 1.3.

- Programme does not start:
  - Start/Reload or end time selected?
  - Washing machine door closed?
  - Childproof lock active? Deactivate ➞ page 5.

- Detergent solution does not empty:
  - Rinse stop (no final spin) selected? ➞ page 3.4.
  - Clean the detergent solution pump ➞ page 11.
  - Clean the waste pipe and/or drainage hose.

- Water not visible in the drum:
  - Not a fault - water below the visible area.

- Spin result not satisfactory:
  - Laundry wet/too damp:
    - Not a fault - the unbalanced-load detection system is adjusting the imbalance.
    - Distribute large and small items of laundry evenly in the drum.
  - Easy-iron selected? ➞ page 5.
  - Speed selected too low? ➞ page 5.

- The programme duration changes during the washing cycle:
  - Not a fault - the programme sequence is optimised for the relevant washing process. This can cause changes in the programme duration in the display panel.

- Spinning is restarted several times:
  - Not a fault - the unbalanced-load detection system is adjusting the imbalance.

- Residual water in the compartment for care products:
  - Not a fault - the action of the care product is not affected.
  - Clean the insert if necessary ➞ page 10.

- Odours build up in the washing machine:
  - Run the Cottons 90 °C programme without laundry. Use standard detergent.

- The status display lights up:
  - Too much detergent used?
    - Mix 1 tablespoon of fabric softener with ½ litre of water and pour into compartment II (not for outdoor or down fabrics).
    - Reduce the detergent dosage for the next wash cycle.

- Loud spinning, vibrations and "walking" during the spin cycle:
  - Are the appliance feet fixed?
    - Secure appliance feet ➞ Installation instructions.
    - Transportation safety devices removed?
      - Remove transportation safety devices ➞ Installation instructions.

- Noise emitted during spinning and emptying:
  - Clean the detergent solution pump ➞ page 11.

- Display panel/indicator lamps do not function during operation:
  - Power cut?
    - Circuit breakers tripped or fuses blown? Reset the circuit breakers or change the fuses.
    - If the fault occurs repeatedly, call the after-sales service.

- Programme sequence longer than usual:
  - Not a fault - the unbalanced-load detection system is adjusting the imbalance by repeatedly redistributing the laundry.
  - Not a fault - foam detection system active - several rinse cycles are added.

- There is detergent residue on the laundry:
  - Occasionally, phosphate-free detergents contain water-insoluble residues.
  - Select the Rinse programme or brush out the laundry after washing.
  - Use liquid detergent

- Water level too high. Close the washing machine door immediately.
  - To continue, press the Start/Reload button.

If you cannot correct a fault yourself (switching on/off) or a repair is required:
- Turn the programme selector to Off and remove the mains plug from the socket.
- Turn off the tap and call the after-sales service ➞ page 13.

Emergency release e.g. in the event of a power cut

The programme continues when the power supply is restored. However, if the laundry has to be removed, the washing machine door can be opened as follows:

1. Turn the programme selector to Off and disconnect the mains plug.
2. Empty the detergent solution ➞ page 11.
3. Pull the emergency release downwards with a tool and release.

Washing machine door can then be opened.

After-sales service

If you cannot remedy the fault yourself (What to do if ... ➞ page 12, 13), contact our after-sales service. We will always find a suitable solution to avoid unnecessary visits by repair personnel.

The contact details of your nearest after-sales service can be found here or in the after-sales service directory (model-dependent).

- GB 0844 892 8979 (Calls from a BT landline will be charged at up to 3 pence per minute. A call set-up fee of up to 6 pence may apply.)

Please give customer service the product number (E-Nr.) and the production number (FD) of the appliance.

<table>
<thead>
<tr>
<th>E-Nr.</th>
<th>FD</th>
</tr>
</thead>
</table>

This information can be found:
- on the inside of the washing machine door/"opened service flap" and rear of the appliance.
- *model-dependent*

Trust the manufacturer’s competence. Turn to us.

You will thereby ensure that the repairs are performed by trained service personnel equipped with original repair parts.
Observe the safety instructions on page 8

Read these instructions and the separate installation instructions before operating the washing machine.
