Your new dryer

Congratulations on your purchase of a Bosch condensation dryer.

Intended use

This appliance is labelled in accordance with European Directive 2009/125/EC on electrical appliances intended for domestic use only, and is not suitable for business or industrial use.

The appliance is supplied with a mains plug fitted with a selector switch. You must ensure that the appliance is only connected to a suitable electrical socket that meets the following requirements:

- Suitable socket: a socket that can be easily switched off when the appliance is not in use.
- Maximum permissible voltage: 230 V, 50 Hz.
- Plug and socket: the plug must not exceed 16 A and 230 V.
- Open circuits: the plug must be suitable for use with a three-phase supply.

The connection must comply with the relevant country standards.

Make sure that the appliance can be easily switched off and that the connection is not left exposed to any risk of damage.

When the appliance is not in use, cut off the mains plug from the electrical socket or switch off the relevant fuse in the main switchboard.

Using incorrect safety instructions on page 11.

Preparation

1. Unpack your dryer and check that it was not damaged during transport.
2. Check that all the packaging materials have been removed from the dryer.

Inspecting the appliance

1. Check that the appliance is not damaged and that all the components are present.
2. Check that the appliances have been installed in accordance with these instructions.

Connecting the appliance to the water supply

1. Check that the water supply is suitable for use with the appliance.
2. Check that the water supply is not damaged.

Selecting and adjusting the programme

1. Select the programme that is best for your laundry load.
2. Adjust the level of dryness as required.

Drying

1. Place the laundry in the drum and close the door.
2. Select the programme and adjust the level of dryness.
3. Start the drying cycle.

Removing the laundry

1. Press the button to stop the programme and remove the laundry from the drum.
2. Allow the drum to cool down before opening the door.

Care and cleaning

1. Clean the fluff filter after each drying operation.
2. Clean the moisture sensors after each drying operation.

Information on laundry...

1. Read the care labels on your laundry before drying.
2. Follow the manufacturer's instructions for your laundry.

Drying tips

1. Use the correct programme for your laundry load.
2. Use the correct level of dryness for your laundry load.
3. Use the correct temperature for your laundry load.

Intended use

This appliance is labelled in accordance with European Directive 2009/125/EC on electrical appliances intended for domestic use only, and is not suitable for business or industrial use.

The appliance is supplied with a mains plug fitted with a selector switch. You must ensure that the appliance is only connected to a suitable electrical socket that meets the following requirements:

- Suitable socket: a socket that can be easily switched off when the appliance is not in use.
- Maximum permissible voltage: 230 V, 50 Hz.
- Plug and socket: the plug must not exceed 16 A and 230 V.
- Open circuits: the plug must be suitable for use with a three-phase supply.

The connection must comply with the relevant country standards.

Make sure that the appliance can be easily switched off and that the connection is not left exposed to any risk of damage.

When the appliance is not in use, cut off the mains plug from the electrical socket or switch off the relevant fuse in the main switchboard.

Using incorrect safety instructions on page 11.
Your new dryer

Congratulations - You have chosen a modern, high-quality Bosch domestic appliance.

The condensation dryer is distinguished by its economical energy consumption.

Every dryer which leaves our factory is carefully checked to ensure that it functions correctly and is in perfect condition. Should you have any questions, our after-sales service will be pleased to help.

Disposal in an environmentally-responsible manner

This appliance is labelled in accordance with European Directive 2012/19/EU concerning used electrical and electronic appliances (waste electrical and electronic equipment - WEEE). The guideline determines the framework for the return and recycling of used appliances as applicable throughout the EU.

For further information about our products, accessories, spare parts and services, please visit: www.bosch-home.com

Intended use

- for domestic use only,
- only to be used for drying fabrics that have been washed with water.
- This appliance is intended for use up to a maximum height of 4000 metres above sea level.

Keep children younger than 3 years old away from the dryer.

Do not let children make the cleaning and maintenance work on the dryer without supervision. Do not leave children unsupervised near the dryer.

Keep pets away from the dryer.

The dryer can be operated by children 8 years old and older, by persons with reduced physical, sensory or mental abilities and by persons with insufficient experience or knowledge if they are supervised or have been instructed in its use by a responsible adult.

Never start the dryer if it is damaged! Inform your after-sales service.

Inspecting the dryer for obvious damage:

- Smoking, burning smell, overheating
- Electrical faults, damage to the control panel or heater, damaged motor

Your warranty will be void if:

- The appliance is used for other than its domestic use
- There is evidence of unauthorised alterations or repairs

When using the appliance:

- Switch off the appliance and pull out the mains plug when you have finished using it for the day.
- Do not let children near the dryer during use.
- Do not let the appliance run unattended.
- Do not use the appliance if the lid is not correctly closed.
- Do not use the appliance if it is not switched on. The appliance will not start.

Disposal and recycling:

This appliance is labelled in accordance with European Directive 2012/19/EU concerning used electrical and electronic appliances (waste electrical and electronic equipment - WEEE). The guideline determines the framework for the return and recycling of used appliances as applicable throughout the EU.

For further information about our products, accessories, spare parts and services, please visit: www.bosch-home.com

Intended use

- for domestic use only,
- only to be used for drying fabrics that have been washed with water.
- This appliance is intended for use up to a maximum height of 4000 metres above sea level.

Selecting and adjusting the drying programmes

Select the drying programme according to the characteristics of the laundry.

A programme is selected by:

- Pressing the programme selector
- Pushing the programme selector to the desired programme with a short movement

... and adapt to individual requirements

The drying result (e.g. Cupboard Dry) can be adjusted over three levels (1 - max. 3) for the Cottons, Easy-Care and SuperQuick 40' programmes → presetting = 0.

After one of these programmes has been finely adjusted, the setting is retained for the others. Further information → Page 5/6.

Reduced temperature for delicate fabrics that require a longer drying time; e.g. for polyacryls, polyamide, elastane or acetate.

Energy-saving mode

Read these instructions and the separate instructions before operating the dryer.

Fine adjustment of the drying result

The drying result (e.g. Cupboard Dry) can be adjusted over three levels (1 - max. 3) for the Cottons, Easy-Care and SuperQuick 40' programmes → presetting = 0.

After one of these programmes has been finely adjusted, the setting is retained for the others. Further information → Page 5/6.

Use the fluff filter:

- for the programme selection
- to control the cold air intake

Make sure your hands are dry. Hold the plug only.

Make sure your hands are dry. Hold the plug only.
Emptying condensation

Empty container after each drying operation!
1. Pull out condensate container keeping it horizontal.
2. Pour out condensation.
3. Always push container in fully until it clicks into place.
If Container flashes in the display panel → What to do if..., Page 10.

Cleaning the fluff filter

Clean the fluff filter after each drying operation.
1. Open the door, remove fluff from door/door area.
2. Pull out and fold open the fluff filter.
3. Remove the fluff (by wiping the filter with your hand).
   If the fluff filter is very dirty or blocked, rinse with warm water and dry thoroughly.
4. Close and reinsert the fluff filter.

Switching off the dryer

Turn the programme selector to Off.
Do not leave laundry in the dryer.

Removing the laundry

The automatic anti-crease function causes the drum to move at specific intervals, the washing remains loose and fluffy for an hour (two hours if the additional Reduced Ironing function is also selected depending on model).

Programme end once lights up in the display.

Interrupt programme removing or adding laundry.

The drying cycle can be interrupted for a brief period so that laundry may be added or removed. The programme selected must then be resumed and completed.

Never switch the dryer off before the drying process has ended. Drum and door may be hot!

1. Open door, the drying process is interrupted.
2. Load or remove laundry and close door.
3. If required, select a new programme and additional functions.
4. Press the Start/Stop button.
Information on laundry ...

Labelling of fabrics
Follow the manufacturer's care information.
- Drying at normal temperature.
- Drying at low temperature → also select Low Heat.
- Do not machine dry.

Observe safety instructions without fail → Page 11!
Do not tumble-dry the following fabrics for example:
- Impermeable fabrics (e.g. rubber-coated fabrics).
- Delicate materials (silk or curtains made from synthetic material) → they may crease
- Laundry contaminated with oil.

Drying tips
- To ensure a consistent result, sort the laundry by fabric type and drying programme.
- Always dry very small items (e.g. baby socks) together with large items of laundry (e.g. hand towel).
- Close zips, hooks and eyelets, and button up covers. Tie fabric belts, apron strings, etc. together.
- Do not over-dry easy-care laundry → risk of creasing! Allow laundry to finish drying in the air.
- Do not dry woolens in the dryer, only use to freshen them up → Page 7, Woolens finish Programme (depending on model).
- Do not iron laundry immediately after drying, fold items up and leave for a while → the remaining moisture will then be distributed evenly.
- The drying result depends on the type of water used during washing. → Fine adjustment of the drying result → Page 5/6.
- Machine-knitted fabrics (e.g. T-shirts or jerseys) often shrink the first time they are dried → do not use the Extra Dry programme.
- Starched laundry is not always suitable for dryers → starch leaves behind a coating that adversely affects the drying operation.
- Use the correct dosage of fabric softener as per the manufacturer's instructions when washing the laundry to be dried.
- Use the timer programme for small loads → this improves the drying result.

Environmental protection / Energy-saving tips
- Before drying, spin the laundry thoroughly in the washing machine → the higher the spin speed the shorter the drying time will be (consumes less energy), also spin easy-care laundry.
- Put in, but do not exceed, the maximum recommended quantity of laundry → programme overview → Page 7.
- Make sure the room is well ventilated during drying.
- Do not obstruct or seal up the air inlet.
- Keep the air cooler clean → Page 6 “Care and cleaning”.

Fine adjustment of the drying result

Fine adjustment of the drying result

Drying, Iron Dry, Cupboard Dry, Anti-Crease/End are displayed in sequence. Short signal when changing from level 3 to 0, otherwise long signal.

Care and cleaning

Dryer housing, control panel, air cooler, moisture sensors
- Wipe with a soft, damp cloth.
- Do not use harsh cleaning agents and solvents.
- Remove detergent and cleaning agent residue immediately.

Air cooler / Protective filter
When cleaning, only remove the protective filter. Clean the air cooler behind the protective filter once a year.
- Allow the dryer to cool.
- Residual water may leak out, so place an absorbent towel underneath the maintenance door.

1. Unlock the maintenance door.
2. Open the maintenance door fully.
3. Turn both locking levers towards each another.
4. Pull out the protective filter/air cooler.

Do not damage the protective filter or air cooler. Clean with warm water only. Do not use any hard or sharp-edged objects.

5. Clean the protective filter/air cooler thoroughly, Allow to drip dry.
6. Clean the seals.
7. Re-insert the protective filter/air cooler, with the handle facing down.
8. Turn back both locking levers.
9. Close the maintenance door until the lock clicks into place.

Moisture sensors
The dryer is fitted with stainless steel moisture sensors. The sensors measure the level of moisture in the laundry. After a long period of operation, a fine layer of limescale may form on the sensors.

1. Open the door and clean the moisture sensors with a damp sponge which has a rough surface.

Do not use steel wool or abrasive materials.
Sort the laundry according to type of textile and fabric. Fabrics must be suitable for tumble drying.

</tbody>
</table>

*for 🚄 Cottons and 🚄 Easy-Care programmes only.
**Dryness levels can be selected individually → Extra Dry, Cupboard Dry and Iron Dry (depending on the model).
Recommendation: Dry separately.

### Installation

**Delivery specification:** dryer, instructions for installation and use, woollens basket (depending on model).

1. **Mains connection**
   - Connect to an AC earthed socket. If in doubt have the socket checked by an expert.
   - The mains voltage and the voltage shown on the rating plate (a Page 9) must correspond.
   - The connected load and necessary fuse protection are specified on the rating plate.

2. **Setting up the dryer**
   - The appliance plug must always be accessible.
   - Ensure that the appliance is installed on a clean, level and solid surface.
   - Keep the cooling grille at the front of the dryer unobstructed.
   - Keep the area around the dryer clean.
   - Do not set up the dryer behind a door or sliding door as this may obstruct or prevent the dryer door from opening, which can prove hazardous for children.

3. **Preparation**
   - Empty the condensate container.
   - Select any programme using the programme selector.
   - Press the Start/Stop button.
   - Wait 5 min. and then empty the condensate container again.

4. **Transport**
   - Turn the programme selector to Off.
   - Take all accessory parts out of the drum.
   - The drum must be empty.

5. **Frost protection**
   - Make sure that the air inlet remains unobstructed.
   - Do not store the dryer near a source of frost or in a garage.

6. **Care and cleaning**
   - Do not operate the dryer if there is a danger of frost.
   - The appliance plug must always be accessible.
   - Do not remove the threaded feet under any circumstances.

Optional accessories (from after-sales service using order number, depending on model)

- Platform
  For easier loading and unloading. The basket contained in the drawer can be used to carry the laundry.
- Washer-dryer stack connection set
  The dryer can be placed on top of a suitable washing machine with the same width and depth to save space. The dryer must be fastened to the washing machine using this connection set. With pull-out worktop: WTZ 11300
- Connection fittings for condensation outlet
  The condensation is conveyed directly via a hose.
- Installation underneath the worktop
  Instead of the appliance covering plate, you must have a metal cover fitted by a specialist.

What to do if...

If you cannot rectify a fault yourself (e.g. switching off/on), please contact our after-sales service. We will always find an appropriate solution and will avoid unnecessary visits by engineers. Trust the expertise of the manufacturer and rest assured that the repair will be carried out by trained service technicians using original spare parts. The contact details of your local after-sales service can be found in the enclosed after-sales service directory, or by calling one of these numbers:

- GB 0344 692 9979 (Calls charged at local or mobile rate.)
- IE 01450 2665 (0.03 € per minute at peak. Off peak 0.0088 € per minute.)

When contacting the after-sales service, please quote the appliance's product number (E no.) and production number (FD) (see the inside of the door).

Set the programme selector to Off and remove the appliance plug from the socket.

The display panel light and indicator lights (depending on model) go out and the Start/Stop indicator light flashes.

- The Container and (Start/Stop button selected? 
  Empty the condensate container.
- If featured, check hose for condensation outlet.

Clean the fluff filter and/or air cooler under running water → Page 4/6.

- Dryer does not start.
  (Start/Stop button selected?
  Door closed?
  Programme set?

- Ambient temperature greater than 5°C?

- Water is running out.
  Align dryer horizontally.
  Clean air cooler seal.

- The door opens by itself.
  Push the door closed until you hear it engage.

- Creasing.
  Laundry load exceeded?
  Remove articles of clothing immediately after the end of the programme, hang up and pull into shape.
  Unsuitable programme selected → Page 7.

After the end of the programme, warm laundry feels damper than it actually is. Spread the laundry out and allow the heat to disperse. Finely adjust the dryness level – this extends the drying time but does not increase the temperature. Your laundry will become drier. Select a programme with a longer drying time or increase the drying level. This does not increase the temperature. Select a time programme for extended drying of laundry that is still damp. If you have exceeded the maximum load for the programme, the laundry may not be dried correctly. Clean the moisture sensor in the drum. A fine layer of limescale may adversely affect the performance of the sensors and your washing will not dry properly.

Drying has been interrupted as a result of a power cut, because the condensate container is full or because the minimum drying time has been exceeded.

- Drying time too long.
  Rinse the fluff filters under running water → Page 4.
  Insufficient supply of air → ensure that air can circulate.
  Air inlet possibly blocked → Clear inlet → Page 8.
  Ambient temperature higher than 35 °C → ventilate the room.

- The humidity in the room increases significantly.
  Make sure the room is sufficiently ventilated.

- Power failure.
  Remove laundry from the dryer immediately and spread out. This allows the heat to dissipate. Be careful as the door, the drum and the laundry may be hot.

- One or more indicator lights for programme status are flashing.
  Clean filter and air cooler → Page 4/6.
  Check installation conditions → Page 8.
  Switch off, leave to cool down, switch on again, restart programme.

- The interior light is not working (depending on model).
  Pull out the appliance plug, remove the cover cap in the interior above the door (use Torx 20 screw driver) and replace the bulb. Close the cover cap. Never operate the dryer without a cover cap.
Safety instructions

Emergency
- Pull the appliance plug out of the socket immediately or disconnect the fuse.
- in rooms inside the house.
- to dry fabrics.

The dryer must
ONLY use
NEVER...
be used for other purposes than those described above.
- be modified in terms of its technology or attributes.

Dangers
- The dryer must not be used by children or persons who have not been instructed in its use.
- Do not leave children unsupervised near the dryer.
- Keep pets away from the dryer.
- Remove all objects from pockets. Make especially sure that cigarette lighters are removed as they constitute an explosion hazard.
- Do not lean or sit on the door risk of tipping.

Installation
- Secure loose cables tripping hazard.
- Do not operate the dryer if there is a risk of frost.

Mains connection
- Connect the dryer according to specifications to an AC earthed socket, as otherwise it cannot be guaranteed that the appliance is completely safe.
- The cable cross-section must be sufficient.
- Only use earth-leakage circuit breakers with the following symbol: ⚠️
- The appliance plug and socket must be compatible.
- Do not use multiple plugs/couplings and/or extension cables.
- Do not hold the appliance plug with wet hands risk of electric shock.
- Never pull the appliance plug out of the socket by its cable.
- Do not damage the mains lead risk of electric shock.

Operation
- Only load the drum with laundry. Check the contents before you switch the dryer on.
- Do not use the dryer if the laundry has been in contact with solvents, oil, wax, grease or paint (e.g. hair setting spray, nail polish remover, stain remover, cleaning solvent, etc.) explosion hazard.
- The tumble dryer is not to be used if industrial chemicals have been used for cleaning.
- Dust (e.g. coal dust, flour) poses a danger: do not use the dryer explosion hazard.
- Do not turn off the dryer until the drying process ends, unless the laundry will be removed quickly and spread out, so that the heat can dissipate.
- Do not put laundry containing foamed material/rubber in the dryer risk of injury.
- The final part of a tumble dryer cycle occurs without heat (cool down cycle), to ensure that the items are left at a temperature that ensures that the items will not be damaged.
- Switch off the dryer once the programme has ended.
- The exterior of the appliance's rear panel becomes very hot during operation. Never touch the hot surface of the appliance's rear panel.
- Keep children away from the appliance Risk of burns!
- Condensation is not drinking water and may be contaminated with fluff.

Defect
- Do not use the dryer if it is defective or if you suspect it is.
- Repairs must only be carried out by the after-sales service.
- Do not use the dryer if the mains cable is defective. To avoid danger, only have the defective mains cable replaced by the after-sales service.
- Always pull the mains plug out of the socket before changing the bulb for the interior light risk of electric shock.

Spare parts
- Only use genuine spare parts and accessories for safety reasons.

Disposal
- Dryer: pull out the appliance plug, then cut off the mains cable from the appliance. Dispose of at municipal waste disposal facility.
- Packaging: do not leave children alone with packing parts risk of suffocation.
- All materials are environmentally sound and can be reused. Dispose of in an environmentally-responsible manner.
