Dryer does not start

Loud humming noise for several minutes when the dryer is switched on.

Energy consumption

Load

Creasing. Laundry load exceeded?

Laundry is not dried correctly or is too dry.

The door opens by itself. Push the door closed until you hear it click into place.

Clean the moisture sensor in the drum. A fine layer of limescale may adversely affect the performance of the sensors and your laundry.

Clean the moisture sensors using a damp sponge with a rough surface.

Clean the filter under running water or in the dishwasher.

Remove detergent and cleaning agent residue immediately.

However, the filter should still be cleaned regularly under running water to ensure that the items are left at a temperature that ensures that the items will not be damaged by the heat of the dryer.

Pull out the condensate container.

Condensate container

Clean the filter in the condensate container if necessary. Make sure the room is sufficiently ventilated.

The compressor in the dryer is ventilated with the help of air ducts. Foreign material in the air ducts may adversely affect the performance of the dryer.

Check the contents before you switch the dryer on.

Risk of suffocation.

Risk of fire/explosion.

Risk of tripping.

Risk of explosion.

The dryer's heat exchanger contains fluorinated greenhouse (R134a) gas in order to achieve an energy-saving mode (cool down cycle).

Final part of a tumble dryer cycle occurs without heat (cool down cycle), to ensure correct drying.

For easier loading and unloading. The basket contained in the drawer can be used to carry the laundry.

The dryer can be placed on top of a suitable washing machine with the same width and depth to save space.

The dryer must be placed on a firm, level and stable surface capable of supporting its total weight.

If the dryer is placed on top of the washing machine, the washing machine must be fastened in order to prevent it moving up and down or sideways.

A platform may be required to ensure that the dryer is not too high above the floor to allow for easy loading and unloading.

Observe the following guidelines when using the dryer:

– Do not use the dryer if it is defective or if you suspect that it is.

– Do not use the dryer if the mains cable is defective. To avoid danger, only have the mains cable checked and replaced by a qualified person.

– The appliance plug and socket must be compatible.

– Connect the dryer to an AC earthed socket according to specifications, otherwise it may cause a fire, electrocution or other hazards.

– Do not obstruct the air inlet on the front of the dryer.

– The mains voltage and the voltage shown on the rating plate must be compatible.

– The mains connection must meet the requirements for electric appliances. The appliance plug must always be accessible.

– Make the dryer level using the threaded feet provided for this purpose.

– Final part of a tumble dryer cycle occurs without heat (cool down cycle), to ensure correct drying.

– Do not use the dryer if it is defective or if you suspect that it is.

– Do not use the dryer if the mains cable is defective. To avoid danger, only have the mains cable checked and replaced by a qualified person.

– The appliance plug and socket must be compatible.

– Connect the dryer to an AC earthed socket according to specifications, otherwise it may cause a fire, electrocution or other hazards.

– Do not obstruct the air inlet on the front of the dryer.

– The mains voltage and the voltage shown on the rating plate must be compatible.

– The mains connection must meet the requirements for electric appliances. The appliance plug must always be accessible.

– Make the dryer level using the threaded feet provided for this purpose.

– Final part of a tumble dryer cycle occurs without heat (cool down cycle), to ensure correct drying.

– Do not use the dryer if it is defective or if you suspect that it is.

– Do not use the dryer if the mains cable is defective. To avoid danger, only have the mains cable checked and replaced by a qualified person.

– The appliance plug and socket must be compatible.

– Connect the dryer to an AC earthed socket according to specifications, otherwise it may cause a fire, electrocution or other hazards.

– Do not obstruct the air inlet on the front of the dryer.

– The mains voltage and the voltage shown on the rating plate must be compatible.

– The mains connection must meet the requirements for electric appliances. The appliance plug must always be accessible.

– Make the dryer level using the threaded feet provided for this purpose.

– Final part of a tumble dryer cycle occurs without heat (cool down cycle), to ensure correct drying.

– Do not use the dryer if it is defective or if you suspect that it is.

– Do not use the dryer if the mains cable is defective. To avoid danger, only have the mains cable checked and replaced by a qualified person.

– The appliance plug and socket must be compatible.

– Connect the dryer to an AC earthed socket according to specifications, otherwise it may cause a fire, electrocution or other hazards.

– Do not obstruct the air inlet on the front of the dryer.

– The mains voltage and the voltage shown on the rating plate must be compatible.

– The mains connection must meet the requirements for electric appliances. The appliance plug must always be accessible.

– Make the dryer level using the threaded feet provided for this purpose.

Read these instructions and the separate Energy-saving mode instructions before switching on the dryer.

Intended use

- For domestic use only.
- Only to be used for drying fabrics that have been washed with water.

Keep children younger than 3 years old away from the dryer.
Do not let children make the cleaning and maintenance work on the dryer without supervision.

Keep pets away from the dryer.
The dryer can be operated by children 8 years old and older, by persons with reduced physical, sensory or mental abilities and by persons with insufficient experience or knowledge if they are supervised or have been instructed in its use by a responsible adult.

This appliance is intended for use up to a maximum height of 4000 metres above sea level.

The drying result (e.g. Cupboard Dry) can be adjusted over three levels (1 - max. 3) for the Cottons, Easy-Care and SuperQuick 40' programmes → presetting = 0. After one of these programmes has been finely adjusted, the setting is retained for the others. Further information → page 6.

Selecting and adjusting the programme

... and adapt to individual requirements

Reduced temperature for delicate fabrics (e.g. polycryclics, polyamide, elastane, acetate silk.)

Sort and load laundry

Remove all items from pockets.
Check for cigarette lighters.
The drum must be empty prior to loading.
See programme overview on page 7.
See also separate instructions for “basket for woolens” (depending on the model)

Only use the dryer with the fluff filter inserted.

Inform your after-sales service.

Cleaning and maintenance work on the dryer without supervision.

Keep pets away from the dryer.

Every dryer which leaves our factory is carefully checked to ensure that it functions correctly and is in perfect condition.

This appliance is labelled in accordance with European Directive 2012/19/EU concerning used electrical and electronic appliances (waste electrical and electronic equipment - WEEE). The guideline 2012/19/EU concerning used electrical and electronic appliances as applicable throughout the EU.

For domestic use only.

Keep children younger than 3 years old away from the dryer.
Do not let children make the cleaning and maintenance work on the dryer without supervision.

Keep pets away from the dryer.

This appliance is intended for use up to a maximum height of 4000 metres above sea level.

Environmentally-responsible disposal

For further information about our products, accessories, spare parts and services, please visit: www.bosch-home.com

Inform your after-sales service.

Clean the filter in the condensate container if necessary → page 9.

Rinse the fluff filters under running water → page 4.
Inspecting the dryer

Connecting the mains plug

Loading laundry

Selecting and adjusting the programme

Drying programme ...

Individual requirements

Start/Stop button

Drying

Control panel

Do not pull out/empty the condensate container when drying is in progress.

Emptying condensation

Empty the container after each drying cycle, not during drying.
1. Remove the condensate container and hold it level.
2. Pour out the condensation.
3. Always push container in fully until it clicks into place.
If the Container indicator lamp flashes despite the container having been emptied → Filter in condensate container, page 9.

Cleaning the fluff filter

Clean fluff filters reduce energy consumption.

The fluff filter consists of two parts. Clean the inner and outer filter after every drying cycle:
1. Open the door. Remove fluff from the door/door area.
2. Pull out both parts of the fluff filter.
3. Remove fluff from the edge of the shaft. Fluff should not fall into the open shaft.
4. Open the filter and remove all the fluff.
5. Rinse both parts under running water and dry thoroughly.
6. Close the inner and outer filter, put them back together and reinsert them into the appliance.

Switching off the dryer

Turn the programme selector to Off.
Do not leave laundry in the dryer.

Removing the laundry

Your dryer is equipped with an automatic reduced ironing function. The drum is moved at specific time intervals for 60 minutes once the programme has ended. The laundry stays loose and fluffy (or 120 minutes if the additional Less ironing function is selected (depending on model)).

End of programme as soon as the Anti-Crease/End indicator lamp lights up.

Interrupt programme Adding or removing laundry.

The drying operation can be interrupted briefly to add or remove laundry. However, it must then be continued until it has finished.
1. Open the door. The drying process is interrupted.
2. Add or remove laundry then close the door.
3. If required, select a new programme and additional functions.
4. Press the Start/Stop button.
Information on laundry...

Labelling of fabrics

Follow the manufacturer's care information.
- Dry at normal temperature.
- Dry at low temperature — in addition, select Low Heat.
- Do not machine dry.

Always observe the safety instructions on page 13.

Drying tips
- To ensure an even result, sort the laundry by fabric type and drying programme.
- Always dry very small fabrics (e.g. baby socks) together with large items of laundry (e.g. towels).
- Close zips, hooks and eyelets, and button up covers. Tie fabric belts, apron strings, etc. together.
- Do not over-dry easy-care laundry — Risk of creasing. Allow laundry to finish drying in the air.
- Do not dry woollens in the dryer. They may, however, be refreshed — page 7 Wool finish programme (depending on model).
- Do not iron laundry immediately after drying; fold items up and leave for a while — residual moisture will then be distributed evenly.
- The drying result depends on the type of water used during washing. — Fine adjustment of the drying result — page 6.
- Knitted fabrics (e.g. T-shirts, jerseys) often shrink slightly the first time they are tumble-dried. — Do not use the Extra Dry programme.
- The drying of starched laundry should be limited. — Starch leaves behind a coating that impairs drying.
- When washing laundry that is to be tumble-dried afterwards, use the correct amount of fabric softener as specified in the manufacturer's instructions.
- For pre-dried, multi-layered fabrics or small, individual items of laundry, use the Timed programme. Also suitable for subsequent drying.

Environmental protection / Energy-saving tips

- Before drying, spin the laundry thoroughly in the washing machine — the higher the spin speed, the shorter the drying time will be, thus less energy is consumed. Also spin easy-care laundry.
- Use the maximum recommended capacity, but do not exceed it — Programme overview — page 7.
- Make sure the room is well ventilated during drying.
- Do not cover or seal the air inlet.

Important Information

Your dryer is designed to be particularly energy efficient. Its technical features include a refrigeration circuit, which uses energy efficiently in a similar way to a refrigerator. The dryer's heat exchanger is cleaned automatically during drying. The fluff filters and filter in the condensate container must be cleaned regularly.

Never operate the dryer without the fluff filters and without filter in condensate container.

- Fluff filters
  During drying, fluff and hair from the laundry is trapped by the fluff filter. Blocked fluff filters may impair the heat exchange process. The fluff filters must therefore be cleaned after every drying cycle. Rinse regularly under running water — page 4.

- Filter in the condensate container
  The filter in the condensate container cleans the condensation. This condensation is required for the automatic cleaning process. The filter should be cleaned regularly under running water. Empty the condensate container before cleaning the filter — page 4/9.

- Fabrics
  Do not dry any fabrics that have come into contact with solvents, oil, wax, grease or paint: e.g. hair styling products, nail varnish remover, stain remover, cleaning solvent, etc. Empty all pockets.
  Do not dry non-breathable fabrics. Avoid drying items that produce a lot of fluff. Woollens should be refreshed only, using the woollens programme.
Sort the laundry according to type of textile and fabric. Fabrics must be suitable for tumble drying.

*Dryness levels can be selected individually ➔ Extra Dry, Cupboard Dry and Iron Dry (depending on the model).
Installation

- Scope of delivery: dryer, installation and operating instructions, woollens basket (depending on model).
- Check dryer for transport damage.
- The dryer is very heavy. Do not attempt to lift it on your own.
- Be careful to avoid sharp edges.
- Do not set up in a room that is susceptible to frost. Freezing water may cause damage.
- If in doubt, have the appliance connected by a specialist.
- Do not lift the dryer by protruding parts (e.g. the door) - risk of breakage.

Setting up the dryer

1. The appliance plug must always be accessible.
2. Ensure that the appliance is installed on a clean, level and firm surface.
3. Do not obstruct the air inlet on the front of the dryer.
4. Keep the area around the dryer clean.
5. Make the dryer level using the threaded feet and a spirit level.
6. Do not remove the threaded feet under any circumstances.
7. Do not set up the dryer behind a door or sliding door, as this may obstruct the dryer door or prevent it from opening. This will prevent a potentially fatal danger to children from locking themselves in.

Mains connection see Safety instructions page 13.

- Connect to an AC earthed socket. If in doubt have the socket checked by a specialist.
- The mains voltage and the voltage shown on the rating plate (page 10) must be the same.
- The connected load and necessary fuse protection are specified on the rating plate.

Frost protection / Transport

1. Empty the condensate container page 4.
2. Select any programme using the programme selector.
3. Press the Start/Stop button condensated water is pumped into the container
4. Wait 5 minutes and then empty the condensate container again.
5. Turn the programme selector to Off.

Transport

- Prepare the dryer see Frost protection - preparation.
- Transport the dryer in a vertical upright position.
- Following transportation, do not use the dryer for two hours.

The dryer contains residual water; this can flow out if the dryer is tilted.

Care and cleaning

Heat exchanger

The dryer’s heat exchanger is cleaned automatically during drying. Do not pull out the condensate container during the cleaning process.

Dryer housing, control panel, air intake

Wipe with a soft, damp cloth. Do not use harsh cleaning agents or solvents. Remove detergent and cleaning agent residue immediately.

Filter in the condensate container

The filter is cleaned automatically when the condensate container is emptied. However, the filter should still be cleaned regularly under running water. This prevents stubborn deposits/dirt from building up.

1. Pull out the condensate container.
2. Pull the filter out of its snap-in lock.
3. Clean the filter under running water or in the dishwasher.
4. Refit the filter.
5. Insert the condensate container so that it locks into place.

Only operate the dryer with the filter inserted.

Moisture sensor

The dryer is equipped with stainless steel moisture sensors. Moisture sensors measure how damp the laundry is. A thin layer of limescale may build up on the moisture sensors after prolonged use.

1. Open the door.
2. Clean the moisture sensors using a damp sponge with a rough surface.

Do not use steel wool or abrasive materials.

Signal

Switching on/off an acoustic signal at the end of the programme

- Turn to Off
- 1 x to the right
- Press and hold Low heat for 1 second
- Turn to Off

Low heat light on → an acoustic signal at the end of the programme is switched on.
Low heat light off → an acoustic signal at the end of the programme is switched off.

---

**Optional accessories** (order from the after-sales service using the order number, depending on the model)

- **Washer-dryer stack connection set**
  - The dryer can be placed on top of a suitable washing machine with the same width and depth to save space. The dryer must be fastened to the washing machine using this connection set. WTZ 11400: with pull-out worktop.
- **Installation underneath the worktop**
  - Instead of the appliance covering plate, you must have a metal cover fitted by a specialist.
- **Platform**
  - For easier loading and unloading. The basket contained in the drawer can be used to carry the laundry.
- **Wollens basket**
  - For drying individual wool fabrics, sports shoes and soft toys (see separate instructions for “Woollens basket”).

---

### Normal noises

During drying, the compressor and the pump generate some noise which is entirely normal.

- The compressor in the dryer may occasionally generate a humming noise. The volume and pitch of this may vary depending on the selected programmes and the progress of the drying.
- The automatic cleaning process causes a clicking noise.
- The process of pumping the condensation into the condensate container generates pumping noises.

---

  - For drying individual wool fabrics, sports shoes and soft toys (see separate instructions for “Woollens basket”).
What to do if...

The door opens by itself. Push the door closed until you hear it click into place.

Water is leaking out. Make sure the dryer is level.

Laundry is not dried correctly or is still too damp.

The display panel light and indicator lamps (depending on model) go out and the Start/Stop indicator light flashes.

A loud humming noise for several seconds.

If you cannot rectify a fault yourself (e.g. switching off/on), please contact our after-sales service. We will always find an appropriate solution and will avoid unnecessary visits by engineers. Trust the expertise of the manufacturer and rest assured that the repair will be carried out by trained service technicians using original spare parts. The contact details of your local after-sales service can be found in the enclosed after-sales service directory, or by calling one of these numbers:

- GB 0344 892 8973 (Calls charged at local or mobile rate)
- IE 01450 2655 (0.03 € per minute at peak. Off peak 0.0088 € per minute.)

When contacting the after-sales service, please quote the appliance's product number (E no.) and production number (FD2) (see under the loading door). Turn the programme selector to Off and unplug the mains plug from the socket.

- The Start/Stop indicator lamp does not light up.
- The display panel light and indicator lamps (depending on model) go out and the Start/Stop indicator light flashes.

- The Container indicator lamp and the Start/Stop button are flashing.
- The Clean indicator lamp and Start/Stop button are flashing.

If you have exceeded the maximum load for the programme, the laundry will not dry properly.

Select a time programme for extended drying of laundry that is still damp.

If you have exceeded the maximum load for the programme, the laundry may be hot.

Drying has been interrupted as a result of a power cut, because the appliance is not completely safe.

Put the condensate container out of the socket immediately or disconnect the fuse.

In rooms inside the house.

To dry fabrics.

The dryer must NEVER...

- be used for purposes other than those described above.
- be modified in terms of its technology or properties.

Hazards

- The dryer must not be used by children or persons who have not been instructed in its use.
- Do not leave children unsupervised near the dryer.
- Keep pets away from the dryer.
- Remove all objects from pockets, and lighters in particular → Risk of explosion.
- Do not lean or sit on the door → Risk of tipping.

Installation

- Secure loose cables → Risk of tripping.
- Do not operate a dryer if there is a risk of frost.

Mains connection

- Connect the dryer to an AC earthed socket according to specifications, otherwise it cannot be guaranteed that the appliance is completely safe.
- The cable cross-section must be sufficient.
- Only use earth-leakage circuit breakers with the following symbol: 📡
- The appliance plug and socket must be compatible.
- Do not use multiple plugs/connectors and/or extension cables.
- Do not touch or hold the appliance plug with wet hands → Risk of electric shock.
- Never pull the appliance plug out of the socket by its cable.
- Do not damage the mains lead → Risk of electric shock.

Operation

- Only load the drum with laundry.
- Check the contents before you switch the dryer on.
- Do not use the dryer if the laundry has been in contact with solvents, oil, wax, grease or paint (e.g. hair styling products, nail varnish remover, cleaning solvent, etc.) → Risk of fire/explosion.
- The tumble dryer is not to be used if industrial chemicals have been used for cleaning.
- Dust (e.g. coal dust, flour) poses a danger: Do not use the dryer → Risk of explosion.
- Do not put laundry containing foamed material/rubber in the dryer → Risk of fire/explosion.
- Do not turn off the dryer until the drying process ends, unless the laundry will be removed quickly and spread out, so that the heat can dissipate.
- Do not turn off the dryer if the drum is still hot.
- Do not operate a dryer if there is a risk of frost.
- Light things, such as long hair, may be sucked into the air inlet of the dryer → Risk of fire/explosion.
- Dust (e.g. coal dust, flour) poses a danger: Do not use the dryer → Risk of fire/explosion.
- Do not damage the mains cable → Risk of fire/explosion.
- Do not lean or sit on the door → Risk of tipping.
- Do not leave children unsupervised near the dryer.
- Keep pets away from the dryer.
- Do not turn off the dryer until the drying process ends, unless the laundry will be removed quickly and spread out, so that the heat can dissipate.
- Do not damage the mains cable replaced by the after-sales service.

Spare parts

- Only use genuine spare parts and accessories for safety reasons.

Disposal

- Pull out the appliance plug, then cut off the mains cable from the appliance.
- Dispose of at a municipal waste disposal facility.
- The dryer’s heat exchanger contains fluorinated greenhouse (R134a) gas in a hermetically sealed unit → dispose of in a proper manner. Capacity: 0.220 kg. Total GWP: 0.315 tCO₂.
- Packaging: Keep all packaging out of reach of babies and children → Risk of suffocation.
- All materials are environmentally sound and can be reused. Dispose of in an environmentally-responsible manner.
