Your new dryer

Congratulations - You have chosen a modern, high-quality Pitsos domestic appliance.

The condensation dryer is distinguished by its economical energy

Every dryer which leaves our factory is carefully checked to ensure that it functions correctly and is in perfect condition.

Should you have any questions, our after-sales service will be pleased

Disposal in an environmentally-responsible manner

This appliance is labelled in accordance with European Directive 2012/19/EU concerning used electrical and electronic appliances (waste electrical and electronic equipment - WEEE). The guideline determines the framework for the return and recycling of used appliances as applicable throughout the EU.

For further information about our products, accessories, spare parts and services, please visit: www.pitsos.gr

Interrupt programme removing or adding laundry.

The drying cycle can be interrupted for a brief period so that laundry may be added or removed. The programme selected must then be resumed and completed.

- Open door, the drying process is interrupted.
- Press the ψ ἐναρξη/παύση (Start/Stop) button.

IInformation on laundry ...

Labelling of fabrics

Follow the manufacturer's care information.

Drying at normal temperature.

 \square Drying at low temperature \longrightarrow also select \varnothing ευπαθή (Low Heat).

□ Do not machine dry.

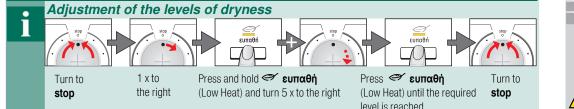

- Impermeable fabrics (e.g. rubber-coated fabrics). - Delicate materials (silk or curtains made from synthetic material) → they may crease
- Laundry contaminated with oil.

- To ensure a consistent result, sort the laundry by fabric type and drying programme. Always dry very small items (e.g. baby socks) together with large items of laundry (e.g. hand
- Close zips, hooks and eyelets, and button up covers. Tie fabric belts, apron strings, etc. together
- Do not over-dry easy-care laundry → risk of creasing! Allow laundry to finish drying in the air.
- Do not dry woolens in the dryer, only use to freshen them up \rightarrow Page 7. Woollens Finish Programme (depending on model).
- Do not iron laundry immediately after drying, fold items up and leave for a while → the remaining moisture will then be distributed evenly.
- The drying result depends on the type of water used during washing. → Fine adjustment of the drying result \rightarrow Page 5/6.
- Machine-knitted fabrics (e.g. T-shirts or jerseys) often shrink the first time they are dried → do not use the δυνατό στέγνωμα για φύλαξη (Cupboard Dry Extra) programme.
- Starched laundry is not always suitable for dryers → starch leaves behind a coating that adversely affects the drying operation.
- Use the correct dosage of fabric softener as per the manufacturer's instructions when
- washing the laundry to be dried. Use the timer programme for small loads → this improves the drying result.

Environmental protection / Energy-saving tips

- Before drying, spin the laundry thoroughly in the washing machine → the higher the spin speed the shorter the drying time will be (consumes less energy), also spin easy-care
- Put in, but do not exceed, the maximum recommended quantity of laundry → programme overview → Page 7
- Make sure the room is well ventilated during drying. Do not obstruct or seal up the air inlet.
- Keep the air cooler clean \rightarrow Page 6 "Care and cleaning".

Fine adjustment of the drying result

Fine adjustment of the drying result

στέγνωμα (drying), στέγνωμα για σιδερώμα(iron dry) στέγνωμα για κρέμασμα (cupboard dry), Τέλος/λιγότ σαλάκωμα (anti-crease/end) are displayed in sequence. Short signal when changing from level 3 to 0, otherwise

Only when switched off!

Care and cleaning

- Do not use harsh cleaning agents and solvents
- Remove detergent and cleaning agent residue immediately.
- Clean the protective filter 5 6 times a year

or if 🖾 καθαρισμός φίλτρου (Clean filter) flashes after cleaning the fluff filter.

When cleaning, only remove the protective filter. Clean the air cooler behind the protective filter once a year.

- Allow the drver to cool.
- Residual water may leak out, so place an absorbent towel underneath the maintenance door.
- **1.** Unlock the maintenance door.
- 2. Open the maintenance door fully.

Do not damage the protective filter or air cooler. Clean with warm water only. Do not use any hard or sharp-edged

5. Clean the protective filter/air cooler thoroughly

- 7. Re-insert the protective filter/air cooler. with the handle facing down.
- 8. Turn back both locking levers.
- **9.** Close the maintenance door until the lock clicks into place.

Moisture sensors

The dryer is fitted with stainless steel moisture sensors. The sensors measure the level of moisture in the laundry. After a long period of operation, a fine layer of limescale may form on the sensors.

1. Open the door and clean the moisture sensors with a damp sponge which has a rough surface.

Do not use steel wool or abrasive materials.

- Delivery specification: dryer, instructions for installation and use, woollens basket (depending on model). - Check dryer for transport damage.

- The dryer is very heavy. Do not attempt to lift it on your own.

 Be careful to avoid sharp edges. Do not lift the dryer by any of the protruding parts (e.g. the door) as they may break off.

 Do not set up in a room that is susceptible to frost. Freezing water may cause damage.

- If in doubt, have the appliance connected by an expert.

Setting up the dryer

Take all accessory parts out of the drum.

The appliance plug must always be accessible. Ensure that the appliance is installed on a clean, level ____ The drum must be empty. and solid surface.

Keep the cooling grille at the front of the dryer unobstructed.

Keep the area around the drver clean. - Make the dryer level using the threaded feet

and a spirit level. Do not remove the threaded feet under any circumstances.

Do not set up the dryer behind a door or sliding door as this may obstruct or prevent the dryer door from opening. This will prevent a potentially fatal danger to children from locking themselves in.

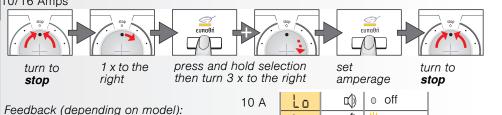

Make sure that the air inlet remains unobstructed

Mains connection see safety instructions → Page 11.

 Connect to an AC earthed socket. If in doubt have the socket checked by an expert. - The mains voltage and the voltage shown on the rating plate ($\longrightarrow Page 9$) must correspond.

- The connected load and necessary fuse protection are specified on the rating plate. **Converting the installed load** Note the fuse protection of the socket.

Care and cleaning

Only when switched off!

Dryer housing, control panel, air cooler, moisture sensors

- Wipe with a soft, damp cloth.
- Do not use harsh cleaning agents and solvents.
- Remove detergent and cleaning agent residue immediately.

Clean the protective filter 5 - 6 times a year or if **καθαρισμός φίλτρου** (Clean filter) flashes after cleaning the fluff filter.

Air cooler / Protective filter

When cleaning, only remove the protective filter. Clean the air cooler behind the protective filter once a year.

- Allow the dryer to cool.
- Residual water may leak out, so place an absorbent towel underneath the maintenance door.
- 1. Unlock the maintenance door.
- 2. Open the maintenance door fully.

καθαρισμός φίλτρο

- εκκένωση δοχείου

- 3. Turn both locking levers towards each another.
- **4.** Pull out the protective filter/air cooler.

Do not damage the protective filter or air cooler. Clean with warm water only. Do not use any hard or sharp-edged objects.

- Clean the protective filter/air cooler thoroughly, Allow to drip dry.
- 6. Clean the seals.
- **7.** Re-insert the protective filter/air cooler, with the handle facing down.
- **8.** Turn back both locking levers.
- 9. Close the maintenance door until the lock clicks into place.

Moisture sensors

The dryer is fitted with stainless steel moisture sensors. The sensors measure the level of moisture in the laundry. After a long period of operation, a fine layer of limescale may form on the sensors.

 Open the door and clean the moisture sensors with a damp sponge which has a rough surface.

Do not use steel wool or abrasive materials.

Pitsos - BSH Οικιακές Συσκευές A.B.E.

- Delivery specification: dryer, instructions for installation and use, woollens basket (depending on model).
- Check dryer for transport damage.
- The dryer is very heavy. Do not attempt to lift it on your own.
- Be careful to avoid sharp edges.
- Do not lift the dryer by any of the protruding parts (e.g. the door) as they may break off.
- Do not set up in a room that is susceptible to frost. Freezing water may cause damage.
- If in doubt, have the appliance connected by an expert.

Setting up the dryer

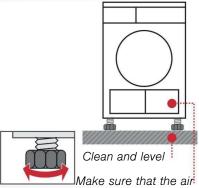

- The appliance plug must always be accessible.
- Ensure that the appliance is installed on a clean, level and solid surface.
- Keep the cooling grille at the front of the dryer unobstructed.
- Keep the area around the dryer clean.
- Make the dryer level using the threaded feet and a spirit level.

Do not remove the threaded feet under any circumstances.

Do not set up the dryer behind a door or sliding door as this may obstruct or prevent the dryer door from opening. This will prevent a potentially fatal danger to children from locking themselves in.

Take all accessory parts out of the drum. The drum must be empty.

inlet remains unobstructed

Mains connection see safety instructions → Page 11.

- Connect to an AC earthed socket. If in doubt have the socket checked by an expert.
- The mains voltage and the voltage shown on the rating plate (\rightarrow Page 9) must correspond.
- The connected load and necessary fuse protection are specified on the rating plate.

Converting the installed load Note the fuse protection of the socket. 0/16 Amps

Programme setting for testing and energy labelling in accordance with Directive 2010/30/EU.

Optional accessories (from after-sales service using order number, depending on model)

Washer-dryer stack connection set

The dryer can be placed on top of a suitable washing machine with the same width and depth to save space. The dryer must be fastened to the washing machine using this connection set. With pull-out worktop: WZ 20300

Connection fittings for condensation outlet

The condensation is conveyed directly via a hose.

Installation underneath the worktop

Instead of the appliance covering plate, you must have a metal cover fitted by a specialist.

What to do if ...

If you cannot rectify a fault yourself (e.g., switching off/on), please contact our after-sales service. We will always find an appropriate solution and will avoid unnecessary visits by engineers. Trust the expertise of the manufacturer and rest assured that the repair will be carried out by trained service technicians using original spare parts. The contact details of your local after-sales service can be found in the enclosed after-sales service directory.

When contacting the after-sales service, please quote the appliance's product number (E no.) and production number (FD) (see the inside of the door).

Set the programme selector to stop and remove the appliance plug from the socket.

The Φ ἐναρξη/παὑση (Start/Stop) Mains plug plugged in? Programme selected? indicator lamp does not light up. Check the socket fuse.

The display panel light and indicator lights (depending on mode instructions. model) go out and the ψ έναρξη/παύση (Start/Stop) indicator light flashes.

Energy-saving mode is activated → see the separate *Energy-saving*

The **Εκκένωση δοχείου** (Empty water) and Φ ἐναρξη/παὐση (Start/Stop) indicator lamp flash.

Empty the condensate container. If featured, check hose for condensation outlet.

The 🖾 καθαρισμός φίλτρου (Clean filter) and Φ εναρξη/παύση (Start/Stop) indicator lamp flash.

Clean the fluff filter and/or air cooler \rightarrow Page 4/6.

♦ ἐναρξη/παύση (Start/Stop) button selected? Dryer does not start. Door closed? Programme set? Ambient temperature greater than 5°C?

Water is running out. Align dryer horizontally. Clean air cooler seal.

The door opens by itself. Push the door closed until you hear it engage. Laundry load exceeded? Creasing. Remove articles of clothing immediately after the end of the

programme, hang up and pull into shape. Unsuitable programme selected \rightarrow Page 7.

Laundry is not dried correctly or is After the end of the programme, warm laundry feels damper than it still too damp.

actually is. Spread the laundry out and allow the heat to disperse. Finely adjust the dryness level - this extends the drying time but does not increase the temperature. Your laundry will become drier. Select a programme with a longer drying time or increase the drying level. This does not increase the temperature. Select a time programme for extended drying of laundry that is still

If you have exceeded the maximum load for the programme, the

laundry may not be dried correctly. Clean the moisture sensor in the drum. A fine layer of limescale may adversely affect the performance of the sensors and your washing will not dry properly.

Drying has been interrupted as a result of a power cut, because the condensate container is full or because the maximum drying time has been exceeded.

Remove the laundry from the dryer immediately and spread out. This

Air inlet possibly blocked \rightarrow Clear inlet \rightarrow Page 8. Ambient temperature higher than $35^{\circ}C \rightarrow \text{ventilate}$ the room.

Rinse the fluff filters under running water \rightarrow Page 4.

Check installation conditions \rightarrow Page 8.

Power failure.

Drving time too long.

allows the heat to dissipate. Be careful as the door, the drum and the laundry may be hot. Clean filter and air cooler \rightarrow Page 4/6.

The interior light is not working (depending on model).

Switch off, leave to cool down, switch on again, restart programme. Pull out the appliance plug, remove the cover cap in the interior above the door (use Torx 20 screw driver) and replace the bulb. Close the cover cap. Never operate the dryer without

a cover cap.

The values may differ from those specified, depending on the type of fabric, composition of laundry to be dried, residual moisture in the fabric and the amount of laundry being loaded.

Safety instructions

dryer...

Emergency – Pull the appliance plug out of the socket immediately or disconnect the fuse.

ONLY use the - in rooms inside the house.

- to dry fabrics.

The dryer be used for other purposes than those described above. must NEVER... - be modified in terms of its technology or attributes.

Dangers

- The dryer must not be used by children or persons who have not been instructed

Do not leave children unsupervised near the dryer.

Keep pets away from the dryer.

- Remove all objects from pockets. Make especially sure that cigarette lighters are removed as they constitute an \rightarrow explosion hazard.

Do not lean or sit on the door → risk of tipping.

Installation

Secure loose cables → tripping hazard.

Do not operate the dryer if there is a risk of frost.

Mains connection Connect the dryer according to specifications to an AC earthed socket, as otherwise it cannot be guaranteed that the appliance is completely safe.

The cable cross-section must be sufficient.

Only use earth-leakage circuit breakers with the following symbol:

- The appliance plug and socket must be compatible.

Do not use multiple plugs/couplings and/or extension cables.
 Do not hold the appliance plug with wet hands → risk of electric shock.
 Never pull the appliance plug out of the socket by its cable.

Do not damage the mains lead → risk of electric shock.

Operation

 Only load the drum with laundry. Check the contents before you switch the dryer on.

- Do not use the dryer if the laundry has been in contact with solvents, oil, wax, grease or paint (e.g. hair setting spray, nail polish remover, stain remover, cleaning solvent, etc.) → fire/explosion hazard.

- The tumble dryer is not to be used if industrial chemicals have been used for

 Dust (e.g. coal dust, flour) poses a danger: do not use the dryer → explosion hazard.

 Do not turn off the dryer until the drying process ends, unless the laundry will be removed quickly and spread out, so that the heat can dissipate.

 Do not put laundry containing foamed material/rubber in the dryer → elastic material may be destroyed and the dryer may be damaged due to possible deformation of the foamed material.

 Light things, such as long hair, may be sucked into the air inlet of the dryer → Risk of injury.

Final part of a tumble dryer cycle occurs without heat (cool down cycle), to ensure that the items are left at a temperature that ensures that the items will not be

Switch off the dryer once the programme has ended.

- The exterior of the appliance's rear panel becomes very hot during operation. Never touch the hot surface of the appliance's rear panel. Keep children away from the appliance → **Risk of burns!**- Condensation is not drinking water and may be contaminated with fluff.

Defect

Do not use the dryer if it is defective or if you suspect it is.

Repairs must only be carried out by the after-sales service. - Do not use the dryer if the mains cable is defective. To avoid danger, only have the defective mains cable replaced by the after-sales service.

 Always pull the mains plug out of the socket before changing the bulb for the interior light \rightarrow risk of electric shock.

Spare parts

Disposal

Only use genuine spare parts and accessories for safety reasons.

- Dryer; pull out the appliance plug, then cut off the mains cable from the

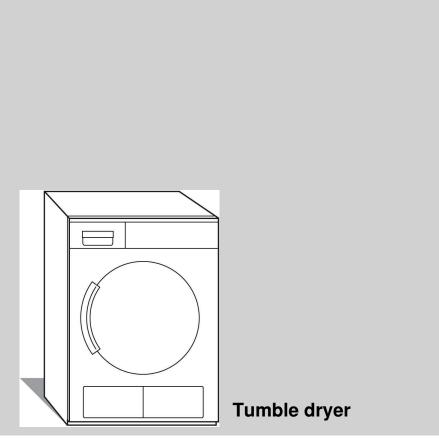

Dispose of at municipal waste disposal facility.

Packaging: do not leave children alone with packing parts → risk of suffocation.
 All materials are environmentally sound and can be reused.

Dispose of in an environmentally-responsible manner.

P17505

Instructions for installation and use

Observe the safety instructions on page 11.

Read these instructions and the separate Energy-saving mode instructions before operating the dryer.
