**Care**

- **Eco**
  - Easy-care textiles made of cotton, linen, synthetic fibres or blended fabrics
  - Different types of washing can be washed together
  - Less Ironing
  - Especially gentle wash programme to prevent shrinkage, longer programme pauses (textiles rest in wash liquor)

- **Cotton**
  - Programmes are time-controlled for lightly soiled textiles
  - If textiles are heavily soiled, reduce the load or select additional function, e.g. at max. selectable spin speed is best suited as a short programme

**Consumption values**

- Program: *Eco*
  - Cotton
  - 7 kg
  - 1.30 kWh
  - 77 l

**Information about the indicator lights**

- *Insert for liquid detergent*
  - Attach insert and lock into position (push cylinder onto guide pin)
  - Pull out, depress insert, take out drawer all the way

- *Maintenance*
  - Connect the hose and check for leaks
  - Disconnect the hose from the water tap
  - Loosen hose clip, carefully remove drainage hose (residual water)
  - Carefully unscrew the pump cover (residual water)

- *Filter in the water inlet hose*
  - Clean the filter:
    - Handle is upright. Insert the drain hose into the holder
    - Start
    - Off
    - Pull out the mains plug

- *Drain pump blocked; Motor fault*
  - Call customer service

- *Water in the base*
  - Be caught

**Overview of programmes**

- **Programme**
  - Cotton 90 °C
  - Mixed Fabrics
  - Programme does not start. – Pause not selected?

**What to do if...**

- *Programme does not start. – Pause not selected?*
  - Select Pause
  - Start
  - If required, clean insert

- *Detergent residue on the dispenser for care cycle, washing unevenly distributed.*
  - If required, clean insert

- *Drainage hose on the siphon*
  - Clean the drain pump

- *Water in the base*
  - Be caught

- *Water not visible in the detergent-solution pump*
  - Allow detergent solution to cool down!

- *Risk of explosion! No solvents!*
  - Keep detergents and care products out of the reach of children.
  - Risk of poisoning

- *Danger to life; Risk of electric shock*
  - Do not clean the appliance with a water jet
  - – Remove detergent residue immediately
  - – Do not clean the appliance with a water jet
  - – Do not clean the appliance with a water jet
  - – Do not clean the appliance with a water jet

- *If the display is indicated again, call customer service.

Your washing machine

Congratulations – You have opted for a modern, high-quality domestic appliance manufactured by Siemens. The washing machine is distinguished by its economical consumption of water and energy. Each appliance which leaves our factory is inspected thoroughly to ensure that it functions properly and is in perfect condition.

Further information on our products, accessories, spare parts and services can be found at: www.siemens-home.com or contact our customer service centres.

Protection of the environment/Conservation tips
- Utilise the maximum amount of washing for the particular programme.
- Wash normally soiled washing without prewash.
- The selectable temperatures apply to the care labels on the textiles. The temperatures in the machine may deviate from this so that you get the optimum mix of energy-saving and washing results.
- Measure detergent according to the manufacturer’s instructions and water hardness.
- If the washing is then dried in the tumble dryer, select spin speed according to the instructions of the dryer manufacturer.

Intended use

- for use in the household only,
- for washing machine-washable textiles and hand-washable wool in wash liquor,
- to be operated with cold drinking water and commercially available detergents and care products which are suitable for use in washing machines.
- Do not leave children unattended near the washing machine!
- Children and uninstructed persons must not use the washing machine!
- Keep pets away from the washing machine!
- Switch on washing machine only with base strip attached

Programmes

Detailed overview of programmes → Page 7
Spin speed can be selected individually irrespective of the selected programme and programme progress.

Cotton hard-wearing textiles
Cotton delicates hard-wearing textiles
Mixed Fabrics different types of washing
Rinse extra rinse with spin; for hand wash, for starching
Spin washing washed by hand; extra spin with selectable spin speed
Empty the rinsing water when Ø is activated (rinse stop = without final spin)
Wool hand/machinewashable wool
Delicates/Silk for easy-care, washable textiles
Easy-Care for easy-care textiles

Preparation

Correct installation according to separate installation instructions.

Checking the machine
- Never switch on a damaged machine!
- Inform your customer service!

Insert mains plug
With dry hands only!
Take hold of the plug only!

Turn on the tap

Dispenser II: Detergent for main wash, softener, bleach, stain remover
Dispenser Ø: Fabric softener, starch
Dispenser I: Detergent for prewash

(* depending on model)
**Setting programmes**

Additional functions and spin speed

- Select Start/Pause

**Switching off**

Turn the programme selector to \( \circ \) Off.

**Turn off tap**

Not required for Aqua-Stop models. → Information, Installation Instructions

**Remove the washing**

Open washing machine door and remove washing.

If \( \circ \) (rinse stop = without final spin) active:
- Set programme selector to Empty or Spin.
- Select Start/Pause.

- Remove any foreign objects – risk of rusting.
- Leave detergent drawer and door open so that residual water can evaporate.

**End of programme when ...**

... the indicator light End is on.

**Terminating the programme**

For programmes at high temperature:
- Cool washing: select Rinse.
- Select Start/Pause.

For programmes at low temperature:
- Select Spin or Empty.
- Select Start/Pause.

**Change programme if ...**

... you have mistakenly selected a wrong programme:
- Reselect programme.
- Select Start/Pause.

The new programme starts from the beginning.

**Cancel Programme**

- Select Start/Pause.
- If required, top up washing (do not leave door open for a long time – water from the washing could run out of the open door).
- Select Start/Pause.
**Individual settings**

- **Spin speed** → depending on model
  You can change the indicated spin speed or select ⬇️ (rinse stop = without final spin cycle, washing remains in the water after the last rinse cycle). Effects dependent on the programme progress. The maximum selectable spin speed depends on the model and the set programme.

- **Additional functions** → Overview of programmes, Page 7
  **Eco** Energy-optimised washing by reducing the temperature while achieving a consistent washing result. The washing temperature is lower than the selected temperature. For special hygiene requirements, it is recommended that a higher temperature be selected.

- **Prewash** For heavily soiled washing. Prewash at 30 °C.

- **Less Ironing** Special spin sequence with subsequent fluffing. Gentle final spin at reduced spin speed. Residual moisture of the washing slightly increased.

- **Extra Rinse** Additional rinse cycle. Longer programme duration. For areas with very soft water or for further improvement of the rinsing result.

- **Start/Pause**
  For starting or interrupting the programme.

**Signal**

1. Activate setting mode for signal volume
   - Set to ●
   - Select and hold
   - Add 1 step to right
   - Release

   ** Optional: Blind mode 📆 ON–OFF.

2. Set volume for...
   - Set volume **
   - 1 step to right
   - Set volume **
   - Set to ●

   ** If required, select repeatedly

---

**Important information**

**Before using your washing machine for the first time**

Do not put any washing in the washing machine! Turn the tap on. Pour into dispenser II:
- approx. 1 litre of water
- detergent (dosage according to manufacturer’s instructions for light soiling and according to degree of water hardness).
- Set programme selector to Easy-Care 60 °C and select Start/Pause.

At the end of the programme set the programme selector to ⬇️.

**Protecting the washing and the machine**

- When dosing all detergents, cleaning aids and cleaning agents, always follow the manufacturer's instructions.
- Empty pockets. Remove metal parts (paper clips, etc.).
- Wash delicates in the net/bag (tights, curtains, underwear bras).
- Close zips, button up covers.
- Brush sand out of pockets and collars.
- Remove curtain fittings or include in the net/bag.

**Insert laundry**

Insert large and small items of washing! Do not jam items of washing between the washing machine door and rubber seal.

**Washing with different degrees of soiling**

<table>
<thead>
<tr>
<th>Light</th>
<th>Wash new items separately.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Heavy</td>
<td>If required, pretreat stains. Select Eco additional function.</td>
</tr>
<tr>
<td></td>
<td>Load less washing. Prewash.</td>
</tr>
<tr>
<td></td>
<td>If required, pretreat stains. Select Eco additional function.</td>
</tr>
</tbody>
</table>

**Soaking**

Load washing of the same colour.
Pour soaking agent/detergent into dispenser II according to the manufacturer’s instructions. Set programme selector to Cotton 30 °C and select Start/Pause. After approx. 10 minutes select Start/Pause to stop the programme. After the required soaking time reselect Start/Pause if the programme is to be continued or change the programme.

**Starching**

Washing should not be treated with fabric softener.
Liquid starch can be used in all wash programmes. Pour starch into the fabric softener dispenser ⬇️ according to manufacturer’s specifications (if required clean beforehand).

**Dyeing/Bleaching**

Dye in household quantities only. Salt may attack stainless steel! Observe specifications of the dye manufacturer! Do not bleach washing in the washing machine!

**Emergency release e.g. if power failure occurs**

The programme continues running when the power supply is restored. If the washing is still to be removed, the door can be opened as described below:

**Risk of scalding!**

Detergent solution and washing may be hot. If required, leave to cool down.
Do not reach into the drum in case it is still rotating. Do not open the door if you can still see water through the glass.

1. Set programme selector to ⬇️, pull out the mains plug.
2. Removing base strip see separate installation instructions.
3. Drain the water. → Page 10
4. Pull down emergency release with a tool and release. Door can then be opened.
5. Attaching base strip see separate installation instructions.

<td>220 kWh</td>
<td>11 000 l</td>
</tr>
</tbody>
</table>

** Programme setting for testing and energy labelling according to directive 2010/30/EU with cold water (15 °C).

***The values deviate from the indicated values depending on water pressure, water hardness, water inlet temperature, room temperature, type and amount of washing and degree of soiling, utilised detergent, fluctuations in the mains voltage and selected additional functions.

---

**Safety instructions**

- Read and follow the operating and installation instructions and all other information enclosed with the washing machine.
- Retain documents for subsequent use.

**Risk of electric shock**
- Never pull out the mains plug by tugging the power cord!
- Insert/pull out the mains plug with dry hands only.

**Danger to life**
- On redundant appliances:
  - Pull out the mains plug!
  - Sever the power cord and discard together with the plug.
- Destroy the lock on the washing-machine door. This will prevent children from locking themselves in and suffocating.

**Risk of suffocation**
- Keep packaging, plastic film and packaging parts out of the reach of children.

**Risk of poisoning**
- Keep detergents and care products out of the reach of children.

**Risk of explosion**
- Caused by detergents containing solvents, e.g. stain remover/spot remover on fabrics. Before hand thoroughly rinse items of washing pretreated with solvent naphtha may result in an explosion after being loaded into the washing machine.

- Sever the power cord and discard together with the plug.

**Risk of injury**
- Washing machine door may become very hot.
- Caution when draining hot detergent solution.
- Do not lean on the open washing machine door.
- Do not reach into the drum in case it is still rotating.

---

**Overview of programmes**

- * Programmes marked with * are time-controlled for lightly soiled textiles. If textiles are heavily soiled, reduce the load or select additional function, e.g. Eco.
- * Programmes marked with ** are time-controlled for lightly soiled textiles. If textiles are heavily soiled, reduce the load or select additional function, e.g. Eco.

- **Eco** Programmes allow you to use less detergent and less water, save energy and protect the environment.
- **Eco** Programmes without Prewash – pour detergent into dispenser I, programmes with Prewash – divide detergent between dispensers I and II.
**Insert for liquid detergent** depending on model

Position insert for dosing liquid detergent:
- Completely remove detergent drawer. → Page 10
- Push insert forwards.
- Do not use insert (push upwards):
  - For gel-like detergents and washing powders,
  - For programmes with Prewash.

---

**Information about the indicator lights** depending on model

A signal sounds and the indicator lamps for spin speed and status displays flash:
- Close the washing machine door properly.
- Washing may be caught.
- Water in the base pan, appliance leaking. Call customer service!
- Drain pump blocked; clean drain pump.
- Drainage hose/outlet pipe blocked; clean drainage hose on the siphon. → Page 10
- Motor fault. Call customer service!
- Or
- Or
- Or

**Care**

- Machine housing, control panel
  - Remove detergent residue immediately.
  - Wipe with a soft, damp cloth.
  - Do not clean the appliance with a jet.

- Clean the detergent drawer ...
  ... if it contains detergent or fabric softener residue.
  1. Pull out, depress insert, take out drawer all the way.
  3. Attach insert and lock into position (push cylinder onto guide pin).
  4. Slide in the detergent dispenser.
  5. Pull out, depress insert, take out drawer all the way.

---

**Maintenance**

**Detergent-solution pump**

Set programme selector to Off, pull out the mains plug.

1. Take the drainage hose out of the holder.
   Remove sealing cap, allow detergent solution to flow out.
   Put the closing cap back on the hose.

2. Carefully unscrew the pump cover (residual water).

3. Clean the interior, pump cover thread and pump housing (fan impeller in the detergent-solution pump must rotate).

4. Reinsert and screw on pump cover.
   Handle is upright. Insert the drain hose into the holder.

To prevent unused detergent from flowing into the outlet during the next wash:
Pour 1 litre of water into dispenser II and start the Empty programme.

**Drainage hose on the siphon**

Set programme selector to Off, pull out the mains plug.

1. Loosen hose clip, carefully remove drainage hose (residual water).

2. Clean drainage hose and siphon spigot.

3. Re-attach drainage hose and secure connection point with hose clip.

**Filter in the water inlet hose**

Risk of electric shock! Do not immerse Aqua-Stop safety device in water (contains electric valve).

Release water pressure in the supply hose:

1. Turn off the tap!

2. Select any programme (except Spin/Empty).

3. Select Start/Pause. Leave programme for approx. 40 seconds.

4. Turn the programme selector to Off. Pull out the mains plug!

5. Clean the filter:

6. Disconnect the hose from the water tap.
   Clean filter with small brush.

   and/or for standard and Aqua-Secure models:
   Remove hose from the rear of the appliance.
   Take out filter with pliers and clean.

6. Connect the hose and check for leaks.

---

**Insert for liquid detergent** depending on model

Position insert for dosing liquid detergent:
- Completely remove detergent drawer. → Page 10
- Push insert forwards.
- Do not use insert (push upwards):
  - For gel-like detergents and washing powders,
  - For programmes with Prewash.

---

**Care**

- Machine housing, control panel
  - Remove detergent residue immediately.
  - Wipe with a soft, damp cloth.
  - Do not clean the appliance with a jet.

- Clean the detergent drawer ...
  ... if it contains detergent or fabric softener residue.
  1. Pull out, depress insert, take out drawer all the way.
  3. Attach insert and lock into position (push cylinder onto guide pin).
  4. Slide in the detergent dispenser.
  5. Pull out, depress insert, take out drawer all the way.

---

**Maintenance**

**Detergent-solution pump**

Set programme selector to Off, pull out the mains plug.

1. Take the drainage hose out of the holder.
   Remove sealing cap, allow detergent solution to flow out.
   Put the closing cap back on the hose.

2. Carefully unscrew the pump cover (residual water).

3. Clean the interior, pump cover thread and pump housing (fan impeller in the detergent-solution pump must rotate).

4. Reinsert and screw on pump cover.
   Handle is upright. Insert the drain hose into the holder.

To prevent unused detergent from flowing into the outlet during the next wash:
Pour 1 litre of water into dispenser II and start the Empty programme.

**Drainage hose on the siphon**

Set programme selector to Off, pull out the mains plug.

1. Loosen hose clip, carefully remove drainage hose (residual water).

2. Clean drainage hose and siphon spigot.

3. Re-attach drainage hose and secure connection point with hose clip.

**Filter in the water inlet hose**

Risk of electric shock! Do not immerse Aqua-Stop safety device in water (contains electric valve).

Release water pressure in the supply hose:

1. Turn off the tap!

2. Select any programme (except Spin/Empty).

3. Select Start/Pause. Leave programme for approx. 40 seconds.

4. Turn the programme selector to Off. Pull out the mains plug!

5. Clean the filter:

6. Disconnect the hose from the water tap.
   Clean filter with small brush.

   and/or for standard and Aqua-Secure models:
   Remove hose from the rear of the appliance.
   Take out filter with pliers and clean.

6. Connect the hose and check for leaks.

---

**Insert for liquid detergent** depending on model

Position insert for dosing liquid detergent:
- Completely remove detergent drawer. → Page 10
- Push insert forwards.
- Do not use insert (push upwards):
  - For gel-like detergents and washing powders,
  - For programmes with Prewash.
What to do if …

Water is running out.
- Correctly attach/replace drainage hose.
- Tighten screw-fitting on the supply hose.

Water not flowing in.
- **Start**/Pause not selected?
- Tap not open?
- Filter blocked? Clean the filter. → Page 10
- Supply hose kinked or jammed?

Detergent not washed in.
- **Start**/Pause not selected?
- Tap not open?
- Filter blocked? Clean the filter. → Page 10
- Supply hose kinked or jammed?

Washing-machine door cannot be opened.
- Safety function active. Stop programme? → Page 4
- **Ø** (without final spin) selected? → Page 3, 4
- Can be opened via emergency release only? → Page 6

Programme does not start.
- **Start**/Pause not selected?
- Door closed?

Detergent solution is not drained.
- **Ø** (without final spin) selected? → Page 3, 4
- Clean the drain pump. → Page 10
- Clean outlet pipe and/or drainage hose.

Water not visible in the drum.
- Not a fault – water below the visible area.

Spin result not satisfactory, washing wet/too damp:
- Not a fault – unbalanced load detection system has stopped the spin cycle, washing unevenly distributed.
- Distribute small and large items of washing in the drum.
- **Less Ironing** is selected? → Page 5
- Too low speed selected? → Page 5

The programme duration changes during the wash cycle.
- Not a fault – the programme sequence is optimised for the particular wash process. This may result in changes to the programme duration in the display field.

Spin cycle actuated several times.
- Not a fault – unbalanced load detection system adjusts imbalance.

Residual water in the dispenser for care product ®.
- Not a fault – effect of the care product not impaired.
- If required, clean insert. → Page 9

Odour formation in the washing machine.
- Run **Cotton 90 °C** programme without washing.
- Use standard detergent.

Foam is coming out of the detergent drawer.
- Too much detergent used?
  - Mix 1 tablespoon of fabric softener with ½ litre of water and pour into dispenser II (not for outdoor, sports and down-filled textiles).
  - Reduce detergent dosage for the next wash cycle.

Loud noise formation, vibrations and “Wandering” during spin cycle.
- Appliance feet fixed?
  - Secure appliance feet. → Installation Instructions
- Transportation protection devices removed?
  - Remove transportation protection devices. → Installation Instructions

Noises during spin and drain cycles.
- Clean the drain pump. → Page 10

Indicator lights do not function while the appliance is running.
- Power failure?
  - Fuse tripped? Switch on/replace fuse.
  - If the fault occurs repeatedly, call customer service.

The programme takes longer than usual.
- Not a fault – unbalanced load detection system adjusts imbalance by repeatedly distributing the washing.
- Not a fault – foam detection system active – a rinse cycle is switched on.

Detergent residue on the washing.
- Occasionally phosphate-free detergents contain water-insoluble residue.
- Select **Rinse** or brush the laundry after washing.

In the pause status **Start**/**Pause** flashes very quickly and a signal sounds.
- Water level too high. Washing cannot be reloaded.
  - Immediately close washing machine door.
  - Select **Start**/**Pause** to continue the programme.
- If a fault cannot be rectified (switching the machine on and off) or a repair is required:
  - Set programme selector to **Off** and pull out the mains plug.
  - Turn off the tap and call customer service. → Installation Instructions

Read these instructions and the separate installation instructions before operating the washing machine.
