Safety instructions

- Read the instruction manual and installation instructions and all other information enclosed with the washing machine and act accordingly.

Retain the documents for subsequent use.

Never pull the cable to disconnect the mains plug.

Never insert/disconnect the mains plug with damp hands.

Danger to life

Risk of electric shock

For worn-out appliances:

Disconnect the mains plug. Sever the mains cable and discard along with the plug.

Destroy the lock on the washing machine door. This will prevent children from locking themselves in and risking their lives.

Danger of suffocation Risk of poisoning Risk of explosion

Keep packaging, film and packaging parts out of the reach of children.

Keep detergents and care products out of the reach of children. Items of laundry pretreated with cleaning agents containing solvents, e.g. stain remover / cleaning solvent may lead to an explosion after being loaded into the

Rinse items of laundry thoroughly by hand beforehand. The washing machine door can become very hot.

Be careful when draining hot detergent solution.

Do not climb onto the washing machine.

Do not lean on the open washing machine door.

Do not reach into the drum if it is still rotating.

Be careful when opening the detergent drawer while the machine is in operation.

Programme setting for testing and energy labelling in accordance with EU directive 2010/30/EU with cold water (15 °C The values deviate from the indicated values depending on water pressure, hardness, and inlet temperature, ambient temperature, type, amount and soiling of the laundry, detergent used, fluctuations in the power supply and selected additional

- Risk of electric shock. Disconnect the mains plug Risk of explosion. No solvents.

Before washing for the first time

Do not load any laundry into the machine. Turn on the tap. Add the following to compartment **II**:

detergent (dosage according to the manufacturer's instructions for light soiling and the appropriate degree of water

Set the programme selector to ﴿ Easy-Care 60 °C and select D (Start/Reload). At the end of the programme, turn the programme selector to **Off**.

Machine housing, control panel

- Wipe with a soft, damp cloth,
- Do not use any abrasive cloths, scourers or cleaning agents (stainless steel cleaners).
- Remove detergent and cleaning agent residue immediately. Do not clean with a jet of water.

Cleaning the detergent drawer and housing...

- ... if it contains detergent or fabric softener residues.
- 1. Pull the drawer out, press down the insert and fully remove the drawer from the housing. **2.** To remove the insert: press the insert upwards from below with your finger.
- 3. Clean the detergent dispenser tray and insert with water and a brush and dry it. Also remove any detergent or fabric softener residues in the housing.
- **4.** Attach the insert and engage (connect the cylinder to the guide pin).
- **5.** Push in the detergent drawer.

Wipe the inside of the rubber seal dry with a cloth. Leave the washing machine door open so that the drum can dry out. Rust stains - use chlorine-free cleaning agent, not steel wool.

Ensure there is no laundry in the machine Descale the appliance according to the descaler manufacturer's instructions. This should not be necessary if the correct dosage of detergent is used.

Emergency release, e.g. in the event of a power cut

The programme continues to run when the power has been restored. However, if the laundry has to be removed, the washing machine door can be opened as follows:

The detergent solution and laundry may be hot. If possible, leave it to cool down. Do not reach into the drum if it is still rotating.

Do not open the washing machine door if water can be seen through the glass.

- 1. Turn the programme selector to **Off** and disconnect the mains plug. **2.** Drain the detergent solution \rightarrow page 10.
- 3. Pull the emergency release downwards with a tool and release. Washing machine door can then be opened.

Information on the display panel depending on model

Important information

Protecting the laundry and the machine

- When determining the dosage of all washing powders, additives and cleaning agents, you must follow the manufacturer's instructions.
- Empty pockets.
- Look out for metal items (paperclips, etc.).
- Wash delicates in a laundry bag (tights, curtains, underwired bras).
- Fasten zips, do up any buttons.
- Brush sand out of pockets and collars.
- Remove curtain fittings or place in the laundry bag.

Laundry with varying degrees of soiling

Wash new items of clothing separately.

Pre-treat any stains as necessary.

intense

Do not load as much laundry. Choose a programme with a prewash.

Soaking Load laundry of the same colour

Pour soaking agent/detergent into compartment II in accordance with the manufacturer's instructions. Turn the programme selector to **② Cottons 30 °C** and press **▷ ■** (Start/Reload). After approx. 10 minutes, press DM (Start/Reload) to pause the programme. Once the required soaking time has elapsed, press DII (Start/Reload) again to continue the programme, or select a different programme.

Laundry should not be treated with fabric softener.

Starching is possible in all wash programmes if liquid starch is used. Pour the starch in accordance with the manufacturer's instructions into fabric softener compartment & (rinse first if necessary).

Dve /Bleach

Dye should only be used in normal household quantities. Salt may damage stainless steel. Always follow the dye manufacturer's instructions! Do **not** use the washing machine for bleaching clothes!

	010	!		

SpeedPerfect function. Reduced load for additional =

As a **short programme, 常瓜 Mix 40 °C,** with a maximum spin speed, is ideal. Programmes without pre-wash - add detergent to compartment II, programmes with pre-wash - distribute the detergent between compartments I and II.

! Safety instructions

- Read the instruction manual and installation instructions and all other information enclosed with the washing machine and act accordingly.
- Retain the documents for subsequent use.

Risk of electric shock

- Never pull the cable to disconnect the mains plug.
- Never insert/disconnect the mains plug with damp hands.

Danger to life

For worn-out appliances:

- Disconnect the mains plug.
- Sever the mains cable and discard along with the plug.
- Destroy the lock on the washing machine door. This will prevent children from locking themselves in and risking their lives.

Danger of suffocation Risk of poisoning Risk of explosion

Risk of injury

- Keep packaging, film and packaging parts out of the reach of children.
- Keep detergents and care products out of the reach of children.
- Items of laundry pretreated with cleaning agents containing solvents, e.g. stain remover / cleaning solvent may lead to an explosion after being loaded into the washing machine.

Rinse items of laundry thoroughly by hand beforehand.

- The washing machine door can become very hot.
- Be careful when draining hot detergent solution.
- Do not climb onto the washing machine.
- Do not lean on the open washing machine door.
- Do not reach into the drum if it is still rotating.
- Be careful when opening the detergent drawer while the machine is in operation.

Consumption values depending on model

_				
Programme	Load	Electricity**	Water**	Programme duration**
Cottons 20 °C	7 kg	0,31 kWh	721	2 ¾ h
☆ Cottons 40 °C	7 kg	0,85 kWh	721	2 ¾ h

	2 kg	0,22 kWh	471	¾ h
Programme	Additional function	Load	Annual energy consumption	Annual water consumption
Cottons 40 / 60 °C	© EcoPerfect*	3,5/7 kg	165 kWh	10686 l

Programme setting for testing and energy labelling in accordance with EU directive 2010/30/EU with cold water (15 °C). The values deviate from the indicated values depending on water pressure, hardness, and inlet temperature, ambient temperature, type, amount and soiling of the laundry, detergent used, fluctuations in the power supply and selected additional functions.

Robert Bosch Hausgeräte GmbH Carl-Wery-Str. 34 81739 München / Germany

WAE24469BY

Care

Risk of electric shock. Disconnect the mains plug.
 Risk of explosion. No solvents.

Before washing for the first time

Do not load any laundry into the machine. Turn on the tap. Add the following to compartment $oldsymbol{I}$:

- approx. 1 litre water
- detergent (dosage according to the manufacturer's instructions for light soiling and the appropriate degree of water hardness)

Set the programme selector to \bigtriangleup Easy-Care 60 °C and select DM (Start/Reload). At the end of the programme, turn the programme selector to Off.

Machine housing, control panel

- Wipe with a soft, damp cloth.
- Do not use any abrasive cloths, scourers or cleaning agents (stainless steel cleaners).
- Remove detergent and cleaning agent residue immediately.
- Do not clean with a jet of water.

Cleaning the detergent drawer and housing...

... if it contains detergent or fabric softener residues.

- 1. Pull the drawer out, press down the insert and fully remove the drawer from the housing.
- 2. To remove the insert: press the insert upwards from below with your finger.
- 3. Clean the detergent dispenser tray and insert with water and a brush and dry it. Also remove any detergent or fabric softener residues in the housing.
- 4. Attach the insert and engage (connect the cylinder to the guide pin).
- **5.** Push in the detergent drawer.

Leave the detergent drawer open so that any residual water can evaporate.

Was

Washing drum and rubber seal

Wipe the inside of the rubber seal dry with a cloth. Leave the washing machine door open so that the drum can dry out. Rust stains - use chlorine-free cleaning agent, not steel wool.

Descaling

Ensure there is no laundry in the machine

Descale the appliance according to the descaler manufacturer's instructions. This should not be necessary if the correct dosage of detergent is used.

Emergency release, e.g. in the event of a power cut

The programme continues to run when the power has been restored. However, if the laundry has to be removed, the washing machine door can be opened as follows:

Risk of scalding.

The detergent solution and laundry may be hot. If possible, leave it to cool down. Do not reach into the drum if it is still rotating.

Do not open the washing machine door if water can be seen through the glass.

- 1. Turn the programme selector to Off and disconnect the mains plug.
- 2. Drain the detergent solution → page 10.
- 3. Pull the emergency release downwards with a tool and release. Washing machine door can then be opened.

depending on model

Information on the display panel

F: 16 Close the washing machine door properly; laundry may be caught.

- **F: 17** Open the tap completely, supply hose kinked or trapped; Clean the filter → page 10. Water pressure too low.
- F: 18 Detergent solution pump blocked; Clean the detergent solution pump \longrightarrow page 10. Drainage hose / waste pipe blocked; Clean the drainage hose at the siphon \longrightarrow page 10.
- **F: 21** Motor fault. Call customer services.
- **F: 23** Water in the base tub, appliance leaking. Call customer services.

Maintenance

Risk of scalding. Allow the detergent solution to cool down.
Turn off the tap.

Detergent solution pump

Turn the programme selector to **Off** and disconnect the mains plug.

- 1. Open and remove the service flap.
- 2. For models with a drainage hose: Remove the drainage hose from the retainer and pull it from the housing.Remove the container. Remove the sealing cap, allow the detergent solution to flow out. Replace the sealing cap and place the drainage hose in the retainer.

2* For models without a drainage hose: Carefully unscrew the pump cover until the detergent solution begins to flow out. When the service flap is half full, close the pump cover and empty the service flap. Repeat the above steps until all the detergent solution has completely drained out.

- 3. Carefully unscrew the pump cover (residual water).
- **4.** Clean the interior, pump cover thread and pump housing (the impeller in the detergent solution pump must rotate).

6. Place the service flap back on and close.

To prevent unused detergent from flowing straight into the drain during the next wash: Pour 1 litre of water into compartment **II** and start the **Fempty** programme.

Drainage hose at the siphon

Turn the programme selector to **Off** and disconnect the mains plug.

- 1. Loosen the hose clamp, carefully remove the drainage hose (residual water).
- 2. Clean the drainage hose and siphon connecting piece.
- 3. Reattach the drainage hose and secure the connection with the hose clamp.

Filter in the water supply

1

Risk of electric shock

Do not immerse the HydroSafe safety device in water (contains an electric valve).

Reduce the water pressure in the supply hose:

- **1.** Turn off the tap.
- 2. Select any programme (apart from © Spin / F Empty).
- **3.** Choose DII (Start/Reload). Let the programme run for approximately 40 seconds.
- 4. Turn the programme selector to Off. Disconnect the mains plug. Clean the filter:
- Depending on model: Disconnect the hose from the tap. Clean the filter using a small brush.

Remove the hose on the rear of the appliance, Remove the filter with pliers and clean.

2. Connect the hose and check for leaks.

What to do if ...

	nat to do ii	
	Water is leaking out.	Attach/replace the drainage hose correctly.Tighten the screw connection of the supply hose.
•	No water supply. Detergent not dispensed.	 DM (Start/Reload) not selected? Tap not turned on? Filter blocked? Clean the filter → page 10. Supply hose kinked or trapped?
	Washing machine door cannot be opened.	 Safety function active. Programme stopped? → page 4.
	Programme does not start.	 D (Start/Reload) or (Finished in) time selected? Washing machine door closed? Childproof lock active? Deactivate → page 5.
	Detergent solution is not drained.	 - □ (without final spin) selected? → page 3, 4. - Clean the detergent solution pump → page 10. - Clean the waste pipe and/or drainage hose.
	Water not visible in the drum.	- Not a fault - water below the visible area.
	Unsatisfactory spin result. Laundry wet/too damp.	 Not a fault - the unbalanced-load detection system has cancelled the spin cycle because of uneven distribution of the laundry. Distribute small and large items of laundry evenly inside the drum. ☐ (Easy-iron) selected? → page 5. Selected speed too low? → page 5.
	The programme duration changes during the wash cycle.	 Not a fault – the programme sequence is optimised for the particular wash process. This may result in changes to the programme duration in the display field.
	Spin cycle performed several times.	 Not a fault - unbalanced load detection system adjusts the imbalance.
	Residual water in the compartment for care products.	 Not a fault - the action of the care product is not affected. Clean the insert if necessary → page 9.
	Odour formation in the washing machine.	 Run programme Cottons 90 °C without laundry. Use standard detergent.
•	Status display $\stackrel{\triangle}{\hookrightarrow}$ flashes. Foam may be coming out of the detergent drawer.	 Too much detergent used? Mix 1 tablespoon of fabric softener with ½ litre of water and pour into dispenser II (not for outdoor and downfilled textiles!). Reduce the detergent dosage for the next wash cycle.
	Intense noise formation, vibrations and "wandering" during the spin cycle.	 Are the appliance feet fixed? Secure the appliance feet → Installation instructions. Transportation safety devices removed? Remove the transportation safety devices → Installation instructions.
	Noises during spin and drain cycles.	 Clean detergent-solution pump → page 10.
	Display panel/indicator lamps do not function during operation.	Power cut?Fuses triggered? Reset/change the fuse.If the fault occurs repeatedly, call customer services.
	Programme sequence longer than usual.	 Not a fault - unbalanced load detection system adjusts imbalance by repeatedly distributing the laundry. Not a fault - foam detection system active - adds an additional rinse cycle.
	Detergent residues on the laundry.	 Occasionally, phosphate-free detergents contain water-insoluble residues. Use the residues residues residues.

If you cannot correct a fault yourself (switching on/off) or a repair is required:

- Turn the programme selector to **Off** and remove the mains plug from the socket.

- Turn off the water supply and call customer services → *Installation instructions*.
