Environmental protection/Conservation tips

- Always fill the washing machine with a maximum amount of laundry for the relevant programme
- Wash normally soiled laundry without a pre-wash.
- The selectable temperatures apply to the care labels on the textiles. The temperatures in the machine may deviate from this so that you get the optimum mix of energy-saving and washing
- Measure the detergent according to the manufacturer's instructions and water hardness.
- If the laundry is then dried in the tumble dryer, select the spin speed according to the instructions of the dryer manufacturer.

Intended use

for domestic use only.

Programmes

progress.

Page

- for machine-washable fabrics and hand-washable wool in detergent solution,
- to be operated with cold drinking water and commercially available detergents and care products which are suitable for use in washing machines.
- Do not leave children unattended near the washing machine.
- The washing machine is not to be used by children or persons not familiar with the operating instructions.
- Keep pets away from the washing machine.

Detailed overview of programmes \rightarrow page 7.

Temperature and spin speed can be selected individually,

depending on the selected programme and programme

algodón/algodão =¹⁰ speedPerfect Hard-wearing fabrics ecoPerfect + prelav. (+ prewash) menos (anti-crease) sintéticos (easy-care) €O speedPerfect Easy-care fabrics ecoPerfect + prelav. (+ prewash) Different types of laundry delicado/seda Delicate washable fabrics delicate/silk) / lana/lã (wool) Hand/machine-washable wool express 15 min. Short programme Hand-wash laundry, extra 🕁 (extra 云 (rinse)/ ອ centrifug (spin) rinse) activated; if only using the spin cycle, deactivate the button Drain rinsing water for - - - (without empty) ہے final spin)

Preparation

Correct installation according to the separate Installation instructions.

Checking the machine

Connecting the mains plug

Make sure your hands are dry. Take hold of the plug only.

Compartment II: Detergent for the main wash, water softener, bleach, stain remover

Compartment S: Fabric softener, starch

Compartment I: Detergent for pre-wash

Setting^{**} and adjusting programmes

Before washing for the first time Wash once without any laundry \rightarrow page 9.

Sorting and loading laundry

Follow the manufacturer's care information. According to the information on the care labels. According to type, colour, soiling and temperature. Do not exceed the maximum load \rightarrow page 7

Observe the important information \rightarrow page 6. Insert large and small items of laundry. Close the washing machine door. Take care not to trap items of laundry between the washing machine door and the rubber seal.

Add detergent and care products

Measure accordingly: Amount of laundry, soiling, water hardness (ask your water supply

company) and manufacturer's instructions. Pour liquid detergent into the appropriate dispenser and place in the drum.

Dilute thick fabric softener and fabric conditioner with water. This prevents blockages.

Removing the washing

Open the washing machine door and remove the washing. - (without final spin) is active: Turn the programme selector to rate (empty) or select the spin speed. Select inicio/pausa (start/pause).

> - Remove any foreign objects - risk of rusting. Leave the washing machine door and detergent drawer open so that any residual water can evaporate.

Turning the tap off

Not required for AquaStop models \rightarrow Refer to installation instructions

Switchina ofi urn the programme selector to \bigcirc (off).

End of programme when ...

... the status indicator **centrifugar (spin)** flashes and End appears in the display panel.

Interrupting the programme

Programmes at high temperatures:

- Cool washing: Select 🖙 (rinse)/ 🛈 centrifug. (spin). Select inicio/pausa (start/pause).
- Programmes at lower temperatures:
- ☞ (rinse)/ⓒ centrifug. (spin) (deactivate extra ☞ (extra rinse)) or select ☞ (empty).
- Select inicio/pausa (start/pause).

Changing the programme, if ...

- you have selected the wrong programme by mistake:
- Reselect the programme.
- Select inicio/pausa (start/pause). The new programme starts from the beginning.

Individual settings

Option buttons

Spin speed / without final spin

You can change the displayed spin speed. The maximum selectable spin speed depends on the model and on which programme is currently selected.

temp.°C (Temperature

You can change the displayed washing temperature. The maximum washing temperature that can be selected depends on the programme that has been set.

(Finished in)

When you select the programme, the relevant programme duration is displayed. You can delay the start of the programme before it begins. The "finished in" time can be set in increments of one hour up to a maximum of 24 hours. Press the () (finished in) button repeatedly until the required number of hours is displayed (h = hour). Select inicio/pausa (start/pause).

Childproof lock and reloading

Childproof lock/ Appliance lock

inicio/pausa (start/pause) For starting or interrupting the programme.

The spin speed and temperature can be changed before and during the selected programme runs. The effects depend on the programme progress.

- **Additional function** \rightarrow and overview of programmes, see page 7
- extra 😅 (extra rinse) Additional rinse cycle. For areas with very soft water or for further enhancing the washing result.
 - You can lock the washing machine to prevent the functions you have set from being changed inadvertently
 - **ON/OFF:** Press and hold the inicio/pausa (start/pause) button for approx. 5 seconds after the start/end of the programme.
 - Note: The childproof lock can remain activated until you wish to start the next programme, even after switching off the machine.
 - Then you can deactivate the childproof lock before the start of the programme and activate it again as necessary once the programme has started.

Important information

otecting the laundry and the machine

- When determining the dosage of all washing powders, additives and cleaning agents, you must follow the manufacturer's instructions.
- Empty pockets.
- Look out for metal items (paperclips, etc.).
- Wash delicates in a laundry bag (tights, curtains, underwired bras).
- Fasten zips, do up any buttons.
- Brush sand out of pockets and collars.
- Remove curtain fittings or place in the laundry bag.

Laundry with varying degrees of soiling

		Wash new items of clothing separately.
	light L	Do not pre-wash. If required, choose the = speedPerfect programme.
		Pre-treat any stains as necessary.
	heavy 🧖	Do not load as much laundry. Select the program with prewash.
\sim	Soaking	Load laundry of the same colour
5	Pour soaking ag	gent/detergent into compartment II in accordance with the manufacturer's n the programme selector to algodón/algodão (cottons) 30 °C and select
	inicio/pausa (st pause the progr	tart /pause). After approx. 10 minutes, press inicio/ pausa (start/ pause) to amme. Once the required soaking time has elapsed, select inicio /pausa gain to continue the programme, or select a different programme.
1117	Starching	Laundry must not be treated with fabric softener

Starching is possible in all wash programmes if liquid starch is used. Pour the starch in accordance with the manufacturer's instructions into fabric softener compartment & (rinse first if necessarv).

Dyeing / Bleaching

Dye should only be used in normal household quantities. Salt may damage stainless steel. Always follow the dye manufacturer's instructions! Do **not** use the washing machine for bleaching clothes!

WM14E267ES	

 Read the instruction manual and installation instructions and all other information enclosed with the washing machine and act accordingly. Retain the documents for subsequent use. 		
Risk of electric shock	 Never pull the cable to disconnect the mains plug. Never insert/disconnect the mains plug with damp hands. 	
Danger to life	 For worn-out appliances: Disconnect the mains plug. Sever the mains cable and discard along with the plug. Destroy the lock on the washing machine door. This will prevent children from locking themselves in and risking their lives. 	
Danger of suffocation	 Keep packaging, film and packaging parts out of the reach of children. 	
Risk of poisoning	 Keep detergents and care products out of the reach of children. 	
Risk of explosion	 Items of laundry pretreated with cleaning agents containing solvents, e.g. stain remover/cleaning solvent may cause an explosion after being loaded into the washing machine. Rinse items of laundry thoroughly by hand beforehand. 	
Risk of injury	 The washing machine door can become very hot. Be careful when draining hot detergent solution. Do not climb onto the washing machine. Do not lean on the open washing machine door. Do not reach into the drum if it is still rotating. Be careful when opening the detergent drawer while the machine is in operation

Programme	Additional function	Load	Annual energy consumption	Annual water consumption
algodón/algodão (cottons) 40 / 60 °C	@ ecoPerfect*	3,5/7 kg	165 kWh	10686 I

Programme setting for testing and energy labelling in accordance with EU directive 2010/30/EU with cold water (15 °C). The values deviate from the indicated values depending on water pressure, hardness, and inlet temperature, ambient temperature, type, amount and soiling of the laundry, detergent used, fluctuations in the power supply and selected additional functions.

Risk of explosion. No solvents.

Before washing for the first time

- Do not load any laundry into the machine. Turn on the tap. Add the following to compartment II:
- approx. 1 litre water

Care

detergent (dosage according to the manufacturer's instructions for light soiling and the appropriate degree of water

Risk of electric shock.

connect the mains plug.

Set the programme selector to algodón/algodão (cottons) 60 °C and select inicio/pausa (start/pause). At the end of the programme, turn the programme selector to \bigcirc (off).

Machine housing, control panel

- Wipe with a soft, damp cloth.
- Do not use any abrasive cloths, scourers or cleaning agents (stainless steel cleaners).
- Remove detergent and cleaning agent residue immediately. Do not clean with a jet of water.

Cleaning the detergent drawer and housing...

- ... if it contains detergent or fabric softener residues.
- **1.** Pull the drawer out, press down the insert and fully remove the drawer from the housing. . To remove the insert: press the insert upwards from below with your finger.
- 3. Clean the detergent dispenser tray and insert with water and a brush and dry it. Also remove
- any detergent or fabric softener residues in the housing.
- **4.** Attach the insert and engage (connect the cylinder to the guide pin). 5. Push in the detergent drawer.

Leave the detergent drawer open so that any residual water can evaporate.

Washing drum and rubber seal

Wipe the inside of the rubber seal dry with a cloth. Leave the washing machine door open so that the drum can dry out. Rust stains - use chlorine-free cleaning agent, not steel wool.

Descaling Ensure there is no laundry in the machine

Descale the appliance according to the descaler manufacturer's instructions. This should not be necessary if the correct dosage of detergent is used.

Emergency release, e.g. in the event of a power cut

The programme continues to run when the power has been restored. However, if the laundry has to be removed, the washing machine door can be opened as follows:

Risk of scalding.

The detergent solution and laundry may be hot. If possible, leave it to cool down. Do not reach into the drum if it is still rotating. Do not open the washing machine door if water can be seen through the glass.

1. Turn the programme selector to \bigcirc (off) and disconnect the mains plug. **2.** Drain the detergent solution \rightarrow page 10. **3.** Pull the emergency release downwards with a tool and release. Washing machine door can then be opened.

Detergent solution pump

- $\overrightarrow{}$ Turn the programme selector to \bigcirc (off) and disconnect the mains plug.
- **1.** Open and remove the service flap.
- 2. For models with a drainage hose: Remove the drainage hose from the retainer and pull it from the housing. Remove the container. Remove the sealing cap, allow the detergent solution to flow out. Replace the sealing cap and place the drainage hose in the retainer.
- 2* For models without a drainage hose: Carefully unscrew the pump cover until the detergent solution begins to flow out. When the service flap is half full, close the pump cover and empty the service flap. Repeat the above steps until all the detergent solution has completely drained out.
- **3.** Carefully unscrew the pump cover (residual water).
- 4. Clean the interior, pump cover thread and pump housing (the impeller in the detergent solution pump must rotate).
- 5. Replace the pump cover and screw it tightly.
- 6. Place the service flap back on and close.

Drainage hose at the siphon

- Turn the programme selector to \bigcirc (off) and disconnect the mains plug.
- **1.** Loosen the hose clamp, carefully remove the drainage hose (residual water).
- **2.** Clean the drainage hose and siphon connecting piece.
- **3.** Reattach the drainage hose and secure the connection with the hose clamp.

Filter in the water supply

Risk of electric shock

Reduce the water pressure in the supply hose:

- **1.** Turn off the tap.
- 2. Select any programme (except 🖙 (rinse)/ 🛈 centrifug. (spin) / 🚽 (empty)
- 3. Select inicio/pausa (start/pause). Let the programme run for approximately 40 seconds.
- **4.** Turn the programme selector to \bigcirc (off). Disconnect the mains plug. Clean the filter:
- 1. Depending on model: Disconnect the hose from the tap. Clean the filter using a small brush.

and/or for Standard and AquaStop models: Remove the hose on the rear of the appliance, Remove the filter with pliers and clean.

2. Connect the hose and check for leaks.

What to do

- No water supply. Detergent not dispensed.
- Washing machine cannot be opened
- Programme does i
- Detergent solution not drained.
- Water not visible in drum.
- Unsatisfactory spin result Laundry wet/too da
- The programme duration changes during the wash c
- Spin cycle perform several times.
- Residual water in t compartment for ca products.
- Odour formation in washing machine.
- activo (wash) dis lamp flashes. Foar may be coming ou the detergent draw
- Intense noise form vibrations and "wandering" during spin cycle.
- Noises during spin drain cycles.
- Display panel/indic lamps do not funct during operation.
- Programme seque longer than usual.

Safety instructions

 Read the instruction manua machine and act accordingl Retain the documents for su 	
Risk of electric shock	 Never pull the cable to disconnect the mains plug. Never insert/disconnect the mains plug with damp hands.
Danger to life	 For worn-out appliances: Disconnect the mains plug. Sever the mains cable and discard along with the plug. Destroy the lock on the washing machine door. This will prevent children from locking themselves in and risking their lives.
Danger of suffocation	 Keep packaging, film and packaging parts out of the reach of children.
Risk of poisoning	 Keep detergents and care products out of the reach of children.
Risk of explosion	 Items of laundry pretreated with cleaning agents containing solvents, e.g. stain remover/cleaning solvent may cause an explosion after being loaded into the washing machine. Rinse items of laundry thoroughly by hand beforehand.
Risk of injury	 The washing machine door can become very hot. Be careful when draining hot detergent solution. Do not climb onto the washing machine. Do not lean on the open washing machine door. Do not reach into the drum if it is still rotating. Be careful when opening the detergent drawer while the machine is in operation.

Consumption values depending on model

Programme	Load	Electricity**	Water**	Programme duration**
algodón/algodão (cottons) 20 °C	7 kg	0,31 kWh	721	2 ¾ h
algodón/algodão (cottons) 40 °C	7 kg	0,85 kWh	721	2 ¾ h
algodón/algodão (cottons) 60 °C	7 kg	1,21 kWh	721	2 ¾ h
algodón/algodão (cottons) 90 °C	7 kg	2,01 kWh	771	3 h
sintéticos (easy-care) 40 °C	3 kg	0,64 kWh	56 I	1 ¾ h
mix 40 °C	3 kg	0,46 kWh	36	1 ¼ h
delicado/seda (delicate/silk) 30 °C	2 kg	0,24 kWh	37 I	3⁄4 h
 	2 kg	0,22 kWh	47	3⁄4 h
Programme	Additional function	Load	Annual energy consumption	Annual water consumption
algodón/algodão (cottons) 40 / 60 °C	@ ecoPerfect*	3,5/7 kg	165 kWh	106861

Programme setting for testing and energy labelling in accordance with EU directive 2010/30/EU with cold water (15 °C). The values deviate from the indicated values depending on water pressure, hardness, and inlet temperature, ambient temperature, type, amount and soiling of the laundry, detergent used, fluctuations in the power supply and selected additional ** functions.

Care

Risk of electric shock. Disconnect the mains plug.

Risk of explosion. No solvents.

Before washing for the first time

- Do not load any laundry into the machine. Turn on the tap.
- Add the following to compartment II:
- approx. 1 litre water
- detergent (dosage according to the manufacturer's instructions for light soiling and the appropriate degree of water hardness)

Set the programme selector to algodón/algodão (cottons) 60 °C and select inicio/pausa (start/pause). At the end of the programme, turn the programme selector to \bigcirc (off).

Machine housing, control panel

- Wipe with a soft, damp cloth.
- Do not use any abrasive cloths, scourers or cleaning agents (stainless steel cleaners).
- Remove detergent and cleaning agent residue immediately.
- Do not clean with a jet of water.

Cleaning the detergent drawer and housing...

... if it contains detergent or fabric softener residues.

- 1. Pull the drawer out, press down the insert and fully remove the drawer from the housing.
- 2. To remove the insert: press the insert upwards from below with your finger 3. Clean the detergent dispenser tray and insert with water and a brush and dry it. Also remove
- any detergent or fabric softener residues in the housing.
- Attach the insert and engage (connect the cylinder to the guide pin). 4.
- 5. Push in the detergent drawer.

Leave the detergent drawer open so that any residual water can evaporate.

Washing drum and rubber seal

Wipe the inside of the rubber seal dry with a cloth. Leave the washing machine door open so that the drum can dry out. Rust stains - use chlorine-free cleaning agent, not steel wool.

Descalina

Ensure there is no laundry in the machine

Descale the appliance according to the descaler manufacturer's instructions. This should not be necessary if the correct dosage of detergent is used.

Emergency release, e.g. in the event of a power cut

The programme continues to run when the power has been restored. However, if the laundry has to be removed, the washing machine door can be opened as follows:

Risk of scalding.

- The detergent solution and laundry may be hot. If possible, leave it to cool down. Do not reach into the drum if it is still rotating. Do not open the washing machine door if water can be seen through the glass.
- **1.** Turn the programme selector to \bigcirc (off) and disconnect the mains plug.
- **2.** Drain the detergent solution \rightarrow page 10.
- 3. Pull the emergency release downwards with a tool and release. Washing machine door can then be opened.

9

Maintenance

Risk of scalding. Allow the detergent solution to cool down. Turn off the tap.

Detergent solution pump

- Turn the programme selector to \bigcirc (off) and disconnect the mains plug.
- 1. Open and remove the service flap.

- 2. For models with a drainage hose: Remove the drainage hose from the retainer and pull it from the housing. Remove the container. Remove the sealing cap, allow the detergent solution to flow out. Replace the sealing cap and place the drainage hose in the retainer.
- 2* For models without a drainage hose: Carefully unscrew the pump cover until the detergent solution begins to flow out. When the service flap is half full, close the pump cover and empty the service flap. Repeat the above steps until all the detergent solution has completely drained out.
- 3. Carefully unscrew the pump cover (residual water).
- 4. Clean the interior, pump cover thread and pump housing (the impeller in the detergent solution pump must rotate).
- 5. Replace the pump cover and screw it tightly.
- 6. Place the service flap back on and close.

To prevent unused detergent from flowing straight into the drain during the next wash: Pour 1 litre of water into compartment II and start the w (empty) programme.

Drainage hose at the siphon

- Turn the programme selector to \bigcirc (off) and disconnect the mains plug.
- **1.** Loosen the hose clamp, carefully remove the drainage hose (residual water).
- **2.** Clean the drainage hose and siphon connecting piece.
- 3. Reattach the drainage hose and secure the connection with the hose clamp.

Filter in the water supply

Risk of electric shock Do not immerse the AquaStop safety device in water (contains an electric valve).

Reduce the water pressure in the supply hose:

- **1.** Turn off the tap.
- 2. Select any programme (except 🖙 (rinse)/ ତ centrifug. (spin) // y (empty)).
- 3. Select inicio/pausa (start/pause). Let the programme run for approximately 40 seconds.
- **4.** Turn the programme selector to \bigcirc (off). Disconnect the mains plug. Clean the filter:
- **1.** Depending on model: Disconnect the hose from the tap. Clean the filter using a small brush.

and/or for Standard and AquaStop models: Remove the hose on the rear of the appliance, Remove the filter with pliers and clean.

2. Connect the hose and check for leaks.

What to do if ...

	Water is leaking out.	Attach/replace the drainage hose correctly.Tighten the screw connection of the supply hose.
	No water supply. Detergent not dispensed.	 inicio/pausa (start/pause) not selected? Tap not turned on? Filter blocked? Clean the filter → page 10. Supply hose kinked or trapped?
	Washing machine door cannot be opened.	 Safety function active. Wait approx. 2 minutes. (without final spin) selected? → page 3, 4. Can be opened by emergency release only? → page 9.
	Programme does not start.	 inicio/pausa (start/pause) or ⁽) (finished in) selected? Washing machine door closed? Childproof lock active? Deactivate → page 5.
	Detergent solution is not drained.	 (without final spin) selected? → page 3, 4. Clean the detergent solution pump → page 10. Clean the waste pipe and/or drainage hose.
	Water not visible in the drum.	- Not a fault - water below the visible area.
r	Jnsatisfactory spin esult. _aundry wet/too damp.	 Not a fault - the unbalanced-load detection system has cancelled the spin cycle because of uneven distribution of the laundry. Distribute small and large items of laundry evenly inside the drum. Programme menos (anti-crease) selected? → page 7. Speed selected too low? → page 5.
	The programme duration changes during the wash cycle.	 Not a fault – the programme sequence is optimised for the particular wash process. This may result in changes to the programme duration in the display field.
	Spin cycle performed several times.	 Not a fault - unbalanced load detection system adjusts the imbalance.
	Residual water in the compartment for care products.	 Not a fault - the action of the care product is not affected. Clean the insert if necessary → page 9.
	Odour formation in the washing machine.	 Run programme algodón/algodão (cottons) 90 °C without laundry Use standard detergent.
li r	activo (wash) display amp flashes. Foam may be coming out of the detergent drawer.	 Too much detergent used? Mix 1 tablespoon of fabric softener with ½ litre of water and pour into dispenser II (not for outdoor and dowr filled textiles!). Reduce the detergent dosage for the next wash cycle.
V."	ntense noise formation, vibrations and 'wandering" during the spin cycle.	 Are the appliance feet fixed? Secure the appliance feet → Installation instructions. Transportation safety devices removed? Remove the transportation safety devices → Installation instructions.
	Noises during spin and drain cycles.	- Clean detergent-solution pump \rightarrow page 10.
	Display panel/indicator amps do not function during operation.	 Power cut? Fuses triggered? Reset/change the fuses. If the fault occurs repeatedly, call the after-sales service.
	Programme sequence onger than usual.	 Not a fault - unbalanced load detection system adjusts imbalance by repeatedly distributing the laundry. Not a fault - foam detection system active - adds an additional rinse cycle.
	Detergent residues on he laundry.	 Occasionally, phosphate-free detergents contain water-insoluble residues. Select ☞ (rinse)/ ⓒ centrifug. (spin) or brush the laundry after washing.
-	 Turn the programme s 	ault yourself (switching on/off) or a repair is required: selector to \bigcirc (off) and remove the mains plug from the socket. ply and call the after-sales service \rightarrow <i>Installation instructions.</i>
