sequence) Iron Dry: Cupboard Dry;

Programme pause → if required:

nd Programme end.

You can lock the dryer to prevent the functions you have set from

being changed inadvertently. To activate/deactivate (Childproof lock) start the programme and then press and hold the \$\Delta\$ Start/Pause button for 5 seconds until a long acoustic signal is heard. The option activated/deactivated → **(Childproof lock)** indicator light on/off.

When a programme is selected, the anticipated drying time (remaining (Remaining time) time) for the recommended load is displayed. While drying, the moisture sensors detect the actual load and correct the programme length. This is shown by jumps in the remaining time in the display panel.

Settings (indicators lights and buttons)

Selected option activated/deactivated \rightarrow indicator light on/off. See the separate **Energy-saving mode** instructions.

Orying time, available only for timed programmes, can be selected from min. 0:20 h to max. 3:00 h, in 10-minute steps.

The dryness levels can be increased in three levels.

Fine Adjust

The laundry is made drier. Default = 0. Selectable values: 0, 1, 2, 3. After setting the level of the fine adjustment for a programme, it is also retained for other programmes, until + * (Fine adjust) is changed again.

The time when the programme has to end can be set by selecting the () (Finished in) time. The () (Finished in) time can be selected in one-hour steps, up to a maximum of 24 hours. Select the () (Finished in) button repeatedly until the required number of hours is displayed. Then press the **Start/Pause** button to activate the **()** (Finished in) option. The

programme ends after the selected number of hours. Several minutes after activating () (Finished in) option the display

switches off to save energy. To switch it on select any button, close/open the door or turn the programme selector.

Reduced temperature for delicate fabrics, e.g. polyacrylic, polyamide or elastane, with a longer drying time. After the programme finishes, the drum moves at regular intervals

to prevent creases. Laundry remains loose and fluffy.

The standard setting for each programme is 60 min. Automatic anti-crease function can be extended by up to 60 min.

For switching the buzzer on and off. (1) Buzzer indicates program end if it is activated. Other sounds are not influenced by this option.

Notes on laundry ...

Labelling of fabrics

Follow the manufacturer's care instructions.

Suitable for tumble drying.

Dry at normal temperature. \bigcirc Dry at low temperature \rightarrow in addition, select * Gentle Dry.

☑ Do not tumble dry.

Do not tumble dry the following fabrics: Non-breathable fabrics (e.g. rubber-coated).

 Delicate materials (silk, curtains made from synthetic material) → these may crease. Oil-stained laundry.

Before drving for the first time

- Do not put any laundry in the machine. Turn the programme selector to ⊕ Warm/⊕ Cold (→ page 7) and select ♦ Start/Pause. At the end of the programme, turn the programme selector to Off.

- To ensure a consistent drying result, sort the laundry by fabric type and drying programme. - Always dry very small fabrics (e.g. baby socks) together with large items of laundry
- Close zips, hooks and eyelets, and button up covers. Tie cloth belts, apron strings, etc. together or use a laundry bag - Do not over-dry easy-care laundry → risk of creasing. Allow laundry to finish drying in
- Do not dry woollens in the dryer. They may, however, be refreshed in the dryer
- → page 7, **@ Woollen finish** programme (depending on model). - Do not iron laundry immediately after drying; fold items up and leave for a while
- → residual moisture will then be distributed evenly. - Knitted fabrics (e.g. T-shirts, jerseys) often shrink slightly the first time they are tumble-dried.
- \rightarrow Do not use the \square Cupboard Dry Extra programme. - Starched laundry is not always suitable for dryers → starch leaves behind a coating that
- reduces the drying effect. - When washing laundry that is to be tumble dried afterwards, use the correct amount of
- fabric softener as specified in the manufacturer's instructions.
- For pre-dried, multi-layered fabrics or small, individual items of laundry, use the timed programme. Also suitable for subsequent drying.

Environmental protection / Energy-saving tips

- Before drying, spin the laundry in the washing machine → higher spin speeds minimise the drying time and reduce energy consumption.
- Use the maximum recommended capacity, but do not exceed it → Programme overview, page 7.
- Make sure the room is well ventilated during drying.
- Clean the fluff filter after every drying cycle \rightarrow Clean the fluff filter, page 4/11.

Care and cleaning

Only when the appliance is

Dryer housing and control panel

- Wipe clean with a soft, damp cloth.

Do not clean with a water jet.

- Remove detergent and cleaning agent residue immediately **Exhaust air duct** \rightarrow Exhaust air duct installation instruction.

Check the exhaust air duct as it may be clogged.

Clean the exhaust air duct at regular intervals, e.g. every six months. Do not bend the exhaust air duct.

- **1.** Switch off the dryer and allow it to cool down.
- 2. Disconnect the mains plug.
- 3. Remove the exhaust air duct.
- 4. Clean the exhaust air duct.
- 5. Refit the exhaust air duct.

Moisture sensors

The drver is equipped with stainless steel moisture sensors. Moisture sensors measure the moisture level of the laundry. After sustained, repeated operation, a fine layer of limescale may form on the moisture sensors.

- **1.** Open the door.
- 2. Clean the moisture sensors with a damp sponge which has a rough

Do not use steel wool or abrasive agents!

- Scope of delivery; dryer, operating and installation instructions, basket for woollens (depending on the model).
- Check the dryer for transport damage.
- The drver is very heavy. Do not attempt to lift it on your own.
- Be careful to avoid sharp edges
- Do not lift the dryer by protruding parts (e.g. the door) risk of breakage.
- Do not set up in a room that is susceptible to frost.
- Freezing water may cause damage. If in doubt, have the appliance connected by a specialist.

Setting up the dryer

ne mains plug must always be accessible.

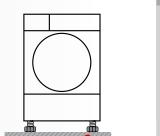

- Install the exhaust air duct \rightarrow Exhaust air duct
- installation instruction. Keep the area around the drver clean.
- Level the drver using the threaded feet and a spirit level.

Never remove the threaded feet!

or sliding door which could prevent or ✓ obstruct the dryer door from opening. This will prevent children from locking themselves in and risking their lives.

Clean and level.

Take all accessory parts out

of the drum.

For mains connection, see Safety instructions → page 13. Connect to an AC earthed socket. If in doubt have the socket checked by a specialist. The mains voltage and the voltage shown on the rating plate ($\rightarrow page 10$) must be the

Cupboa The connected load and necessary fuse protection are specified on the rating plate.

must – be used for purposes other than those described above. be modified in terms of its technology or attributes.

- The dryer must not be used by children or persons who have not been instructed in its use.
- Do not leave children unsupervised near the dryer. Keep pets away from the dryer.
 - Remove all objects from the pockets of garments Pay particular attention to cigarette lighters → Risk of explosion
- Do not lean or sit on the door → Risk of tipping.
- Open the door with care. Hot steam may escape. Fasten down loose leads → Risk of tripping
- Do not operate the dryer where there is a risk of frost.
- The safety information in the separate installation instructions for the exhaust air duct must be observed without fail.

- Connect the drver to an AC earthed socket according to specifications, as otherwise it cannot be guaranteed that the appliance is completely safe. The cable cross-section must be sufficient.
- Only use earth-leakage circuit breakers with the following symbol:
- The mains plug and socket must be compatible. Do not use multiple plugs/couplings and/or extension cables.
- Do not touch or hold the mains plug with wet hands → Risk of electric
- Never pull the mains plug out of the socket by its cable.
- Do not damage the mains lead → Risk of electric shock.
- Only load the drum with items of laundry.
- Check what has been loaded before switching the dryer on. Do not use the dryer if the laundry has been in contact with solvents, oil. wax, grease or paint (e.g. hair spray, nail polish remover, stain remover,
- The tumble dryer is not to be used if industrial chemicals have been used
- Dust risk (e.g. coal dust or flour): do not use the dryer \rightarrow Risk of explosion.
- Do not turn off the dryer until the drying process ends, unless the laundry will be removed quickly and spread out, so that the heat can dissipate.
- Do not put laundry containing foamed material/rubber in the dryer → elastic material may be destroyed and the dryer may be damaged due to possible deformation of the foamed material.
- Final part of a tumble dryer cycle occurs without heat (cool down cycle), to ensure that the items are left at a temperature that ensures that the items will not be damaged.
- Switch off the dryer once the programme has ended.
- Do not use the dryer if it is defective or if you suspect that it is. Repairs must only be carried out by the after-sales service.
- Do not use the dryer with a faulty mains cable. In order to avoid danger. have the mains lead replaced only by our after-sales service.

- For safety reasons, you must only use genuine spare parts and accessories.
- Dryer: Disconnect the mains plug, then cut the mains cable off the appliance. Dispose of the appliance at a municipal waste disposal site.
- Packaging: Do not allow children access to items of packaging → Risk of suffocation.
- All materials are environmentally friendly and reusable. Dispose of them in an environmentally responsible manner.

Notes on laundry ...

Labelling of fabrics

Follow the manufacturer's care instructions.

- ☐ Suitable for tumble drying.
- Ory at normal temperature.
- \bigcirc Dry at low temperature \rightarrow in addition, select ** Gentle Dry.
- ☐ Do not tumble dry.

Do not tumble dry the following fabrics:

- Non-breathable fabrics (e.g. rubber-coated).
- Delicate materials (silk, curtains made from synthetic material) → these may crease.
- Oil-stained laundry.

Before drying for the first time

Do not put any laundry in the machine. Turn the programme selector to 🖰 Warm/🖰 Cold (→ page 7) and select ♦ Start/Pause. At the end of the programme, turn the programme selector to Off.

Drying tips

- To ensure a consistent drying result, sort the laundry by fabric type and drying programme.
- Always dry very small fabrics (e.g. baby socks) together with large items of laundry (e.g. towels).
- Close zips, hooks and evelets, and button up covers. Tie cloth belts, apron strings, etc. together or use a laundry bag.
- Do not over-dry easy-care laundry → risk of creasing. Allow laundry to finish drying in
- Do not dry woollens in the dryer. They may, however, be refreshed in the dryer → page 7, **@ Woollen finish** programme (depending on model).
- Do not iron laundry immediately after drying; fold items up and leave for a while → residual moisture will then be distributed evenly.
- Knitted fabrics (e.g. T-shirts, jerseys) often shrink slightly the first time they are tumble-dried. \rightarrow Do not use the \blacksquare Cupboard Dry Extra programme. Starched laundry is not always suitable for dryers → starch leaves behind a coating that
- reduces the drying effect.
- When washing laundry that is to be tumble dried afterwards, use the correct amount of fabric softener as specified in the manufacturer's instructions.
- For pre-dried, multi-layered fabrics or small, individual items of laundry, use the timed programme. Also suitable for subsequent drying.

Environmental protection / Energy-saving tips

- Before drying, spin the laundry in the washing machine → higher spin speeds minimise the drying time and reduce energy consumption.
- Use the maximum recommended capacity, but do not exceed it → Programme overview, page 7.
- Make sure the room is well ventilated during drying.
- Clean the fluff filter after every drying cycle → Clean the fluff filter, page 4/11.

Programme overview see also page 6.

Care and cleaning

Only when the appliance is switched off.

Dryer housing and control panel

- Wipe clean with a soft, damp cloth.
- Do not clean with a water jet.
- Remove detergent and cleaning agent residue immediately.

Exhaust air duct → Exhaust air duct installation instruction.

Check the exhaust air duct as it may be clogged.

Clean the exhaust air duct at regular intervals, e.g. every six months. Do not bend the exhaust air duct.

- 1. Switch off the dryer and allow it to cool down.
- 2. Disconnect the mains plug.
- 3. Remove the exhaust air duct.
- 4. Clean the exhaust air duct.
- 5. Refit the exhaust air duct.

Do not use steel wool or abrasive agents!

Installation

- Scope of delivery: dryer, operating and installation instructions, basket for woollens (depending on the model).
- Check the dryer for transport damage.
- The dryer is very heavy. Do not attempt to lift it on your own.
- Be careful to avoid sharp edges.
- Do not lift the dryer by protruding parts (e.g. the door) risk of breakage.
- Do not set up in a room that is susceptible to frost.
 Freezing water may cause damage.
- If in doubt, have the appliance connected by a specialist.

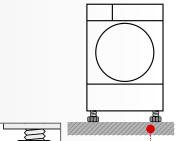

Setting up the dryer

- The mains plug must always be accessible.
- Ensure that the appliance is placed on a clean, level and firm surface.
- Install the exhaust air duct → Exhaust air duct installation instruction.
- Keep the area around the dryer clean.
- Level the dryer using the threaded feet and a spirit level.

Never remove the threaded feet!

Do not install the dryer behind a door or sliding door which could prevent or obstruct the dryer door from opening. This will prevent children from locking themselves in and risking their lives.

Clean and level.

of the drum.

Take all accessory parts out

The drum must be empty.

- Connect to an AC earthed socket. If in doubt have the socket checked by a specialist.
- The mains voltage and the voltage shown on the rating plate (→ page 10) must be the same.
- The connected load and necessary fuse protection are specified on the rating plate.

Optional accessories (order from the after-sales service using the order number, according to model)

Exhaust air duct set

The exhaust air is extracted via a hose.

Washer-dryer stack connection set

The dryer can be placed on top of a suitable washing machine with the same width and depth to save space. The dryer must be fastened on the washing machine with this connection set. If the worktop of the washing machine is less than 544 mm deep, please consult the after-sales service or your specialist retailer.

20500 For easier loading and unloading. The basket contained in the drawer can be used to carry the laundry.

Technical data

Dimensions (DxWxH)	60 x 60 x 85 cm (height adjustable)
Weight	approx. 36 kg
Max. capacity	7 kg
Connection voltage	220-240 V
Connected load	2200 W
Fuse protection	10 A
Ambient temperature	5 - 35°C
Product number	

Inside of door **Production number**

The rating plate can be found on the back of the dryer.

Consumption rates

Fabrics/programmes	Residual moisture in the fabrics after spinning		Drying time**	Energy consumption**
ʿʿ⁄⁄⁄⁄⁄⁄⁄⁄ Cottons 7 kg				
□ Cupboard Dry*	1400 rpm	(50%)	107 min	3.12 kWh
	1000 rpm	(60%)	128 min	3.90 kWh
	800 rpm	(70%)	149 min	4.54 kWh
	1400 rpm	(50%)	83 min	1.93 kWh
	1000 rpm	(60%)	99 min	2.88 kWh
	800 rpm	(70%)	116 min	3.58 kWh
⇔ Synthetic 3.5 kg				
□ Cupboard Dry*	800 rpm	(40%)	47 min	1.32 kWh
	600 rpm	(50%)	59 min	1.72 kWh

Programme setting for testing in accordance with applicable standard DIN EN61121.

After-sales service

If you cannot rectify the fault yourself (e.g. switching off/on) \rightarrow What to do if..., page 11/12, please contact our after-sales service. We will always find an appropriate solution and avoid unnecessary visits by engineers.

The contact details of your local **after-sales service** can be found in the enclosed after-sales service directory.

- **GB** 0344 892 8999 (Calls charged at local or mobile rate.)

- **IE** 01450 2655 (0.03 € per minute at peak. Off peak 0.0088 € per minute.)

Please provide the after-sales service the product number (E no.) and the production number (FD) of the appliance.

Production number Product number

You can find this information: inside the door* / in the opened service flap* and on the rear of the appliance. *depending on the model

Trust the expertise of the manufacturer. Contact us for assistance. In this way, you can rest assured that the repair will be carried out by trained service technicians using original spare parts.

What to do if ...

Turn the programme selector to Off and remove the mains plug from the socket.

	<u></u>	
•	The Start/Pause indicator light does not light up.	Mains plug plugged in? Programme selected? Check the socket fuse.
•	The display panel light and indicator lights (depending on model) go out and the \$\ightarrow\$ Start/Pause indicator light flashes.	Energy-saving mode is activated → see the separate Energy-saving mode instructions.
•	The display panel switches off.	The appliance goes into the sleep mode after activating \bigcirc Finished in option \longrightarrow page 5.
•	(Fluff filter/exhaust air duct) indicator light flashes.	Clean the fluff filter \rightarrow page 4. Press the \diamondsuit Start/Pause button to reset the displayed indication and then press the \diamondsuit Start/Pause button again to restart the appliance if necessary. Exhaust air duct blocked or bent? Clean the exhaust air duct \rightarrow page 8. If necessary, clean the insect screen on the exhaust air pipe.
•	Dryer does not start.	♦ Start/Pause button selected? Door closed? Programme set?
•	Programme terminates shortly after starting.	Ambient temperature greater than 5°C? Is the appliance loaded with the laundry? Load too small for selected programme?/Use timed programme → page 6/7. Loaded laundry dry?
	Water is leaking out.	Make sure the dryer is level.
	The door opens by itself.	Push the door closed until you hear it engage.

The values may differ from those specified, depending on the type of fabric, composition of laundry to be dried, residual moisture in the fabric, the degree of dryness that has been set and the amount of laundry being loaded.

What to do if ...

	Drying result is not satisfactory	Warm laundry feels damper than it really is.
	(laundry feels too damp).	The selected programme does not suit the load. Use another drying programme or, in addition, select the timed programme \rightarrow page 7.
		Dryer installed too closely to other objects? Provide adequate air circulation.
		Use + $\%$ Fine Adjust for the dryness levels \longrightarrow page 5.
		Fine layer of limescale on the humidity sensors \rightarrow Clean the moisture sensors \rightarrow page 8.
		Programme termination, e.g. mains power supply failure, door open or maximum drying time reached?
	Drying time too long.	Clean the fluff filter under running water \rightarrow page 4.
		Insufficient supply of air \rightarrow Ensure that air can circulate.
		Ambient temperature greater than 35°C \rightarrow Ventilate the room.
•	The humidity in the room increases.	Make sure the room is sufficiently ventilated. Exhaust air duct installed/the exhaust air routes directly into the open air? → Installation instructions for exhaust air duct, page 1.
•	One or more indicator lights are flashing.	Clean the fluff filter \rightarrow page 4/11. Check the installation conditions \rightarrow page 9. Exhaust air duct blocked or bent? Clean the exhaust air duct \rightarrow page 8. Switch off, allow to cool, switch back on, and restart the programme.
•	Power failure.	Remove the laundry from the dryer immediately and spread out. This allows the heat to dissipate. Be careful as the door, the drum and the laundry may be hot.
•	Condensation in the exhaust air duct.	Exhaust air duct too long? Check the maximum exhaust air duct length. Further information → Installation instructions for exhaust air duct.

Safety instructions

Emergency

- Pull the mains plug out of the socket immediately or disconnect the fuse.

ONLY use the - in rooms inside the house. - for drying fabrics.

dryer... NEVEŔ...

The dryer must – be used for purposes other than those described above. - be modified in terms of its technology or attributes.

 The dryer must not be used by children or persons who have not been **Dangers**

instructed in its use. Do not leave children unsupervised near the dryer.

Keep pets away from the dryer.

- Remove all objects from the pockets of garments.

Pay particular attention to cigarette lighters → Risk of explosion

 Do not lean or sit on the door → Risk of tipping. Open the door with care. Hot steam may escape.

Installation

Fasten down loose leads → Risk of tripping

Do not operate the dryer where there is a risk of frost.

 The safety information in the separate installation instructions for the exhaust air duct must be observed without fail.

Mains connection Connect the dryer to an AC earthed socket according to specifications, as otherwise it cannot be guaranteed that the appliance is completely safe.

The cable cross-section must be sufficient.

- Only use earth-leakage circuit breakers with the following symbol:

The mains plug and socket must be compatible.

Do not use multiple plugs/couplings and/or extension cables.

- Do not touch or hold the mains plug with wet hands → Risk of electric shock.

Never pull the mains plug out of the socket by its cable.

Do not damage the mains lead → Risk of electric shock.

Operation

Only load the drum with items of laundry.

Check what has been loaded before switching the dryer on.

- Do not use the dryer if the laundry has been in contact with solvents, oil, wax, grease or paint (e.g. hair spray, nail polish remover, stain remover, cleaning solvent, etc.) → Risk of fire/explosion.

 The tumble dryer is not to be used if industrial chemicals have been used for cleaning.

Dust risk (e.g. coal dust or flour): do not use the dryer → Risk of explosion.

- Do not turn off the dryer until the drying process ends, unless the laundry will be removed quickly and spread out, so that the heat can dissipate.

 Do not put laundry containing foamed material/rubber in the dryer → elastic material may be destroyed and the dryer may be damaged due to possible deformation of the foamed material.

- Final part of a tumble dryer cycle occurs without heat (cool down cycle), to ensure that the items are left at a temperature that ensures that the items will not be damaged.

Switch off the dryer once the programme has ended.

Defect

 Do not use the dryer if it is defective or if you suspect that it is. Repairs must only be carried out by the after-sales service.

 Do not use the dryer with a faulty mains cable. In order to avoid danger, have the mains lead replaced only by our after-sales service.

Spare parts Disposal

For safety reasons, you must only use genuine spare parts and accessories.

 Dryer: Disconnect the mains plug, then cut the mains cable off the appliance. Dispose of the appliance at a municipal waste disposal site.

 Packaging: Do not allow children access to items of packaging → Risk of suffocation.

- All materials are environmentally friendly and reusable. Dispose of them in an environmentally responsible manner.

en Instructions for installation and use

Observe the safety instructions on page 13.

Read these instructions, the **Installation Instructions** and the separate **Energy-saving mode** instructions before operating the dryer.
