Preparatory work

1. Pull out the condensate container and keep it horizontal.
2. Open the door, the drying process is interrupted.
3. Check the programme overview.

Selecting and adjusting the programme

1. Select the desired programme and set to individual requirements.
2. Press the Start/Stop button.
3. The programme selected must then be resumed and completed.
4. Clean the fluff filter inserted!
5. Choose the correct drying time (depending on model)
6. If the fluff filter is very dirty or blocked, rinse with warm water and dry.
7. The automatic anti-crease function causes the drum to move at specific intervals, the washing remains.
8. When cleaning, only remove the protective filter. Clean the air cooler thoroughly, or if
9. Inform your after-sales service.
10. Keep pets away from the dryer.

Inform your after-sales service.

- Consult the retailer about appliance take back schemes

- The programme selected must then be resumed and completed.
Congratulations - You have chosen a modern, high-quality Bosch domestic appliance.

The condensation dryer is distinguished by its economical energy consumption. Every dryer which leaves our factory is carefully checked to ensure that it functions correctly and is in perfect condition. Should you have any questions, our after-sales service will be pleased to help.

Environmentally responsible disposal

Dispose of packaging in an environmentally-responsible manner. This appliance is certified in accordance with the guidelines on E-waste (Management) Rules 2016 which govern waste electrical and electronic equipment. The guidelines provide a framework for the return and recycling of used appliances.

Do's:

- Hand over the old/discard electronic equipment only to authorized collection centers for disposal
  www.bosch-home.com/in/about-bosch/responsibility.html

See also:

Contact No: 180042535287 (toll-free)
E-mail: recycle@ewasteindia.com

- Consult the authorized service center as to whether the Electronic Equipment can be repaired or not, before discarding
- Consult the retailer about appliance take back schemes

Don'ts:

- Don't dump the discarded Electronic Equipment in the open or in any land fill site, as this will result in contamination of the soil and the ground water
- Don't dispose of the discarded Electronic Equipment in household bins or Municipal bins
- The product is not meant for re-sale to any unauthorized agencies/scrap dealers

Don't keep any replaced spare part(s) from the product in an exposed area – Don't dispose of the discarded Electronic Equipment in Municipal bins – Don't dump the discarded Electronic Equipment in the open or in any land fill site,

- Consult the retailer about appliance take back schemes
- Consult the authorized service center as to whether the Electronic Equipment can be repaired or not, before discarding
- Consult the retailer about appliance take back schemes

Observe the safety instructions on page 11.

Read these instructions and the separate Energy-saving mode instructions before operating the dryer.

Intended use

- for domestic use only,
- only to be used for drying fabrics that have been washed with water.

Keep children younger than 3 years old away from the dryer.

Do not let children make the cleaning and maintenance work on the dryer without supervision.

Never start the dryer if it is damaged! Inform your after-sales service.

Make sure your hands are dry. Hold the plug only.

Selecting and adjusting the drying result

Select the drying programmes.

... and adapt to individual requirements.

- You have chosen a modern, high-quality Bosch domestic appliance.
- Only operate the dryer with the fluff filter inserted!
- Keep pets away from the dryer.
- Do not let children make the cleaning and maintenance work on the dryer without supervision.
- Do not let children make the cleaning and maintenance work on the dryer without supervision.
- Keep pets away from the dryer.

Inspecting the service indicators

Empty the condensate container.

Clean the filter and/or air cooler under running water. → Page 4/6.

Fine adjustment of the drying result

The drying result (e.g. Cupboard Dry) can be adjusted over three levels (1 - max. 3) for the Cottons, Synthetics and Super 40 min programmes → presetting = 0. After one of these programmes has been finely adjusted, the setting is retained for the others. Further information → Page 5/6.
Emptying condensation

After each drying cycle, empty the condensate container; otherwise the next drying programme may be cancelled as a result of the condensate container being full.
1. Pull out condensate container keeping it horizontal.
2. Pour out condensation.
3. Always push container in fully until it clicks into place.

If Container flashes in the display panel → What to do if..., Page 10.

Cleaning the fluff filter

Clean the fluff filter after each drying operation.
1. Open the door, remove fluff from door/door area.
2. Pull out and fold open the fluff filter.
3. Remove the fluff (by wiping the filter with your hand).
   If the fluff filter is very dirty or blocked, rinse with warm water and dry thoroughly.
4. Close and reinsert the fluff filter.

Switching off the dryer

Turn the programme selector to Off.
Do not leave laundry in the dryer.

Removing the laundry

The automatic anti-crease function causes the drum to move at specific intervals, the washing remains loose and fluffy for an hour (two hours if the additional Reduced Ironing function is also selected depending on model).

Programme end once lights up in the display.

Interrupt programme removing or adding laundry.

The drying cycle can be interrupted for a brief period so that laundry may be added or removed. The programme selected must then be resumed and completed.

Never switch the dryer off before the drying process has ended. Drum and door may be hot!

1. Open door, the drying process is interrupted.
2. Load or remove laundry and close door.
3. If required, select a new programme and additional functions.
4. Press the Start/Stop button.
Information on laundry ...

Labelling of fabrics
Follow the manufacturer’s care information.
- Drying at normal temperature.
- Drying at low temperature → also select Low Heat.
- Do not machine dry.

Observe safety instructions without fail → Page 11!
Do not tumble-dry the following fabrics for example:
- Impermeable fabrics (e.g. rubber-coated fabrics).
- Delicate materials (silk or curtains made from synthetic material) → they may crease.
- Laundry contaminated with oil.

Drying tips
- To ensure a consistent result, sort the laundry by fabric type and drying programme.
- Always dry very small items (e.g. baby socks) together with large items of laundry (e.g. hand towel).
- Close zips, hooks and eyelets, and button up covers. Tie fabric belts, apron strings, etc. together.
- Do not over-dry easy-care laundry → risk of creasing! Allow laundry to finish drying in the air.
- Do not dry woolens in the dryer, only use to freshen them up → Page 7, Woolens finish Programme (depending on model).
- Do not iron laundry immediately after drying, fold items up and leave for a while → the remaining moisture will then be distributed evenly.
- The drying result depends on the type of water used during washing. → Fine adjustment of the drying result → Page 5/6.
- Machine-knitted fabrics (e.g. T-shirts or jerseys) often shrink the first time they are dried → do not use the Cupboard extra dry programme.
- Starched laundry is not always suitable for dryers → starch leaves behind a coating that adversely affects the drying operation.
- Use the correct dosage of fabric softener as per the manufacturer’s instructions when washing the laundry to be dried.
- Use the timer programme for small loads → this improves the drying result.

Environmental protection / Energy-saving tips
- Before drying, spin the laundry thoroughly in the washing machine → the higher the spin speed the shorter the drying time will be (contributes less energy), also spin easy-care laundry.
- Put in, but do not exceed, the maximum recommended quantity of laundry → programme overview → Page 7.
- Make sure the room is well ventilated during drying.
- Do not obstruct or seal up the air inlet.
- Keep the air cooler clean → Page 6 “Care and cleaning”.

Drying III, Iron dry III, Cupboard dry III, Anti-Crease/End  ⏰ / ⏰ are displayed in sequence. Short signal when changing from level 3 to 0, otherwise long signal.

Care and cleaning

Dryer housing, control panel, air cooler, moisture sensors
- Wipe with a soft, damp cloth.
- Do not use harsh cleaning agents and solvents.
- Remove detergent and cleaning agent residue immediately.

Clean the protective filter 5 - 6 times a year or if Filter flashes after cleaning the fluff filter.

Air cooler / Protective filter
When cleaning, only remove the protective filter. Clean the air cooler behind the protective filter once a year.

- Allow the dryer to cool.
- Residual water may leak out, so place an absorbent towel underneath the maintenance door.

Do not damage the protective filter or air cooler. Clean with warm water only. Do not use any hard or sharp-edged objects.

1. Unlock the maintenance door.
2. Open the maintenance door fully.
3. Turn both locking levers towards each another.
4. Pull out the protective filter/air cooler.
5. Clean the protective filter/air cooler thoroughly, Allow to drip dry.
6. Clean the seals.
7. Re-insert the protective filter/air cooler, with the handle facing down.
8. Turn back both locking levers.
9. Close the maintenance door until the lock clicks into place.

Moisture sensors
The dryer is fitted with stainless steel moisture sensors. The sensors measure the level of moisture in the laundry. After a long period of operation, a fine layer of limescale may form on the sensors.

1. Open the door and clean the moisture sensors with a damp sponge which has a rough surface.

Do not use steel wool or abrasive materials.
After drying...

- **Cottons**
  - max. 7 kg
  - Hard-wearing fabrics, boil-resistant fabrics made of cotton or linen.

- **Synthetics**
  - max. 3.5 kg
  - Non-iron laundry made of synthetic fibres and blended fabric, easy-care cotton.

*Iron dry
- Fabrics suitable for ironing (iron fabrics in order to avoid creasing).

_Fabrics made of thick, multilayered items of clothing._

_Do not remove the threaded feet under any circumstances._

Frost protection / Transport

1. Empty the condensate container — page 4.
2. Select any programme using the programme selector.
3. Press the **Start/Stop** button — condensation is pumped into the container.
4. Wait 5 min., and then empty the condensate container again.
5. Turn the programme selector to **Off**.

Installation

- **Delivery specification**: dryer, instructions for installation and use, woollens basket (depending on model).
- Check dryer for transport damage.
- The dryer is very heavy. Do not attempt to lift it on your own.
- Be careful to avoid sharp edges.
- Do not lift the dryer by any of the protruding parts (e.g. the door) as they may break off.
- Do not set up in a room that is susceptible to frost. Freezing water may cause damage.
- If in doubt, have the appliance connected by an expert.

**Setting up the dryer**
- The appliance plug must always be accessible.
- Ensure that the appliance is installed on a clean, level, and solid surface.
- Keep the cooling grille at the front of the dryer unobstructed.
- Keep the area around the dryer clean.
- Make the dryer level using the threaded feet and a spirit level.
- Do not remove the threaded feet under any circumstances.

_Do not set up the dryer behind a door or sliding door as this may obstruct or prevent the dryer door from opening. This will prevent a potentially fatal danger to children from locking themselves in._

**Mains connection** — see safety instructions — Page 11.
- Connect to an AC earthed socket. If in doubt have the socket checked by an expert.
- The mains voltage and the voltage shown on the rating plate (— Page 9) must correspond.
- The connected load and necessary fuse protection are specified on the rating plate.

**Preparation**

1. Empty the condensate container — page 4.
2. Select any programme using the programme selector.
3. Press the **Start/Stop** button — condensation is pumped into the container.
4. Wait 5 min. and then empty the condensate container again.
5. Turn the programme selector to **Off**.

**Take all accessory parts out of the drum. The drum must be empty.**

**Clean and level**

_make sure that the air inlet remains unobstructed_

**Do not operate the dryer if there is a danger of frost.**

**Take all accessory parts out of the drum. The drum must be empty.**

**Clean and level**

_make sure that the air inlet remains unobstructed_

**Do not operate the dryer if there is a danger of frost.**
If you cannot rectify a fault yourself (e.g. switching off/on), please contact our after-sales service. We will always find an appropriate solution and will avoid unnecessary visits by engineers. Trust the expertise of the manufacturer and rest assured that the repair will be carried out by trained service technicians using original spare parts. The contact details of your local after-sales service can be found in the enclosed after-sales service directory.

When contacting the after-sales service, please quote the appliance’s product number (E no.) and production number (FD) (see the inside of the door).

Set the programme selector to Off and remove the appliance plug from the socket.

- The Start/Stop indicator lamp does not light up.
  - Mains plug plugged in? Programme selected?
  - Check the socket fuse.

- The display panel light and indicator lights (depending on model) go out and the Start/Stop indicator light flashes.
  - Energy-saving mode is activated → see the separate Energy-saving mode instructions.

- The filter and Start/Stop indicator lights are flashing.
  - Empty the condensate container.
  - If featured, check hose for condensation outlet.

- Dryer does not start.
  - Start/Stop button selected?
  - Do you have the right programme?
  - Check if the programme start/stop button is pushed too far or turned too far.

- Water is running out.
  - Align dryer horizontally.
  - Dryer load exceeded?
  - The optimum ambient temperature for drying is between 5 °C and 35 °C.

- The door opens by itself.
  - Push the door closed until you hear it engage.

- Creasing.
  - Laundry load exceeded?
  - Remove articles of clothing immediately after the end of the programme, hang up and pull into shape.
  - Ambiente temperature greater than 5 °C? The optimum ambient temperature for drying is between 5 °C and 35 °C.

- The humidity in the room increases significantly.
  - Make sure the room is sufficiently ventilated.

- Power failure.
  - Remove laundry from the dryer immediately and spread out. This allows the heat to dissipate. Be careful as the door, the drum and the laundry may be hot.

- One or more indicator lights for programme status are flashing.
  - Clean filter and air cooler → Page 4/6.
  - Check installation conditions → Page 8.
  - Switch off, leave to cool down, switch on again, restart programme.

* Programme setting for testing in accordance with the applicable IEC 61121 standard.

**The values may differ from those specified, depending on the type of fabric, composition of laundry to be dried, residual moisture in the laundry, the degree of dryness that has been set, the amount of laundry being loaded, the environmental conditions, and any additional functions that have been activated.

### Optional accessories (from after-sales service using order number, depending on model)

- WMZ 20500: Platform
  - For easier loading and unloading. The basket contained in the drawer can be used to carry the laudry.

- WIZ 11310: Washer-dryer stack connection set
  - The dryer can be placed on top of a suitable washing machine with the same width and depth to save space. The dryer must be fastened to the washing machine using this connection set. With pull-out worktop: WIZ 11300

- WIZ 11110: Connection fittings for condensation outlet
  - The condensation is conveyed directly via a hose.

- WIZ 10290: Installation underneath the worktop
  - Instead of the appliance covering plate, you must have a metal cover fitted by a specialist.

Safety instructions

Emergency
ONLY use the dryer...
- Pull the appliance plug out of the socket immediately or disconnect the fuse.
- in rooms inside the house.
- to dry fabrics.

The dryer must...
NEVER...
- be used for other purposes than those described above.
- be modified in terms of its technology or attributes.

Dangers
- The dryer must not be used by children or persons who have not been instructed in its use.
- Do not leave children unsupervised near the dryer.
- Keep pets away from the dryer.
- Remove all objects from pockets. Make especially sure that cigarette lighters are removed as they constitute an explosion hazard.
- Do not lean or sit on the door risk of tipping.

Installation
- Secure loose cables tripping hazard.
- Do not operate the dryer if there is a risk of frost.

Mains connection
- Connect the dryer according to specifications to an AC earthed socket, as otherwise it cannot be guaranteed that the appliance is completely safe.
- The cable cross-section must be sufficient.
- Only use earth-leakage circuit breakers with the following symbol: ☐
- The appliance plug and socket must be compatible.
- Do not use multiple plugs/couplings and/or extension cables.
- Do not hold the appliance plug with wet hands risk of electric shock.
- Never pull the appliance plug out of the socket by its cable.
- Do not damage the mains lead risk of electric shock.

Operation
- Only load the drum with laundry. Check the contents before you switch the dryer on.
- Do not use the dryer if the laundry has been in contact with solvents, oil, wax, grease or paint (e.g. hair setting spray, nail polish remover, stain remover, cleaning solvent, etc.) fire/explosion hazard.
- The tumble dryer is not to be used if industrial chemicals have been used for cleaning.
- Dust (e.g. coal dust, flour) poses a danger: do not use the dryer explosion hazard.
- Do not turn off the dryer until the drying process ends, unless the laundry will be removed quickly and spread out, so that the heat can dissipate.
- Do not put laundry containing foamed material/rubber in the dryer elastic material may be destroyed and the dryer may be damaged due to possible deformation of the foamed material.
- Light things, such as long hair, may be sucked into the air inlet of the dryer Risk of injury.
- Final part of a tumble dryer cycle occurs without heat (cool down cycle), to ensure that the items are left at a temperature that ensures that the items will not be damaged.
- Switch off the dryer once the programme has ended.
- The exterior of the appliance’s rear panel becomes very hot during operation. Never touch the hot surface of the appliance’s rear panel. Keep children away from the appliance Risk of burns.
- Condensation is not drinking water and may be contaminated with fluff.

Defect
- Do not use the dryer if it is defective or if you suspect it is.
- Repairs must only be carried out by the after-sales service.
- Do not use the dryer if the mains cable is defective. To avoid danger, only have the defective mains cable replaced by the after-sales service.
- Always pull the mains plug out of the socket before changing the bulb for the interior light risk of electric shock.

Spare parts
- Only use genuine spare parts and accessories for safety reasons.

Disposal
- Dryer: pull out the appliance plug, then cut off the mains cable from the appliance. Dispose of at municipal waste disposal facility.
- Packaging: do not leave children alone with packing parts risk of suffocation.
- All materials are environmentally sound and can be reused. Dispose of in an environmentally-responsible manner.
