Munich, January 2017: The fully automatic espresso machine 400 series and 200 series complements the design aesthetic of the kitchen with clean lines that frame a new lighting system. Opt for the fixed inlet and outlet water connection and brewing the perfect coffee becomes even more effortless. The fully automatic espresso machine 400 series and 200 series will be available to purchase from March 2017.

“Coffee is an integral part of our culinary culture, be it a functional morning wake up or an after dinner ceremony, we all have our own, specific coffees for different moods, times of the day or occasions. Our commitment to personalisation and providing professional results in the private setting has now been fully realised by our latest range of fully automatic espresso machines”, says Sven Schnee, Head of Global Brand Gaggenau.

The care that coffee-lovers take in choosing their coffee beans is reflected in the array of choices offered by the machine. Interchangeable bean containers allow for the seamless switch from a perfect espresso to a specific roast. The ability to programme up to eight personalised settings ensures each coffee is consistently extraordinary, and personal – with everything from strength levels, water temperature, coffee-to-milk ratio and cup size all being controlled by the user.

The machines' multifarious options for personalisation are matched only by its automation. The maintenance-free ceramic grinders provide fresh, consistent grounds. Fill levels for the milk, beans and water are monitored and when required, the automatic door opening of the 400 series and the cushioned closing system of the 200 series makes refilling as simple and easy as possible. For inlet and outlet water connected machines, the coffee is brewed with fresh water while all appliances offer an emptying programme, which prepares the machine for longer periods of non-use.

The automated rinsing, descaling and steam cleaning functions free the user from almost everything to do with the machine, other than appreciating its coffee.

Notes to editors

Gaggenau is a manufacturer of high-quality home appliances and acknowledged as an innovation leader in design and technology "Made in Germany". The company, with a history dating back to 1683, has revolutionised the domestic kitchen with its internationally acclaimed products. Gaggenau's success is founded on technological innovation and a clear design language combined with high functionality. Gaggenau has been a subsidiary of BSH Hausgeräte GmbH in Munich since 1995 and is currently represented in more than 50 countries with 21 flagship showrooms in major cities around the world.

The difference is Gaggenau.
