

The Siemens logo is displayed in a white rectangular box in the top left corner. The background of the entire advertisement is a futuristic kitchen scene with a glowing blue city skyline at night, featuring various skyscrapers and a bright blue laser beam cutting across the sky. The kitchen appliances are modern and sleek, with a mix of white and dark grey finishes. On the left, there is a tall white cabinet with integrated ovens and a dishwasher. In the center, a range hood is mounted on a dark grey wall. To the right, a large dark grey refrigerator stands next to a white countertop. In the foreground, two white front-loading washing machines are prominently displayed on a dark grey base.

# Connected appliances for a connected life.

When intelligence meets connectivity: the wifi-enabled Siemens appliances that blend into your seamless life. Start managing your appliances whenever you want, from wherever you are – with Home Connect. Discover all new possibilities at [connectivity-erleben.de](https://connectivity-erleben.de)

## **Remote Control.**

Let your appliances adjust to your timetable. With the Home Connect App you can easily select programs and start your wifi-enabled Siemens appliances whenever you want.

## **Remote Monitoring.**

Thanks to Home Connect, peace of mind is just a click away: monitor your appliance's settings and receive push notifications when your selected program is finished.

### Remote Diagnostics\*\*

Remote Diagnostics enables customer service to connect remotely to Home Connect Appliances and diagnose potential failure causes. This will enable the technician to better determine where the problems lie and bring along the necessary spare parts for the on-site visit.

\*Not applicable for Siemens hobs.

\*For selected wifi-enabled appliances only.

## Washing and drying to perfektion.

**Siemens presents the new avantgarde: washing and drying to perfektion.**

Break with conventions, discover new points of view and create something extraordinary that crosses boundaries. That's how innovations originate. That's avantgarde: The starting point for ground-breaking developments, for new perspectives and possibilities. An avantgardist is a pioneer, just like Siemens. With the avantgarde laundry appliances, Siemens pursues its goal of revolutionising homes as we know them – with a pioneering design that makes your life more beautiful and technology that simplifies your everyday world.

**Laundry care is now state-of-the-art.**

A modern, minimalist design meets innovative technology that simplifies your everyday world. That's avantgarde. The blue light ring is the visual highlight of our washers and dryers. The inclined control panel and iSelect display ensure optimal legibility and ergonomic, intuitive control. That's avant-garde, too. The seamlessly integrated door with the tap-to-open button and the high-quality chromeLine leave a lasting impression every time. avantgarde is all this and much more. It turns laundry appliances into genuine design icons on the cutting edge of technology.

# Design meets innovation. The new avantgarde.

## Washing to perfektion.

### **Fast and effective odour removal with active oxygen: sensoFresh System.**

The sensoFresh System quickly and effectively eliminates odours without washing: perfect for delicate and non-washable fabrics. Active oxygen neutralises smells in just 30 to 45 minutes, depending on the intensity of the odour – for an immaculate appearance whenever you need it.

### **Reimagine the dispensing of laundry detergent: i-Dos.**

Based on the type of clothing, size of the load, water hardness and stain level, the Siemens avantgarde washing machine automatically regulates the amount of detergent – for perfect results and minimal use of resources.

### **Redefine clothes washing: stainRemoval system.**

The stainRemoval system removes the 16 most stubborn stains. Whether it's tomato, grass or red wine, the stainRemoval system automatically knows how to remove the stain.

## Drying to perfektion.

### **Rediscover drying: with the intelligentCleaning system.**

The intelligentCleaning system offers maximum convenience without sacrificing performance. Whereas other dryers require that the filter be cleaned after every cycle, the intelligentCleaning system reduces this effort to a minimum.

### **Simplified operation: iSelect display.**

The iSelect display has an intuitive, smartphone-like user interface and a large selection of washing programmes – for the most convenient laundry care possible.

### **Extraordinarily smart: autoDry.**

With autoDry, your laundry is dried with no risk of shrinkage. Thanks to intelligent sensor technology, your dryer automatically knows the right temperature for every item of clothing – for perfectly dry clothing with minimal energy consumption.

**Pleasant memories stay. Unpleasant odours don't.**  
Happy memories are too valuable to let them be spoiled by unpleasant odours. Although you can't prevent your clothing from absorbing odours, thanks to the sensoFresh Programme and the use of active oxygen, you can now eliminate odours in a heartbeat – without washing and even from extremely delicate fabrics. So enjoy your parties, your adventures and your banquets to the fullest – and your clothing as well, even the very next day.

**Discover the benefits of active oxygen with the revolutionary sensoFresh System.**  
Active oxygen is the next major advance in laundry care. The sensoFresh System is the optimal solution for removing a wide range of odours. Active oxygen removes them easily and thoroughly – leaving your laundry pleasantly fresh and hygienically clean.

**The laundry care revolution carries over to the next appliance class.**  
You can now discover the benefits of this ground-breaking innovation in the iQ500 washing machines as well. A programme that makes your life easier and guarantees extraordinary results.

# Fast and effective odour removal. sensoFresh.

## Fast and effective odour removal with active oxygen: the sensoFresh System.

The sensoFresh System quickly and effectively eliminates odours without washing: perfect for delicate and non-washable fabrics. Active oxygen neutralises smells in just 30 to 45 minutes, depending on the intensity of the odour – for an immaculate appearance whenever you need it.

## Hygienically clean laundry even at low temperatures: the Hygiene Mix Washing Programme.

The Hygiene Mix Washing Programme is ideal for delicate fabrics that can't be washed at high temperatures. Thanks to active oxygen, laundry is hygienically clean – even when washed at low temperatures between, for example 30° and 40° Celsius.

## Meets your highest hygiene standards: the drumCleaning Programme.

The drumCleaning Programme prevents the formation of odours inside the washing machine's drum. Active oxygen stops the accumulation of odour-causing bacteria and ensures a hygienically clean washing machine.

## The first combination washer/dryer with an integrated, automatic, precision dosing system: i-Dos.

### The world's first integrated, automatic, precision dosing system: i-Dos.

The innovative i-Dos system determines the precise amount of detergent and fabric softener that your laundry needs. Depending on factors as variable as fabric type, load size, water hardness and degree of soiling, it dispenses detergent efficiently and to the precise millilitre – for even more perfect fabric care and superior washing results.

### Equipped for up to 20 loads: the i-Dos dosing chambers.

You don't need to add detergent for each wash cycle. Just fill the two chambers with enough liquid detergent and fabric softener for up to 20 loads and it will be saved for future use.

### Saves up to 7,062 litres of water per year.

Up to 7,062\* litres: That's how much water you can potentially save per year with the i-Dos automatic dosing system compared with manual dosing, according to the independent wfk Institute for Applied Research.

\* Potential annual savings with i-Dos compared with a standard household washing machine with manual dosing in a conventional easy-care programme and based on an average of 220 loads per year. Source: wfk Institute for Applied Research, Research Report WL 5132/10. Individual results may vary.

### Washing and drying in a single appliance: the iQ500 washer/dryer with i-Dos.

The washer/dryer that combines all the advantages of a state-of-the-art Siemens washing machine with those of an efficient condensation dryer. You can wash and dry up to six kg of laundry in one procedure, without waiting for the washing cycle to finish, without transferring the laundry to the dryer and without re-entering settings. Laundry has never been easier or more convenient.

### Automatic, moisture-controlled drying – gentle and precise.

To prevent uneven drying, the temperature and moisture are precisely measured and controlled by sensors. Your laundry is dried especially gently and requires less energy and time for ironing. Perfection.

### Lots of room for your laundry: 1 to 10 kg load.

You can now wash up to 10 kg of laundry at once. Even large items fit easily in the roomy drum with room to spread out.

**With the times – against the clock.** Greater efficiency for more free time. How can you gain time? By using it more efficiently – and this includes waiting less and living more. The time-saving speed technology of Siemens dishwashers helps.

**Wash and dry at three times the speed: varioSpeed Plus.**

Pressing the varioSpeed Plus button reduces dishwashing time by up to 66 percent.\* The reduced time shows up immediately on the time-remaining display. The result: dishes that are always perfectly cleaned and dried in the shortest possible time.

\* Does not apply to the pre-rinse or quick wash programmes.

**Innovative features for inspiring results: brilliantShine system.**

Experience four perfectly synchronised, innovative features in just one washing cycle – for a brilliant shine and an everyday life full of sparkling highlights.

# Technology as brilliant as your glassware. brilliantShine.

Great moments start with small details. Like perfectly shiny glasses directly out of your dishwasher – with no additional polishing. Now it's easy thanks to the new brilliantShine system with Zeolith®-Drying.

## The innovative functions of the brilliantShine system:

### Innovative drying with a brilliant shine: Zeolith®-Drying.

The innovative, patented Zeolith®-Drying technology is based on a natural mineral that transforms humidity into heat energy. This results in extremely gentle but effective drying conditions.

### Now makes your glassware shine even longer: Raw Water Valve.

The Raw Water Valve is an automatic water-softening system for a long-lasting sparkle. It minimises glass corrosion as well as detergent residue and optimises the whole cleaning process by pumping fresh water into the cycle.

### Brilliantly delivers what it promises: Shine&Dry.

The Shine&Dry feature uses additional rinse water to remove all the residues of detergent and extends the gentle drying phase. This delivers a shine you can truly rely on and a smile whenever you open your dishwasher.

### Specialising in gentle cleaning: the glass 40° programme.

The glass 40° programme is specifically designed to treat delicate glasses the way they deserve: very gently. It reduces the time and temperature of the cleaning cycle and creates shiny results you can rely on.

Download and  
install Home  
Connect App

#### Home Connect.

Thanks to the integrated Home Connect app, you can operate your refrigerator remotely and conveniently from any location. Not only do you get storage tips, you can also conveniently control the temperature and humidity from wherever you are. If you accidentally leave the door open or if the temperature rises unexpectedly, you're automatically notified.

# Superior in both design and function.

## The new, giant hyperFresh premium 0°C freshness drawer.

The new, giant hyperFresh premium 0°C refrigerator features a new operating concept. Thanks to a display integrated in the handle with motorised humidity control operated by touch, setting the temperature and humidity level have never been easier. The metal telescopic rails with two 40 litre removable boxes are pure luxury, with the added benefit that the optimal humidity level keeps foods fresh up to three times longer.

## Premium LED lighting concept.

Thirty-eight brilliant and invisible LEDs brightly illuminate the entire refrigerator compartment. An LED spotlight also provides ideal lighting in the hyperFresh premium drawer. The brightness can also be precisely adjusted to the desired intensity, so your refrigerator always looks hygienically clean and tidy.

## Superior design and a larger usable volume.

With its stunning black glass design, the refrigerator isn't just flexible in everyday use, it's also extremely convenient. Daily access to food couldn't be easier thanks to the generous double-doors and ergonomically positioned drawers on the lower level. And best of all, the larger usable volume leaves nothing to be desired.

# There's even room for the future.

Thanks to two cameras installed inside the new KG56NHX3P XXL refrigerator, you can view your foods from any location using the Home Connect app. So when culinary inspiration hits, it'll take just a few seconds to learn the ingredients you need to buy. For more information, visit [www.connectivity-erleben.de](http://www.connectivity-erleben.de).

## Perfectly integrated: no distance to side walls needed.

Siemens' new coolFlex appliances with Skin Condenser technology don't require gaps at the sides, meaning that they can be installed right up against other objects. The innovative hinges let you pull out the drawers at a door-opening angle of just 90 degrees. It all adds up to superlative convenience.

## Keeps fish, meat, fruit and vegetables fresh up to two times longer: hyperFresh plus with humidity control.

A slider lets you adjust the humidity level in the hyperFresh plus drawer to the drawer's contents, guaranteeing an ideal humidity level that preserves flavour, vitamins and nutrients longer.

# side-by-side. A new dimension of cooling and freezing.

With their bar handles and satiny matte finish, the new side-by-side appliance KA95NAX3P in stylish black inox lend an air of elegant professionalism.

noFrost

**Never defrost again.**  
**noFrost.**

With noFrost, an air circulation system draws humidity out of the freezer compartment. This means the air stays dry to reliably prevent ice formation in the refrigerator compartment and frost build-up on foods.

LED light

**Light up the dark: the LED light concept.**

The new, long-lasting LED lights integrated flush with the side walls illuminate the interior evenly with no glare. An LED spotlight lights up the freshness zone from above (iQ500 Series and later).

**Light up the dark: the LED light concept.** The new, long-lasting LED lights integrated flush with the side walls illuminate the interior evenly with no glare. An LED spotlight lights up the freshness zone from above (iQ500 Series and later).

# Benefits that won't leave you cold.

Discover the new built-in cooling appliances from Siemens.

## Keeps food fresh up to three times longer: **hyperFresh premium 0°C.**

The hyperFresh premium 0°C drawers – one with humidity control for produce and one for fish and meat – offer great advantages with their different humidity levels and temperature of about 0° Celsius.

## Never defrost again. **noFrost.**

With noFrost, an air circulation system draws humidity out of the freezer compartment. This means the air stays dry to reliably prevent ice formation in the refrigerator compartment and frost build-up on foods.

## **EasyInstallation: even easier to install thanks to pre-mounted screws.**

Installation is as fast as it's safe and uncomplicated with the new Topline appliance models. Almost all the brackets are pre-mounted, including the fastening screws. All you have to do is tighten the screws with a screwdriver and the refrigerator is perfectly integrated into the kitchen unit.

# The less-ordinary kitchen experience. The iQ700 built-in appliances.

A built-in appliance range that reaches new heights in home appliance design. The iQ700 Ovens and the iQ700 built-in appliance range. A seamless design that complements every kitchen. All appliances in the iQ700 built-in appliance range can be combined perfectly with each other. Thanks to the coherent front panels, it doesn't matter whether you arrange the appliances side by side or on top of each other: The result is always pleasing to the eye.

varioSpeed

**varioSpeed: one press of a button. Twice as fast.**

It's easy to be twice as fast: All it takes is a single press of a button. The integrated microwave not only helps defrost and heat the food, it also speeds up the preparation of all your dishes in the oven by supplementing the selected heating mode – with perfect results. With the varioSpeed feature, your food is cooked in up to 50 percent less time with the press of a button.

cookControl Plus

**Preinstalled setting recommendations guarantee the best results for a variety of dishes: cookControl Plus.**

Simply select the required dish and enter the weight, and the cookControl Plus feature immediately recommends custom settings for perfect cooking. This lets you reliably achieve the best results with the many dishes contained in cookControl Plus.

TFT-Touchdisplay Plus

**TFT Touchdisplay Plus: Operating your oven has never been easier.**

Thanks to a user-friendly menu structure and easy-to-use touch navigation, operating your oven is child's play. Let the iQ700 oven guide you through the varied menu and enter your personal cooking preferences.

pulseSteam

**Crispy crusts and juicy roasts: the pulseSteam feature.**

Thanks to the regular addition of steam to conventional heating methods, it's now easier than ever to prepare perfect dishes. The moisture on the surface of the food evaporates, leaving it crispy on the outside and moist or juicy on the inside.

**Designed to enchant.** It's time to outdo yourself – with new built-in appliances from Siemens. The new iQ500 ovens and cooker sets invite you to enjoy cooking with all your senses. Even before you start preparation, the modern design makes you hungry for more. Clear lines and structures, sophisticated materials and an inspiring lighting concept open up new horizons in your kitchen. Innovative features like coolStart, fast preheat, cookControl and activeClean® save you a tremendous amount of time for enjoying the truly beautiful things in life.

# The definition of speed. The new iQ500 ovens.

coolStart

## **coolStart: no pre-heating necessary for frozen foods.**

The preparation of frozen foods has never been faster – thanks to the innovative coolStart function. You can prepare many dishes quickly and with no pre-heating – which is an especially nice way of saving time.

fast preheat

## **fast preheat: Achieve the right oven temperature faster.**

Thanks to innovative fast preheat, your oven pre-heats at lightning speed – without consuming more energy. In about five minutes, it reaches a temperature of 175° Celsius (with 3D hot air Plus).

varioClip rail

## **varioClip rails: Maximum flexibility is simple with telescopic rails on any level.**

The varioClip shelf rails offer maximum flexibility. Thanks to the quick and easy fastening system, you can attach telescopic rails at any level in your oven.

activeClean®

## **activeClean®: the automatic self-cleaning system.**

Thanks to the innovative activeClean® function, your oven now cleans itself. Just remove the loose residue and the oven does the rest. At the touch of a button, all deposits from baking, roasting and grilling turn to ash at high temperatures, and you'll simply wipe up what remains with a cloth.

## Special bonus with the new iQ500 ovens.

lightControl

## **lightControl: intuitive control thanks to the illuminated control knob.**

The new lightControl control knob illuminates each heating symbol you select with a stylish blue light, transforming the act of selection into an intuitive and exciting experience.

# The new iQ500 cooker sets with TFT display.

## **coolStart: no pre-heating necessary for frozen foods.**

The preparation of frozen foods has never been faster – thanks to the innovative cool-Start function. You can prepare many dishes quickly and with no pre-heating – which is an especially nice way of saving time.

## **fast preheat: Achieve the right oven temperature faster.**

Thanks to innovative fast preheat, your oven pre-heats at lightning speed – without consuming more energy. In about five minutes, it reaches a temperature of 175° Celsius (with 3D hot air Plus).

## **varioClip rails: Maximum flexibility is simple with telescopic rails on any level.**

The varioClip shelf rails offer maximum flexibility. Thanks to the quick and easy fastening system, you can attach telescopic rails at any level in your oven.

## **activeClean®: the automatic self-cleaning system.**

Thanks to the innovative activeClean® function, your oven now cleans itself. Just remove the loose residue and the oven does the rest. At the touch of a button, all deposits from baking, roasting and grilling turn to ash at high temperatures, and you'll simply wipe up what remains with a cloth.

## **Door with softClose: The new door closes softly and quietly.**

The new door with softClose cushions the closing process so completely that the door always closes gently.

## **Triple fully extendable telescopic rails: a better view and greater stability.**

You can pull baking sheets, racks or the universal pan all the way out of the oven on three levels – 17 cm farther than with conventional telescopic rails. They're as smooth as they're stable, and nothing can tip over.

## **Oven carriage: Never burn your fingers again.**

The racks, baking sheets and pans attached to the back of the door are pulled forward for you when you open the oven door, making all your dishes easily and safely accessible.

Starting in November 2018: unique features for the iQ500 cookers.

## **Home Connect: Operate your appliances from wherever you are, whenever you want.**

Technological innovations are making every area of life smarter and more connected, changing your daily routine one step at a time. Now they're finally moving into your home. With Wi-Fi-capable Siemens home appliances and Home Connect.

## **TFT display: easy to read and intuitive to operate.**

Let your oven guide you through the menu so you can easily find the right settings for your dishes.

## Unique together: the hob with an integrated extractor module.

The combination of cooktop and ventilation offers you more flexibility in the planning and use of your kitchen. Enjoy the convenience of an open kitchen where the extractor module is integrated directly into the kitchen island. Cooktop and ventilation are merged into one appliance that's both stylish and unique. The ventilation system design also matches the cooktop design and gives you a myriad of options that are intuitive to operate.

### **inductionAir: the best of two worlds.**

The inductionAir system combines two great appliances: a flexInduction cooktop and a sensor-controlled ventilation system. This modern concept lets you enjoy more freedom in kitchen planning to create a kitchen that uncompromisingly reflects your personal vision.

### **radiantAir: the radiantly beautiful innovation.**

The new radiantAir system is the latest innovation in this series of built-in ventilation systems. Harmoniously integrated into the cooktop, it provides a modern ventilation solution for classic cooktops.

**downdraftAir: conspicuously inconspicuous.**

The downdraftAir system conceals itself directly behind the cooktop where it waits until it's needed. As soon as the cooking process begins, the ventilation system can emerge and extract kitchen steam directly, before it has a chance to escape into the room. When retracted, the system is barely visible and emphasises the clean design of your kitchen.

**modulAir: maximum flexibility in kitchen planning.**

The modulAir system opens up an abundance of new possibilities for customising your kitchen: You can now individually select and combine the type, features and size of your cooktop. The additional integrated extractor module ensures even more flexibility when cooking.

# This cooktop knows no limit.

## Greater flexibility for even more options.

From now on, your cooking is no longer bound by limitations. With the freeInduction Plus full-surface induction hob, you can freely position up to six pots and pans of different sizes anywhere on the hob and move them wherever you want. You're no longer bound by pre-set cooking zones and have even more cooking options.

## Information at a glance.

The activeLight sheds a brand-new light on your cooking experience. Thanks to the blue light from the light strips, you immediately see which cooking zones are activated and the functions that are selected. Cooking has never been more intuitive.

## Cook like a pro.

With powerMove Pro, you can change the power level while you cook just by moving your cookware. You can select various power levels in five steps: Just move your pot or pan from the front to the back, and the hob responds immediately by adapting the power level. So you can cook like a real pro.

oLine

When the goal is to create more options in every situation, total flexibility is essential – and that's especially true in the kitchen. The freeInduction Plus full-surface induction hobs from studioLine are the ideal foundation for turning the preparation of any food into a genuine cooking experience.

#### Everything under control.

The colour TFT Touchdisplay Plus optimally displays the position, size and shape of your cookware and is intuitive to operate.

#### Any place is the right place.

To allow you more freedom when cooking, varioMotion remembers the heat setting for each piece of cookware: You can move them freely across the cooktop and the new cooking zone automatically adapts the temperature.

#### Perfect interaction between hob and extractor hood.

With cookConnect, your Wi-Fi-capable hob and Wi-Fi-capable extractor hood communicate directly with one another and automatically coordinate their settings – so that you can concentrate on cooking.

The cooktop with unlimited possibilities: flexInduktion Plus from Siemens. If you want complete freedom when you cook, induction is the optimal solution. Because flexInduktion Plus taps the full potential of this technology, it opens up a whole range of new options. The vision of a smart cooktop that allows you to cook more freely and flexibly than ever before has finally become a reality.

# As flexible and versatile as your life. flexInduction Plus.

## Adapts to your needs: flexInduction Plus.

Whether you use a small saucepan or a large paella pan: With flexInduction Plus, the cooking zones are automatically adapted to the size of your cookware up to a diameter of 30 cm and can be combined as needed so that everything is heated evenly.

## Your cooktop is in charge: cookConnect system.

Thanks to the convenient cookConnect system, many functions of the hood can be controlled directly from the cooktop: for example, selecting the power level and adjusting the lighting.

## It's all in your hands: the new TFT Touchdisplay.

With the TFT Touchdisplay, it's even easier to keep an eye on multiple pots and pans. Operate all features from the cooktop – with no rotary knobs.

## powerMove Plus: Upshift the heat by shifting the pan.

PowerMove Plus lets you separate your hob into three different heating zones with pre-set levels that range from preheat to keep warm. Intuitively position your cookware to activate the heating zones with no extra manual control – fully automatically, just by moving the cookware. With the slight pressure of a finger, you can activate the powerMove Plus feature and the adjacent cooking zones.

## Dual lightSlider: Follow your intuition.

With the dual lightSlider, you can completely control all your cooking zones with just one finger, easily selecting and combining the different zones.

# Amaze the eye – by upgrading your kitchen.

Discover the new Siemens ceiling hoods – the ultimate design highlight in your kitchen. A brilliant outlook for your kitchen. The new ceiling hoods are the ideal complement to any kitchen. In addition to high-quality materials and a timeless design, they're also impressive for their performance. State-of-the-art technology ensures that kitchen vapours vanish into thin air.

**Your cooktop is in charge: cookConnect system.**

Thanks to the convenient cookConnect system, many functions of the hood can be controlled directly from the cooktop: for example, selecting the power level and adjusting the lighting.

**Automatically adapts the extraction rate to the amount of steam: the climateControl Sensor.**

The innovative climateControl Sensor is hidden from view inside the air duct. It measures vapour and odours while you cook and automatically adjusts the extraction rate accordingly. When you finish cooking, it operates in after-running mode for an additional ten minutes before shutting off completely – which ensures that the air in your kitchen stays fresh.

Download and  
install Home  
Connect App

**Your extractor hood is ready for more:  
Home Connect.**

The new extractor hood is delivered Home Connect-ready – for use with the intuitive app for iOS and Android that allows you to access and control all the features of your extractor hood via your smartphone or tablet. For example, adjusting the extraction rate or lighting and receiving status notifications directly on your mobile device.

# Intelligently controlled.

The new Q 8.0 Siemens Extra Class vacuum cleaner with intelligent autoControl technology.

## For intelligent cleaning: Siemens powerSensor.

The intelligent powerSensor technology continuously monitors the appliance's performance and adapts it as needed. Losses are compensated fully automatically by increasing the motor power just enough to ensure thorough cleaning results. This guarantees that your appliance is always operating at its optimal performance level.

## The intelligent sensor that automatically detects conditions: autoControl.

The autoControl technology lets you vacuum without interruptions, even when you're cleaning a range of different floor types. This is possible thanks to a sensor that measures the level of negative pressure and regulates it as necessary. The nozzle is automatically prevented from adhering to the floor surface, ensuring a consistently pleasant cleaning experience combined with a consistent level of cleaning performance.

## Powerful cleaning that's also extremely quiet: activeSound Control.

Finally, it's quiet from the nozzle to the exhaust, thanks to activeSound Control. Just a few decibels make all the difference between unbearably loud and comfortably quiet. The entire appliance concept, from the nozzle to the shielded exhaust area, was optimized to reduce noise and redesigned to provide first-class cleaning power at a low noise level.

# Customised enjoyment. Perfectly adapted to your taste.

The Siemens EQ.9 plus fully automatic coffee machine – the ultimate in technology and design.

Download and  
install Home  
Connect App

## Home Connect: perfectly connected to your fully automatic coffee machine.

Conveniently operate your fully automatic coffee machine via your smartphone or tablet. Discover the exclusive world of the Home Connect app: for example, coffee-World, which offers you international coffee specialities. Or you can preload several drinks to your coffeePlaylist and prepare them one after the other. It's the most convenient way to become the consummate host.

**iAroma  
System**

## Perfect interactions bring perfect enjoyment: iAroma system.

Thanks to the iAroma system, the Siemens fully automatic coffee machines provide distinctive quality with every cup. The perfectly connected system – comprising a ceramic grinder, water pump and smart brewing unit – guarantees a seamless interaction of all the technical components, resulting in a perfect aroma and a uniquely pleasurable experience.

**dualBean  
System**

**autoMilk  
Clean**

## Separate bean containers, unadulterated flavour: dualBean system.

Perfect coffee enjoyment with exactly the beans you want: Two separate bean containers, each with its own grinder, ensure an unadulterated flavour choice at all times.

## Automatic cleaning of the milk system: autoMilk Clean.

Ensures perfect hygiene with every drink. Milk residue simply doesn't get a chance to develop.
