

SIEMENS

Freestanding Appliances 2019 Collection

Be inspired by the extraordinary and explore exciting new possibilities with appliances rooted in cutting edge technology. Siemens Home appliances enrich life through innovation and stylish design.

The future moving in.

Siemens Home Appliances

Intuitive sensor controlled appliances, rooted in cutting-edge technology.

The Siemens premium freestanding range of appliances showcases an outstanding range of sensor-controlled products that can automatically detect, evaluate and regulate the appliances' key operational elements to deliver outstanding performance and results. The technology includes everything, from dishwashers that will automatically adjust their cycle time based on the degree of dirt, sensor-controlled cooling appliances that deliver long-lasting food freshness, washing machines with automatic detergent dosing features, and oven sensors that will prevent any food from being overcooked.

With the range including iQ700, iQ500 and iQ300 appliances experience uncompromising design, innovation and technology, be inspired when power meets intelligence, and enjoy outstanding results from Siemens Home Appliances.

Siemens is part of BSH Home Appliances, winner of the 2018 Domestic and General Total Excellence and Quality Award. This award is based on surveys sent to customers of most of the major home appliance manufacturers and confirms our commitment to offering Siemens customers the very best customer service.

Warranties.

Siemens are proud to offer a 5 year warranty across the majority of our freestanding range for added peace of mind. This warranty covers all manufacturing and material faults. To register your warranty please refer to the information on page 61. Appliances without a 5 year warranty come with a 2 year warranty as standard.

For the machines featured in this brochure, we are also able to offer longer warranties on certain parts. This includes a 10 year Anti-Rust warranty on all dishwashers, a 10 year Compressor Drive warranty on selected cooling appliances, a 10 year iQdrive® warranty on selected washing machines and AquaStop lifetime warranty on selected washing machines and dishwashers.

For further details please refer to page 61 or visit our Siemens Home UK website.

Every connection lets your world grow.

To learn more about this technology visit siemens-home.bsh-group.com/uk

Our world has turned into an ever-growing network of partner services, to help you turn your house into a fully connected home.

Raise your voice and reduce your efforts with Amazon Alexa.

Food and ambience are equally important when it comes to pleasing your guests, but how can you be in two places at the same time – preparing dishes in the kitchen, whilst entertaining in the living room? Now with Home Connect and the right partner, it just became possible. Amazon Alexa enables you to voice-control various home appliances. With just one command, you can start the laundry program, preheat the oven, check the dishwashing progress or ask for your favourite coffee. A world of exciting possibilities awaits – just ask Alexa.

There are more important things to think of than dishwasher tablets.

Make life easier with Amazon Dash Replenishment.

Replenishing consumables is a small thing, but it can also become a big thing when you discover that you've just run out of essentials like dishwasher tablets. Discover the seamless way of managing dishwashing cycles by getting tablets automatically delivered to you, with the Home Connect app and your selected online shopping partners. By monitoring the number of dishwashing cycles, the system intelligently reorders dishwasher detergent for you, just in time, and with total convenience.

Define your unique with IFTTT

With IFTTT (If This Then That), you can integrate your Home Connect appliances seamlessly into your life and allow them to communicate with one another, allowing you to create your own automated applets which are perfectly tailored to your needs. Design bespoke triggers, for example, connect your coffee machine to your smart watch and your sleeping rhythm will then be recorded and directly sent to your coffee machine, which can then prepare you the most appropriate morning coffee - a double espresso after a rough night, or a latte after a good rest. There are so many possibilities to be creative; the smart lamp in your living room blinks when the laundry is done, the hood emotionLight lights up when your dinner is ready... Be inspired by checking the IFTTT partner app to learn about the latest "triggers" available.

Models shown above: Fully integrated dishwasher – model shown unavailable although please check matrix for freestanding dishwashers with Home Connect, **CT636LE56** coffee centre, **B1630CNS1B** warming drawer, **HN678GES6B** single oven, **LC91KWW60B** angled hood, **WM4UH640GB** freestanding avantgarde washing machine, **WT7XH940GB** freestanding avantgarde tumble dryer and **KG36NA145** freestanding fridge freezer.

Ovens and Coffee Centre

- **recipeWorld:** Discover a large and delicious variety of Siemens approved recipes. Select your favourite via the app and send the settings directly to the oven, straight from your mobile, tablet or smart device.
- **coffeeWorld:** Explore a wide range of additional coffee specialties from all around the world. Select your choice via the app and send the drink instruction straight to your coffee machine.
- **coffeePlaylist:** Impress your guests by asking them to submit their coffee preferences via the app. Transfer the beverage list remotely to the coffee machine and the drinks will be prepared one after the other.
- Operate the oven and coffee machine intuitively from wherever you are, for instance preheat your oven while you are on your way home or rinse your coffee machine from your bed when you wake up in the morning, ready for the day ahead.

Hobs and Hoods

- **emotionLight Pro:** Change the ambience of the kitchen by projecting a different colour of light from your hood. Access up to 256 colours via the Home Connect app, perfect for parties.
- **Cooking assistant:** Use the assist tab on the Home Connect App when using the hob to help you find or select cooking methods. Send the settings directly to your hob for easier and quicker evening meals.
- With both hobs and hoods you can conveniently monitor your appliances' cooking status, turn appliances on or off or change the cooking settings via your Home Connect App, from wherever you are.
- Push notifications are a helpful guide notifying you when your appliance needs maintenance attention, such as letting you know when the filters need replacing.

Dishwashers

- **easyStart:** simply select the kind of dishes and your cleaning preference on the app and Home Connect will suggest the correct cycle for your load, making chores stress free and straightforward.
- Identify the most efficient wash for your load and access the whole programme offering through the app. With descriptions for each setting, use the app to help you identify the right wash for your cycle and send the load instructions straight to your machine.
- Operate the dishwasher from wherever you are to fit around your lifestyle. Check the wash time, receive push notifications to your mobile for machine maintenance or even start the machine remotely when out of home.

Washing Machines and Tumble Dryers

- **easyStart:** select from 5 easy options via the Home Connect App to identify the best wash or drying setting. Send this cycle type direct from your app to the machine.
- Operate laundry appliances from wherever you are and receive push notifications when the cycle is finished and, for our i-Dos model, whenever the fill status of detergent or fabric softener is getting low.

Fridge Freezers

- **Camera in the fridge:** Plan ahead by checking the contents of your fridge from wherever you are. Our fridge freezer model **KG36NH132** has two cameras in the fridge that regularly send updated internal fridge photographs to the Home Connect App allowing you to peer inside and plan ahead, even if you are at work or on your commute.
- Manage your appliance remotely and intuitively select and activate the ideal setting for your refrigerator. Whether you are returning from a food shop or boarding a flight, adjust your fridge temperature or setting directly using the app. Receive helpful push notifications directly to your app, such as when you leave the door open.

Take the next step into the future:

Discover how new connections redefine your daily life with Siemens and Home Connect. Wi-Fi enabled Home Appliances can already be operated through the Home Connect App, and now this technology connects your appliances with services of different partners – turning your house into a connected home.

This connectivity creates new possibilities and opportunities in your living space; such as changing the colour of your cooker hood to change the ambience of the kitchen, or setting up your oven using Amazon Alexa voice control, technology which both enriches and offers you more time and flexibility.

Try demo

If you haven't yet registered appliances on the app you can still try out the demo function to get a better understanding of the features available to you.

To experience the demo mode download the free Home Connect app and then press and hold 'Try demo' on the app's home screen.

blackSteel refrigeration.
Refined elegance meets
innovative cooling.

Models shown:
KS36VAX3P single door fridge and
GS36NAX3P single door freezer

Sophisticated Cool.

The Siemens elegant black steel anti-fingerprint refrigeration range with hyperFresh technology combines style and function. With hydroDry technology that protects delicate glassware during the drying process, the ability to reduce running times by up to 66% with varioSpeed and flexibility for more convenient loading with the varioFlex rack and varioDrawer, discover a wide range of features that come with our iQ500 blackSteel dishwasher.

blackSteel warranties.

5
Year Warranty

All of the appliances in the blackSteel collection come with a Siemens Five Year Warranty.

Anti-Rust
10
Year Warranty

The dishwasher in the blackSteel collection has a 10 Year Anti-Rust Warranty to protect against rust in the inner cavity of the appliance.

Compressor Drive
10
Year Warranty

blackSteel cooling appliances KG39NXB35G, KG36NXX3AG and KG34NVX3AG come with a 10 Year Compressor Drive Warranty.

AquaStop
Lifetime
Warranty

The dishwasher in the blackSteel collection also has a lifetime AquaStop Warranty to protect against water damage caused by a defective AquaStop system.

For more information on our warranties, please see page 61.

Laundry. Welcome to a range designed around you.

Siemens Washing Machines, Washer Dryers and Tumble Dryers deliver outstanding results every time.

Sleek, streamlined, and stylish, Siemens laundry appliances not only look great in your home, they perform perfectly too. With state-of-the-art technology Siemens washing machines are extremely energy efficient, easy to use, and most importantly designed to save you time and money.

All Siemens tumble dryers feature sensor drying, which provides uniform drying results, and makes over-drying a thing of the past. All Siemens tumble dryers have been developed to make laundry easier and less of a chore.

Siemens washer dryers combine the innovative functions of the modern washing machines and dryers in one appliance to save effort, time and space. At the touch of a button, with their large display and clear operation, you can conveniently control the variety of cycles from both worlds: washing and drying.

Siemens laundry warranties:

5 Year Warranty
5 Year Warranty
 A Siemens Five Year Warranty is available on all Siemens freestanding washing machine and tumble dryer models listed in this brochure to protect against any manufacturing and material faults and defects during this warranty period.

2 Year Warranty
2 Year Warranty
 A Siemens Two Year Warranty is available as on all Siemens Washer Dryers listed in this brochure to protect against any manufacturing and materials faults and defects during this warranty period.

10 Year Warranty
iQdrive® Motor
iQdrive® 10 Year Warranty
 The iQdrive® Motor Warranty is available on selected laundry machines to protect against any defects to the iQdrive® motor. For models with this warranty please check the laundry matrix.

Lifetime Warranty
AquaStop
Lifetime AquaStop Warranty
 Selected Siemens laundry appliances have a lifetime AquaStop warranty to protect against water damage caused by a defective AquaStop system. For models with this warranty please check the matrix.

To find out more about your warranty and for registration please refer to page 61.

Models shown: WM14YH89GB washing machine and WT4HY791GB tumble dryer

Laundry key features.

Laundry Energy and Capacity ratings.

Washing machines

Our entire washing range boasts A+++ for energy. Siemens washing machines are extremely energy efficient and can automatically adapt the wash time and the energy consumption to the amount of laundry in the machine.

Washer dryers and tumble dryers

Each of our washer dryer and tumble dryer appliances has a different energy rating. From B all the way through to the most efficient A+++ tumble dryers.

Capacity

Each of our laundry appliances can hold a different amount of clothes, measured in weight. Our stunning avantgarde washing machine and iQ700 machine (WM16XGH1GB) can hold an impressive 10kg of clothing.

Washing machine range

Washer Dryer range

Tumble dryer range

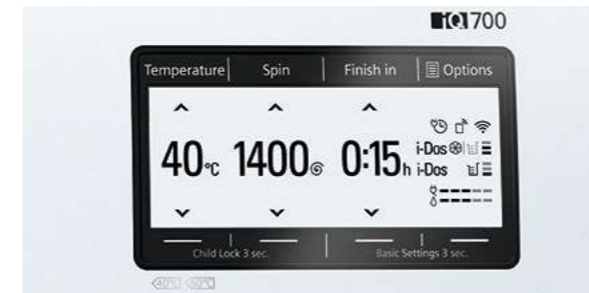

Clear displays for easy selection.

With the Siemens Laundry collection choose from Touch TFT, TFT, LED or Toledo LED.

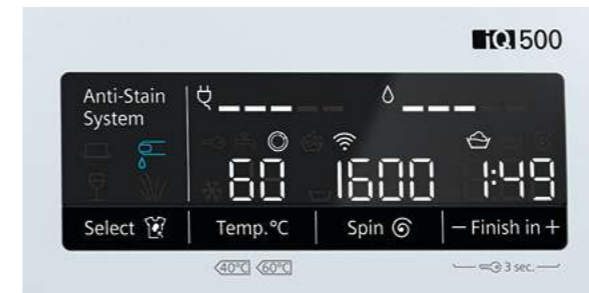

iSelect TFT Display

With an innovative smart phone like interface, scroll through this large and colourful digital menu to select washing and drying programmes. Available on avantgarde machines only.

TFT

Operation is simple with a high-resolution TFT clear text digital display with plenty of programme options. Clear text and symbols provide you with all the information you need about the programme sequence.

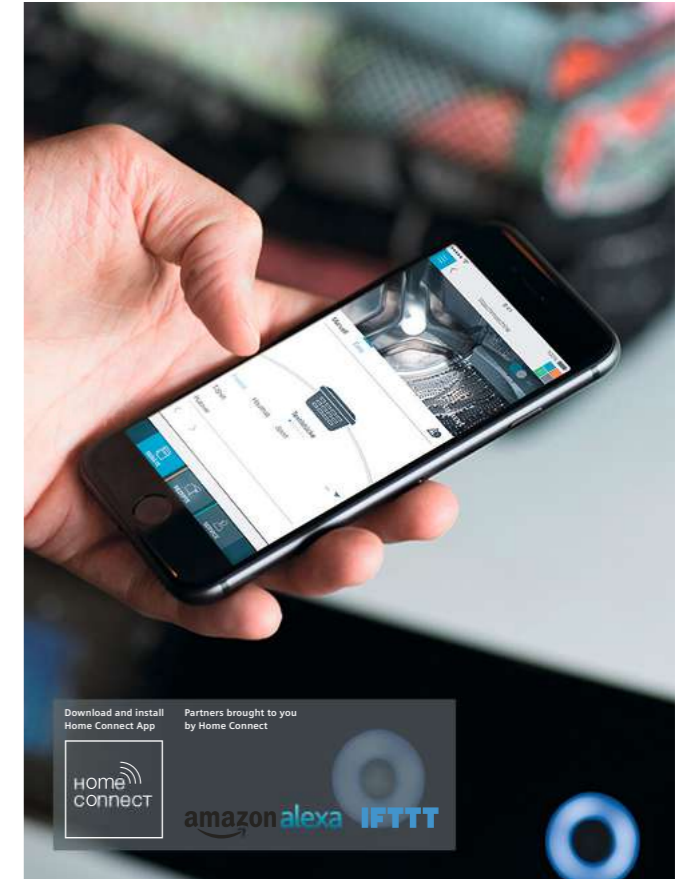

LED

The large LED comfort display panel with touch buttons provide you with a full overview and makes operation effortless.

Toledo LED

Full touch LED display alongside illuminated control dial for easy programme setting.

The Home Connect App means you can start cleaning the laundry on your way home.

Siemens Wi-Fi-enabled washing machines with Home Connect can't take the loading and unloading away, but they will add exciting features to give you more flexibility and choice when doing your laundry.

easyStart

The easyStart feature available in your Home Connect App helps you to find the best programme for your load. Just answer a few simple questions, for example defining the types of fabric and the degree of soiling. The machine will then remotely suggest and send the recommended wash settings to your appliance. Go from finding the ideal programme to starting the laundry in just a few seconds.

Manage out of home.

Let your laundry adjust to your timetable

A washing machine you can monitor from wherever you are provides a lot of convenience. With the Home Connect App you always know if the laundry is ready or not, and you don't have to approach the machine to check it several times just to see that it's still running.

Push notifications

Receive alerts to your app when the i-Dos compartment drawers need to be refilled with detergent or when the cycle is finished so you can focus on the important things.

Connected partners

With our connected partners, Amazon Alex and IFTTT you can truly turn your living space into a fully connected home. Simply voice control your appliance just by asking Alexa. With the IFTTT app join your Home Connect appliance with a wider range of smart devices. Set up applets, digital commands, to create bespoke solutions such as programming smart lights to flash when the laundry cycle ends.

For more information about Home Connect visit Siemens Home UK: siemens-home.bsh-group.com/uk

Excellent performance meets maximum energy-efficiency with Siemens laundry.

Model shown: WM16YH79GB washing machine

A new level of convenience.

reload
The reload function allows the machine to be paused and the door opened at the next safe opportunity. It's the perfect solution when an extra item needs to be added to the load.

antiVibration
Having antiVibration technology built-in to the design of the machine makes the appliance more stable, which in turn makes it quieter.

rapid15, rapid30 and rapid40
What can you do in an hour? Add the laundry to your list. Need a shirt cleaning an hour before you're due to leave the house? Don't panic! The rapid15 and rapid30 wash, rinse and spin washing programme and rapid40 drying programme will save the day!

Drum interior light
The drum is lit after switching on the appliance, after opening and closing the door and after starting the programme for extra convenience. The light switches off automatically.

Less Ironing option
At the touch of a button 'Less Ironing' can be added to a selected programme, ensuring the machine gently and evenly drains the water and reduces the spin speed, helping to keep clothes creases to a minimum.

Outdoor
This programme applies a waterproof treatment to breathable fabrics, prolonging the life of high-quality functional clothing like winter jackets, fleeces and ski suits.

Reimagining the everyday: be avantgarde.

Siemens avantgarde: laundry care appliances setting new standards for style and function.

Models shown: WM14U940GB avantgarde washing machine and WT7XH940GB avantgarde tumble dryer

Discover our most premium laundry care range designed to set new standards.

Discover laundry care appliances that keep up with your lifestyle. With a cutting-edge appearance Siemens avantgarde laundry models add a touch of brilliance to your home – even for everyday tasks like washing and drying laundry. Enjoy outstanding design and exceptional convenience thanks to the inclined ergonomic control panel, intuitive iSelect TFT Display, and an overall outstanding design.

avantgarde washing machine with sensoFresh

The use of active oxygen marks the latest revolution in laundry care. For the first time, a washing machine provides the perfect solution to purify almost any kind of contamination. Whether it comes to odours or germs – with the sensoFresh System, even sensitive and non-washable fabrics can be treated both effectively and gently, all in just 30 to 45 minutes.

avantgarde washing machine with speed options: myTime

Whether you're in a rush or have plenty of time, you can choose how long your washing or drying takes with myTime. Exclusive to avantgarde, myTime allows you to choose to run the programme from between 20 to 60 minutes, you decide. Now you can fit the laundry into your schedule without compromise.

avantgarde tumble dryer with revolutionary drying: The intelligentCleaning system

The intelligentCleaning system provides maximum convenience without compromises on performance, since you don't need to remove the fluff after every cycle.

Home Connect

Both avantgarde machines are Wi-Fi enabled allowing you to easily control your avantgarde appliances directly from the Home Connect app using your mobile or tablet device. Home Connect allows you to use features such as the easyStart function so you can select the most effective wash programme for your load based on answering a few simple questions; perfect for finding a suitable programme for washing sportswear or drying delicates. Home Connect conveniently also allows you to manage your appliance out of home so you can track the status of your laundry cycle when you're on the go. Push notifications directly to your app on your smart phone or tablet can also update you when the cycle ends.

iSelect TFT Display

Both avantgarde machines have matching iSelect TFT Displays; an intuitive smartphone-like user interface, allowing you to select programmes by scrolling through a digital menu. This large clear screen provides clear and precise selection options. These two models with their stand-out displays coordinate together beautifully. The iSelect TFT Display panel helps aid the process of choosing programmes through clear legibility and a beautiful user-friendly interface.

To learn more about avantgarde, please visit our Siemens Home UK website siemens-home.bsh-group.com/uk

Siemens Home Appliance washing machines take the hassle out of doing the washing. Our machines take full advantage of the latest technology and innovation, and are designed to make laundry less of a chore.

Experience effective odour removal with our top washing programme: sensoFresh.

sensoFresh

When you're out having fun it's difficult to prevent your clothes from picking up odours, but that's no problem for sensoFresh. Siemens washing machines with sensoFresh technology make it fast and simple to remove odours from all kinds of fabric and clothes, even dry clean only items and delicates. sensoFresh's revolutionary active oxygen system neutralises smells in just 30 to 45 minutes, without the need for water or detergents. Just pop your suit or evening dress in the machine on this programme, and it will come out smelling fresh and revitalised.

Together, the use of active oxygen and efficient sensor technology provide a highly convenient way to eliminate odours, delivering pleasantly fresh clothes and outstanding hygiene.

Meets your highest hygiene standards: The Drum Clean programme

An automatic alert after 20 washes to run the Drum Clean programme on a 90°C or 60°C wash which keeps the appliance clean and odour free.

Hygienically clean laundry even at low temperatures: The hygiene programme

The hygiene programme is particularly suitable for delicate textiles that cannot be washed in a high temperature wash programme.

Get perfectly clean laundry in up to 65% less time with varioSpeed

Available in our iQ700 and iQ500 washing machines only this feature can automatically detect when time can be saved. The smart sensor identifies load volume and textile kind, hence adapting the washing machines process time efficiently to suit the specific load.

Automatic programmes

Whether normal or delicate items – the automatic programmes 'Auto' function adjusts the entire wash cycle to the needs of your laundry for optimum effect. Perfect for hard-wearing fabrics this mode can even add extra detergent if your washing is heavily soiled.

powerSpeed 59 system

With the new powerSpeed system the laundry gets evenly soaked and heated up much faster and more consistently, for more thorough washing. Suited for up to 5kg of cottons or blended fabrics the powerSpeed 59 result is achieved by a second pump, that feeds the water into the drum at the beginning of the washing process. In parallel, the detergent is mixed with water and gets sprayed into the centre of the load, shortening the run time to only 59 minutes and increasing the wash performance.

Model shown: WM16W5H0GB washing machine with LED display

Washing machine key features.

Just add laundry with i-Dos.

The i-Dos system automatically determines how much detergent is needed for each of your wash loads, based on the weight of the laundry and programme used.

Saving you time, the i-Dos washing machine allows you to simply place your clothes in the drum, select your desired programme and relax. The i-Dos system uses a combination of all the sensors to automatically determine the exact amount of liquid detergent needed for each of your laundry cycles, depending on the weight of the load and what programme is being used.

With the built-in drawer conveniently holding enough liquid detergent for around 20 washes, not only does this mean you don't have to measure and fill the container for every wash, but as the correct amount of liquid detergent is used every time, your clothes will receive the perfect wash whilst saving you time, water and detergent. The result, hassle-free laundry and perfectly clean clothes!

Consumption indication

See which programmes use less energy and water with the consumption value indicator. This display option provides information about the relative energy consumption in selected cycles. The more the indicator lights light up, the higher the consumption. So if you are conscious about energy and water saving this setting will help you decide which cycle to choose.

Fast and efficient washing machines with added peace of mind.

For further information on washing machine warranties please see page 61.

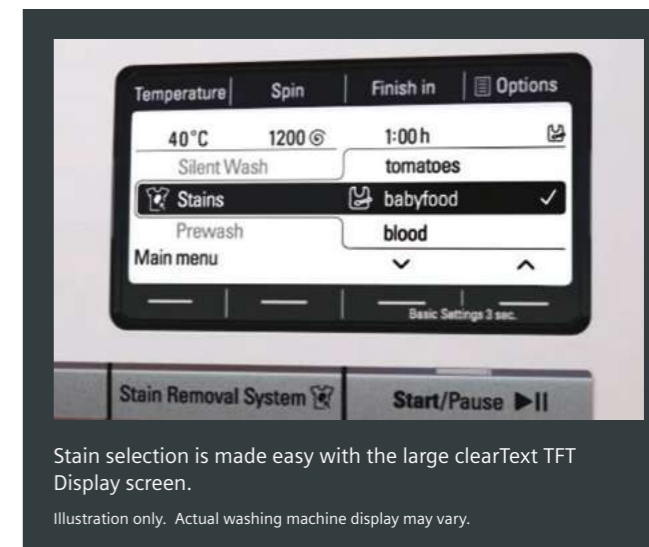

Tough on stains, gentle on your washing.

Remove tough stains without the need for specialist products or pre-washing. Keeping your life uncluttered, our specially designed autoStain removal system (ASR) takes the effort out of cleaning tough stains. Simply load your clothes in the machine, choose a wash programme, select one of the 16 stain treatments and let ASR do the rest. This saves you time and removes the need for specialist products or pre-washing.

It happens to the best of us, a stain on your favourite dress or best shirt is part of life. However, we have a solution that is going to save you time and effort when it comes to removing stubborn stains. So next time you need to remove last night's wine from your shirt sleeve or a lipstick smudge on your favourite dress, look no further than your Siemens washing machine.

Whether it is red wine or coffee, dirt or grass, blood or even cosmetics, our autoStain removal system automatically optimises the wash settings to remove individual stains from your laundry. The system eradicates the need to pre-wash stained clothes and the use of special detergents, tackling up to 16 different types of stain. The system tailors the wash according to the nature of the stain, creating the perfect balance between the mechanical drum action, water level, wash time and temperature thus saving you time and money on buying specialist products. Those unforeseen accidents need not ruin your clothes anymore.

Stain selection is made easy with the large clearText TFT Display screen.

Illustration only. Actual washing machine display may vary.

Model shown above: WM14YH89GB washing machine

A breath of fresh air: Siemens Washer Dryers.

Maintaining efficiency for life: Siemens Tumble Dryers.

With a Siemens washer-dryer combo, you can enjoy the luxury of complete laundry care without needing a lot of space.

varioPerfect
The choice between speedPerfect and ecoPerfect; varioPerfect allows the setting of certain washes to be changed determined by what is most important to the user; time or energy.

Wash and dry in only 60 minutes with the new Wash&dry60 programme
The Wash&dry60 washing cycle lasts 15 minutes and drying cycle lasts 45 minutes for extra speed for when you need to prepare your clothes quickly.

Model shown: WD14U520GB washer dryer

selfCleaning condenser (Washer and Tumble Dryers)
An automatic selfCleaning condenser is integrated into many Siemens laundry appliances helping to keep the condenser lint free. This sensor-controlled programme is intuitive and collects lint during each drying cycle. The result is a continually lint-free condenser that helps to keep energy consumption constantly low at all times.

The 10kg washer dryer
The 10kg washer dryer model provides ultimate convenience. Ideal for families you can achieve everything in one go with the ability to wash and dry a larger than average load.

autoDry
Don't shrink away from drying with autoDry. autoDry technology prevents overheating or uneven drying. Sensors precisely measure and control the temperature and moisture of your laundry, preventing it from shrinking.

Fast and efficient washer dryers with added peace of mind.

For further warranty information please visit page 61.

2 Year Warranty | AquaStop Lifetime Warranty | iQdrive® Motor 10 Year Warranty

With the latest technology built into our appliances, Siemens offers energy-efficient and stunning looking appliances for stylish kitchens and utility spaces.

Sensor drying
All Siemens tumble dryers feature sensor drying, which provides uniform drying results, and makes over-drying a thing of the past. Sensors in the drum continually monitor the residual moisture in the laundry. They detect when the load has reached the selected drying level, and move the programme to the final cool-down period.

So your laundry is afforded the utmost protection, while neither energy nor your time is wasted.

The heat exchanger is cleaned automatically several times during the drying cycle.

- 1 Water filtering
- 2 Self-cleaning
- 3 Lint and fluff

State-of-the-art technology is at the heart of all Siemens tumble dryers.

For further warranty information please visit page 61.

5 Year Warranty | iQdrive® Motor 10 Year Warranty

High-performance and highly-efficient (Tumble Dryers only)
Let yourself be fascinated by the state-of-the-art technology of Siemens heat pump dryers. Heat pump dryers are condensation dryers equipped with a special heat pump technology. In contrast to classic condensation dryers, here energy in the form of heat is not discharged into the environment; instead it is retained for the drying process.

Siemens heat pump dryers achieve impressive energy values and consume significantly less energy than condensation dryers. Siemens heat pump dryers can also be set up, like all condensation dryers, in multiple places within the home since the condensed water is collected in a separate container integrated into the appliance.

Shoe drying basket

Wool drying basket

A lot less ironing
The Less Ironing option extends the anti-crease phase period at the end of the cycle by up to 120 minutes leading to fewer creases in your laundry – so you can spend less time ironing.

The rapid40 drying programme
With this programme, your washing will be perfectly dry in only 40 minutes, thanks to optimised temperature control and a customised cool-down phase.

Wool or Shoe Drying basket
To further protect your garments and materials during the drying process Siemens tumble dryers come with a drying basket. Just place your items onto this sturdy platform during the drying cycle.

Dishwashers. Cutting-edge innovations for extra shine.

As you'd expect, Siemens dishwashers take full advantage of the latest technologies.

Designed to fit in around your busy lifestyle our standard 60cm and slim line 45cm dishwashers feature efficient, time saving and environmentally conscious programmes that are going to make your dishes shine. With sleek and stylish design, both inside and out, Siemens dishwashers are designed to complement your home.

Siemens dishwasher warranties:

5 Year Warranty

A Siemens Five Year Warranty is available on all Siemens freestanding dishwasher models to protect against any manufacturing and material faults and defects during this warranty period.

10 Year Anti-Rust Warranty

All Siemens dishwashers purchased from the 1st January 2012 onwards have a 10 Year Anti-Rust Warranty to protect against rust in the inner cavity of the appliance.

Lifetime AquaStop Warranty

All Siemens freestanding dishwashers listed in this brochure have a lifetime AquaStop warranty to protect against water damage caused by a defective AquaStop system.

To find out more about your warranty and for registration please refer to page 61.

Model shown: SN278136TE 60cm dishwasher

Dishwashing key features.

Take your mind off the household chores using the Home Connect App.

Connect your Wi-Fi ready dishwasher with the Home Connect App to easily select programmes and options to start your dishwasher from wherever you are, whenever you want. Thanks to this app technology, you can control your appliance out of home and have the dishes ready exactly when you need them. Perfect for busy lifestyles, when the cycle is finished, the Home Connect App can send you a push notification to let you know, so you can focus more time on doing the things you enjoy.

Partner services

You can even use our partner services, Amazon Dash Replenishment, Amazon Alexa and IFTTT to manage your machine.

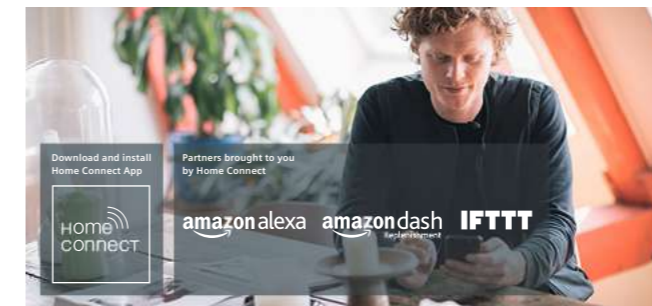

Amazon Alexa

Whether you want to start or finish the cycle, or check the remaining cycle time, just ask Amazon Alexa.

IFTTT

IFTTT technology allows you to integrate the Home Connect App to produce customised applets, (demands between two devices), so you can really bring your smart home to life. For example, you could make your lights flash to alert you when your dishes are ready.

The easyStart menu on the Home Connect App guides you through selecting options to ensure your dishes are washed with the optimum setting for the load. It's easy to adjust your dishwasher settings via the app on your mobile or tablet to keep it running at maximum efficiency.

Amazon Dash Replenishment

The integrated Tab Counter can be linked to Amazon Dash Replenishment to offer even more convenience. Simply let the Home Connect App know when you buy new dishwasher tablets. The app will monitor the amount of tablets you have left, will notify you when you are running low and can reorder automatically via the Amazon online site. That's one less item on the shopping list to think about.

Learn more about Home Connect by visiting the Home Connect page at siemens-home.bsh-group.com/uk

Welcome to a new era of dishwashing with brilliantShine.

Our brilliantShine system combines our low temperature glass care programme with our advanced water softening technology and Zeolith® drying to ensure your glassware is taken care of. Straight from dishwasher to table, Shine&Dry gives you streak-free, shining glasses. Harnessing the power of Zeolith® at its best, the special drying cycle also works just as well on plastics, pots and pans. Saving you time, you no longer need to give glasses an extra towel dry to smarten them up, allowing you to spend more time preparing for your guests arrival. With the brilliantShine system your glassware is always ready to shine for your guests, even unexpected ones.

That's what the new brilliantShine system with Zeolith® Drying is made for: creating the perfect conditions to start every day with a highlight, and sparkling glasses that you can be proud of.

There are three factors in dishwashing that influence the shine of your glassware: temperature, cycle time, and the use of detergent.

The new brilliantShine system offers three intelligent solutions that take care of these factors:

- Zeolith® drying uses a Zeolite mineral that absorbs moisture and converts it into a gentle heat.
- The Shine&Dry option swills all residues of detergent with extra rinsing water, resulting in streak free, shining glassware.
- The Glass 40°C programme ensures that your glassware is not exposed to excessive temperatures or spray pressures, and keeps the cycle time shorter.

Zeolith®: Super efficient drying technology.

Using advanced drying technologies Siemens dishwashers keep energy consumption to a minimum. Zeolith®, a form of zeolite mineral has the astonishing ability to absorb moisture and convert it to heat. What does this mean for you? The heat produced naturally by the Zeolith® is used for the drying cycle. No additional energy is therefore required to heat up the contents of your dishwasher for the drying process (as with a standard drying system). This leads to excellent drying results, with less energy usage than models without Zeolith® technology.

Zeolith® is stored in the depths of the dishwasher; it regenerates itself and keeps working for the lifetime of the machine meaning you never have to replace it! Combine this with the economy 50°C programme to get brilliant results with minimal energy.

Drying phase
Zeolith® absorbs moisture and converts it to heat energy.

Cleaning phase
As the mineral is heated during the cleaning cycle, it is recharged and ready to absorb moisture once more.

Basket systems for added flexibility and better results.

varioDrawer

By adding a third shelf for cutlery, varioDrawer removes the need for a cutlery basket.

varioDrawer Pro

The varioDrawer Pro adds a third shelf for cutlery and removes the need for a cutlery basket, creating more space. Knives, forks and spoons are placed on their side, leaving them easier to remove when emptying the dishwasher. Convenient blue touchpoints also indicate all the adjustment options available, such as lowering the side sections to accommodate bulkier items like espresso cups and ladles.

varioFlex basket system

The ability to fold down certain compartments within the cavity for extra room and flexibility.

varioFlex Pro basket system

The VarioFlex Pro basket system is designed to accommodate different shapes and sizes of crockery and allows you to create extra space for pots and pans with ease. Blue touchpoints inside the baskets indicate all the adjustment options available at a glance. It's never been so easy to adjust the slats to suit each load, making the inside of your dishwasher constantly adaptable.

rackMatic™

Available across all basket systems, this feature conveniently allows the user to raise and lower the height of the top basket to create more or less space, even when the dishwasher is loaded.

Let the dishwasher do the work, with the automatic programme sensor.

Doing the dishes is now easier than ever before with sensor technology included in every one of our dishwashing appliances. From soiled pots and pans to delicate plates – every item gets the right care and treatment.

For example, the autoProgramme sensor gives brilliant results at the push of a button. As soon as the autoProgramme is activated, the aqua sensor automatically measures the cloudiness of the water to precisely adapt the amount and temperature of water needed for optimal cleaning. The sensor controls the entire washing and drying process and automatically adjusts water consumption, water temperature and cycle time to suit each load. The sensor control unit steers the whole washing and drying process to deliver brilliant results every time.

Enhanced performance and sparkling results.

Model shown: SN278136TE 60cm dishwasher

Standard features on all models.

intensiveZone
Delicate items and pots and pans can be cleaned together in the same wash. The intensiveZone option increases the spray pressure and temperature in the bottom basket to handle burnt on pans, whilst delicate items can be washed safely in the top basket.

Silence Programme
At just 42dB, you'll barely hear our dishwashers running, leaving you to relax in peace; perfect for open plan living. To reduce noise levels further our Silence programme is an adapted Eco 50°C programme that achieves a noise reduction of 2dB by decreasing the spray pressure and extending the run time.

Energy efficiency
Using the latest sensor technology, our dishwashers don't just minimise water, they also minimise energy. All Siemens dishwashers have an energy rating of at least A++, with some iQ500 and iQ700 Zeolith® models boasting a maximum efficiency A+++ rating.

Water consumption
Our Freestanding dishwashers' lowest water usage programme is 7.5L per cycle* if the Eco 50 programme is selected, for the most resource efficient option.
*Based on the iQ700 model

varioSpeed Plus
Use the varioSpeed Plus button to run the dishwasher significantly faster without compromising on wash quality. Standard on all models.

dosageAssist
Quickly and evenly dissolves dishwasher tablets throughout the entire machine, leaving no mess to clean at the end of the cycle.

extraDry
The "extraDry" option can be added to any programme and will extend the drying cycle. This can be useful for harder to dry loads.

Heat exchanger
Protect your glasses from cracking with gentle water heating. Heat generated during the wash cycle is used to pre-heat the rinsing water to stop glasses being put under stress. Standard on all models.

loadSensor
By monitoring that the optimum amount of water is flowing through the dishwasher throughout the cycle, the loadSensor helps to ensure that dishes are cleaned thoroughly.

Machine Care with Siemens dishwashers
For excellent results when washing and drying, it's important to look after your dishwasher correctly. All of our freestanding Siemens dishwashers include the Machine Care Programme. This is designed to be used together with a dishwasher cleaning detergent and provides a short, high temperature, high pressure wash designed to remove limescale and grease build up inside your dishwasher and outlet pipes. The dishwasher will remind you every 30 cycles or so to run this programme, to keep your appliance running as efficiently as possible.

Highlight features, available on selected models.

TFT display with real-time clock
The clear, touch control high resolution TFT display makes it easy to select programmes and settings and check the status of your dishwasher at a glance. Thanks to the real-time clock, it's now possible to set the exact time that you want your dishes to be ready by, for extra convenience. Perfect for delivering warm plates to the dinner table.

hydroSensor
Makes sure that the optimum temperature is used depending on how dirty the dishes are, meaning that dishes are perfectly clean the first time round.

Hygiene Plus
The Hygiene Plus setting eradicates 99.9% of germs by super heating the final rinse. Ideal for chopping boards and food containers, Hygiene Plus helps to keep your family fit and healthy.

Wine glass holder
This accessory holds up to four long-stemmed glasses safely and securely. The innovative lock mechanism ensures glasses are stable in the basket, yet with minimal contact areas to avoid any water pooling or streaks. Available as an accessory or supplied as standard with SN258106TG and SN258W06TG.

emotionLight
The emotionLight uses LED lights* to create a cool blue glow emanating from inside your dishwasher.
*Not available on black steel model SN258B00NE

Wine glass holder

■ Yes, model has this feature. – Feature not available for this model.

¹ Based on 280 standard cleaning cycles using cold water fill, including consumption of the standby mode.

² The consumption per cleaning cycle of the "Eco 50" programme using cold water fill.

³ We would recommend our dishwashers are connected to the mains water supply where possible. However, they may also be connected to an external water softener as long as the water softener produces softened water of less than 1.1 mmol/litre (7.0°e) and the water softener in the appliance is turned off. Please contact product advice for further information. Water pressure required: 0.5-10 Bar. Flow rate: 10 litres per minute.

Inlet valve connected directly to ¾" screwed joint.

Key to accessories:
SZ72010 - Inlet/ outlet hose extension (2m)
SZ73300 - Wine glass holder
SZ73100 - Cutlery basket
SZ73145 - Slimline cutlery basket
SZ73001 - Silverware holder cassette (to prevent contamination from other metals)

Dishwashing Accessories

There are a few accessories that you can purchase through our Siemens website to help you manage and get the best from your appliance. Please refer to the dishcare accessories section when visiting siemens-home.bsh-group.com/uk

SZ73300
Wine Glass Holder

Cooling. Super efficient, super stylish.

Elegant, functional and packed with technology, your new Siemens fridge freezer is going to become a talking point in your kitchen.

Whether you want an American-style fridge freezer that has wow-factor, a side by side fridge and freezer for extra space, or a single appliance, Siemens has a wide range of products to choose from. Our energy efficient appliances are packed with food preservation technology.

Siemens cooling warranties:

5
Year Warranty

5 Year Warranty
A Siemens Five Year Warranty is available on all Siemens freestanding cooling models listed in this brochure to protect against any manufacturing and material faults and defects during this warranty period.

10
Year Warranty

10 Year Compressor Drive Warranty
Available on all Siemens freestanding fridge freezers, covers defects in compressor motor.

To find out more about your warranty and for registration please refer to page 61.

Keep your food fresher for longer: hyperFresh technology.

Set the right conditions to ensure your food stays fresher for longer: hyperFresh humidity drawers and 0°C chiller drawers.

Freshness controlled: hyperFresh
Simply use the stylish control panel to adjust the humidity in the fridge. The hyperFresh drawer with rippled base allows cool air to circulate around your fruit and vegetables easily. As a result, the quality and freshness of your food will be retained.

Shelf life maximised: hyperFresh Plus
The hyperFresh Plus drawer doesn't just store food, it provides the right conditions to keep them fresher for longer. Whether it's fruit or vegetables, increase shelf life and reduce food wastage. Simply switch between the 2 control settings, and the humidity will be adjusted for optimum storage of your food.

Food stays fresh for longer: hyperFresh Premium
Enjoy fresher food with hyperFresh Premium. With a choice of 3 humidity controls, simply select whether it's fruit, vegetables, or both that you want to store. The hyperFresh Premium drawer will regulate how much humidity your food receives. Be in control; these innovative drawers help to keep in nutrients and minerals to create delicious meals and fewer trips to the supermarkets, saving you time, effort and money. hyperFresh Premium is available in selected Siemens single door fridges only.

hyperFresh 0°C chiller drawers. Perfectly fresh for fish and meat:
hyperFresh and hyperFresh plus models: The two hyperFresh 0°C chiller drawers are especially designed for the storage needs of fish and meat. Keep them fresher in ideal conditions near 0°C to retain the vitamins and minerals for longer. With two separate compartments the transfer of unpleasant smells will be avoided.

hyperFresh Premium models: These variants come complete with a larger full-length 0°C chiller drawer, where fish and meat are stored at the perfect temperature.

With noFrost technology you'll never have the job of defrosting the freezer again.

noFrost
Defrosting the freezer is now done automatically. Siemens freezers are equipped with intelligent sensor-controlled technology to save the hassle of defrosting the freezer. An air-circulation system guides the humidity to the outside of the refrigerator into an external evaporation tray, and sensors measure the degree of humidity and any frost production – ensuring the appliance is periodically defrosted without the need to turn off the appliance or empty it out. Also, ice no longer forms on the inside of the refrigerator, and the appliance's energy consumption remains consistently low.

lowFrost
Thanks to the innovative lowFrost technology with the special evaporator, not only is there less icing that is more homogeneous, but also defrosting is much faster than in conventional systems. All lowFrost models have a water drainage system, to allow removal of all thawed water during the defrosting process.

Freezer storage made easy with bigBox

Big enough for your lifestyle, the bigBox has the capacity for storing whole frozen turkeys, as well as the height to hold dessert glasses upright. Ideal for the holidays and entertaining.

Stay connected your kitchen, with Home Connect.

Home Connect fridges
Cooling appliances with Home Connect offer you the ability to flexibly control your appliances using your smart device, such as your smart phone or tablet. This means you can control your appliance out of home; for example adjusting the fridge temperature to cool down as you are on your way home from a food shop, or setting your fridge to holiday mode whilst at the airport.

The iQ500 Fridge Freezer with internal cameras
Our KG36NH132 with Home Connect also features two internal fridge cameras that can be linked to your Home Connect app. See what's available in your fridge without actually being at home. No more guess work needed, this iQ500 fridge freezer can help you to plan ahead. With food recognition, the App can also suggest recipes suitable for the available ingredients you have within your fridge.

The Home Connect fridge with cameras can also recognise and suggest both delicious recipes based on the contents in your fridge, as well as suggesting better storage options for your food. For example, advising you to move strawberries from a shelf to the hyperFresh drawers, to prolong freshness for extra convenience.

For more information about Home Connect visit www.siemens-home.bsh-group.com/uk

Premium cooling options for every size and style of kitchen.

Choose your style and size.

When considering which appliance to purchase look at what height space you have available, consider the width, do you need more capacity, would you like more freezer space than fridge?

Height and width

Siemens has many different sizes of cooling models to suit your needs from: 176cm-203cm high and between 60cm and 91cm in width.

American Style	Fridge Freezers	Single Door Fridges	Single Door Freezers
176 x 91cm	203 x 70cm	186 x 60cm	186 x 60cm
177 x 91cm	203 x 60cm	161 x 60cm	161 x 60cm
179 x 91cm	187 x 60cm		

Fridge Freezer split options

Siemens fridge freezers are split into two separate compartments which are given as a percentage of space that's given to the fridge and freezer compartments so you can choose what split proportions you need depending on your food usage.

Total Height: 176cm	Total Height: 186cm	Total Height: 186cm	Total Height: 203cm	Total Height: 203cm

The perfect fit for your kitchen.

Some of the Siemens range for 2019 feature our Latest Condenser Technology (No distance)* which means space around the appliance is not required for ventilation purposes, making these products perfect should they need to be fitted into tight spaces or form part of an overall sleek built-in look.

No distance
Fully integrated on both sides of the appliance, models with latest condenser technology offer flexibility and convenience when positioning your fridge as no distance is needed between the wall or the furniture for ventilation, offering a Perfect Fit solution. Valuable space can be kept when building the appliance into a cabinet, and you don't need to worry about condensation damaging the kitchen furniture. The condenser is also more silent and maintenance free.

This means it's easy to update your current cooling appliance with an efficient Siemens fridge freezer, single door fridge or single door freezer. For example, a 60cm refrigeration appliance will fit perfectly into that exact niche in your kitchen and the special door hinges mean the door will still open within that space.

*Please check individual product descriptions and look for "Latest Condenser Technology (No distance)" in the product matrix to see if this feature is included.

Tried and tested

All Siemens fridges and freezers are built to last. And rigorous testing ensures that our products meet all the requirements of our customers. Every single one of our appliances is tested before it leaves the factory. For 24 hours a day, components are tested continuously to the maximum tolerance possible for the equivalent lifetime of the appliance.

Our doors are weighted and then opened and closed by the handle 200,000 times during testing to ensure they are robust (200,000 times is equivalent to opening and closing the door 27 times per day for 20 years). Materials are not only tested for suitability and longevity, we also look at how they sound and feel when we use them.

Create the perfect pair.

For extra internal space pair a Siemens upright fridge alongside a Siemens upright freezer, like the iQ500 KS36VAX3P (fridge) and the iQ500 GS36NAX3P (freezer) shown, to re-create the style of an American fridge freezer with our easy access shelving zone.

To enable this look you will need to purchase a joining strip to secure the two appliances. This can be bought through our website or through a retailer.

The joining strip product codes are as below:

- KS39ZAX00 – Black Steel
- KS39ZAL00 – Stainless Steel
- KS39ZAW00 - White

All of the Siemens appliances in the freestanding range are a minimum A++ in energy efficiency.

Cooling key features.

Colour finish options.

Choose from a selection of colour finishes for your Siemens cooling appliances. There is an option to suit every kitchen:

Black Glass (dot pattern)

Stainless steel antiFingerprint

Black steel antiFingerprint

White

Handle options.

Depending on your preference, choose from stylish quality bar handles or handles that are integrated into the appliance for a more seamless look:

Integrated Horizontal

Integrated Vertical

Vertical Bar Handle (Long)

Vertical Bar Handle (Short)

Temperature displays.

Whether you're looking for a cooling appliance with a large front display, or would prefer the controls to be hidden on the inside of the appliance, our Siemens cooling range varies from large digital screens visible on the front door of the appliance to internal LED controls.

Exterior Digital LED Display

Exterior Electronic Display

Exterior Electronic LCD Display

Interior Electronic LED Display

easyAccess shelving

LED Illumination

multiAirflow system

A+++

easyLift door trays

Bottle rack

easyAccess shelving zone – single door freezers
Creates additional space whilst delivering the design of an American fridge freezer interior compartment.

LED Illumination
Integrated seamlessly into the top or the side walls of our cooling appliances, LED lighting is very efficient and gives maximum illumination of your fridge and freezer.

multiAirflow system
This system works with the electronics to optimise the air circulation within the fridge and freezer compartments to ensure even cooling throughout the appliance. This means wherever you place your groceries it will cool them quickly no matter where they are placed. The back wall of the appliance has open vents which work with the cooling circuit to draw cold air into each compartment.

easyLift
Adjustable door trays and glass shelves that can be moved even when full. Now that's convenience.

Bottle rack
Available on some models which is the perfect place to store wine of all varieties and make the best use of space in your fridge.

Experience intelligent cool.

Fresher food for longer with sensor controlled cool.

1 freshSense

Fresh food, guaranteed for longer. With conventional fridges, varying surrounding temperatures and the continuous opening of the refrigerator door lead to temperature changes inside the appliance. To ensure this does not affect your food, sensors immediately react. The freshSense sensors activate the moment a change in temperature is registered, for example when products are stored away, and compensates for this change in an instant. Therefore the temperature always remains within the optimum range, and your food stays fresh and delicious for longer.

2 Inverter motor

The intelligent inverter technology is a clever combination of the inverter motor and sensor. The sensors register every slight change in temperature or humidity inside the refrigerator, for example when the door is opened or warm food is stored. This information is then passed to the inverter motor, which adapts its need for energy accordingly. This means you can cool food intelligently and energy efficiently, and thanks to the high-quality inverter motor, incredibly quietly.

3 superCool

Ensures that warmer food entering the fridge does not increase the fridge temperature, which can affect other food.

4 superFreeze

superFreeze makes sure that warmer food added to the freezer doesn't raise the freezer temperature, stopping food partially defrosting.

5 Wrap around evaporator

This new technology creates more space in the freezer cavity, allowing for more innovations like bigBox for large food items, plus removable glass drawers.

6 iceTwister

Enjoy your own personal ice cube service. Simply activate the iceTwister and receive up to 20 ice cubes at once right away. The water tank is very easy to remove for reliable refilling.

Explore more features that work around your lifestyle.

Shatterproof and easy to clean: the safetyGlass shelves:
All safety glass shelves are made from extra strong, easy-to-clean safety glass. If something tips over, the spillage is contained and does not spill into the rest of the refrigerator compartment.

Sabbath mode

When Sabbath mode is switched on, the following settings are switched off: Audible signals, interior lighting, automatic super freezing, messages on the display panel, the background illumination of the display panel is reduced and buttons are locked.

Holiday mode

When you're on holiday or a business trip, Holiday Mode will ensure that food in the freezer stays cold enough to maintain freshness whilst reducing its energy output. Our fridges also feature a warning alarm that signals when the door has been left open, ensuring that energy isn't needlessly wasted and preserving the food inside.

American fridge freezers

American fridge freezers.

If you have extra kitchen space our stunning larger capacity iQ700, iQ500 and iQ300 American fridge freezers all feature innovative indoor electronics, intelligent noFrost technology, interior LED lighting, a minimum of 4 fridge shelf positions and 2 freezer compartments with superFreeze function, and are a welcome statement to any kitchen. Modern and classic in their appearance, choose from Siemens striking and sleek black glass, Inox-easyclean or stainless steel options.

UnEQualled coffee shop experiences. At home. In style. Siemens EQ innovation. Your in-home barista.

Models shown: EQ.6 plus s700, EQ.9 plus s700 and EQ.3 s500 bean-to-cup coffee machines

Siemens are excited to introduce a new range of EQ fully automatic bean-to-cup coffee machines designed for those that settle for nothing less than exceptional coffee.

With intelligent iAroma technology, 3 key innovations are combined together in a high quality brewing unit to deliver truly sensational tasting beverages. These intuitive appliances stand out on any premium kitchen surface with their stunning design, elegant display panels and optimal usability. From the entry-level compact EQ 3 models to the fine-tuned Wi-Fi-connected EQ 9 model, rediscover your love for outstanding coffee with the new Siemens EQ range.

Introducing new brewing technology: iAroma system

Pioneering Siemens iAroma system: Our innovative system is engineered to release the full aroma of each bean for pure coffee enjoyment.

High performance ceramic grinder
Precise and hard wearing, the ceramic grinder ensures coffee beans are ground to an even consistency, allowing the aroma of the coffee to develop.

sensoFlow intelligent heater
Sensor technology ensures an optimal drink temperature is consistently achieved; enhancing the taste of every bean.

Smart water pump
Delivering the perfect balance of water pressure and water flow speed to extract maximum flavour.

High-quality brewing unit
All features come together in a high-quality unit, which can be easily removed to allow for fast and simple cleaning.

Perfect pleasure at the touch of a button: oneTouch function.

No matter what coffee speciality you desire, whether it is latte macchiato, creamy cappuccino or extra-strong espresso, thanks to the oneTouch Function your fully automatic coffee machine can serve you up pure coffee indulgence at just the touch of a button – it's as easy as that.

For longer-lasting coffee indulgence: calc'nClean.

Maximise beverage quality, product lifetime and overall hygiene of your EQ coffee machine with the combined cleaning and descaling program. Easy to use, calc'nClean provides a thorough clean and rinse, keeping your machine perfectly clean inside.

For busy mornings and tired evenings: Drinks on demand.

All of the machines in our range offer a minimum of 4 drinks that are pre-set in the machine. From the EQ.3 model that has the option of Americano, Cappuccino, Espresso and Latte Macchiato all the way through to the top EQ.9 model that offers all of these plus 7 more drink options. Through the Home Connect App, available on model EQ.9 Plus s700 only, you are able to pick from an even wider ever-growing range of beverage options.

Enjoy café culture at right at home: EQ9 plus, s700.

Our most exclusive coffee machine yet.

Download and install Home Connect App Partners brought to you by Home Connect

Home Connect

Explore new coffee varieties, by selecting drinks through the app, design coffee playlists so you and your guests can save drink preferences and send drinks to the machine so they are automatically prepared one after the other. Connected partners including Amazon Alexa, allow you to ask your coffee machine to make you a drink just by voice control whilst IFTTT allows you to create bespoke applets so that you can connect your coffee machine to other smart home appliances and create a fully connected home.

baristaMode: individualise your coffee creation
There are five essential parameters of baristaMode that contribute to the quality of coffee and espresso: coffee strength, amount, temperature, coffee-to-milk ratio and brewing speed. By switching to baristaMode, you can make even finer, fully customised adjustments to please any coffee taste. This optimised setting lets you celebrate the fine art of coffee preparation.

dualBean System: separate bean containers for a pure taste
Two separate coffee bean containers, each with its own grinder, ensure that your beans never get mixed up and guarantee that the desired flavour will always be achieved.

Try something new, or rediscover an old favourite. Our bean-to-cup coffee machines give you the flexibility to explore a diverse and rich coffee culture, with a perfected result every time. For more information and to review the full specifications of our full range of appliances please visit the Siemens Home Appliances UK website: siemens-home.bsh-group.com/uk

Service

Award Winning Customer Service
Siemens is part of BSH Home Appliances, winner of the 2018 Domestic and General Total Excellence and Quality Award. This award is based on surveys sent to customers of most of the major home appliance manufacturers and confirms our commitment to offering Siemens customers the very best customer service.

Total Excellence & Quality Winner 2018
Domestic & General

Purchasing a Siemens appliance gives you access to our expert customer service team for the lifetime of your appliance. With 2 year and 5 year manufacturer's warranties on offer*, multi-award winning products to choose from and assistance from an outstanding customer service department, you can be assured that the appliance you are buying will offer peace of mind.

Expert advice
Siemens customer service staff are full of knowledge and expertise, whether you have a question about your Siemens appliance, want to order replacement spare parts or require an engineer to repair your appliance. With engineers based locally across the country**, no one is better suited to help, and all Siemens repairs are analysed in advance so that we bring the correct replacement spare parts likely to be needed on the first visit***.

Original replacement spare parts
Order replacement parts online and access exploded diagrams to help you locate the correct part. As a manufacturer we only use original spare parts and we keep a comprehensive range of parts available for up to ten years to ensure the quality of your appliance. You can also browse appliance diagrams online to locate and purchase the parts you need.

Accessories and cleaning products
You can order accessories and cleaning products quickly and easily via our Siemens online shop. The Siemens shop has an extensive selection of accessories to help you get the most out of your Siemens appliance. With our range of tested and approved cleaning and care products you can keep your appliance looking great and working at its optimum performance. You can quickly order accessories and cleaning products by telephone on 0344 892 8999 (option 2) or by visiting our online shop at www.siemens-home.bsh-group.com/uk/shop.

Arrange a Siemens engineer visit
Need to arrange an engineer visit? No problem. Simply call our customer service team to discuss the problem with your appliance and if needed we will arrange a home appointment with an engineer at a time and date that's convenient for you. Siemens appliances are built to the highest standards but if you do require an engineer to repair your appliance, we are here to help, whether your appliance is inside or outside the manufacturer's warranty period. You can book an appointment by telephone on 0344 892 8999 (option 1) or you can book online.

Our engineers are employed and trained by Siemens and are based locally around the country**.

No one knows our appliances better, and all repairs are analysed in advance by our technical team so that the parts likely to be needed to complete the repair are sent to the engineer's van the night before the visit***.

Our advisors provide expert assistance

- Product information before and after purchase
- Tips on functions and operation
- User related queries
- Help with Siemens promotions

Telephone:
UK: 0344 892 8999 (options 3 and 4)

For product support available 24 hours a day visit our website for:

- Product information
- Downloadable brochures
- Videos
- Instruction manuals
- FAQs
